# Bibliographical Abbreviations

All bibliographical abbreviations used in this dictionary are listed below, following the typography used in the text of the dictionary. Broadly, *italic* type is used for periodicals and for reference works; roman type is used for anthologies, series etc. (titles of individual volumes are italicized).

Full bibliographical information is not normally supplied in the list below if it is available elsewhere in the dictionary. Its availability is indicated as follows: D – in the list of 'Dictionaries and encyclopedias of music'; E – in the list of 'Editions, historical'; and P – in the list of 'Periodicals'; these lists are located in vol.28. For other items, in particular national (non-musical) biographical dictionaries, basic bibliographical information is given here; and in some cases extra information is supplied to clarify the abbreviation used.

Festschriften and congress reports are not generally covered in this list. Although Festschrift titles are sometimes shortened in the dictionary, sufficient information is always given for unambiguous identification (dedicatee; occasion, if the same person is dedicatee of more than one Festschrift; place and date of publication; and name(s) of editor(s) if known). For fuller information on musical Festschriften up to 1967 see W. Gerboth: *An Index to Musical Festschriften and Similar Publications* (New York, 1969). The published titles of congress reports are generally reduced to their essentials, but sufficient information is always given for purposes of identification (society or topic; place and date of occurrence; journal issue if published in a periodical; editor(s) and publication details in unfamiliar cases). A comprehensive list of musical and music-related 'Congress reports' appears in vol.28. Further information can be found in J. Tyrrell and R. Wise: *A Guide to International Congress Reports in Music, 1900–1975* (London, 1979).

# Library Sigla

The system of library sigla in this dictionary follows that used by Répertoire International des Sources Musicales, Kassel, as listed in its publication *RISM-Bibliothekssigel* (Kassel, 1999). Below are listed the sigla to be found; a few of them are additional to those published in the RISM list, but have been established in consultation with the RISM organization. Some original RISM sigla that have now been changed are retained here.

More information on individual libraries is available in the libraries list in volume 28.

In the dictionary, sigla are always printed in *italic*. In any listing of sources a national sigillum applies without repetition until it is contradicted.

Within each national list, entries are alphabetized by sigillum, first by capital letters (showing the city or town) and then by lower-case ones (showing the institution or collection).

*A*: AUSTRIA

| Siglum | Library |
|---|---|
| *A* | Admont, Benediktinerstift, Archiv und Bibliothek |
| *DO* | Dorfbeuren, Pfarramt |
| *Ed* | Eisenstadt, Domarchiv, Musikarchiv |
| *Ee* | ——, Esterházy-Archiv |
| *Eh* | ——, Haydn-Museum |
| *Ek* | ——, Stadtpfarrkirche |

# A Note on the Use of the Dictionary

This note is intended as a short guide to the basic procedures and organization of the dictionary. A fuller account will be found in the Introduction, vol. l, pp.xix–xxix.

**Abbreviations** in general use in the dictionary are listed on pp.vii–xi; bibliographical ones (periodicals, reference works, editions etc.) are listed on pp.xiii–xviii and discographical abbrevations on pp.xix–xx.

**Alphabetization** of headings is based on the principle that words are read continuously, ignoring spaces, hyphens, accents, bracketed matter etc., up to the first comma; the same principle applies thereafter. 'Mc' and 'M'' are listed as 'Mac', 'St' as 'Saint'.

**Bibliographies** are arranged chronologically (within section, where divided), in order of year of first publication, and alphabetically by author within years.

**Cross-references** are shown in small capitals, with a large capital at the beginning of the first word of the entry referred to. Thus 'The instrument is related to the BASS TUBA' would mean that the entry referred to is not 'Bass tuba' but 'Tuba, bass'.

**Signatures** where the article was compiled by the editors or in the few cases where an author has wished to remain anonymous are indicated by a square box (□).

**Work-lists** are normally arranged chronologically (within section, where divided). Italic symbols used in them (like *D-Dl* or *GB-Lbl*) refer to the libraries holding sources, and are explained on pp.xxi–xxxvii; each national sigillum stands until contradicted.

# Contents

# B

[continued]

**Baxter, J(esse) R(andall, jr)** (*b* Lebanon, AL, 8 Dec 1887; *d* Dallas, 21 Jan 1960). American music publisher and composer of gospel songs. He studied with some of the foremost gospel-hymn writers, including James Rowe and Charles Gabriel, and became proficient in writing both words and music; he probably wrote more convention songs than any other gospel-music composer of his time (a compilation of his songs, *Precious Abiding Peace*, was published in 1960). He was also an outstanding singing-school teacher and conducted his own schools until 1922, when the publisher A.J. Showalter asked him to manage one of his offices, in Texarkana, Texas. In 1926 Baxter joined V.O. Stamps in the foundation of the Stamps-Baxter Music Company at Jacksonville, Texas. When the company moved to Dallas in 1929, Baxter opened a branch office in Chattanooga, Tennessee. The business was extremely successful, becoming one of the foremost publishers of gospel music in seven-shape notation (*see* SHAPE-NOTE HYMNODY, §5). The company promoted gospel music further by its sponsorship of vocal quartets. After Stamps's death in 1940, Baxter moved to Dallas and became president of the firm. In 1949 an article in *Time* likened the company to a gospel Tin Pan Alley: at that time the firm employed 50 people; its journal, *Gospel Music News*, had a circulation of 20,000. Stamps-Baxter was sold to Zandervan in 1972.

SHIRLEY BEARY

**Bayan** (Russ.). *See* ACCORDION; *see also* RUSSIAN FEDERATION, §I, 5.

**Bayard, Samuel Preston** (*b* Pittsburgh, 10 April 1908; *d* Pittsburgh, 10 Jan 1997). American ethnomusicologist. He studied folklore and comparative literature with Kittredge at Harvard (MA 1936) and in 1945 was appointed instructor at Pennsylvania State University, where he was later professor of English and comparative literature; he also served as president of the American Folklore Society, 1965–6. He collected folksongs in Pennsylvania and West Virginia between 1928 and 1963, usually in the summer months, and documented fiddle and fife melodies in his editions *Hill Country Tunes: Instrumental Folk Music of Southwestern Pennsylvania* (Philadelphia, 1944) and *Dance to the Fiddle, March to the Fife: Instrumental Folk Tunes in Pennsylvania* (University Park, PA and London, 1982). He also made an important contribution to the theory of tune relationships, identifying three central factors in such relationships: contour, important scale degrees and stereotypical motifs. Building on the work of G.P. Jackson he identified a number of 'tune families' (varying from 35 to 55) in British-American folk tradition; his findings resulted in a series of articles begun in 1939, of which the best-known were published in 1950.

WRITINGS

'Aspects of Melodic Kinship and Variation in British-American Folk-Tunes', *PAMS 1939*, 122–9

'Prolegomena to a Study of the Principal Melodic Families of Folksong', *Journal of American Folklore*, lxiii (1950), 1–44

'Principal Versions of an International Folk Tune', *JIFMC*, iii (1951), 44–50

'American Folksongs and their Music', *Southern Folklore Quarterly*, xvii (1953), 122–39

'Two Representative Tune Families of British Tradition', *Midwest Folklore*, iv (1953), 13–34

'A Miscellany of Tune Notes', *Studies in Folklore: in Honor of Distinguished Service Professor Stith Thompson*, ed. W.E. Richmond (Bloomington, IN, 1957), 151–76

JAMES PORTER

**Bayer** [Beyer, Peyer], **Andreas** (*b* Geisenheim, nr Würzburg, 1710; *d* Würzburg, 1749). German organist and composer. He had some lessons from his father, headmaster of the school at Geisenheim, and seems to have had a natural musical talent, as well as a good voice which secured a place for him at the Hospitalsschule in Würzburg. He became organist of Würzburg Cathedral and later studied and practised law. In October 1745 he attended the coronation at Frankfurt of Francis I, Maria Theresa's consort, and met Wagenseil, her keyboard teacher, who, on his way back to Vienna, heard Bayer play the organ in Würzburg and acknowledged his mastery. His reputation brought him many pupils and lucrative offers from Mergentheim and Kassel, but he remained in Würzburg. Gerber deplored the loss of Bayer's compositions; his only known works are a prelude

and 11 fugues (in *D-Bsb* 1220; for questions of attribution and authenticity, *see* PEYER, JOHANN BAPTIST). The fugues are in the fugato style associated with the south German school of organ composers, and generally have short, predictable subjects. Heinichen's thoroughbass treatise of 1711 may have inspired the example in C which moves through the circle of 5ths. An attractive concerto in G for organ and strings (*Bsb* 1221) may also be his.

HUGH J. MCLEAN

**Bayer, Johann Baptist.** *See* PEYER, JOHANN BAPTIST.

**Bayer, Joseph** (*b* Vienna, 6 March 1852; *d* Vienna, 12 March 1913). Austrian violinist, conductor and composer. He studied at the Vienna Conservatory with Georg and Joseph Hellmesberger (violin), Dachs (piano) and Bruckner (theory). He later played the violin in the Vienna Hofoper orchestra and, from 1885 to his retirement in 1898, was director of the ballet at that theatre. He travelled throughout Europe as a conductor and visited America in 1881 to conduct his operetta *Der Chevalier von San Marco* in New York. His other operettas include *Menelaus* (1892), *Fräulein Hexe* (1898) and *Der Polizeichef* (1904), while he also wrote two comic operas, *Alien Fata* and *Der Goldasoka*. It was, however, as a composer of some 22 ballets that he made his reputation; many of them were produced in Vienna or Berlin, the best-known being *Die Puppenfee* (1888).

ERIC BLOM/CHRISTOPHER FIFIELD

**Bayle, François** (*b* Tamatave, Madagascar, 27 April 1932). French composer. He studied in Bordeaux (1946–54), at the Paris Conservatoire, where his teachers included Messiaen (1958–9), and at the Darmstadt summer courses (1960–62) with Stockhausen, among others. In 1960 he joined the Service de la Recherche of ORTF, recently established by Pierre Schaeffer, and took part in the *musique concrète* course. That same year he composed his first work, *Points critiques*, which won the Paris Biennale prize. Further instrumental compositions were followed by compositions for instruments and tape; in 1967 he wrote his first important work for tape alone, *Espaces inhabitables*, influenced by Georges Bataille and Jules Verne. In its determinedly 'morphological' style, *Espaces inhabitables* showed both great inventive power and discreet lyricism. After 1969 Bayle turned entirely to tape composition.

In 1966 Schaeffer put Bayle in charge of the Groupe de Recherches Musicales (GRM). From then on he remained active as a composer, an administrator and a music theorist. In 1975, after the integration of the GRM and the Institut National de l'Audiovisuel (INA), he became department head of INA-GRM, serving as its director until 1997. During these years he organized concerts, radio broadcasts, seminars and events celebrating individual composers, supported technological developments (Syter, GRM Tools, Midi Formers, Acousmographe) and was behind major innovations, such as the Acousmonium (an orchestra of loudspeakers) and the Collection INA-GRM recordings label. In 1992 he founded the Acousmathèque with a repertory of 2000 works composed after 1948. After leaving GRM in 1997, he founded his own audio-numerical and multiphonic studio, the Studio Magison, where he has devoted himself to research, writing and composition.

Bayle's oeuvre is notable for its masterly craftsmanship and rhetoric, its agile discourse and its sophisticated thought. His music's elegance of form and transparency of sound locates it in the tradition of Debussy and Ravel. The general tone of each composition is suggested by its poetic title. Bayle has described the successive stages of his musical development as 'Utopias exploring the genesis of movements in sound, the grammar of their formation, and their relation to events in the physical and psychic world'. His most experimental work, *L'expérience acoustique*, investigates over several hours the relationship between sound and its effect on its audience. Other large-scale forms include long developmental sections shot through with recycled mutations of various 'proto-elements' (*Toupie dans le ciel*, *Son vitesse-lumière*, *Bâton de pluie*) and vast sequences of contrasting, but complementary movements that give rise to variations on certain initial propositions (*Jeïta*, *Grande polyphonie*, *Les couleurs de la nuit*, *Tremblement de terre très doux*). Additional style characteristics include intertwining textural variations, filigree-like sound, sequential proliferations and reactions, distinctive tone colours and syntactical articulation ('montages-catastrophes').

Bayle's work as a theorist has always accompanied and elucidated his activities as a composer. His most important articles have been revised and collected in his book *Musique acousmatique, propositions ... positions* (Paris, 1993). As early as 1974 he suggested the phrase 'acousmatic music' to designate 'music "shot" and developed in the studio and then projected into the concert hall, as happens in the cinema', and said it should be distinguished from electro-instrumental music produced in an actual place in real time. Starting out from this basic idea, he developed the concept of 'images of sound', or the marks left on a medium by sound energy (as in recording). These physical images, he suggested, give rise to three kinds of mental images: iconic, diagrammatic and metaphorical.

FRANCIS DHOMONT

**Bayley, Daniel** (*b* Rowley, MA, 27 June 1729; *d* Newburyport, MA, 29 Feb 1792). American tune book compiler and publisher. He worked as a potter and shopkeeper, and served as a clerk and possibly chorister at St Paul's, Newburyport; his son Daniel, with whom he has been confused, played the organ at St Paul's from 1776. Bayley began a prolific career as a compiler by bringing out *A New and Complete Introduction* (5 edns, Newburyport, 1764–8), a composite drawn from successful works by other compilers. In 1768 he published Tans'ur's *Royal Melody Compleat* (London, 1754–5 and later edns; 2 edns, Boston, 1767–8), then combined it with Aaron Williams's *Universal Psalmodist* (London, 1763 and later edns), and under the title *The American Harmony* issued four editions between 1769 and 1774. Towards the end of the American Revolution, Bayley pirated the title and partial contents of another popular work, Andrew Law's *Select Harmony* (Cheshire, CT, 1779), despite Law's vigorous protest. Bayley compiled five other tune books as well as two tune supplements for metrical psalters, and he published John Stickney's *Gentleman and Lady's Musical Companion* (Newburyport, 1774). His chief contribution was to circulate in New England a large repertory of mid-century British sacred music.

RICHARD CRAWFORD/NYM COOKE

**Baylou, Luigi de.** *See* BAILLOU, LUIGI DE.

**Bayly** [Baily], **Anselm** (*b* c1719; *d* Nov 1794). English clergyman and writer. He matriculated at Exeter College, Oxford, on 4 November 1740; and on 22 and 29 January 1741 he was appointed lay vicar of Westminster Abbey and a Gentleman of the Chapel Royal. He resigned the latter post on 13 March 1744, when he was admitted a priest of the chapel. On 12 June 1749 he took the degree of BCL and on 10 July 1764 the degree of DCL from Christ Church, Oxford. In the latter year he was appointed sub-dean of the Chapel Royal; he was also a minor canon of St Paul's Cathedral. Like many clergymen of his day, he studied medicine and on 20 July 1787 patented an elastic girdle, bandage or roller to relieve ruptures, fractures and swellings.

Bayly wrote on religion, the study of language and the study of music. He supervised the compilation of, and wrote the preface to, *A Collection of Anthems Used in His Majesty's Chapel Royal* (London, 1769). He wrote two treatises on music: *The Sacred Singer* (London, 1771, republished in the same year as *A Practical Treatise on Singing and Playing*); and *The Alliance of Musick, Poetry and Oratory* (London, 1789). In seeking to establish general guidelines for regulating the prosody of the musician, orator and poet, Bayly defined prosody as the 'art of metrical numbers, or versification, comprehending more especially ... Accent, Quantity and Feet, to which may be added Rythm'. But he embraced certain contradictory facets of both the syllabic and the accentual systems of prosody, without realizing the fundamental impossibility of reconciling the wholly different aesthetic bases of the two systems.

JAMIE C. KASSLER

**Baynes, Sydney** (*b* Sudbury, Middlesex, 1 or 3 Feb 1879; *d* Willesden, 9 March 1938). English composer and conductor. He was a church organist at the age of 13, and while still a youth was accompanist to Edward Lloyd and Ben Davies. Later he was chorus master under James Glover at the Theatre Royal, Drury Lane, and from 1910 to 1914 he was music director to John Tiller. It was at this time that he achieved international fame as the composer of waltzes such as *Destiny* (1912), *Ecstasy* (1913), *Mystery* (1914) and *Modesty* (1914). His compositions also included religious music, songs, piano pieces and other orchestral works including an overture *Endure to Conquer* played at the victory thanksgiving service at Westminster Abbey in 1919. Baynes conducted and composed for revue and other productions at various London theatres, and from 1924 to 1929 he was music editor to Boosey & Hawkes. From 1928 until his death he conducted his own orchestra for broadcasts, using his own arrangements, and he also made records for HMV and Columbia.

ANDREW LAMB

**Bayo, Maria** (*b* Fitero, 28 May 1962). Spanish soprano. She studied at the Conservatorio Pablo Sarasate in Pamplona and the Hochschule für Musik in Detmold. After winning a series of international competitions, she quickly established herself in the major European opera houses, making débuts at La Scala, Milan, in 1991 as Musetta, at the Opéra Bastille, Paris, the same year as Mozart's Susanna and at Covent Garden in 1994 as L'Ensoleillad in Massenet's *Chérubin*. With her pure, finely focussed soprano and versatile musicianship, Bayo is equally adept at conveying the minx-like qualities of Handel's Cleopatra and the innocent charm of Mélisande.

Her other roles include Ilia (*Idomeneo*), Adina, Cavalli's Calisto and Oscar in *Un ballo in maschera*, the last two of which she has recorded.

ANDREW CLARK

**Bayon Louis** [née Bayon], **Marie Emmanuelle** (*b* Marcei, Orne, 1746; *d* Aubevoye, Eure, 19 March 1825). French pianist and composer. She published six keyboard sonatas, three with violin accompaniment (1769); a two-act *opéra comique*, *Fleur d'épine* (1776); an arrangement of the overture; and *airs* and *ariettes*, almost all of them from *Fleur d'épine* (for complete list, see Jackson). Her unpublished works, discussed during her lifetime but now lost, include further instrumental chamber music and *opéras-comiques*, and a divertissement *La fête de Saint Pierre* to a text by Antoine-François Quétant (performed in 1771). Her playing, singing and composing were recognized from the 1760s in Parisian intellectual and artistic circles. She was a member of the salon of Mme de Genlis, who discusses Bayon's music in her *Mémoires* (Paris, 1825), and music teacher to the daughter of Dénis Diderot, who refers to Bayon in his *Leçons de clavecin, et principes d'harmonie* (Paris, 1771). She married the architect Victor Louis in 1770, presided over distinguished salons in Bordeaux and Paris, and is credited with bringing the fortepiano into vogue in France.

Her musical style combines traditional French and new German and Italian expressive techniques in a melodious, Italianate texture. Diderot found 'facility, expression, grace, melody' in her music as in that of Alberti, J.C. Bach, Eckard and Schobert. Her music reflects the virtuosity of skilled amateurs like herself and of the internationally known French and foreign professional musicians of the Paris salons and other concerts. In her accompanied sonatas, the violin part is truly *obligé*. *Fleur d'épine* is a tale of love and magic with 20 musical numbers including airs, duos and ensembles.

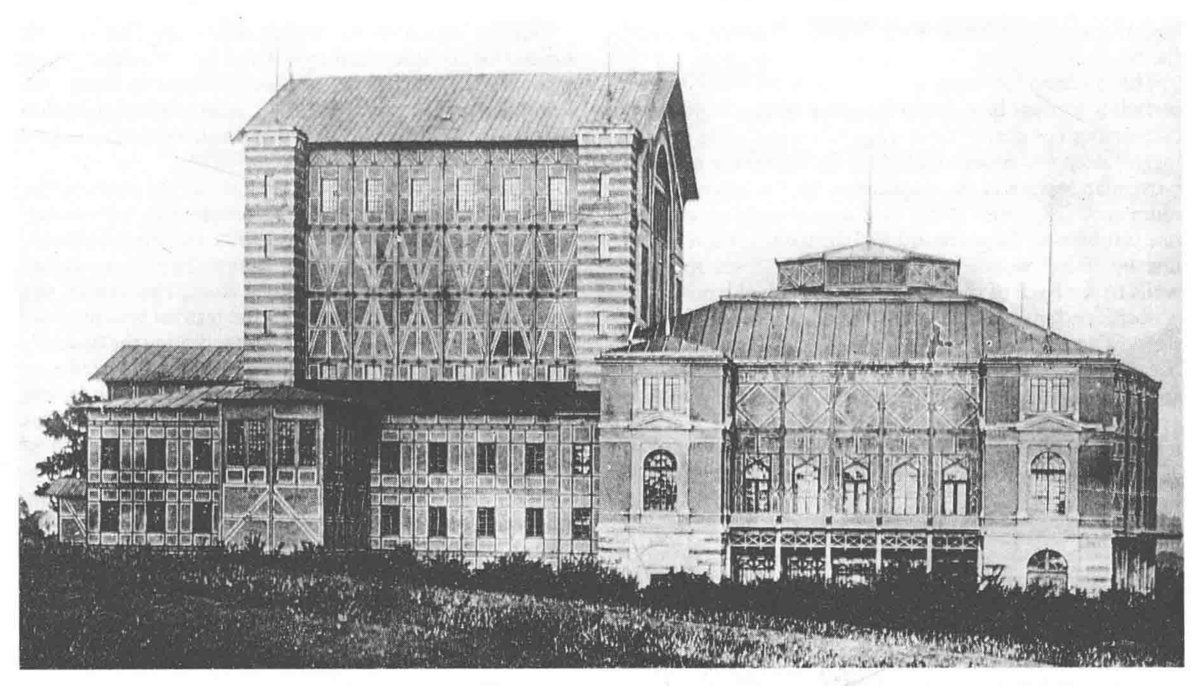
DEBORAH HAYES

**Bayreuth.** Town in Bavaria in southern Germany. It is internationally famous as the site of Richard Wagner's Festspielhaus (opened 1876). The town, dating back to 1231 and in the 17th and 18th centuries the seat of an independent margravate, is now the capital of Upper Franconia and since 1975 has had a university.



1. Church music and concert life. 2. Markgräfliches Opernhaus. 3. Wagner's Festspielhaus. 4. Wagner's successors. 5. Richard Wagner Foundation.

1. CHURCH MUSIC AND CONCERT LIFE. During the 15th century church and school music in Bayreuth followed the model of Nuremberg; three churches (St Nikolaus, St Linhard and the Stadtkirche) acquired permanent organists. After the Reformation, church repertory included music by Jacob Meiland, Erasmus Rotenbucher and Georg Schmalzing. The margrave's residence moved to Bayreuth in the 17th century, and Margrave Christian (1603–55) appointed Johann Staden as court organist. The court musical establishment suffered during the 30 Years War but was revived with the accession as margravine of Frederick the Great's sister Wilhelmine (1709–58) in 1735. Her main interest was opera (see §2 below); with her death in 1758 music at court languished again and in 1769 the court moved to Ansbach. The town maintained some musical life: works by Handel and others were heard at public concerts from 1779, and oratorios by Rolle, C.H. Graun and Hasse were given. In the 19th century concerts were sponsored by various organizations, culminating in the Musik-Dilettantenverein (founded 1860).

The Stadthalle in Jean-Paul-Platz, which stands on the site of the former margrave's Reithalle (built 1747–8), was converted into a theatre in 1935–6. It was destroyed in an air attack in 1945, but the front wall remained intact and was incorporated in the new Stadthalle, opened in 1965. An all-purpose building used for plays, concerts, opera performances, congresses and balls, it contains two halls with seating capacity of 930 (Grosses Haus) and 300 (Kleines Haus). Occasional concerts are also given in the Markgräfliches Opernhaus (see §2 below).

2. MARKGRÄFLICHES OPERNHAUS. As elsewhere in Germany before 1918, the cultivation of opera was an important part of court life in Bayreuth. The first opera performed there (in 1661) was *Sophia*, by an unknown composer, and in the next 55 years about four to six works by German and Italian composers (among them G.H. Stölzel, G.P. Telemann, C.F. Hurlebusch, Attilio Ariosti and Antonio Lotti) were staged each year, either in the Schlosssaal or in a theatre built within the palace grounds. However, it was not until the accession of Wilhelmine, the consort of Margrave Friedrich, in 1735 that opera in Bayreuth became something beyond the ordinary. Wilhelmine was a skilled composer herself (her opera *Argenore*, performed in 1740, is lost, but some chamber works remain), and her excellent relations with her brother and the Prussian court ensured that eminent composers and musicians were willing to place themselves at her disposal.

Among the works known to have been performed in Bayreuth under the Kapellmeister Johann Pfeiffer (served 1734–61) were Hasse's operas *Ezio* and *Artaserse* and Andrea Bernasconi's *festa teatrale L'huomo*. These were staged in the new Markgräfliches Opernhaus, built in the street now known as Opernstrasse, close to the margrave's palace. One of the finest late Baroque theatres still in existence, this three-storey building was erected by the French architect Joseph Saint-Pierre in 1745–8, and the interior decoration was entrusted to the Italian theatre designer Giuseppe Galli-Bibiena and his son Carlo. The richly decorated auditorium is dominated by the large margrave's box at the back, with three tiers of boxes on either side, the stalls area being separated from the stage by an ornamental balustrade. The elaborate proscenium stage (14 metres wide, 15 metres high), which is slightly

*1. Bayreuth Festspielhaus in its original form before the addition (1882) of the entrance to the royal box, designed to give Ludwig II total privacy*

raised, is unusually deep (30 metres); it was this feature that first attracted Wagner to Bayreuth in the hope that it might prove suitable for the production of his *Ring* cycle. He at once saw, after inspecting it, that it would not do for his work.

Following Wilhelmine's death in 1758 and Friedrich's in 1763, the court moved to Ansbach, and Bayreuth reverted to the status of a provincial town. The Markgräfliches Opernhaus continued, however, to be used by travelling companies from neighbouring towns, mainly Bamberg and Coburg, until 1935, when, after a restoration that carefully preserved its original character, it became little more than a museum. It was brought into use again in 1948 (its bicentenary) as a venue for the Fränkische Festwoche, a week of performances of early operas and ballets in productions by the Bayerische Staatsoper, Munich, that takes place annually in May or June.

3. Wagner's Festspielhaus. The Markgräfliches Opernhaus may have been the factor that first drew Wagner to Bayreuth, but it was by no means the beginning of his vision of a theatre of his own. That was closely connected with the composition of *Der Ring des Nibelungen*, which he early recognized as unsuitable for presentation within the traditional operatic framework. In the preface to the full text of the *Ring* in 1863 he outlined the ideal theatre he had in mind:

> I would have to aim at one of the less large towns in Germany, favourably sited and capable of accommodating an unusual number of guests, and in particular a town in which there would be no danger of clashing with a large existing theatre and thus having to compete with large-city audiences and their established customs. Here a temporary theatre would be created, as simple as possible, perhaps merely of wood, its sole criterion being the artistic suitability of its inner parts. I had already worked out in discussions with an intelligent and experienced architect a plan with an auditorium in the shape of an amphitheatre and with the great advantage of an orchestra invisible to the audience. To this theatre singers from German opera houses, chosen for their outstanding acting skills, would be summoned, probably in early spring, to rehearse the several parts of my work, uninterrupted by any other artistic activity.

Three performances of the complete cycle, Wagner went on to say, would be given at the height of summer on four successive evenings for 'art-lovers from near and far'.

Bayreuth met in all respects the conditions he had laid down in his *Ring* preface for the site of his festival performances. It had the additional advantages of being within the territories of his patron, King Ludwig II of Bavaria, and of having civic authorities (in particular the mayor, Theodor Muncker, and the banker, Friedrich Feustel) eager to serve Wagner in the realization of his ambition. They offered him, free of charge, a site on a hill on the northern outskirts of the town (the Grünes Hügel) for the theatre, and he bought at his own expense a plot of land backing on to the grounds of the Neues Schloss (the margrave's former residence, by now the property of King Ludwig) for a family home. (Called Wahnfried, in Richard Wagner Strasse, it was the home of the Wagner family up to the death of Wieland Wagner in 1966, and is now the Richard Wagner Museum.)

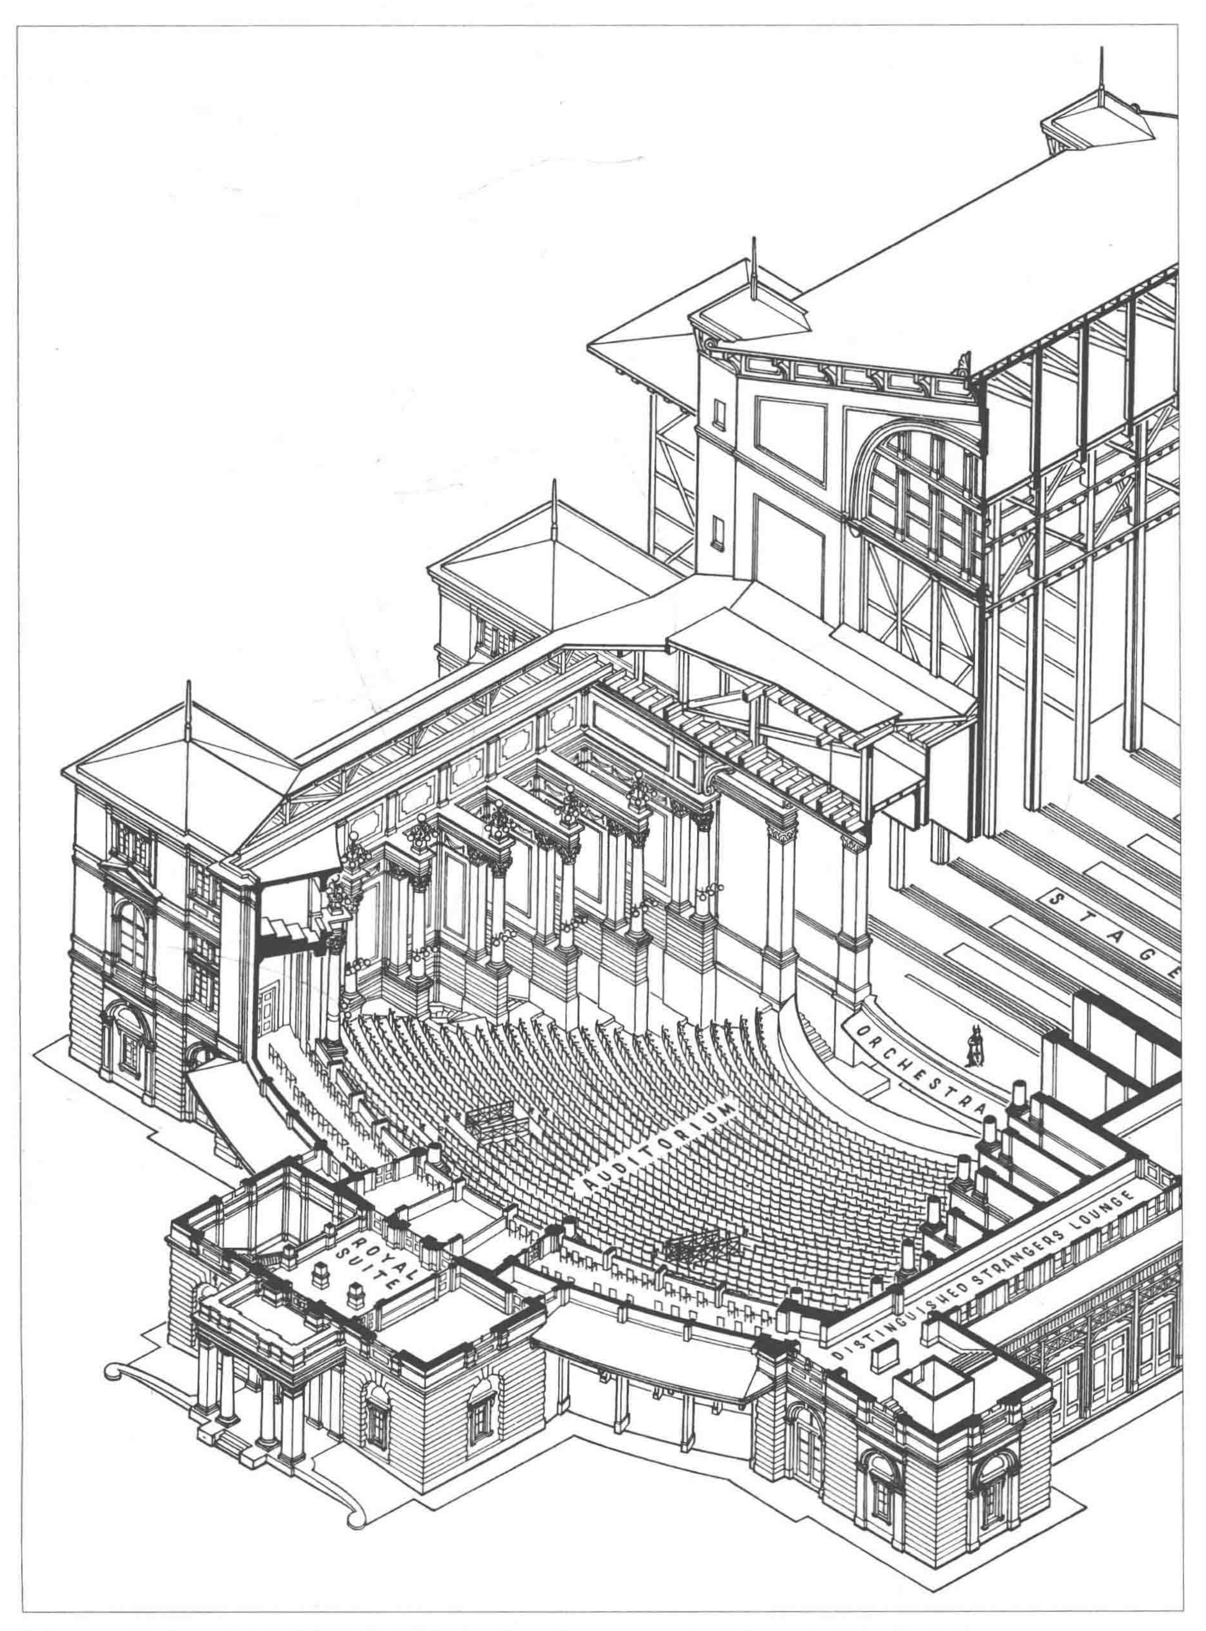
After laying the foundation stone of the theatre on 22 May 1872 (a ceremony that included a performance of Beethoven's Ninth Symphony in the Markgräfliches Opernhaus, conducted by Wagner himself), he set out to raise funds for it by conducting concerts and selling certificates of patronage. The response was disappointing, and he was obliged to construct the building with the simplest and cheapest materials. This, as his *Ring* preface shows, is what he had always intended his Festspielhaus to be: a 'sketch of an ideal', a temporary structure that the German nation, if it chose, could eventually turn into a monumental building. It incorporated all his theatrical ideas, which (as mentioned in the *Ring* preface) had been translated into practical terms by the architect Gottfried Semper. Now, working with the architect Otto Brückwald

and the stage machinist Karl Brandt, Wagner realized them.

The auditorium (originally 1460 seats with boxes, including a royal box, behind) is on a single raked level, converging fan-shaped on a stage 32 metres wide and 23 metres deep (40 metres including the backstage area). A particular feature is the duplication of the stage proscenium arch (13 metres wide, 11.8 metres high) by a wider one just beyond the orchestra and the continuation of this line by 'false' wooden pillars projecting from the side walls to the back of the auditorium (fig.2). The orchestra is positioned in a deep well obscured from the audience's sight. Wagner wrote: 'We called this the "mystic chasm", because its task was to separate the real from the ideal', and the result of this arrangement, together with the extended proscenium, was that 'the spectator has the feeling of being at a far distance from the events on stage, yet perceives them with the clarity of near proximity; in consequence, the stage figures give the illusion of being enlarged and superhuman'. The hood over the orchestra serves the additional function of throwing the orchestral sound on to the stage to blend with the vocal sound before being projected back to the auditorium. All these features, combined with the theatre's wooden ceiling covered with painted canvas, give the performances in the Festspielhaus a visual and acoustical flavour that is unique.

With the aid of a loan from King Ludwig, Wagner was at last able, in August 1876, to produce the *Ring* for the first time in its entirety. Three complete cycles were given, the first attended by Emperor Wilhelm I of Germany and the last by King Ludwig. But Wagner's triumph was clouded by dissatisfaction with the production itself and dismay at the huge financial deficit remaining. Six years passed before he could afford to stage another festival, this time (1882) devoted exclusively to *Parsifal*, his only work written expressly for the completed Festspielhaus (a fact reflected in its orchestration) and intended by Wagner to be performed nowhere else. In all, 16 performances were given. At the last, Wagner took the baton for the final scene – his only conducting appearance in his own theatre. He died in the following year.

4. WAGNER'S SUCCESSORS. The task of running the festival devolved on Wagner's widow Cosima, who dedicated herself to carrying out the composer's wishes exactly as she understood them. Wagner had intended that all his works from *Der fliegende Holländer* onwards should eventually be staged in his theatre, and Cosima's first production (1886) was *Tristan und Isolde*, followed by *Die Meistersinger* in 1888, *Tannhäuser* in 1891, *Lohengrin* in 1894, a new production of the *Ring* in 1896, and *Der fliegende Holländer* in 1901. Her achievement was laudable, but her priestess-like devotion to the voice of the master and her refusal to consider new ideas (such as those of the Swiss designer Adolphe Appia) threatened to turn the Festspielhaus into a museum. She did, however, move with the times to the extent of installing electric lighting in 1888 in place of the original gas. Cosima's choice of artists, though widened to include foreign singers, was based not on their star quality (the Bayreuth Festival prides itself on making reputations rather than profiting from them), but on the artists' willingness to submit to her rigid production style, in which prescribed movements were tied closely to musical phrases and clear diction was of paramount importance.



Cosima was assisted by her daughters Daniela and Isolde (for costumes and so on) and by her son Siegfried, who first conducted in the Festspielhaus in 1896 (the *Ring*). After the festival of 1906 Cosima, in failing health, relinquished control in favour of Siegfried, but remained in Wahnfried.

Siegfried made no radical changes in the years before 1914, continuing the pattern established by his mother: festivals were held in two consecutive summers, followed by a rest year; *Parsifal* and the *Ring* were presented at all festivals, together with one other work. His impact was more marked after 1924, when the festival was resumed after a ten-year break. While not abandoning the basically realistic productions of his father and mother, he gradually replaced painted backcloths with solid sets, extended the stage depth, improved the lighting system and allowed his singers more freedom of movement. His production of *Tannhäuser* in 1930 was the first decisive move away from the conception of the Bayreuth Festival as a museum religiously preserving Wagner's own production style.

Both Cosima and Siegfried died in 1930. Siegfried's successor, his British-born widow Winifred (née Williams, 1897–1980), had no pretensions as a producer, and she appointed the Intendant of the Berlin Staatsoper, Heinz Tietjen, as artistic director. Tietjen's productions, with scenic designs by Emil Preetorius (except *Parsifal*, redesigned in 1934 by Alfred Roller and in 1937 by Wieland Wagner), were lavish. If this period of the Bayreuth Festival's history is to some extent viewed with disapproval, the fault lies not in the productions or the stylized modified realism of Preetorius's sets, but in Winifred Wagner's personal association with Hitler, a frequent visitor to Bayreuth. At his command the festival became a yearly event from 1936 to 1944 (when war events closed it down), and at his request *Parsifal* was dropped from the programme from 1940. Winifred's contribution to the building itself was the erection of an administrative block on the north-west side and (in 1932) a new line of boxes at the back of the auditorium above the royal box.

The fact that Winifred Wagner, politically compromised, was still by the terms of her husband's will the sole owner of the festival's assets delayed the reopening after World War II, but eventually her two sons Wieland (1917–66) and Wolfgang (*b* 1919) were permitted to assume control as lessees. Wieland Wagner's *Parsifal*, with which the festival reopened in July 1951, made a sensational impact, as did his production of the *Ring*. The realism, modified or otherwise, of the previous festivals had disappeared; what little stage scenery there was came mainly from light projections; costumes were simple and stylized; choruses, uniformly dressed, moved in precise formations; and the soloists matched their movements to the words rather than the music.

The 'new Bayreuth style', as it came to be called, may have owed something of its origin to the need to change the festival's image after its Nazi associations, but it soon established an artistic validity, and before long directors everywhere were copying Wieland Wagner's methods. Wieland, whose production experience had been gained outside Bayreuth (in Nuremberg and Altenburg), acknowledged no masters, but his conception of the stage as an 'illuminated space' owes something to Appia as well as to Gordon Craig. In the years 1951–66, during which the festival was again an annual event, he used the Festspielhaus as an 'experimental workshop', bringing

*2. Diagram of the Bayreuth Festspielhaus after 1882 when the royal entrance was added: drawing by Richard Leacroft*

*3. Set of four tickets for the first complete 'Ring' cycle at Bayreuth, 13–16 August 1876; the performances of 'Siegfried' and 'Götterdämmerung' were postponed for one day because of the indisposition of Franz Betz, who sang Wotan*

out new productions or modifying older ones in a constant search for new aspects. Like Cosima, he chose singers who were willing to follow his ideas: casts, which had been predominantly German under Winifred Wagner, again became international.

Wolfgang Wagner, who served his apprenticeship under Tietjen in Berlin, concentrated mainly on administrative duties until 1966. These included the restoration of the theatre itself. Although Richard Wagner, regarding it as a temporary structure, had set little store on its outward appearance, Wolfgang Wagner decided, in the interests of its unique visual and acoustic qualities, to retain the original form of the building both inwardly and outwardly, and simply to replace weak parts with more solid materials (steel, concrete, brick). He extended the stage still further, modernized technical equipment, increased the seating capacity (now 1925) and built new offices, dressing rooms and rehearsal stages.

During the period of joint control with his brother, Wolfgang Wagner staged his own productions of some of the works. These, though less radical than Wieland Wagner's, adhered in the main to the principles of the new Bayreuth style. Following Wieland Wagner's death in 1966, Wolfgang Wagner, while continuing to stage operas occasionally himself, adopted from 1969 a policy of inviting directors from outside the family to stage one of the works in turn, each production remaining in the repertory for a number of years (usually five). Guest directors up to 1998 were August Everding, Götz Friedrich, Harry Kupfer, Patrice Chéreau, Jean-Pierre Ponnelle, Peter Hall, Werner Herzog, Dieter Dorn, Heiner Müller and Alfred Kirchner. The result of this policy was the disappearance of a recognizable Bayreuth style. Guest directors have been allowed the freedom to interpret the works each in his own way, untrammelled by any pious regard to the composer's expressed intentions. The tendency of most (though not all) of them has been to place a direct stress (through the use of modern clothing or alienation techniques, for instance) on the moral, sociological and political implications of the works rather than on the mythological guise in which Wagner chose more indirectly to present them.

The annual festivals run from the last week of July to the end of August; *Parsifal* and the *Ring* are usually given, together with two of the other works, and each festival normally contains one new production.

5. Richard Wagner Foundation. The festival was financially self-supporting until World War II, but after its postwar reopening it relied to some extent on public subsidies. In May 1973 exclusive family ownership of the festival ended with the creation of the Richard Wagner Foundation Bayreuth which assumed responsibility in perpetuity for the festival and took over its assets, including the Wagner archives in Wahnfried. The trustees of the foundation include members of the Wagner family and representatives of the German government, the Bavarian Land, the town of Bayreuth and the voluntary organization Die Freunde von Bayreuth. The foundation does not finance the festival, which continues to receive public subsidies, and sole artistic control remains in the hands of the appointed festival director (Wolfgang Wagner was appointed in 1973). In the choice of future directors the trustees undertake to give preference to members of the Wagner family.

GEOFFREY SKELTON

**Bazelon, Irwin (Allen)** (*b* Evanston, IL, 4 June 1922; *d* New York, 2 Aug 1995). American composer. After graduating from DePaul University (BA 1944, MA 1945), he studied with Milhaud at Mills College (1946–8) and then settled in New York in 1948, where he received numerous fellowships, honours and commissions. His music is in the tradition of urban American expressionism, with audible antecedents in the works of Varèse and Ruggles

but with a distinctive angular simplicity, characterized by dramatic alternations between violence and tenderness. Bazelon's language, while influenced by serialism, borrows the jabbing brass and percussion chords and the propulsive rhythms of big-band jazz. This driving energy is contrasted with moments of relative repose in which orchestral colours are subtly varied.

Bazelon's ten symphonies (1962–92) form the heart of his musical output. The immediacy of these works derives from their spare textures, which often feature one or two contrapuntal lines presented in striking instrumental combinations; characteristic passages are harmonically and timbrally static, treating sound as a sculptural object. A free use of serial techniques combined with an undercurrent of jazz creates a dark sense of New York City, reminiscent of *film noir*. The influence of a lighter jazz style, reflecting the manic side of life in New York, dominates such works as the chamber concerto *Churchill Downs* (1971). Named after the racetrack near the city, it features electronic instruments more typically employed in rock and pop music.

Bazelon's vocal works set texts from the modernist tradition of American poetry (i.e. Hart Crane, Wallace Stevens, etc.) in a highly charged, chromatic style, more dramatic than lyrical, with striking and uncluttered accompaniments. Also notable are percussion works such as *Propulsions* (1974), with their emphasis on rhythmic invention, dramatic structure and the exploration of timbre. Several film scores, as well as music for television, number among his other compositions. He is the author of *Knowing the Score: Notes on Film Music* (New York, 1975).

SCOTT WHEELER

**Bazin, François-Emmanuel-Victor** (*b* Marseilles, 4 Sept 1816; *d* Paris, 2 July 1878). French composer, teacher and conductor. He became a student at the Paris Conservatoire in 1834, and studied composition with Henri-Montan Berton and Halévy. He won *premiers prix* for harmony and accompaniment (1836), counterpoint and fugue (1836) and for organ playing (1839). The jury of the Prix de Rome awarded him a second prize on 30 April 1839, and the first prize on 23 May 1840. His cantata written for the competition, *Loÿse de Montfort*, was performed at the Opéra on 7 October 1840.

On completing his studies he divided his time mainly between teaching and composition, and worked occasionally as a conductor. He held an unsalaried post as teacher of harmony and accompaniment at the Conservatoire from 1838 to 1 April 1841 and was appointed accompanist to the opera class on 1 December 1839. He became (unsalaried) assistant professor of harmony and accompaniment on 1 October 1843 and professor of harmony and accompaniment on 1 January 1849. Finally, on 1 October 1871, he succeeded Ambroise Thomas as professor of composition.

Some of Bazin's choral works may have been performed by the Accademia Filarmonica Romana while he was at the Villa Medici. When he returned to Paris he soon became highly regarded as a teacher and as a composer. In 1846 his one-act *Le trompette de Monsieur le Prince* proved to be the first of a series of successful stage works up to 1870, all performed by the Opéra-Comique. The most popular, judging by the many transcriptions, must have been the three-act *Le voyage en Chine*, to a libretto by Eugène Labiche (1865).

Vocal music was another of Bazin's main interests. He composed for and conducted choirs in Paris. He was an enthusiastic supporter of the male-voice choir movement there, and when the Orphéon was divided into two sections in 1860 he was appointed conductor for the Left Bank of the Seine.

His theoretical works, which include *Cours d'harmonie théorique et pratique* (Paris, 4/1857) and *Traité de contrepoint* (Paris, n.d.), are strongly rooted in the traditions of the Conservatoire; after 1844 Bazin was one of their most intransigent defenders. With Massé and Reber, he represented conservatism against the more modern and liberal tendencies of César Franck. No doubt this aspect of Bazin's character was more marked after 1871, with the appointment of Ambroise Thomas (well known for his conservative ideas) as director of the Conservatoire. Bazin's fortunes as an opera composer,

however, declined beside the increasing success of Massenet, whom he had refused to accept as a student in his composition class at the Conservatoire. Ironically, Massenet succeeded him at the Conservatoire and the Institut de France when he retired.

Bazin received several honours besides his official appointments. Although an attempt to succeed Adam as a member of the Institut failed on 21 June 1856, he was eventually elected on 5 April 1873 (in succession to Carafa). He became vice-president of the composition section of the Académie des Beaux-Arts in 1877 and president in 1878. He was made an Officier de L'Instruction Publique in 1875 and an Officier of the Légion d'Honneur in 1876.

GÉRARD STRELETSKI

**Bazino, Francesco.** *See* BAZZINI, FRANCESCO.

**Baziron** [Bazison], **Philippe.** *See* BASIRON, PHILIPPE.

**Bázlik, Miro(slav)** (*b* Partizánska L'upča, 12 April 1931). Slovak composer and pianist. He began his music education at the Bratislava State Conservatory, where he studied the piano with Anna Kafendová (1946–51). He then read mathematics at Prague University (until 1956) and studied privately with Jiři Eliáš (composition), Rauch and Moravec (piano). After returning to Bratislava he studied with Cikker at the College of Performing Arts (1956–62) and taught mathematics at Bratislava University. In 1963 he embarked on a career as a freelance composer, pianist and lecturer.

From an early age Bázlik displayed a talent towards both mathematics and music. His interest in composition stemmed from his insight as a skilled performer inspired by masterpieces from the classical piano repertory. His experience of mathematical analysis provided the basis for a rational approach to compositional technique and the move towards serialism, which he arrived at in *Hudba* ('Music', 1961) for violin and orchestra and *Tri kusy* ('Three Pieces, 1964'). His view that music is essentially a dramatic art form gave rise to the opera *Peter a Lucia* (1963–6); here he combines the qualities of large-scale symphonic music with a synthesis of dodecaphony and tonal counterpoint. His research into algebraic topology has been a further source of inspiration together with the affiliation he feels for Xenakis. From here it was only a short distance to composing in the electro-acoustic medium, which became his dominant interest in the early 1970s. Of these works *Triptych* (1971) and the cycle *Spektrá* (1970–74) are based on electro-acoustic transformations of historic styles, forming a synthesis of traditional compositional ideals and an accompanying modern commentary. His vocal-orchestral work *Canticum 43* combines counterpoint from the Renaissance and Baroque periods with serialism and controlled movement of sound masses. In *Simple Electronic Symphony* (1975) he applies the Golden Section within the framework of sonata form. These ideas remained a constant feature of works composed during the 1980s and are coupled later with a stronger desire to incorporate elements from the European classical tradition.

Among his several awards are first prize at the Maria-José competition in Geneva in 1974 (for *Canticum 43*) and the Ján Levoslav Bella Prize in 1977 (for *Dvanást'* 'The Twelve'). Bázlik's repertory as a performer includes the complete solo keyboard works of Bach, Mozart and Beethoven (all performed from memory).

VLADIMÍR GODÁR

**Bazuin** (Dut.). *See under* ORGAN STOP (*Posaune*).

**Bazylik, Cyprian** [Basilicus, Ciprianus; Cyprian z Sieradza; Ciprianus Sieradensis] (*b* Sieradz, *c*1535; *d* in or after 1600). Polish writer, poet, composer and printer. In printed volumes of music he was referred to as 'C. B.' and 'C.S.'; on 1 September 1557 he was knighted and admitted to the family of Heraklides Jakub Basilikos. He studied at Kraków Academy in 1550–51 and then worked for a while in the chancellery of King Sigismund II August. In 1558 he moved to Lithuania and worked at Wilno (now Vilnius) and Brześć Litewski (now Brest) as a member of the court of Duke Mikołaj Radziwiłł. He was engaged mainly as musician, but later he worked as a writer and as a translator of Calvinist publications. In 1569–70 he owned a printing house at Brześć Litewski and was a member of the household of Albrecht Łaski, the Voivode of Sieradz. Subsequently with financial assistance from the king, he continued his work as a translator, mainly of Latin works on history and politics; he also wrote a number of occasional poems. His writings are notable for the distinction of their language. He published his last literary work in 1600. His known music was all published in the late 1550s and consists mainly of four-part polyphonic works. They were written for the use of Polish Reformers, and the mostly simple, note-against-note textures show that they were intended for popular performance. The few that are elaborately contrapuntal suggest that Bazylik may have composed other, more ambitious works of this kind (now lost), which would help justify his contemporary reputation as a highly skilled musician.

WORKS

Edition: *Cyprian Bazylik: Pieśni* [Songs], ed. Z.M. Szweykowski, WDMP, xxxiv (1958) [incl. all extant vocal works]

Pieśń z ewanjeliej [Evangelical songs], 4vv (Kraków, 1557)

5 songs, 4vv: Dobrotliwość pańska [The goodness of the Lord]; Nabożna piosnka [Holy song]; Pieśń nowa krześcijańska [A new Christian song]; Pieśń nowa w której jest dziękowanie [A new song of thanksgiving]; Pieśń o niebezpieczeństwie żywota człowieczego [Song of the dangers of man's life]: all in Kancjonał zamojski [Zamość hymnbook] (Kraków, *c*1558)

5 psalms, 4vv, in Kancjonał zamojski (Kraków, *c*1558)

3 hymns, 1v, in Pieśni chrześcijańskie, dawniejsze i nowe [Christian songs, old and new], ed. J. Seklucjan (Królewiec, 1559)

Hymns, in J. Zaremba: Pieśni chwał boskich [Spiritual songs of praise] (Brześć Litewski, 1558), ed. in MMP, ser. B, ii (1989)

Works composed for Duke Albrecht of Prussia, lost

ZYGMUNT M. SZWEYKOWSKI

**Bazzani, Francesco Maria** (*b* ?Parma, *c*1650; *d* Piacenza, *c*1700). Italian composer and teacher. He was the son of one of Duke Ranuccio Farnese's servants. On the duke's recommendation he was elected *maestro di cappella* of Piacenza Cathedral on 16 June 1679 and held the post until at least 1693. From 1684 to 1686 he was also *maestro di cappella* of S Giovanni in Canale, Piacenza. He was a respected teacher; his nephew Fortunato Chelleri was one of his pupils. Of his music only that of his oratorio *La caduta del Gerico* (1693) survives (in *I-MOe*). His other works (of which some librettos survive) included the operas *L'inganno trionfante* (Parma, 1673), *Ottone in Italia* (Parma, 1679) and *Il pedante di Tarsia* (Bologna, 1680); the oratorios *Il bacio della giustizia e della pace* (Piacenza, 1697), *Mose in Egitto* and *Passione di Nostro Signore*; *I trionfi dell'Eridano in cielo*, an *azione drammatica* (Piacenza, 1679), and *La pace scesa in terra*, an 'omaggio in versi e musica a Gesu bambino' (1683).

JULIA ANN GRIFFIN

**Bazzini, Antonio** (*b* Brescia, 11 March 1818; *d* Milan, 10 Feb 1897). Italian violinist, composer and teacher. He was a pupil of a Brescian violinist, Faustino Camisani (Camesani); encouraged by Paganini, he began his concert career at an early age and became one of the most highly regarded artists of his time. From 1841 to 1845 he lived in Germany, where he was much admired by Schumann both as a violinist and a composer, as well as by Mendelssohn (Bazzini gave the first private performance of his Violin Concerto). After a short stay in Denmark he returned to Brescia to teach and compose. In 1846 he played in Naples and Palermo. In 1849–50 he toured Spain and from 1852 to 1863 lived in Paris. He ended his concert career with a tour of the Netherlands in 1864. Returning once more to Brescia, he devoted himself to composition, gradually abandoning the virtuoso opera fantasias and character-pieces (such as the well-known *La ronde des lutins*, *Elégie* and *Le muletier*), which had formed a large part of his earlier work. He attempted an opera (*Turanda*, 1867), dramatic cantatas, sacred music, concert overtures and symphonic poems, as well as chamber music, the genre in which he achieved his greatest success. Written in the classic forms of the German school Bazzini's chamber works earned him a central place in the Italian instrumental renaissance of the 19th century. In 1868 he became president of the Società dei Concerti in Brescia, and was active in promoting and composing

for quartet societies in Italy. In 1873 he became composition professor at the Milan Conservatory and in 1882 its director. Among his pupils there were Catalani, Mascagni and Puccini.

WORKS

Vocal: Il silfo e l'innamorato, scena, 1v, vn obbl, pf, op.39 (Milan, 1865); Turanda (op, 5, A. Gozzoletti, after C. Gozzi), Milan, Scala, 13 Jan 1867; Sennacheribbo (sinfonia cant., V. Meini), S, Bar, vv, orch, vs (Milan, ?1875); sacred works, incl. masses, lits, cants., ps; songs

Orch: Ov. to Alfieri's Saul, 1866 (Florence, 1869); Re Lear, ov., op.68, 1868 (Florence, ?1874); Francesca da Rimini, sym. poem, op.77 (Berlin, 1889/90)

Vn, orch: Concertino, E, op.14, arr, vn, pf (Milan and Leipzig, 1843); Grand allegro de concert, op.15 (Milan, 1845); Vn Conc. no.3 (Hymne triomphal), B, op.29 (Milan and Mainz, 1855); Vn Conc. (Conc. militare), D, op.42 (Milan, 1863); Vn Conc., no.4, a, op.38 (Milan, 1865); Allegro drammatico, op.51 (Mainz, n.d.)

Chbr: Str Qt, op.7, unpubd; Str Qt, C (Milan, 1864); Str Qnt, F, 1865, unpubd; Str Qr, E♭, op.76 (Milan, 1879); Str Qnt, A, 1866 (Milan, 1884); Str Qt, G, op.79 (London, ?1892); Str Qt, c, op.80 (Milan, 1892); Str Qt, d, op.75 (Leipzig, 1893)

Vn, pf: Gran duo concertante (Milan, 1840); La ronde des lutins, scherzo fantastique, op.25 (Milan, 1852); Elégie, op.35 no.1 (Milan, 1860); Le muletier, op.35 no.3 (Milan, 1860); 3 morceaux en forme de sonate, op.44 (Milan, ?1863); Sonata, e, op.55 (Milan, 1872); numerous salon pieces, opera fantasias etc.

GIOVANNI CARLI BALLOLA/ROBERTA MONTEMORRA MARVIN

**Bazzini** [Bazzino, Bazino], **Francesco** (*b* Lovere, 1593; *d* Bergamo, 15 April 1660). Italian singer, theorbo player, organist and composer, younger brother of NATALE BAZZINI. He studied at the seminary and at the Accademia della Mia at Bergamo, where he gained a reputation as an excellent singer. He studied composition with Giovanni Cavaccio and in 1614 began teaching at the academy. He served as organist of S Maria Maggiore, Bergamo, and also sang in the choir there, until he was summoned to serve the Este court at Modena. He was prominent as a singer and theorbo player in performances at the court and in the city itself, and he was given leave to perform at the court in Vienna and at Venice, Florence and Parma (1628). In 1636 he returned to the Bergamo area where he remained until his death. Bazzini was living at Zanica, very close to Bergamo, in 1637, when he was paid considerably more than any other visiting singer to take part in elaborate performances of Assumptiontide music at S Maria Maggiore. According to Calvi he published canzonettas, theorbo sonatas and an oratorio, *La rappresentazione di S Orsola*, all of which seem to be lost.

JULIA ANN GRIFFIN

**Bazzini** [Bazzino], **Natale** (*b* Lovere; *d* Bergamo, 1639). Composer, organist and singer. He became a chaplain at S Maria Maggiore, Bergamo, in 1610 and sang in the choir until 1611. He was an organist at nearby Desio in 1628. In that year he published at Venice a volume of *Messe, motetti et dialogi a 5, concertati*, the dialogues of which are important in the history of the oratorio. According to Calvi he published four other volumes – two books of motets, *Messe e salmi a 3, concertati* and *Arie nuove e diverse* – but all seem to be lost.

**Beach** [née Cheney], **Amy Marcy** [Mrs H.H.A. Beach] (*b* Henniker, NH, 5 Sept 1867; *d* New York, 27 Dec 1944). American composer and pianist. She was the first American woman to succeed as a composer of large-scale art music and was celebrated during her lifetime as the foremost woman composer of the USA. A descendant of a distinguished New England family, she was the only child of Charles Abbott Cheney, a paper manufacturer and importer, and Clara Imogene (Marcy) Cheney, a talented amateur singer and pianist. At the age of one she could sing 40 tunes accurately and always in the same key; before the age of two she improvised alto lines against her mother's soprano melodies; at three she taught herself to read; and at four she mentally composed her first piano pieces and later played them, and could play by ear whatever music she heard including hymns in four-part harmony. The Cheneys moved to Chelsea, Massachusetts, about 1871. Amy's mother agreed to teach her the piano when she was six, and at seven she gave her first public recitals, playing works by Handel, Beethoven and Chopin, and her own pieces. In 1875 the family moved to Boston, where her parents were advised that she could enter a European conservatory; but they decided on local training, engaging Ernst Perabo and later Carl Baermann as piano teachers. Her development as a pianist was monitored by a circle including Louis C. Elson, Percy Goetschius, H.W. Longfellow, Oliver Wendell Holmes, William Mason and Henry Harris Aubrey Beach (1843–1910), a physician who lectured on anatomy at Harvard and was an amateur singer; she was to marry him in 1885.

At her successful début in Boston (24 October 1883) she played Chopin's Rondo in E♭ and Moscheles's G minor Concerto, conducted by Adolf Neuendorff; at her début with the Boston SO (28 March 1885), the first of

several appearances with that orchestra, she played Chopin's F minor Concerto with Wilhelm Gericke conducting. After her marriage to Dr Beach, and in respect of his wishes, she curtailed her performances, giving only annual recitals, with proceeds donated to charity. Most significantly, following her husband's wishes, her focus changed to composition.

Her training in composition was limited to one year of harmony and counterpoint with Junius W. Hill. In 1884 she sought a composition teacher, consulting Gericke, who prescribed a course of independent study using the masters as models. Following his advice, and for the next ten years, she taught herself fugue, double fugue, composition and orchestration, using a range of theory texts, and translating treatises by Berlioz and Gevaert. During that time, she also produced a substantial body of work including her Mass in E♭ op.5, an 85-minute work for large performing forces. Almost all of her compositions were performed (in particular her songs and choral pieces), and were published by Arthur P. Schmidt, her exclusive publisher from 1885 to 1910.

Beach's first published work was *The Rainy Day*, a setting of Longfellow's poem, composed in 1880 and issued in 1883. Her major works during the period 1885–1910 include the Mass, the Symphony op.32, the Violin Sonata op.34, the Piano Concerto op.45, the *Variations on Balkan Themes* op.60 and the Piano Quintet op.67 – introduced by such ensembles as the Boston Handel and Haydn Society, the Kneisel Quartet and the Boston SO. Eminent singers of the time, such as Emma Eames and Marcella Sembrich, presented her songs on recital programmes. Two of her many songs, *Ecstasy* op.19 no.2 and *The Year's at the Spring* op.44 no.1, sold many thousands of copies. Among her commissioned works were the *Festival Jubilate* op.17, written for the dedication (1 May 1893) of the Women's Building of the World's Columbian Exposition, Chicago, *Eilende Wolken* op.18, given its première by the Symphony Society of New York (2 December 1892) and the *Song of Welcome* op.42, for the Trans-Mississippi Exposition, Omaha (1898); others were the *Panama Hymn* op.74, for the international Panama Pacific Exposition in San Francisco (1915), and the Theme and Variations for Flute and String Quartet op.80, for the San Francisco Chamber Music Society.

After her husband's death in 1910 and her mother's in 1911, Beach went to Europe (sailing on 5 September 1911), determined to establish a reputation there as both performer and composer and to promote the sale of her own works. Beginning in autumn 1912 she gave recitals in German cities, playing her sonata and quintet and accompanying her songs; her symphony was given in Leipzig and Hauburg, and her concerto in those two cities and in Berlin. The reviews were favourable: one journal stated that Beach was the leading American composer and the critic Pfohl called Beach a 'virtuoso pianist' who had, as a composer, 'a musical nature tinged with genius'.

At the outbreak of World War I Beach returned to the USA, with 30 concerts already scheduled in the East and Midwest, and in 1915 moved briefly to New York and San Francisco, settling in Hillsborough, New Hampshire, in 1916. Thereafter she spent winters on tour and summers practising and composing in Hillsborough; in Centerville on Cape Cod, Massachusetts, where she owned land purchased with the proceeds of her song *Ecstasy*; and,

*Amy Marcy Beach*

from 1921, as a fellow at the MacDowell Colony where almost all her later works were composed. Outstanding among them are the String Quartet op.89, the two *Hermit Thrush* pieces op.92, *From Grandmother's Garden* op.97, *Rendezvous* op.120, *The Canticle of the Sun* op.123, Three Piano Pieces op.128, and the chamber opera *Cabildo* op.149. She made several trips abroad, including one to Rome (1929), where she finished her String Quartet. In 1942, to celebrate Beach's 75th birthday, Elena de Sayn, a violinist and critic from Washington, DC, organized two retrospective concerts of her music.

A highly disciplined composer, capable of producing large-scale works in a few days, Beach was also energetic in the promotion of her compositions, arranging for performances as soon as works were completed. As a pianist, she had a virtuoso technique and an extraordinary memory. She was interested in philosophy and science, and was fluent in German and French. Deeply religious, she later became virtual composer-in-residence at St Bartholomew's Episcopal Church, New York. She was generous, using her status as dean of American women composers to further the careers of many young musicians. She served as leader of several organizations including the Music Teachers National Association and the Music Educators National Conference, and was co-founder in 1925 and the first president of the Society of American Women Composers. Heart disease caused her retirement in 1940 and her death in 1944. Her will assigned her royalties to the MacDowell Colony.

Beach's earliest works demonstrate her ability to create a long line and her sensitivity to relationships between music and text. Song is at the core of her style – she used some of her songs as themes in her instrumental works (e.g. the Symphony, the Piano Concerto op.45 and the Piano Trio op.150) – but her remarkable ear for harmony and harmonic colour is also apparent from the beginning. Like the early Romantics, Beach emphasized modal degrees and used mixed modes. Her perfect pitch and association of keys with colours and by extension with moods resulted in the expressive use of modulation (e.g. the song *Die vier Brüder* from op.1).

Her mature style, characterized by increasing chromaticism, use of long-held and overlapping appoggiaturas, 7th and augmented-6th chords, modulation by 3rds and avoidance of the dominant, shows her debt to the late Romantics, as well to the use of Scottish, Irish, American and European folk music in some 30 compositions. However, she was acutely aware of the stylistic changes in music from the 1910s, and a significant number of her late works depart from the previously lush harmonies. The String Quartet (1929), for example, which quotes three simple Inuit melodies, displays lean textures and contrapuntally driven, unresolved dissonances, while *From Grandmother's Garden*, whose title may suggest a retrospective style, moves further away from tonality. Her most adventurous pieces verge on atonality itself: the first of the op.128 set of three pieces for piano, 'Scherzino: a Peterborough Chipmunk', begins with a series of arpeggiated seventh chords without tonal implications, while the *Improvisation*, op.148 no.1, employs whole-tone arpeggios arranged in chromatic wedges.

Beach first made her reputation as a composer of art songs. But it was her large-scale works beginning with the Mass and the Symphony that won her acceptance first by her Boston colleagues then nationally and internationally. Her most popular works in addition to the songs were the Symphony, which had dozens of performances by leading orchestras, the Violin Sonata, the Piano Quintet, the Theme and Variations for flute quintet, the *Hermit Thrush* pieces for piano and, among the secular choral works, *The Chambered Nautilus*. Her sacred works, in particular the anthem *Let this mind be in you* and the Expressionist *The Canticle of the Sun*, remained in the repertory of church choirs for years after her death when her other works were no longer heard. Many of her works have returned to the concert stage and about two-thirds of a total of 300 have been recorded.

SACRED CHORAL

*4 voices and organ, unless otherwise stated*

| Op. | Work |
|---|---|
| 5 | Mass, E♭, 4vv, orch, 1890, os (1890) |
| — | Graduale (Thou Glory of Jerusalem), T, orch, ps (1892) [addition to Mass, op.5] |
| 7 | O praise the Lord, all ye nations (Ps cxvii) (1891) |
| 8/1–3 | Choral Responses (1891): Nunc dimittis (Bible: *Luke* ii.29), With prayer and supplication (Bible: *Philippians* iv.6–7), Peace I leave with you (Bible: *John* iv.27) |
| 17 | Festival Jubilate (Ps c), D, 7vv, orch, 1891, ps (1892) |
| 24 | Bethlehem (G.C. Hugg) (1893) |
| 27 | Alleluia, Christ is risen (after M. Weisse, C.F. Gellert, T. Scott, T. Gibbons) (1895), arr. with vn obbl (1904) |
| 33 | Teach me thy way (Ps lxxxvi.11–12), 1895 |
| 38 | Peace on earth (E.H. Sears) (1897) |
| 50 | Help us, O God (Pss lxxix.9, 5; xlv.6; xliv.26), 5vv (1903) |
| 52 | A Hymn of Freedom: America (S.F. Smith), 4vv, org/pf (1903), rev. with text O Lord our God arise (1944) |
| 63 | Service in A, S, A, T, B, 4vv, org: Te Deum, Benedictus (1905), rev. omitting Gloria, 1934; Jubilate Deo; Magnificat; Nunc dimittis (1906) |
| 74 | All hail the power of Jesus' name (E. Perronet), 4vv, org/pf, 1914 (1915) |
| 76 | Thou knowest, Lord (J. Borthwick), T, B, 4vv, org (1915) |
| 78/1–4 | Canticles (1916): Bonum est, confiteri (Ps xcii. 1–4), S, 4vv, org; Deus misereatur (Ps lxvii); Cantate Domino (Ps xcviii); Benedic, anima mea (Ps ciii) |
| 84 | Te Deum, f, T, male chorus 3vv, org, 1921 (1922) |
| 95 | Constant Christmas (P. Brooks), S, A, 4vv, org (1922) |
| 96 | The Lord is my shepherd (Ps xxiii), female chorus 3vv, org (1923) |
| 98 | I will lift up mine eyes (Ps cxxi), 4vv (1923) |
| 103/1–2 | Benedictus es, Domine, Benedictus (Bible: *Luke* i.67–81), B, 4vv, org (1924) |
| 105 | Let this mind be in you (Bible: *Philippians* ii.5–11), S, B, 4vv, org (1924) |
| 109 | Lord of the worlds above (I. Watts), S, T, B, 4vv, org (1925) |
| 115 | Around the Manger (R. Davis), 4vv, org/pf (1925), version for 1v, pf/org (1925); rev. female chorus 3vv, org/pf (1925), rev. female chorus 4vv, org/pf (1929) |
| 121 | Benedicite omnia opera Domini (Bible: *Daniel* iii.56–8) (1928) |
| 122 | Communion Responses: Kyrie, Gloria tibi, Sursum corda, Sanctus, Agnus Dei, Gloria, S, A, T, B, 4vv, org (1928) |
| — | Agnus Dei, SA, chorus, org/pf (1936) [suppl. to op.122] |
| 123 | The Canticle of the Sun (St Francis), S, Mez, T, B, 4vv, orch, 1924, os (1928) |
| 125/2 | Evening Hymn: The shadows of the evening hours (A. Procter), S, A, 4vv, 1934 (1936) |
| 132 | Christ in the universe (A. Meynell), A, T, 4vv, orch, os (1931) |
| 133 | Four Choral Responses (J. Fischer) (1932) |
| 134 | God is our stronghold (E. Wordsworth), S, 4vv, org |
| 139 | Hearken unto me (Bible: *Isaiah* li.1, 3; xliii.1–3; xl.28, 31), S, A, T, B, 4vv, orch, os (1934) |
| 141 | O Lord, God of Israel (Bible: *1 Kings* viii.23, 27–30, 34), S, A, B, 4vv, 1935 |
| 146 | Lord of all being (O.W. Holmes) (1938) |
| 147 | I will give thanks (Ps cxi), S, 4vv, org (1939) |
| — | Hymn: O God of love, O King of peace (H.W. Baker), 4vv, 1941 (1942) |
| — | Pax nobiscum (E. Marlatt), (female chorus 3vv)/(male chorus 3vv/4vv), org (1944) |

SECULAR CHORAL

| Op. | Work |
|---|---|
| 9 | The Little Brown Bee (M. Eytinge), female chorus 4vv (1891) |
| — | Singing Joyfully (J.W. Chadwick), children's chorus 2vv, pf |
| 16 | The Minstrel and the King: Rudolph von Hapsburg (F. von Schiller), T, B, male chorus 4vv, orch, ps (1890) |
| 26/4 | Wouldn't that be queer (E.J. Cooley), female chorus 3vv, pf (1919) [arr. of song] |
| — | An Indian Lullaby (anon.), female chorus 4vv (1895) |
| 30 | The Rose of Avon-Town (C. Mischka), S, A, female chorus 4vv, orch, ps (1896) |
| 31/1–3 | Three Flower Songs (M. Deland), female chorus 4vv, pf (1896): The Clover, The Yellow Daisy, The Bluebell |
| 37/3 | Fairy Lullaby (W. Shakespeare), female chorus 4vv (1907) |
| 39/1–3 | Three Shakespeare Choruses, female chorus 4vv, pf (1897): Over hill, over dale, Come unto these yellow sands, Through the house give glimmering light |
| 42 | Song of Welcome (H.M. Blossom), 4vv, orch, os (1898) |
| 43/4 | Far Awa' (R. Burns), female chorus 3vv, pf (1918) [arr. of song] |
| 44/1–2 | The year's at the spring (R. Browning), female chorus 4vv, pf (1909); Ah, love, but a day (Browning), female chorus 4vv, pf (1927) |
| 46 | Sylvania: a Wedding Cantata (F.W. Bancroft, after W. Bloem), S, S, A, T, B, 8vv, orch, ps (1901) |

ADRIENNE FRIED BLOCK

**Beach Boys, the.** American rock band. It was formed in 1961 in Hawthorne, California, by the Wilson brothers Brian (*b* 1941; vocals, piano and bass guitar), Dennis (1944–83; vocals and drums) and Carl (1946–98; vocals and guitar), their cousin Mike Love (*b* 1941; vocals and drums) and additional members Al(an) Jardine (*b* 1942; vocals and guitar) and, from 1965, Bruce Johnston (*b* 1944). For most of the 1960s they were the most successful and important American band, turning out an impressive series of hit singles, addressing mostly teenage and youth culture sensibilities and albums of increasing musical and technical sophistication, culminating in their most celebrated effort, *Pet Sounds* (Cap., 1966).

Until his nervous breakdown in 1967, Brian Wilson was the creative force behind the group. He had ceased touring with the band in 1964, and thereafter devoted himself wholly to writing, arranging, recording and producing the songs and albums that secured the Beach Boys' international success. Though his style had a unique quality and evolved rapidly in response to fierce competition from other bands (particularly those associated with the 'British invasion'), several early influences left a lasting impact on his work: the vocal harmonies of the Four Freshmen (which he had learned and internalized from records as a teenager), the light-spirited, high energy style of Southern California surf music (including Jan and Dean, with whom Brian had regularly collaborated in the early 1960s), and the famous 'wall of sound' style of instrumental arrangement developed by Phil Spector, as well as the latter's artistic vision as a studio producer.

Brian Wilson assimilated these influences, and soon transformed them into a wholly new idiom. Even in the early songs – which celebrate male teenage lifestyle preoccupied with surfing, cars and girls – several of the features for which the band was to become famous are recognizable: unconventional and arresting harmonic progressions (as in the 1964 single *The Warmth of the Sun*), a tendency to experiment with new sounds and recording techniques (including vocal overdubbing, by which the group's vocal timbre acquired an almost luminescent brilliance, as in the 1963 hit *Surfin' USA*), and a disarming and soulful quality of intimacy, vulnerability and introspection (notably in *She knows me too well* and *Please let me wonder*, from 1964 and 1965 respectively). These trends culminated, first, in the superb polished and sophisticated album *The Beach Boys Today!* (Cap., 1965) and then in the masterpiece *Pet Sounds*, an album whose exquisitely colourful orchestration, breathtaking original harmonies and intense poignancy of expression have won the acclaim of critics since it was released. Brian Wilson's attempt to surpass the album with an even more innovative effort, to be entitled *Smile* (in collaboration with the lyricist Van Dyke Parks), ran

*The Beach Boys*

aground in 1967, due mainly to a combination of psychological trauma and internal tensions within the band. Of the 12 tracks planned for *Smile*, eight were finished or nearly finished, yet with three exceptions were not officially released until 1991.

After his breakdown Brian Wilson continued to be involved only on an irregular basis, allowing other band members (especially Carl Wilson and Bruce Johnston) to develop their talents in composition, arrangement and production. Although there are several fine later albums, including *Friends* (Cap., 1968) and *Surf's Up* (Brother, 1971), and although the band kept touring until the late 1990s, their position in the history of rock is based chiefly on their influential contributions during 1962–7.

ROB C. WEGMAN

**Bealand, Ambrose.** *See* BEELAND, AMBROSE.

**Beale, William** (*b* Landrake, 1 Jan 1784; *d* London, 3 May 1854). English organist and composer. He was brought up in London as a chorister of Westminster Abbey under Samuel Arnold and Robert Cooke. After his voice broke he served as a midshipman. In 1813 he gained the prize cup given by the Madrigal Society for his madrigal *Awake, sweet Muse*. From 30 January 1816 to 13 December 1820 he was one of the Gentlemen of the Chapel Royal. In November 1820 he was appointed organist of Trinity College, Cambridge, but in December 1821 he returned to London and became successively organist of Wandsworth Parish Church and St John's, Clapham Rise. He gained a prize at the Adelphi Glee Club in 1840. His best-known works are *Awake, sweet Muse* and *Come let us join the roundelay*.

WORKS

Vocal: A First Book of Madrigals, Glees, etc, 3–5vv (London, 1815); A Collection of Glees and Madrigals (London, 1820); A Collection of 13 Glees, ed. E. Plater (London, ?*c*1875); Bow down thine Ear, anthem (London, 1897)

Inst: 2 sonatas, vn, pf (London, [1813], [1815]); La Caspienne, pf [1866]; Verloren, pf [1876]

W.H. HUSK, WILLIAM BARCLAY SQUIRE/R

**Beamish, Sally** (*b* London, 26 Aug 1956). English composer and viola player, active in Scotland. Though drawn to composition, she studied the violin and the viola at the RNCM and worked for around ten years as a viola player with several London ensembles. In 1986 she received her first professional commission, for *Dances and Nocturnes*; in 1989 she moved to Scotland where, aided by an Arts Council bursary, she began to concentrate on composition. She founded the Chamber Group of Scotland with James MacMillan and her husband Robert Irvine. Her distinctive music draws on many different sources. Motherhood has been an important inspiration, reflected in works such as *Tuscan Lullaby* (1989) or *Magnificat* (1992), in which the traditional Latin text is interspersed with poems by Elizabeth Jennings. A particularly Scottish influence can be heard in her use of pibroch in the piano trio *Piobaireachd* (1991) and her First Symphony (1992), commissioned by the City of Reykjavik. Her dramatic oboe concerto *Tam Lin* (1992) is based on the Border ballad of the same name; other concertos are for violin (1994), inspired by E.M. Remarque's novel *All Quiet on the Western Front*, for viola (1995), a lyrical work based on Peter's realisation that he has denied Christ and the ultimate redemption of all human beings, and *River* (1997), a delicately colourful work for cello.

WORKS
(*selective list*)

Stage: Ease (music theatre, E. Kemp), 3 S, fl, cl, va, 1993; Winter Journey (nativity musical for children), 1996

SOPHIE FULLER

**Bean.** Nickname of COLEMAN HAWKINS.

**Bean, Hugh (Cecil)** (*b* Beckenham, 22 Sept 1929). English violinist. After lessons from his father, he became a pupil of Albert Sammons when nine years old, later also attending the RCM. A further year's study with André Gertler at the Brussels Conservatory on a Boise Foundation travelling award brought him a double first prize for solo and chamber music playing, and with two other prizewinners he formed the Boise Trio. He joined the RCM teaching staff in 1953 and became a freelance London orchestral player, until he was made sub-leader (1956), then leader (1957–67) of the Philharmonia Orchestra. He was co-leader of the BBC SO from 1967 to 1969, when he resigned to concentrate on an independent career, but retained his membership (1966–76) of the

Music Group of London, a chamber ensemble. His qualities as an orchestral leader were reflected in the sustained level of ensemble maintained under him, notably through the Philharmonia's difficult transition to the self-governing New Philharmonia in 1964. He rejoined the orchestra as co-leader in 1991.

As a soloist Bean's playing was distinguished by lyrical feeling and warmth of expression in addition to technical command; he was particularly admired for his performance of Elgar's Concerto and Vaughan Williams's *The Lark Ascending*, both of which he recorded. He plays a violin by Pietro Guarneri (Venice 1734), on extended loan from Amy Haswell-Wilson, and owns one by Carlo Tononi dated 1716. He was made a CBE in 1970.

NOËL GOODWIN

**Bearbeitung** (Ger.). Arrangement, transcription. In the compound, *Choralbearbeitung*, German usage allows for a much broader range of meaning than the English equivalents would suggest, and has embraced any cantus-firmus composition based on either plainchant or a hymn tune (both are *Choral* in German), whether it be medieval organum or a Bach chorale prelude for organ. More recently, however, there has been a tendency to restrict the term *choralbearbeitung* specifically to multi-voiced arrangements of Lutheran chorales from the 16th century on.

DAVID FULLER

**Beard, John** (*b* c1717; *d* Hampton, 5 Feb 1791). English tenor. Trained by Bernard Gates at the Chapel Royal, he sang while still a boy in Handel's *Esther* (staged at the crown and Anchor in February 1732). He won immediate success on his operatic début as Silvio in *Il pastor fido* with Handel's Covent Garden company (1734) and began a long association with the composer from the late 1730s up to the 1750s. He sang more Handel parts under the composer than any other singer, appearing in ten operas, and created roles in *Ariodante* (Lurcanio, 1735), *Alcina* (Oronte, 1735), *Atalanta* (Amintas, 1736), *Arminio* (Varus, 1737), *Giustino* (Vitalian, 1737), *Berenice* (Fabio, 1737). He was most known as an operatic singer, taking a leading role in every one of Handel's English oratorios, odes and musical dramas except *The Choice of Hercules* (which has no tenor part), including many first performances. He sang regularly in Handel's *Messiah* performances at the Foundling Hospital (refusing a fee), for Musicians Fund benefits and other charities, and at provincial festivals (Oxford, Birmingham, Three Choirs).

Beard was not exclusively a Handel singer; from 1736, when he sang in Galliard's *The Royal Chace* at Covent Garden, he appeared in numerous ballad operas, pantomimes, burlesques and more serious pieces, and was a member of the Drury Lane company (1737–43, 1748–59) and at Covent Garden (1743–8, 1759–67). From 1737 he was a popular Macheath in *The Beggar's Opera* and appeared in J.C. Smith's *Rosalinda* (1740), *The Fairies* (1755) and *The Tempest* (1756). He also sang in many works by Lampe, Boyce and especially Arne, including *Comus*, *Rosamond*, *The Judgment of Paris*, *Alfred*, *Artaxerxes* and *Love in a Village*, in which he made his last appearance in 1767 (*see* ARNE, THOMAS AUGUSTINE, fig.2).

*John Beard: mezzotint by James McArdell after Thomas Hudson*

In 1739 Beard married Lady Henrietta Herbert – a union which met with obloquy from the bride's family and scatalogical comment from the aristocracy. After his first wife's death in 1753, Beard in 1759 married Charlotte Rich, daughter of the proprietor of Covent Garden, whom Beard succeeded in the management from 1761 until his retirement with the onset of deafness in 1767, when he sold the Covent Garden patent for £60,000. For many years, before and after his retirement from the theatre, he held the post of 'vocal performer to his Majesty' with a salary of £100 a year, and he sang occasionally at the Chapel Royal. Burney said he 'constantly possessed the favour of the public by his superior conduct, knowledge of Music, and intelligence as an actor'. Dibdin considered him the finest English singer of the age. The heroic parts Handel composed for him, especially Samson, Judas (from *Judas Maccabeus*) and Jeptha, established the importance of the tenor voice at a time when leading male roles were still often taken by castratos or women, but many of the finest airs call for expressiveness and a firm *mezza voce* rather than agility. The extreme compass of his Handel parts is *B* to *a′*, but they seldom go below *d*. (*BDA*; *SartoriL*).

WINTON DEAN

**Beardmore & Birchall.** *See* BIRCHALL, ROBERT.

**Beare.** English family of violin dealers and restorers. John Beare (1847–1928) became an instrument dealer in 1865. He was a friend of Elgar and published some of his early music in the 1880s. In 1892 he divided his business into two parts: Beare & Son, with his elder son Walter, at 32 Rathbone Place, London, and Beare, Goodwin & Co. at 186 Wardour Street. Beare & Son, later came under the direction of Walter's son Richard Barrington Beare (*b* 20 July 1908), and moved to Dunstable. They are wholesalers of new instruments and accessories. Beare, Goodwin & Co. specialized in early instruments of the violin family,

becoming John & Arthur Beare shortly after the turn of the century.

Arthur Beare (*b* Norbury, 14 Feb 1875; *d* Watford, 23 Aug 1945), the younger son of John Beare, trained as a violinist in Leipzig before joining the business (*c*1890). He earned an excellent reputation both as a craftsman and as a connoisseur of violins. He made a speciality of tonal adjustments, fitting bridges and soundposts to the instruments of many of the best performers of his time. He was also well trusted as a dealer, handling a large number of fine instruments. The firm moved a short distance to 164 Wardour Street during World War I, to no.179 in 1929, and to 7 Broadwick Street in 1979.

William Arthur Beare (*b* Streatham, 25 April 1910), son of Arthur Beare, joined the firm in 1929; he took over the firm on his father's death and became chairman and managing director in 1954, when the business was incorporated as J. and A. Beare Ltd. From 1927 to 1929 he trained as a violin maker under Marc Laberte in Mirecourt, France, becoming an excellent craftsman. On his return he made more than 30 violins, also carrying out repairs and adjustments. He upheld the firm's reputation for reliability in dealing and in craftsmanship, and also developed a worldwide reputation of his own as an authority on early instruments.

Charles Beare (*b* London, 22 May 1937), stepson of William Beare, trained at the State Violin Making School at Mittenwald, Bavaria, and under Rembert Wurlitzer and Fernando Sacconi in New York. He joined the firm in 1961 and specializes in the restoration of fine instruments. He has contributed scholarly articles to music journals and published *Antonio Stradivari: The Cremona Exhibition of 1987* (London, 1993).

CHARLES BEARE/MARGARET CAMPBELL

**Beaser, Robert** (*b* Boston, 29 May 1954). American composer. A percussionist with the Greater Boston Youth SO, he conducted the orchestra in the première performance of his first orchestral work, *Antigone* (1972). He studied composition with Arnold Franchetti before entering Yale University, where his teachers included Jacob Druckman, Toru Takemitsu, Earle Brown and Yehudi Wyner (BA 1976, MMA 1981, DMA 1985). He also studied composition with Goffredo Petrassi in Rome and Betsy Jolas at Tanglewood. His conducting teachers included Otto-Werner Mueller, Arthur Weisburg and William Steinberg. He served as co-director of the New York ensemble, Contemporary Elements (1978–89), and composer-in-residence of the American Composers Orchestra (1988–93) before joining the composition department at the Juilliard School (1993). Among his awards are the Prix de Rome (1977), Guggenheim and Fulbright foundation fellowships, a 1988 Grammy nomination (*Mountain Songs*, 1985) and an award from the American Academy in Rome (1995). His works have been commissioned by the St Paul Chamber Orchestra (*Song of the Bells*, 1987), St Louis SO (*Piano Concerto*, 1989), Chicago SO (*Double Chorus*, 1990), Baltimore SO (*The Heavenly Feast*, 1994) and the New York PO.

Beaser's music from the late 1970s onwards embraces the tenets of Romanticism in its epic scale, use of programmatic elements and tonal foundation. His melodic gift and finely developed sense of irony, however, elevate his compositions above mere exercises in nostalgia. Thematic variation and transformation is central to the structure of many of his works, particularly the set of variations that forms the second movement of the Piano Concerto. While the concerto quotes material from Beethoven to Bernstein, a subtle reflection of musical influence is more characteristic of Beaser's style.

WORKS

Orch: Song of the Bells, fl, orch, 1987; Pf Conc., 1989–90; Double Chorus, 1990; Chorale Variations, 1992; Sexigessimal Chorus, 1996

Vocal-orch: Sym. (e.e. cummings, W.B. Yeats, J. Fowles), S, orch, 1976–7; The Seven Deadly Sins (A. Hecht), B/T, orch, 1984; The Heavenly Feast (G. Schnackenberg), S, orch, 1994

Other vocal: Silently Spring (Cummings), S, chbr ens, 1973; Quicksilver (D.M. Epstein), T, pf, 1978; The Seven Deadly Sins (Hecht), B/T, pf, 1979; Teach Me, O Lord (Ps cxix), S, A, T, B, SSAATTBB, brass qnt ad lib, 1983; Songs from 'The Occasions' (E. Montale), T, chbr ens, 1985; The Old Men Admiring Themselves in the Water (Yeats), 1v, pf, 1986 [also version for fl, pf]; A Martial Law Carol (J. Brodsky), 1v, pf, 1994; I Dwell in Possibility (E. Dickenson), 1v, pf, 1994; Ps, cl, SATB, pf/org, 1995; Prayer for Peace (R. Beaser), 1v, children's chorus, pf, 1996

Chbr and solo inst: Trasparenza, vc, 1971; Canti notturni, gui, 1974; Str Qt, 1975–6; Shadow and Light, ww qnt, 1978–80; Notes on the Southern Sky, gui, 1980; Variations, fl, pf, 1981–2; Il est ne le divin enfant, fl, gui, 1982; Mountain Songs, fl, gui, 1985; Landscape with Bells, pf, 1986; Minimal Waltz, fl, pf, 1986; Shenandoah, gui, 1995; Brass Qnt, 1996

Principal publisher: Helicon

JAMES CHUTE

**Beastie Boys, the.** American rap group. Originally formed as a hardcore punk band at New York University, the Beastie Boys recorded singles in a variety of styles before signing to Def Jam Recordings, who in turn had signed a distribution deal with CBS Records. With a group comprising MCA (Adam Yauch; *b* Brooklyn, NY, 15 Aug 1967), D (Mike Diamond; *b* New York, 20 Nov 1965) and Ad Rock (Adam Horowitz; *b* Manhattan, NY, 31 Oct 1966), their album *Licence to Kill* (1986) became CBS's fastest-selling début album. Hit singles such as *Fight for your right to party* crossed the racial divisions within popular music, appealing to the fans of both black rap and white rock. Controversy also followed the band in the wake of its riotous live performances.

Disagreements between the Beastie Boys and Def Jam led to a three-year hiatus which ended with the excellent though commercially unsuccessful album, *Paul's Boutique* (Cap., 1989). Relocated in California, the band launched a record label, studio and magazine under the name Grand Royal. Freed from their image of rebellious youth, albums such as *Check Your Head* (Cap., 1992) and *Ill Communication* (Cap., 1994) were self-assured, stylish mergers of hip hop, jazz and rock. They remain one of the few white groups to have achieved success and credibility within hip hop.

DAVID TOOP

**Beat (i)** (Fr. *temps*; Ger. *Zählzeit, Schlag*; It. *battuta*). The basic pulse underlying mensural music, that is, the temporal unit of a composition; also the movement of the hand or baton by which the conductor indicates that unit. The grouping of strong and weak beats into larger units constitutes METRE; *see also* DOWNBEAT, UPBEAT and OFF-BEAT.

**Beat (ii).** A 17th-century English term for one of several ORNAMENTS: a lower appoggiatura (indicated by an ascending oblique line placed before or over the main note), an inverted trill (indicated by a wavy line over the

main note), or a mordent (called 'beat' only in the 18th century).

**Beat (iii).** An acoustical phenomenon. *See* BEATS.

**Beat, Janet (Eveline)** (*b* Streetly, Staffs, 17 Dec 1937). British composer and teacher. She studied at Birmingham University between 1956 and 1964 (BMus 1960, MA 1968) and with Alexander Goehr. During the 1960s she worked as a freelance horn player and as a music lecturer at colleges of education; in 1972 she was appointed lecturer at the Royal Scottish Academy of Music and Drama. She was a founder member of the Scottish Society of Composers and the Scottish Electro-Acoustic Music Society and in 1988 formed the contemporary music ensemble Soundstrata. During 1992 she was visiting composer at the Meistersinger-Konservatorium in Nuremberg; in 1996 she was appointed lecturer in music technology at the University of Glasgow. As a composer, she has acknowledged the influence of Bartók, Stockhausen and oriental music, and she was a pioneer of British electronic music. She combines natural and artificially generated or mediated sound, often using tape, as in *Fêtes pour Claude*, and also creates purely electronic works such as *Dancing on Moonbeams* (1980), and *A Vision of the Unseen* no.2 (1988). Electronic music has greatly affected her attitudes to timbre, rhythm and the use of montage effects. For example, even in a non-electronic work such as *Mestra*, she is concerned with exploring timbre to the utmost possible degree, involving not only the flute's sound, but also the noise made by the instrument's mechanism and the player's breathing.

She has written about her *Cross Currents and Reflections* in Stretto (iv/1, 1984, pp.1–4), and has also worked on Baroque music, with an essay on Monteverdi's opera orchestra (*The Monteverdi Companion*, 1968) and editions of works by Giacomo Carissimi, Handel and M.-A. Charpentier.

WORKS
(*selective list*)

Elec: Apollo and Marsyas, cl, tape, 1973; The Gossamer Web (dance drama), S, pf, perc, tape, 1975; Hunting Horns are Memories, hn, tape, 1977; Piangam, pf, tape, 1978–9; Dancing on Moonbeams, tape, 1980; Dreamscapes, bn, tape, 1980; Ongaku, hpd, tape, 1981; Cross Currents and Reflections, vol.1, pf, vol.2 [to be played with vol.1], pf, elec pf, synth, tape, 1981–2; A Willow Swept by Rain, gui, tape, 1982; Journey of a Letter (ballet), tape, 1986; Echoes from Bali, cptr, synth, 1987; A Vision of the Unseen, 1988: no.1, inst trio, tape, no.2, tape; Aztec Myth, Mez, tape, 1988; Puspawarna, Mez, tape, 1989–90; A Springtime Pillow Book, Mez, fl + a fl, synth (DX7), cptr-controlled synths/tape, 1989–90; Mandala, cptr-controlled synths, fl, synth (WX7), Tibetan monastery bells, 1990; The Song of the Silkie, vc, elec kbd, 1991; Fêtes pour Claude: 3 Homages to Debussy, Mez, fl, pf, tape, 1992; Der Regenpalast, Mez, fl, tape, 1993

MARIE FITZPATRICK

**Beater.** *See* MALLET.

**Beatles, the.** English pop group. Ringo Starr [Richard Starkey] (*b* Liverpool, 7 July 1940) drums, voice; JOHN LENNON (*b* Liverpool, 9 Oct 1940; *d* New York, 8 Dec 1980), rhythm guitar, keyboards, harmonica, voice; PAUL MCCARTNEY (*b* Liverpool, 18 June 1942), bass guitar, keyboards, lead guitar, drums, voice; George Harrison (*b* Liverpool, 25 Feb 1943), lead guitar, *sitār*, keyboards, voice.

1. Career. 2. Works.

1. CAREER. Originating in Liverpool, the Beatles evolved from an amateur teenage skiffle group, the Quarry Men, formed by Lennon in 1956 and named after his school, Quarry Bank High. McCartney joined the Quarry Men in July 1957, Harrison in March 1958. In August 1960, Lennon, McCartney and Harrison – together with Stuart Sutcliffe (*b* Edinburgh, 23 June 1940; *d* Hamburg, 10 April 1962), bass guitar, and Pete Best (*b* Madras, 24 Nov 1941), drums – became the Beatles. Between then and November 1962 the group played many one-off gigs in and around Liverpool, and also, with decisive effect on their development as performers, four extended residencies at various clubs in Hamburg's red-light Reeperbahn district. Sutcliffe, a talented painter, left in December 1961, being replaced on bass by McCartney, who until then had played guitar and piano. In November 1961 a Liverpool music shop owner, Brian Epstein (*b* Liverpool, 19 Sept 1934; *d* London, 26/7 Aug 1967), heard the Beatles at the Cavern, a local 'beat' club in which they played the greatest number of their pre-1963 British gigs. Becoming their manager, he set about securing the group a recording contract, at which he succeeded in June 1962 with Parlophone, a subsidiary of the EMI label run by the producer GEORGE MARTIN.

The rawness of the Beatles' performing talent, which six months earlier had made Decca reject them, appealed to Martin, although he was then doubtful of their songwriting. Replacing Best with Starr on drums, he encouraged Lennon and McCartney, the group's chief composers, to write with more concentration, pointing out to them simple structural devices such as commencing with the chorus (the main selling-point of most pop songs). The Beatles responded by developing at remarkable speed. Their second release, *Please please me*, rose to number one in the British singles chart and their commercial success thereafter was continuous. The group's tours of Britain in 1963 created an unprecedented excitement ('Beatlemania') which was reproduced in the USA when, on 9 February 1964, they appeared on national television singing their fifth single *I want to hold your hand* to an estimated audience of 70 million, an event unanimously identified by social commentators as a turning-point in postwar American culture. In the months after this breakthrough, the Beatles dominated the American singles charts, at one stage occupying the top five positions, a feat unheard of before and since. There were around three and a half million advance

orders in Britain and America for the group's sixth single *Can't buy me love* (1964).

During 1964–5 the Beatles built on their success with a sequence of bestselling singles and LPs and two feature films: *A Hard Day's Night* (1964) and *Help!* (1965). However, by the end of 1965, owing about equally to the visionary influence of Bob Dylan and the accelerating popularity among pop musicians of marijuana, the international pop scene began to advance from the straightforward energy and good humour of 'beat music' towards a greater formal and emotional complexity. Aware that they needed to regenerate themselves stylistically, the Beatles toyed uncertainly with 'comedy songs' and idiosyncratic variations on soul music in their transitional LP *Rubber Soul* (Parlophone, 1965). Only in early 1966, with the appearance of the counterculture and its associated drug the powerful hallucinogen LSD, did they identify their way forward: a new type of pop music which exploited the techniques of the recording studio to create unprecedented forms and textures in the service of an imaginative exploration of consciousness and childhood memories. With their groundbreaking LPs *Revolver* (Parlophone, 1966) and *Sgt Pepper's Lonely Hearts Club Band* (Parlophone, 1967), the Beatles eclipsed even their most gifted rivals, achieving an eminence in contemporary popular culture which has endured and seems unlikely to diminish to any great extent in the foreseeable future. This work, together with the best of their 1962–5 output and liberal selections from their later releases, such as *Magical Mystery Tour* (Parlophone, 1967), *The Beatles* (Apple, 1968), and *Abbey Road* (Apple, 1969), constitutes the Beatles' claim on posterity: this claim has to date provoked a literature of over 400 books.

After Epstein's death in August 1967, the group gradually lost direction, the underlying conflicts between its otherwise intensely cohesive members souring the atmosphere in EMI's Abbey Road studio and the tone of much of the work they did there during 1968–70. Despite this, they carried on, recording around 80 more tracks, albeit that these were increasingly individual efforts, written and sometimes even recorded solo. During this period Harrison emerged alongside Lennon and McCartney as a writer of worthy songs, one of which, *Something* (Apple, 1969) became the Beatles' second most recorded number after McCartney's *Yesterday* (Parlophone, 1965). Divisiveness, caused largely by the process of growing up and getting married, eventually broke the group, a process painfully visible in their final film *Let It Be* (1970). After rallying with their last LP, *Abbey Road*, the Beatles, to the chagrin of their tens of millions of fans around the world, split up, each of them from then on continuing as a soloist.

Little the ex-Beatles did (amounting to around 60 LPs) compares with the music they recorded together during the 1960s. Two 'reunion' records, made in 1994–5 by matching McCartney, Harrison and Starr to demo tracks informally taped by Lennon during the late 1970s, failed to rise to the standards attained by the Beatles in their original guise. Notwithstanding this, their *Anthology* video and compact disc series (the latter comprising 145 previously unissued out-takes and alternative mixes) achieved massive commercial success during 1995–6, when, without playing concerts or recording more than a handful of new notes, the Beatles registered among the world's highest-selling popular artists, earning around £100 million.

*The Beatles: (from left to right) Paul McCartney, John Lennon, Ringo Starr and George Harrison*

2. WORKS. Since none of the Beatles could read music, arrangements beyond the basic four-piece were supplied by Martin, a graduate of the Guildhall School of Music. He has painstakingly refuted the suggestion, made by some classical critics, that he was the real creative genius behind the Beatles; on the contrary, he insists, he worked only to their original designs and to their specific requests, even to details of arrangements which they sang to him and which he often transcribed on the spot in the studio. Where Martin was important to the Beatles was in suggesting improvements in the form of their early songs (improvements they quickly came to incorporate independently into their writing) and later in guiding them in the selection of instrumental and electronic textures hitherto unused in pop music. Benign and self-effacing, his mode of cultivation was that of a man schooled in orthodox musicianship who delighted in, and was occasionally awed by, the untutored novelties with which the Beatles' music naturally abounded. Together with his innovative engineer Geoff Emerick, Martin endeavoured to give the Beatles a productive base within the primitive and often exasperating restrictions of the studio technology of the time and of Abbey Road in particular.

Although Starr contributed one or two songs to the Beatles' canon, they are negligible, the main source of the group's original material being the Lennon-McCartney partnership, supplemented, to the tune of something around a tenth of the Beatles' output, by Harrison. Unlike orthodox songwriting partnerships, in which one writes the music and the other the words, 'Lennon-McCartney' was a trademark for a pair of independent songwriters who happened to work similarly enough to collaborate, when the occasion arose, in several ways – ranging from bar-by-bar co-composition to supplying sections or lines for otherwise finished songs which each brought to their regular formal three-hour 'writing sessions'.

Musicologists, rarely acquainted with the musical context in which the Beatles arose and developed, often misconstrue the structural attributes of their music, invoking inapposite parallels with, for example, Schubert and Mahler. Certainly it is true, as William Mann pointed out in *The Times* in 1963, that an early song by Lennon contains Aeolian cadences, yet these were not wittingly, let alone purposefully, put there by their author. They are thus, at best, of secondary significance in diagnosing the traits of the Beatles' style (if such a homogeneous entity may be deemed to exist). While more than a little of the group's music has a modal flavour, this was never consciously cultivated as it was, for instance, in a more serious context by Vaughan Williams; rather, it points to that part of the Beatles' inheritance which derives from Anglo-Celtic folk music, a source which also prompted Lennon and McCartney's taste for harmonizing in 4ths and 5ths (thereby to some extent guiding their choice of chords during collaborative composition, with a knock-on impact on their separate writing). Exceedingly eclectic, the Beatles were 'folk musicians' who, via the media of radio and gramophone, were inspired to music, and thence to songwriting, by a dense complex of vernacular influences. These included the show music of Broadway and Hollywood, British music hall and variety, blues, folk-blues, rhythm-and-blues, skiffle, rock and roll, gospel, doo-wop, soul music, the teenage pop genre created by British and American writer-producer teams during 1957–64, and, later in their career, the linear rāga forms of Hindustani classical music and the *musique concrète* of Schaeffer and Stockhausen. Perhaps the most influential of any discretely identifiable idiom on the Beatles as songwriters was the prolific output of the black Detroit pop label Tamla Motown, which gave them many early hints as to harmonic schemes, song lay-outs, arrangements (particularly rhythm-section parts), and formulae for lyric and melodic expression. (The group, it should be said, were candid in conceding to such borrowings, giving general credit where it was due, although, for obvious reasons, never being absolutely specific as to bars or phrases.)

Beyond these influences, the Beatles were adept and unusually exacting in the ways in which they shaped and elaborated their musical ideas. Self-taught by ear and schooled in the memory-intensive genre of jobbing pop, they were alive to the virtues of the unexpected and composed their songs with scant regard for harmonic orthodoxy. Always on the lookout for unusual changes, they frequently created these by moving their hands speculatively around piano or guitar, or by exploiting the scale- and arpeggio-generating possibilities of retuning the latter. Each, moreover, had a different personal style. McCartney, a natural melodist, voiced his romantic-sentimental optimism in wide-ranging tunes, capable of being sung or whistled without chordal support. Coincidentally, his harmonic designs are the most elegant in the Beatles' repertory, often evincing a classical cadential grace and formal poise. A realist by temperament, Lennon preferred lines close to the narrow span of speech-inflections, relying on harmonic context to give these colour and emotional power. If not the most melodic, then certainly the most original of the songwriting Beatles, he wrote almost as many hit records as McCartney, in many cases succeeding through sheer immediacy of feeling. Harrison, too, depended on harmonic rather than melodic inspiration, working from chord-sequence to melody, although later (e.g. *Something*), emancipating himself, through the influence of rāga scales, into a more melodic, McCartneyesque, style. Together these three writers amounted to a formidable body of creative talent no rival pop group has come close to matching.

It is difficult to overestimate the Beatles' impact and influence. Purely in terms of pop, they invented the idiom as later generations came to know it, revolutionizing pop songwriting, studio production, video promotion, general presentation and instrumental styles. As one of the two or three most influential bass-players in his field, a fluent pianist, an inventive drummer, and the performer of a handful of the genre's most striking guitar solos, McCartney remains pop's leading multi-instrumentalist; Starr's direct and propulsive style, distinctively unorthodox fills and novel drum sounds have made him a significant influence on modern rock drumming. Beyond these accomplishments, the Beatles dominated and defined their time, reflecting every culturally significant shift in their kaleidoscopic decade in ways so acute, and at times prescient, that it occasionally seemed to their contemporaries that the group themselves caused some of the major social changes of the 1960s. In fact this was not so, but it is a testament to the scale of their real achievements that a quartet of popular musicians should be credited with so fundamental a contribution to late 20th-century culture.

WORKS

Edition: *The Beatles Complete*, ed. Tetsuya Fujita, Yuji Hagino, Hajime Kubo and Goro Sato (Milwaukee, 1993) [transcr. of recordings]

[*songs, in order of commencement of work in the recording studio*]

Lennon and McCartney: You'll be mine (1960); Like Dreamers Do (1962); Hello little girl (1962); Love me do (1962); P.S. I love you (1962); Please please me (1963); Ask me why (1963); There's a place (1963); I saw her standing there (1963); Do you want to know a secret (1963); Misery (1963); Hold me tight (1963); From Me to You (1963); Thank you girl (1963); I'll be on my way (1963); She loves you (1963); I'll get you (1963); Little Child (1963); All I've got to do (1963); Not a Second Time (1963); I want to hold your hand (1963); This Boy (1963); Can't buy me love (1964); You can't do that (1964); And I love her (1964); I should have known better (1964); Tell me why (1964); If I Fell (1964); I'm happy just to dance with you (1964); I call your name (1964); Any Time at All (1964); Things We Said Today (1964); When I get Home (1964); Baby's in black (1964); I'm a loser (1964); Every Little Thing (1964); I don't want to spoil the party (1964); What you're doing (1964); No Reply (1964); Eight Days a Week (1964); She's a woman (1964); I feel fine (1964); I'll follow the sun (1964)

Ticket to Ride (1965); Another Girl (1965); The Night Before (1965); You've got to hide your love away (1965); If You've got Trouble (1965); Tell me what you see (1965); You're going to lose that girl (1965); That means a lot (1965); Help! (1965); I've just seen a face (1965); Yesterday (1965); It's only love (1965); Wait (1965); Run for your life (1965); Norwegian Wood (This bird has flown) (1965); Drive my car (1965); Day Tripper (1965); In My Life (1965); We can work it out (1965); Nowhere Man (1965); I'm looking through you (1965); Michelle (1965); The Word (1965); You won't see me (1965); Girl (1965); Tomorrow never knows (1965); Got to get you into my life (1966); Paperback Writer (1966); Rain (1966); Doctor Robert (1966); And your bird can sing (1966); I'm only sleeping (1966); Eleanor Rigby (1966); For No One (1966); Yellow Submarine (1966); Good Day Sunshine (1966); Here, There and Everywhere (1966); She said she said (1966); Strawberry Fields forever (1966); When I'm Sixty-Four (1966); Penny Lane (1966)

A Day in the Life (1967); Sgt Pepper's Lonely Hearts Club Band (1967); Good morning good morning (1967); Fixing a Hole (1967); Being for the Benefit of Mr Kite (1967); Lovely Rita (1967); Lucy in the Sky with Diamonds (1967); Getting Better (1967); She's leaving home (1967); With a Little Help from my Friends (1967); Sgt Pepper's Lonely Hearts Club Band (Reprise) (1967); Magical Mystery Tour (1967); Baby you're a rich man (1967); All Together Now (1967); Your mother should know (1967); I am the walrus (1967); The Fool on the Hill (1967); Hello, Goodbye (1967)

Lady Madonna (1968); Across the Universe (1968); Hey Bulldog (1968); Revolution 1 (1968); Revolution 9 (1968); Blackbird (1968); Everybody's got something to hide except me and my monkey (1968); Good Night (1968); Ob-la-di, ob-la-da (1968); Revolution (1968); Cry baby cry (1968); Helter Skelter (1968); Sexy Sadie (1968); Hey Jude (1968); Mother Nature's Son (1968); Yer Blues (1968); Rocky Racoon (1968); What's the new Mary Jane (1968); Wild Honey Pie (1968); Dear Prudence (1968); Back in the USSR (1968); Glass Onion (1968); I will (1968); Step inside love (1968); Birthday (1968); Happiness is a warm gun (1968); Honey Pie (1968); Martha my Dear (1968); I'm so tired (1968); The Continuing Story of Bungalow Bill (1968); Why don't we do it in the road? (1968); Julia (1968)

Dig a Pony (1969); I've got a feeling (1969); Don't let me down (1969); Get back (1969); Two of Us (1969); Let it be (1969); The Long and Winding Road (1969); One After 909 (1969); I want you (She's so heavy) (1969); The Ballad of John and Yoko (1969); Oh! Darling (1969); You never give me your money (1969); Her Majesty (1969); Golden Slumbers (1969); Carry that weight (1969); Maxwell's Silver Hammer (1969); Come Together (1969); the End (1969); Sun King (1969); Mean Mr Mustard (1969); Polythene Pam (1969); She came in through the bathroom window (1969); Because (1969)

Harrison: Don't bother me (1963); You know what to do (1964); You like me too much (1965); If I needed someone (1965); Think for yourself (1965); Love You To (1966); Taxman (1966); I want to tell you (1966); Only a Northern Song (1967); Within You Without You (1967); It's all too much (1967); Blue Jay Way (1967); The Inner Light (1968); While my Guitar Gently Weeps (1968); Not Guilty (1968); Piggies (1968); Savoy Truffle (1968); Long, Long, Long (1968); For You Blue (1969); All things must pass (1969); Old Brown Shoe (1969); Something (1969); Here comes the sun (1969); I Me Mine (1970)

Other: Don't pass me by (1968); Octopus's Garden (1969) [Starkey]

What Goes On (1965) [Lennon, McCartney, Starkey]

12-bar Original (1965); Flying (1967); Christmas Time (is here again) (1967); Los Paranoias (1968); Dig it (1969) [Harrison, Lennon, McCartney, Starkey]

In Spite of All the Danger (1958) [Harrison, McCartney]

Cry for a shadow (1961) [Harrison, Lennon]

Cayenne (1960); Junk (1968); Teddy Boy (1969); Come and get it (1969) [McCartney]

Free as a Bird (1994); Real Love (1995) [Lennon]

Films: A Hard Day's Night (1964); Help! (1965); Magical Mystery Tour (1967); Yellow Submarine (1969); Let It Be (1970)

IAN MACDONALD

**Beat Music.** A style of British pop music developed in the early 1960s; it was significant as the first time musicians of that country had created their own sound, rather than imitating the US originals. In Liverpool, Merseybeat was spearheaded by the Beatles, whose early style grafted onto a skiffle base the instrumental and vocal textures, melodic structures, syncopated rhythms and responsorial vocal styles of early rock and roll, the modality and verse–refrain form of Anglo-Celtic folk song, and some ornamental chromaticisms and triadic parallelisms from late 19th-century European harmony. Other leading exponents included Gerry and the Pacemakers and the Searchers. The Beatles' insistence on writing their own material was a novel redivision of labour which has had lasting consequences. In London an alternative approach was

dominated by the Rolling Stones, the Kinks and the Who, in which a narrower amalgam was found, with the skiffle and rock and roll foundation partly replaced by a harder-edged rhythm and blues sound, in a selfconscious attempt at authenticity. In the USA the term 'British invasion' is preferred to 'beat', calling attention to the flood of such bands as these into the US market during the period 1964–5. However this term fails to distinguish stylistically between beat music and the simpler pop music purveyed by Peter and Gordon, the Dave Clark Five or the Hollies.

**Beatritz de Dia.** Name formerly assumed to be that of the COMTESSA DE DIA.

**Beats** (Fr. *battements*; Ger. *Schwebungen*; It. *battimenti*; Sp. *batimientos*). An acoustical phenomenon, useful in tuning instruments, resulting from the interference of two sound waves of slightly different frequencies. The number of beats per second equals the difference in frequency between the two notes: a pitch of 440 Hz will make four beats per second with one of 444 (or 436); three with one of 443 (or 437); two with 442 (or 438); one with 441 (or 439); and the beats will disappear if the two notes are in perfect unison. *See* ACOUSTICS.

CLIVE GREATED

**Beattie, James** (*b* Laurencekirk, Kincardineshire, 25 Oct 1735; *d* Aberdeen, 18 Aug 1803). Scottish philosopher and writer on musical aesthetics. He was the son of a farmer, and became professor of moral philosophy and logic at Marischal College, Aberdeen, and entered polite London society on the strength of his *Essays* and his universally acclaimed poem *The Minstrel*. He was also a member of the Aberdeen Musical Society and a keen amateur cellist; he continued to play the cello with three fingers after the tendon of his left-hand middle finger was severed in an accident.

His philosophical writings are unusual for their time in including an intelligent and penetrating essay *On Poetry and Music* (written 1762, published 1776), which considers the questions 'Is music an imitative art?' and 'How are the pleasures we derive from music to be accounted for?' along with 'Conjectures on some peculiarities of National Music'; the essay was reprinted several times and was translated into French in 1798. A further interesting, if slight, open letter *On the Improvement of Psalmody in Scotland* was printed for private circulation in 1778.

Large collections of Beattie's letters, with copious references to musical matters, are in Aberdeen University Library and the National Library of Scotland. His poem *The Hermit* was set in 1778 by Tommaso Giordani.

DAVID JOHNSON

**Beatty, Josephine.** *See* HUNTER, ALBERTA.

**Beauchamps** [Beauchamp], **Pierre** (*b* Paris, 30 Oct 1631; *d* Paris, early Feb 1705). French dancer, choreographer, composer and conductor. He has been wrongly identified with Charles-Louis Beauchamps. Called the father of all ballet-masters, he codified the five positions of feet and arms, and developed a rational system of dance notation which is now called after Raoul-Auger Feuillet, who published it (in his *Chorégraphie, ou L'art de décrire la dance*) in 1700.

Beauchamps was Louis XIV's personal dancing-master and favourite partner in *ballets de cour* in the 1650s and 60s. Throughout his career he collaborated with Lully, whom he first met as comic dancer in, and later as composer of, *ballets de cour*. Beauchamps choreographed *intermèdes* and dances for Molière's *comédies-ballets*, beginning with *Les fâcheux* (1661), for which he also composed the music and conducted the orchestra. He choreographed entrées for *Le mariage forcé* (1664), *Le bourgeois gentilhomme* (1669), *Les amants magnifiques* (1670, with Dolivet), *Psyche* (1671) and *Le malade imaginaire* (1673), and danced in others. He was the ballet-master of Pierre Perrin's Académies d'Opéra, creating dances for Cambert's *Pomone* (1671). As ballet-master for Lully's Opéra during the 1670s and 80s, he choreographed dances for the premières of Lully's *L'impatience* (1661), *La naissance de Vénus* (1665), *Alceste* (1674), *Atys* (1676), *Isis* (1677), *Le triomphe de l'Amour* (1681, with Pécour) and *Ballet de la Jeunesse* (1686). After Lully's death (1687) Beauchamps left the Opéra to choreograph and compose music for ballets at the Jesuit colleges (1669–97), although he continued to choreograph and dance in the King's court ballets. Louis XIV bestowed many honours upon him: he was appointed *Intendant des ballets du roi* in 1661 and director of the Académie Royale de Danse in 1680 (although he was not, as many have assumed, a founder-member).

MAUREEN NEEDHAM

**Beauchamps, Pierre-François Godard de** (*b* Paris, 1689; *d* Paris, 22 March 1781). French dramatist and literary historian. A prolific writer of ballets, comedies, harlequinades and licentious tales disguised in the garb of classical antiquity, Beauchamps seems to have begun his career in 1714 when he wrote the words for the divertissement *Le comte de Gabalis et les peuples élémentaires*, performed at the Château de Sceaux (music by Bourgeois, lost). He

continued along the same lines with the *Ballet de la jeunesse*, first performed at the Tuileries in 1718 (music by Matho and Alarius, mostly lost). The rest of his theatrical career was spent at the Théâtre Italien, where he had ten comedies produced between 1722 and 1731, three of which contained musical *intermèdes*. The *Chefs d'oeuvre de M. Beauchamps* (1787) contained only three works, all without *intermèdes*; another 11 plays, never performed, are listed in his *Recherches sur les théâtres de France*, five of them with musical *intermèdes*.

Beauchamps is remembered above all for his meticulous *Recherches sur les théâtres de France, depuis l'année onze cens soixante-un jusques à présent* (Paris, 1735/*R*), which remains a valuable source of information on many aspects of French theatre from the troubadours up to the early 18th century. It is often more informative and accurate than the better-known writings on theatre music by his predecessor Ménestrier. The *Bibliothèque des théâtres* (Paris, 1733/*R*) sometimes attributed to Beauchamps is the work of Maupoint.

ROBERT FAJON

**Beaufils, Marcel** (*b* Beauvais, Oise, 30 Dec 1899; *d* Paris, 11 Jan 1985). French aesthetician. He studied in Paris (1917) and, after the war, in Strasbourg (1921–4), where he prepared his agrégation in German (1925). While holding a musicological post (1925–9) at the Centre Français d'Etudes Supérieures in Vienna (now the Institut Français) he gave a series of lecture-recitals in Vienna and Budapest on contemporary music and French folk music, and made contact with the Second Viennese School. On his return to France he taught in the Lycée Pasteur (1931–65) while also working on his doctorate (1942) and writing his first literary essays. In 1947 he was appointed professor of aesthetics at the Paris Conservatoire, where he taught until 1971; he succeeded Claude Rostand as vice-president of the Académie Charles Cros in 1970.

Beaufils specialized in German studies, particularly in German poetry and music. He was a philosopher rather than a musicologist, his approach to music being an aesthetic one: going beyond a strictly literary, musical, historical or sociological point of view, he attempted, for instance, to discover the basic meaning of drama (notably in Mozart and Wagner), and the essential difference in origin between the German lied and the French *mélodie*. He wrote several plays and novels (*Innocent*, *Le mystère de Sainte Jeanne d'Arc*, *Poids d'une vie* and *Le pont du diable*) as well as two volumes of poetry (*Christ noir* and *Cathédrales intérieures*).

CHRISTIANE SPIETH-WEISSENBACHER

**Beauharnais, Hortense Eugénie de.** *See* HORTENSE.

**Beaujoyeux** [Beaujoyeulx], **Balthasar de** [Belgioioso, Baldassare de; 'Baltazarini'] (*b* Piedmont, before *c*1535; *d* *c*1587). Italian ballet-master and violinist. He went to France in about 1555 as leader of a band of violinists sent by the Maréchal de Brissac to Catherine de' Medici; soon he adopted French nationality and changed his name to Balthasar de Beaujoyeux. Beaujoyeux was not only a good musician and a competent violinist, but also a tactful and successful courtier who rapidly found favour with his French masters, serving successively as *valet de chambre* to the sovereign, to Queen Catherine, Mary Stuart, Charles IX and Henri III of Valois. His principal duties at court were those of ballet-master and 'master of the revels', devising and superintending a variety of court entertainments, including masquerades, pastorals and *intermedi*. Influenced on the one hand by the performances of the Italian travelling troupe, the Compagnia dei Gelosi, then in Paris, and on the other by the aesthetics of the Pléiade, Beaujoyeux' choreographic skills found full expression in the luxurious and costly *Magnificences* of 1581, a series of extravagant productions given by Henri III on the occasion of the marriage of the Duc de Joyeuse to Queen Louise's half-sister, Marguérite de Vaudemont.

One of these, the *Balet comique de la Royne*, presented on 15 October 1581, was largely Beaujoyeux' creation and is his only extant work (ed. and Eng. trans., *MSD*, xxv, 1971). It was the result of collaboration by various artists connected with the court: the story was by Agrippa d'Aubigny, the text by La Chesnaye, the king's almoner, the music by Lambert de Beaulieu and Jacques Salmon and the scenery by Jacques Patin. Beaujoyeux was the stage manager and choreographer. The result was an important forerunner of the *ballet de cour* and through the strong dynastic links between the Valois and the Medici was to have an impact on the development of staged dance in Italy, beginning with the final choreographed *intermedio* for *La Pellegrina*, performed at the 1589 Florentine wedding festivities. The music applied the technique of *musique mesurée* in the choral sections, while several of the solo airs are in the new monodic recitative style of the time and some sections of the ballet are in five parts for instruments alone.

CAROL MACCLINTOCK/IAIN FENLON

**Beaulaigue** [Beaulègue], **Barthélemy** (*b c*1543; *fl* Marseilles, 1555–8). French composer and poet. In December 1557 Robert Granjon and Guillaume Guéroult of Lyons announced that they intended to publish 'new music by a child from Marseilles'; the dedication of the ensuing *Chansons nouvelles … à quatre parties* (Lyons, 1558–9; ed. in Auda and Goosse) to Diane de Poitiers describes him as a choirboy at Marseilles Cathedral, and begs indulgence for the first efforts of a 15-year-old student, promising something more worthy in the future. The first two of the 13 chansons are addressed to Diane, with three more dedicated to Leon Strozzi, a naval commander based at Marseilles from 1549 to 1551 who died in 1554; this suggests that the chansons were written before Beaulaigue was even 12 years old. The superius partbook contains a portrait of the composer (see illustration). According to the title-page he also wrote the poems, all of them extended *épigrammes* with decasyllabic lines using conventional courtly language. The clearcut form of the music and its generally homophonic style are typical of the mid-century French chanson.

The 14 motets of his *Mottetz nouvellement mis en musique* (Lyons, 1559; ed. in Auda and Goosse), for four to eight voices, are more varied in construction and more polyphonic than the chansons; the text *Vidi turbam magnam* is set twice, the second time with a canon by inversion in the top part. Three of the pieces show connections with Marseilles: the first, *Surgite omnes gentes*, for five voices, is dedicated to the Cardinal of Lorraine (Charles de Guise), who was 'passing through Marseilles on his way to Rome', and two others praise the patron saints of Marseilles; one of these, *Videas Dominus*, together with another eight-voice motet from the same volume, *Vidi turbam magnam*, was reprinted at Nuremberg in *Thesaurus musicus* (RISM 1564[1]). The literary expertise of the chansons, the musical maturity of both collections, the absence of later compositions and the complete lack of archival material documenting Beaulaigue's activity raise doubts that the child prodigy ever existed; the possibility that the publishers engaged in fraud is discussed by Durand.

FRANK DOBBINS

**Beaulieu, André Rosiers,** Sieur de. *See* ROSIERS, ANDRÉ DE.

**Beaulieu** [Martin, Martin-Beaulieu], **(Marie) Désiré** (*b* Paris, 11 April 1791; *d* Niort, Deux Sèvres, 21 Dec 1863). French composer, folk music collector, musical philanthropist and writer on music. He studied the violin with Rodolphe Kreutzer and composition with Benincori before entering the Paris Conservatoire in Méhul's class. In 1810 he won the Prix de Rome, but instead of going to Italy as the prize required, he settled at Niort and became engaged to Françoise Caroline Rouget de Gourcez, whom he married in 1816. He nonetheless continued to meet the other requirements of the prize, including the submission of both sacred and secular compositions which show him to have been a well-trained though conservative musician. In 1818, the year after Méhul's death, Beaulieu wrote his most ambitious work, a Requiem in his teacher's memory.

Beaulieu's contributions to musical life in Western France were substantial. In 1827 he founded a philharmonic society in Niort to perform vocal music from the 16th century to the 18th, as well as modern works. Eight years later he established a more serious organization, the Association Musicale de l'Ouest; it sponsored annual concert series in Niort, Poitiers, La Rochelle and elsewhere that involved regional professionals and amateurs in large-scale choral works, as well as chamber and orchestral repertory. Under its aegis Mendelssohn's *St Paul* and *Elijah* and Handel's *Alexander's Feast* were presented in France for the first time. Also important were Beaulieu's activities as a collector of folk music in his region. He participated in civic life, and was acting mayor in 1844; he was president of the local academic society and founded the charitable Société de Secours Mutuels.

Several of Beaulieu's works were performed in Paris during the 1840s, 50s and 60s, and in 1860 he founded there the Société de Chant Classique whose aims were to promote choral music in Paris and to raise funds for the charitable Association des Artistes Musiciens (which was later renamed the Fondation Beaulieu). In part subventioned by Beaulieu's estate, it continued until 1912. The other beneficiaries after his widow's death were the Association Musicale de l'Ouest and the library in Niort. Beaulieu was not the author of romances and other short pieces published in Paris in the 1840s under the name Désiré Martin, as some catalogues indicate.

WORKS

*for additional sources see Beaulieu collection, Bibliothèque Médiathèque Régionale de la Ville de Niort*

Liturgical: Miserere, 4 solo vv, 4vv, orch, 1812, *F-Pn**; Laudate Dominum, 2 choruses, 2 orch, 1813, *Pn**; Domine salvum, 4 solo vv, 5vv, orch, 1814, *Pn**; Messe de requiem, 4 solo vv, 4vv, orch, 1818 (Paris, 1866), *Pn**; Messe solennelle, 4 solo vv, 4vv, orch, 1845 (Paris, 1866); Messe à trois voix, org. 1853 (Paris, 1867); Salve regina, s, org, 1859

Other sacred: O Dieu, qui par un choix propice (J.-B. Rousseau), 4 solo vv, vv, orch, 1828, *Pn**; J'ai vu mes tristes journées (Rousseau), 1v, orch, 1828; Prière des matelots, solo vv, 5vv, vc, b, tpt, 1831; Hymne pour la première communion (E. Deschamps), S, girls' choir, 1840; Où donc es-tu, Seigneur? (A. de Lamartine), op.1, 5vv, vc, b, tpt (Niort, 1845); Cantique pour la fête de Sainte Anne, 1845; La charité (J.A. Vinaty), hymne, 1852; Dieu de lumière, hymne, 2 solo vv, 5vv; O rives du Jourdain! (after J. Racine), S, 4vv, orch, 1860; Jehovah, de la terre, a consacré les cimes, choir, 2 tpt (?Niort, n.d.)

Ops and op excerpts: Anacréon (1, Gentil-Bernard [P.J. Bernard]), 1818–19; Tout mortel doit ici paraître (P. Quinault), 1830; Ninette à la cour (oc, C.S. Favart), 1929, inc.; Philadelphie (1), 1855

Other vocal: Alcyone (A.V. Arnault), scène dramatique, 1808; Céphale (J.-B. Rousseau), cant., 1808; Cupidon pleurant Psyché (Arnault), scène dramatique, 1809; Circé (Rousseau), cant., 1809; Agar dans le désert (V.J.E. de Jouy), scène lyrique, 1809, *Pn**; Marie Stuart (Jouy) monologue lyrique, S, orch, 1810; Héro (J.M.B.B. de Saint-Victor), cant., 1810, *Pn**; Sapho à Leucade (Vinaty), scène lyrique, 1813, *Pn**; Scène lyrique adressée à Mme la duchesse d'Angoulême, 1815; Jeanne d'Arc (Vinaty), cant., 1817; Ode sur la naissance de Louis XV (?Niort, 1820); Fantaisie sur des airs des Pyrénées, solo vv, vv, orch, 1828; Psyché et l'Amour (J.-B.P. Molière and P. Corneille), scène lyrique, 1833; Fête bachique (Rousseau), 2 T, choir, orch, 1835; Sombre océan (E. Deschamps), 1841; Hymne du matin (Lamartine), orat, 1843 (Paris, n.d.); Dithyrambe sur l'immortalité de l'âme (J. Delille), orat, 1850; L'hymne de la nuit (Lamartine), orat, 1851; Jeanne d'Arc, grande scène lyrique, 1853; others

M. ELIZABETH C. BARTLET

**Beaulieu, Eustorg** [Hector] **de** (*b* Beaulieu-sur-Ménoire, Bas-Limousin, *c*1495; *d* Basle, 8 Jan 1552). French poet and composer. He was organist at Lectoure Cathedral (Gers) in 1522 and from 1524 taught music at Tulle. About this time he entered the priesthood. He moved to Lyons in 1534 (probably at the instigation of Charles d'Estaing, one of the canons at St Jean Cathedral), where he entered the service of the governor of Lyons, Pomponio Trivulzi. His *Les divers rapportz* (Lyons, 1537; ed. M.A. Pegg, Geneva, 1964) includes some biographical details and the texts of 12 chansons which he claimed to have set for three and four voices, but only three of the pieces survive with music; a further setting, ascribed to Jean Caulery, was published by Phalèse in 1552. Beaulieu also frequented the town's literary and musical salons, making the acquaintance of Maurice Scève and Jean Pérreal and the composer Francesco de Layolle. The evangelical philosophy of Margaret of Navarre and her circle may have influenced Beaulieu's conversion to Protestantism. He left for Geneva at the end of April 1537, but soon moved on to Lausanne, where he studied theology. On 12 May 1540 the consistory of Berne appointed him pastor of Thierrens and Moudon. A few months later he married but his young wife left him soon afterwards, accusing him of homosexuality. By August 1540 he had completed a collection of psalms but was apparently unable to secure Calvin's permission for their publication. However, the texts of 160 *chansons spirituelles* were printed on 12 August 1546 with the title *Chrestienne resjouyssance*. Beaulieu promised to publish three- or four-voice settings of 39 of the pieces together with a number of Latin motets, but as far as is known these never appeared; four of the poems, set for four voices by Caulery, were published in Antwerp (RISM 1556[18]). After another unsuccessful marriage he resigned his pastorate, moving first to Biel (near Berne) and then to Basle, where he matriculated at the university in 1548 and enjoyed the support of Bonifacius Amerbach, then rector of Basle University.

FRANK DOBBINS

**Beaulieu, Girard de.** French music teacher and possibly a composer, who may have been related to LAMBERT DE BEAULIEU.

**Beaulieu, Lambert de** (*fl* 1559–90). French ?composer and singer. His voice was praised in an ode by Olivier de Magny published in 1559. Fétis claimed that he composed the vocal music to Beaujoyeux's *Balet comique de la Royne* (Paris, 1582/*R*; ed. in MSD, xxv, 1971), though Mersenne attributed it to Girard de Beaulieu. Beaujoyeux's preface to the work explained that the queen, Louise de Lorraine, commissioned the music from 'Sieur de Beaulieu' who was in her service, and that he in turn sought assistance from the king's chamber musicians, notably Jacques Salmon. Lambert was probably also the singer who took the virtuoso bass part of Glaucus in the

ballet, and who, according to Fétis, was a chamber musician to Henri III in 1583–4. In 1590 Emperor Rudolf II wrote to his ambassador at Paris requesting that inquiries be made about engaging Lambert de Beaulieu whom he described as 'a celebrated bass singer of rare voice who accompanied himself on the lyre' and who had previously been in the service of Henri III. Fabrice Marin Caietain's first book of *airs* (RISM 1576[3]) contains three settings of courtly poems by Desportes attributed to 'De Beaulieu'; the similarity between these and the vocal music of the *Balet comique* suggests that the same composer was responsible for both. In the dedication Caietain described Beaulieu as the 'Arion' of France and acknowledged him, together with Joachim Thibault de Courville, as his models for quantitatively measured music 'for they not only excel in lyrical recitation but are learned in the art of music and perfect in the composition of *airs* which the Greeks call melopoeia'.

Two rustic songs in popular style attributed to 'Beaulieu' in Le Roy & Ballard's fourth book of chansons for four voices (RISM 1553[23]; both songs ed. in SCC, ix, 1995) are stylistically unlike the *airs* of 1576 and the *Balet comique*. It is not known whether any of the musicians named Beaulieu in late 16th-century France were related. Girard de Beaulieu, mentioned above, was described in a document of 25 May 1590 as music master to the Chevalier d'Aumale. Others named Beaulieu include Mathurin, who was employed at St Merry, Paris, in May 1574, and Pierre le Proust, Sieur de Beaulieu, a nobleman who witnessed Beaujoyeux's wedding in 1595.

FRANK DOBBINS

**Beaumarchais, Pierre-Augustin** [Caron de] (*b* Paris, 24 Jan 1732; *d* Paris, 18 May 1799). French writer. The son of a clockmaker, he defended his invention of a watch escapement mechanism against theft by the royal clockmaker Lepaute, whom he replaced at court in 1755. He subsequently became harp teacher to the daughters of Louis XV and, thanks to contact with the *homme d'affaires* Pâris-Duverney, was ultimately able to buy himself into the nobility. In his *Essai sur le genre dramatique sérieux* (1767), the preface to his *Eugénie*, he took up the ideas of Diderot in favour of a distinct genre of *drame*, different from both French classical tragedy and comedy. His works in this genre outnumber his Figaro comedies, and even these show its influence: he returned to it fully in the third Figaro play, *La mère coupable* (1792). His racy *parades*, playlets written for the high-society private stage, served as an apprenticeship in comic musical theatre, particularly in the use of vaudevilles (well-known tunes sung, as part of the dramatic text, to new words). *Le barbier de Séville* was first conceived as a more substantial musical play in this form, but was refused by the Théâtre Italien (which had absorbed the Opéra-Comique) in 1772. Song remained an important structural element in the final dialogue comedy version, successful at the Comédie-Française in 1775. Having attempted to make dramatic use of entr'acte music in *Eugénie*, he successfully included Baudron's storm music as a prelude to Act 4 of *Le barbier*, and, alongside continued use of vaudeville tunes in *Le mariage de Figaro* (1784), stretched Comédie-Française conventions by introducing a whole scene of dance, song and mime for the 'coronation' of Suzanne with the bride's head-dress (4.x). The tune of the *vaudeville final* of this famous comedy, originally by Tissier for Madame d'Antremont's anacreontic poem *La fauvette* (Bazile sings its first verse in Act 4 scene x), was immensely popular during the Revolution, as indeed was that for Chérubin's burlesque *romance*: 'Malbrouck s'en va-t-en guerre' (2.iv). As if to vindicate Beaumarchais's musical instinct, *Le barbier de Séville* attracted settings by Benda, Paisiello, Isouard and Rossini, while the Mozart-Da Ponte collaboration in *Le nozze di Figaro* proved just how much of the original play was translatable into music. Beaumarchais also collaborated with Salieri, and held views on the role of music at variance with Mozart's operatic practice. He set forth his theories on opera in the foreword to his libretto *Tarare* – 'Aux abonnés de l'Opéra qui voudraient aimer l'opéra' (1787) – which called for a closer collaboration of composer and librettist, the subordination of music to text and the choice of great philosophical ideas as subjects. Seeking a *confusion des genres*, a *genre mixte*, he strove to renew the language of librettos by eliminating classical vocabulary while allowing bizarre and familiar expressions, archaisms, neologisms and words hitherto offensive to propriety. *Tarare* (1787), set by Salieri, remains a landmark for 19th-century opera. Contemporary sources refer to Beaumarchais as a composer, but no work by him survives. The stage music for his Figaro comedies was by Antoine Laurent Baudron, and although it survives in an original engraving for *Le barbier*, the music for *Le mariage* is now lost and only reliably traceable in counterfeit editions of the play (1785).

RUDOLPH ANGERMÜLLER/PHILIP ROBINSON

**Beaumesnil, Henriette Adélaïde Villard de** (*b* Paris, 30 or 31 Aug 1748; *d* Paris, 1813). French singer and composer. Having specialized from the age of seven in soubrette roles in comedies, she made a successful début at the Paris Opéra on 27 November 1766, replacing Sophie Arnould in the title role of *Silvie* (P.-M. Berton and J.-C. Trial). She sang in many premières and revivals until her retirement in 1781, creating with Rosalie Levasseur the role of Iphigenia in Gluck's *Iphigénie en Tauride* (1779), and although her talents were overshadowed by those of Arnould and Levasseur, she was considered an enchanting singer, actress and dancer.

*Anacréon*, a one-act opera and her first composition, received a private performance at the Brunoy residence of the Comte de Provence on 5 December 1781. Beaumesnil then achieved public success with her *acte de ballet Tibulle et Délie, ou Les Saturnales* (after L. Fuzelier: *Les fêtes grecques et romaines*), which was given at the Paris Opéra on 15 March 1784 (and published) after a court première the previous month, and with the two-act *opéra comique Plaire, c'est commander* (libretto by Marquis de La Salle), performed at the Théâtre Montansier, Paris, on 12 May 1792. Her operas were light and *galant* in style; an oratorio, *Les Israëlites poursuivis par Pharaon*, showed her more serious vein and was heard at the Concert Spirituel (where, during the 1760s, she had performed as a soloist) on 8 December 1784. She is further remembered for her part in a 'duel au pistolet' with the dancer Mlle Théodore, described in detail by Campardon.

ELISABETH COOK

**Beausseron** [Beausiron], **Johannes Bonnevin alias** (*b* Chenou, Château-Landon, between ?1475 and 1490; *d* Rome, 22 May 1542). French composer. His sobriquet, which appears with his music to the exclusion of his family name, reflects his origin in the region of Beauce. He became a member of the Ste Chapelle, Paris, in February 1511. In June 1514 or shortly before, he entered the papal chapel and remained there until his sudden death. He received several benefices from Leo X, who appointed him an apostolic notary; towards the end of his life he appears to have belonged to the private chapel of Paul III. Beausseron was one of the French composers at the Vatican who helped establish the smooth, polished style typical of Roman music from the mid-16th century onwards. His vocal lines, mostly based on chant melodies, unfold in flowing, predominantly conjunct motion without marked rhythmic impetus. He preferred full textures with relatively little systematic imitation. His treatment of dissonance, although sometimes awkward, reveals a concern for harmonic clarity.

JOSHUA RIFKIN/R

**Beauvais.** City in France. It is the diocesan seat in the archdiocese of Reims. It was the capital of the Bellovaci Gauls until Julius Caesar's conquest in 57 BCE; the Normans overran it in 851 and 861. The last reference to a lay Count of Beauvais occurs in 1035, and by the 12th century the bishops were powerful feudal lords. From the early 13th century royal authority was entrenched in the town, but it retained some independence until the time of the Hundred Years War. It is now the seat of the prefecture of the Oise département. The present Cathedral of St Pierre was begun in about 1240; older foundations include Notre Dame de la Basse-Oeuvre and St Etienne, whose present building dates mainly from the 12th century.

A manuscript compiled in Beauvais between 1227 and 1234 (now *GB-Lbl* Eg.2615) contains a complete liturgy for 1 January, the Feast of Circumcision (First Vespers, Procession to the Rood, Compline, Matins, Lauds, Mass, Sext, None and Second Vespers; edition and extensive discussion by Arlt). Its rich repertory of *Benedicamus* tropes and conductus is comparable with festal liturgies of this period from Sens and Laon, and it is of particular interest for its inclusion of polyphonic music showing the influence on an older tradition of the new early 13th-century Parisian style associated with the name of Perotinus, which is assimilated to varying degrees. Concordances among the numerous conductus occur in Norman-Sicilian and Aquitanian manuscripts. The well-known Song of the Ass, *Orientis partibus*, appears in two forms, in three-part music and in a monophonic version headed 'Conductus as the ass is led in'. Later sections of this manuscript contain polyphonic compositions from Paris and also pieces in a style which may be described as 'peripheral' in comparison with the 'central' Notre Dame repertory (facsimiles and discussion by Everist). These pieces are in different hands and are less perfectly suited to the requirements of the Beauvais Circumcision Office, though presumbly collected with that purpose in mind

and eventually bound together with the rest. Yet another section contains the famous *Ludus Danielis*, apparently written by scholars of the cathedral school for performances at the close of Matins on New Year's Day. The tradition of the mystery play continued at Beauvais Cathedral at least until 1452, when a *Mystère de St Pierre* was performed.

Beauvais has produced only one composer of importance, Eustache Du Caurroy (1549–1609), baptized in Notre Dame de la Basse-Oeuvre and probably educated at the cathedral choir school. There are brief records of several 16th-century musicians: Nicolle des Celliers de Hesdin (*d* 1538), *maître* of the choir school; the cathedral organists Jean Doublet (1532), Robert Godard (1540), Jean le Roux or Ruffi (1560) and Jean Mollet (1575); and Berthaud Turquet, choirboy at the cathedral and *maître* at Senlis, appointed to St Sauveur in 1559.

An organ was built for the cathedral in 1531 by François and Alexandre des Oliviers of Paris, and inspected by a Canon Mouton of Paris on 6 September 1532; the present organ was constructed by the Belgian builder Cosyn (1826–8). Jean de Bavencourt worked on the organ of St Martin in 1488 and on that of St Etienne in 1511. The organ of St Sauveur was worked on in 1509 by Georges Fleury and in 1584 by Denis de Journy, who also built an organ for Notre Dame, La Neuville en Hez, in 1559.

The names of some Beauvais minstrels are known: Eude (12th century), Robert and Selet (13th century). There was an annual convention in the 14th and 15th centuries, and in 1563 a *ménestrandie* was established.

In 1766 a Société de Musique was formed of professionals and amateurs and gave concerts patterned on those of the Concert Spirituel. From 1773, when a theatre was constructed, it also performed *opéras comiques*. The Société Philharmonique was founded in 1825 under the direction of Louis Graves.

DAVID HILEY

**Beauvais, Vincent de.** *See* VINCENT DE BEAUVAIS.

**Beauvarlet, Henricus** (*b* Lille, before 1575; *d* Veurne, West Flanders, between 26 Feb and 27 June 1623). Franco-Flemish composer and priest. On 28 May 1593 he became *phonascus* at the St Walburga, Veurne; he also had to attend a number of services each day and to conduct Mass four times a week. At the yearly renewals of his post he was frequently reprimanded for negligence and later for drunkenness also. From 9 August 1602 to 27 June 1603 he was even suspended and in 1609 spent four days in the chapter prison. On 2 July 1612 he was replaced, and from this time he remained attached to the church only as a vicar. On 27 January 1598 he had been appointed chaplain of the altar of St Peter and St Paul; in November 1612 he resigned this prebend probably in exchange for that of the altar of St Catharine, of which he was chaplain at the time of his death. After 1612 he substituted occasionally for the new *phonascus* and was paid for doing so; this arrangement seems to have terminated about 1619.

Shortly before his death he published *Missae octo, V., VI. et VIII. vocum* (Douai, 1622; 4 ed. in MMBel, xi, 1974); in the dedication, to the magistrate of Veurne (who gave him six bottles of wine and 200 guilders to meet the cost of printing), he remarked that he had collected together his earlier mass compositions for the use of churches, in particular the St Walburga. These parody masses show a sound if somewhat uninspired craftsmanship and may be considered stylistically as a local outcrop of 16th-century Netherlandish polyphony.

GODELIEVE SPIESSENS

**Beauvarlet-Charpentier, Jacques-Marie** (*b* Lyons, 3 July 1766; *d* Paris, 7 Sept 1834). French composer and organist, the son of JEAN-JACQUES BEAUVARLET-CHARPENTIER. Unlike his father, he published under the name 'Beauvarlet-Charpentier', although in official documents he was known as 'Beauvarlet, dit Charpentier'. *Survivancier* of his father at St Paul in the Marais before the Revolution, he rode comfortably through the political upheavals, serving as organist of the Théophilanthropes and at the Temple de la Reconnaissance (1799, 1800), and composing pieces adapted to the times: *Le réveil du peuple* (1795), *Cérémonie du couronnement de sa majesté l'empereur* (1804), *Louis le désiré à Paris* (*c*1814) and finally *Plus de politique*. When religious observances were restored, he obtained successively organist's posts at St Germain-l'Auxerrois, St Germain-des-Prés, St Eustache, St Paul-St Louis and the Chapelle des Missions Etrangères. When he became organist at St Eustache in 1831 he stipulated that his son, Charles-Emile (*b* Paris, 9 June 1816), be allowed to substitute for him on occasion. Although he himself was later celebrated as one of the best organists the church ever had (Ply), his son's theatrically playing almost lost him the post. He also worked as a music publisher and dealer in instruments; this activity slowed in 1815 and ceased in 1821. The catalogues of the Bibliothèque Nationale list some 50 songs and romances, ten large programmatic pieces for piano celebrating battles and other events, two republican hymns, variations and arrangements for piano, and organ music including masses, *Magnificat* settings, hymns and noëls. A one-act opera, *Gervais ou Le jeune Aveugle*, was in the repertory of the Théâtre des Jeunes Artistes for

seven months in 1802. What success it enjoyed was despite the weakness of the libretto and music, according to the *Courrier des spectacles* (16 June 1802).

DAVID FULLER/BRUCE GUSTAFSON

**Beauvarlet-Charpentier, Jean-Jacques** (*b* Abbeville, 28 June 1734; *d* Paris, 6 May 1794). French composer and organist. He was one of the most celebrated organists of the late 18th century. His father was Jean-Baptiste Beauvarlet (*d* Lyons, 1763), merchant dyer according to the baptismal certificate (Servières) and organist and instrument maker (Vallas). It is not known why he added the name Charpentier, but it was under that name alone that most of his compositions were published. He succeeded his father as organist of the Hospice de la Charité in Lyons and married Marie Birol, a singer who became known in Lyons and Paris under her husband's name; they had a daughter (1764) and a son, Jacques-Marie. Jean-Jacques was heard on the organ of the Concert Spirituel of Paris as early as 1759 (Pierre), but he continued living in Lyons until 1771, where he played the organ at the Académie des Beaux Arts from 1763, performing two of his own concertos in December 1765. Towards the end of his stay in Lyons the programmes grew increasingly trivial, and Jean-Jacques played chiefly comic-opera tunes and overtures.

In 1771, he became organist of the royal abbey of St Victor in Paris, probably on the initiative of Mgr de Montazet, archbishop of Lyons and abbot of St Victor (Fétis). In the same year he made a second appearance at the Concert Spirituel and in the next he succeeded Daquin at St Paul in the Marais, adding later on the posts at the chapel of St Eloi des Orfèvres (by 1777) and Notre Dame (1783; shared by trimesters with three others).

Beauvarlet-Charpentier's strongest music is to be found in his sonatas for harpsichord or piano with violin accompaniment, opp.2, 3 and 4 (1772–5), in which Saint-Foix detected the influence of Schobert. The idiom is early Classical with a tendency, especially in op.3, to imitate orchestral styles and textures. Some of the sonatas of opp.3 and 4, and all of op.8, are 'dans le goût de simphonie concertante'. Although thematically unimaginative and narrow in their range of expression, these works show that Beauvarlet-Charpentier had a surprising ability (for a French organist of the period) to sustain ample curves of tension by delaying cadences and maintaining rhythmic energy. His organ music is weakened by the failure to reconcile style and medium, by a feeble grasp of counterpoint and by a hasty, improvisatory approach to form.

DAVID FULLER/BRUCE GUSTAFSON

**Beaux Arts Trio.** American piano trio. It was formed in New York in 1955 by the pianist Menahem Pressler (*b* Magdeburg, 16 Dec 1923), the violinist Daniel Guilet and the cellist Bernard Greenhouse. Encouraged by Robert Casadesus, in whose house they rehearsed, the three made a sensational début at the Berkshire Music Festival in Tanglewood; and in autumn 1955 they made their first nationwide tour. Guilet (under his original name Guilevitch) had been a member of the Calvet Quartet of Paris for a decade before the war and had led the Opéra-Comique Orchestra; after emigrating to the USA in 1941, he had led his own quartet and Toscanini's NBC SO. His style of playing, grounded in Franco-Belgian traditions, strongly coloured the trio's early performances and recordings, the latter including works by Haydn, Mendelssohn, Dvořák, Fauré and Ravel, as well as outstanding Mozart, Beethoven and Schubert cycles. His younger colleagues, who counted Egon Petri and Pablo Casals among their teachers, played with refulgent tone and deep musicality but – under his influence – always with a light touch. For a time all three taught at the University of

Indiana School of Music. When Guilet retired in 1969 he was replaced by Isidore Cohen, a former member of the Schneider and Juilliard Quartets.

This formation of the ensemble toured indefatigably and recorded a vast range of music, including all the trios of Haydn and the Mozart and Brahms piano quartets (with Bruno Giuranna and Walter Trampler respectively). The Mozart, Beethoven and Schubert trios were re-recorded, confirming the impression gained in the concert hall that the group's style had broadened and deepened, but also coarsened to a degree. Its saving grace was the wit it brought to many of its performances, for instance in Charles Ives's Trio. In 1987, on Greenhouse's retirement, Peter Wiley came into the group. In 1990 George Rochberg's *Summer 1990* received its première by the Beaux Arts Trio, followed in 1991 by Ned Rorem's *Spring Music* and then by David Baker's *Roots II*. In 1992 Cohen retired, his replacement being Ida Kavafian. This formation proved to have a more combustible chemistry; in the recording studio, it was commemorated by an excellent disc of trios by Hummel. In 1998 both string players withdrew and Pressler was joined by the violinist Young Uck Kim and the cellist Antonio Meneses. The Beaux Arts Trio's ability to renew itself across several generations has owed much to Pressler's sparkling technique, whole-hearted involvement and sense of style. The group has been vastly influential and has raised the profile of the piano trio as a form but has left the repertory more or less as it found it.

TULLY POTTER

**Beber, Ambrosius** (*fl* 1610–20). German composer. All that is known of Beber, who described himself as a 'musician of Naumburg', is that he worked there in the first quarter of the 17th century. He is important for a *St Mark Passion* that he sent to the town council of Delitzsch in 1610 and to the Elector Johann Georg I of Saxony in 1620. A *Historia Johannis des Täufers* is known only from an entry in the catalogue of the Delitzsch Kantorei. The title of the St Mark Passion reads: *Historia des Leidens Christi nach dem Evangelisten S. Marco auf zween Chor componirt* (solo parts in *D-Bsb*, choruses in *F-Pn*, fonds du Conservatoire; ed. in Cw, lxvi, 1958; ed. K. Beckmann, Wiesbaden, 1971). The peculiarity of this work lies in its departure from the normal Passion tone of the Lydian mode; like Heinrich Schütz's *St Matthew Passion*, but antedating it by some 50 years, it uses the Hypodorian mode. No Passion in the intervening years is known to do so, but there are indications that Beber's work is not unique at the time but belongs to a particular tradition about which little detail is known (see Ameln, Mahrenholz and Thomas). Moreover, the work belongs to the mixed type of Passion introduced into Germany by Antonio Scandello and standing midway between the responsorial Passion and the motet Passion, only the Evangelist's part being set as solo recitative. Beber set the exordium and the words of the various characters for two to four voices, the 'gratiarum actio' for five. The expression 'for two choirs' in the title therefore signifies not a double choir in the sense of *cori spezzati* but rather – following the early Baroque use of the expression – the juxtaposition of different bodies of sound, not necessarily choral (cf the preface to Schütz's *Auferstehungshistorie*).

WALTER BLANKENBURG

**Bebey, Francis** (*b* Douala, Cameroon, 16 July 1929). Cameroonian composer, writer and musician. He studied mathematics in Douala and continued to study English at the Sorbonne, Paris, and is perhaps best known for his comprehensive guide to African music, first published in French as *Musique de l'Afrique* (1969), later translated into English (1975). He assumed a post in the Department of Information at UNESCO in 1972. In addition to his writing, Bebey is also known as a guitarist and a composer. His solo recital tours (USA, Canada, Africa and Europe) typically included arrangements of African-influenced materials, as well as his own compositions. His best-known compositions are perhaps *Le Christ est né à Bomba* (1963), *Black Tears* (1963), *Concert for an Old Mask* (1965), *The Ashanti Doll is Sleeping* (1967) and *The Poet's Virile Prayer* (1973). Bebey's guitar-playing style, classical rather than the typical African two-finger playing style, demonstrates the difficult artistic position he has adopted, neither 'African' nor 'European'. At times rejected by African communities at home, he has tenaciously pursued an individual career.

GREGORY F. BARZ

**Bebization.** A short-lived seven-step SOLMIZATION system published by Daniel Hitzler in *Extract aus der Neuen Musica oder Singkunst* (Nuremberg, 1623). Permanently related to the octave on A, the vocables ran *la–be–ce–de–me–fe–ge*, each pitch name incorporating an alphabetical note name. The chromatic scale was notated as shown in ex.1. The system took its name from the two forms of B.

BERNARR RAINBOW

Ex.1

**Bebop.** *See* BOP.

**Bebung** (Ger., from *beben*: 'to tremble'; Fr. *balancement*). (1) A vibrato obtained on the clavichord by alternately increasing and decreasing the pressure of the finger on the key. The effect is described by a number of mid-18th-century writers, notably Mattheson ('tremolo'), F.W. Marpurg and C.P.E. Bach. Bach (1753) wrote that it should be used on long *affettuoso* notes, and added (in the 1787 edition) that the vibrato should be delayed until the second half of the note. *Bebung* is indicated by a slur and dots over the note to which it is to be applied (as in ex.1) and Marpurg (1755, 2/1765) suggested that the

Ex.1

number of dots indicates the number of pulses one should employ, although this is difficult to accept and there is no mention of this point in either his *Die Kunst das Clavier zu spielen* (1762) or the French translation of the *Anleitung* (1756).

Although *Bebung* is possible on clavichords of the 16th and 17th centuries, the 18th-century writings suggest that the effect was then new and that its use was confined to long notes and pieces of a tragic character.

(2) Generic term used in Germany during the 18th century to denote a vibrato on a single note; it is synonymous with *Schwebung*. It was first mentioned by E.G. Baron (1727) as an ornament used in lute playing, and was common from at least 1750. It is mentioned in connection with singing and clavichord playing (Marpurg, 1750, Agricola, Hiller and Lasser), violin playing (Quantz, Mozart (as synonym of *Tremolo*), Petri and Löhlein), flute playing (Quantz, Tromlitz) and trumpet playing (Altenburg). It was to be used occasionally, according to the character of the piece. The *Bebung* was indicated in clavichord music and also in Altenburg's trumpet tutor by slurred dots (see above); Baron used a double cross and, on the lower strings only, a single slanting cross (ж and X) (*see* LUTE, §6). Other sources merely describe the use of the ornament. During the latter half of the 18th century there was a strong tendency towards the use of vibrato on most long notes, although this was not advocated by all theorists.

*See also* VIBRATO and ORNAMENTS, §8.

**Bécaud, Gilbert** [Silly, François] (*b* Toulon, 24 Oct 1927). French composer and singer. He studied at the Nice and Toulon conservatories and during World War II was active in the Résistance (Maquis) in Savoie. He began composing songs in 1948, which were taken up by popular singers including Marie Bizet and Edith Piaf, who sang his *Je t'ai dans la peau*. The poet Louis Amade encouraged him and became one of Bécaud's regular lyricists, with Pierre Delanoë and Maurice Vidalin. Bécaud performed at the re-opening of the Olympia music hall in Paris (1954) to immediate success, becoming known as 'Monsieur 100,000 Volts'. His songs were performed around the world in translations: *Et maintenant*, for example, was recorded by Frank Sinatra as *What now, my love?*. He attempted large-scale works, such as the cantata *L'enfant à l'étoile* (1961) with words by Amade. His opera *L'opéra d'Aran* (1962), to a libretto by Jacques Emmanuel and with lyrics by Amade and Delanoë, was first performed at the Paris Opéra and recorded complete with the original cast including Bécaud himself, Suzanne Sarroca, André Turp, Jacques Mars and Roger Soyer; the operatic voices jar with Bécaud's pop-style rhythms and melodies, but the piece retains a powerful mixture of lyricism and urgent drama.

WORKS
(*selective list*)

Dramatic works: L'enfant à l'étoile (cant., L. Amade), 1961; *L'opéra d'Aran* (op, J. Emmanuel; L. Amade and P. Delanoë), 1962
Songs, lyricist in parentheses: L'absent (Amade); Alors, raconte (Broussolle); La ballade des baladins (Amade); Le bateau blanc (Vidalin); Les cerisiers sont blans (Vidalin); C'était mon copain (Amade); Les croix (Amade); Dimanche à Orly (Delanoë); Et maintenant (Delanoë); L'importance c'est la rose (Amade); L'indifference (Vidalin); Je crois en toi; Je reviens de te chercher (Delanoë); Je t'ai dans la peau (Pills); Je t'appartiens (Amade); Le jour où la pluie viendra (Delanoë); Les marches de Provence (Amade)

Le mur (Vidalin); L'orange (Delanoë); Mes main (Delanoë); Nathalie (Delanoë); Pilou-Pilouhé (Amade); Quand il est mort le poète (Amade); Le rideau rouge (Amade); Tu le regretteras (Delanoë); Seul sur son étoile (Vidalin); La solitude, ça n'existe pas (Amade); L'un entre eux inventa la mort (Delanoë); Un peu d'amour et d'amitié (Amade)

PATRICK O'CONNOR

**Beccatelli, Giovanni Francesco** (*b* Florence, 8 Nov 1679; *d* ?Prato, 1734). Italian theorist and composer. Beccatelli's early musical studies were under Virgilio Cionchi and G.M. Casini in Florence. By order of Grand Duke Cosimo III, he was made *maestro di cappella* and organist of Prato Cathedral in 1704 where he remained until his death. Although he composed a quantity of church music, Beccatelli was best known as a speculative writer on music theory and its history. As one of the Florentine neo-Pythagoreans of the late Baroque (cf Nigetti and Casini), Beccatelli treated problems of temperament and relied heavily on mathematical reasoning. Of particular interest is his contention that the 4th is a consonance (see Lustig). His supporting arguments include the construction of an hypothetical *modo obbliquo* in which all the intervals of the normal *modo retto* are reckoned from the highest rather than the lowest sounding note. The result is a recognition of triadic inversions as unstable analogues to the stable root position triads. In their novel accommodation of current practice to older theory, Beccatelli's theories reveal the problems of a transitional period.

THEORETICAL WORKS

*MSS in I-Bc unless otherwise indicated*

*Annotazioni sull'opera del P. Gio: d'Avella, intitolata 'Regole di musica' etc. Roma, 1657*

JOHN WALTER HILL

**Becce, Giuseppe** (*b* Lonigo, 3 Feb 1877; *d* Berlin, 5 Oct 1973). Italian composer. He studied classical philology and geography at the University of Padua and, at the same time, studied the flute and cello at the conservatory there. In 1900 he moved to Berlin, where he may have studied composition with Leopold Schmidt and conducting with Nikisch. His first contact with the cinema was in 1913, in which year he both arranged the score and played the title role in Carl Froelich's film *Richard Wagner*; and he retained his connections with the medium throughout his life, also writing much light music and incidental music. Until the advent of sound film he conducted orchestras in the most important cinemas in Berlin, where he was responsible for the musical accompaniment for hundreds of films. Initially he prepared compilations of works from the best-known repertory; later he wrote a series of pieces that could be adapted to situations that recurred most often in the majority of films ('nocturnal atmosphere ', 'love scene' etc.). He published these works in the *Kinothek* (Berlin, 1919–29), a collection of about 90 pieces that covered virtually every situation in the accompaniment of silent films. At the same time Becce also wrote several totally or partly original scores, including *Der letzte Mann* (1924) and *Tartüff* (1925). In 1927, with Hans Erdmann and Ludwig Braf, he published the *Allegemeines Handbuch der Filmmusik*, a synthesis of the theory and practice of music for silent film. Becce also worked with sound film, writing music for more than a 100 films of every kind, notable among which are the mountain films directed by Luis Trenker.

During the era of the silent film Becce made an important contribution to the development of a musical language specifically for the cinema. Although the quality of his music, stylistically linked to the 19th century, is often modest, it is extremely well suited to the demands of the screen. As early as the 1920s he had defined topoi which would become norms even in many sound films. His output for the latter, though well crafted and of honest professionalism, is highly conventional.

WORKS
(*selective list*)

Film scores: Richard Wagner (dir. C. Froelich), 1913; Comtesse Ursel, 1913; Schuldig, 1914; Der letzte Mann (dir. F.W. Murnau), 1924; Tartüff (dir. F.W. Murnau), 1925; Das blaue Licht (dir. L. Riefenstahl), 1932; Der Rebell (dir. L. Trenker), 1932; Ekstase: Symphonie der Liebe (dir. G. Machaly), 1932; Der verlorene Sohn (dir. Trenker), 1934; Der ewige Traum (dir. A. Fanck), 1934; Der Kaiser von Kalifornien (dir. Trenker), 1936; Condottieri (dir. L. Trenker), 1937; Der Berg Ruft (dir. Trenker), 1937; Liebesbriefe aus dem Engadin (dir. L. Trenker), 1938; Der Feuerteufel (dir. Trenker), 1940; La cena delle beffe (dir. A. Blasetti), 1941; Im Banne des Monte Miracolo (dir. L. Trenker), 1948; Der König der Berge
General purpose silent film music

ENNIO SIMEON

**Becchi, (Marc')Antonio di** (*b* Parma, 19 Dec 1522; *d* after 1566). Italian lutenist and composer. The baptismal records at Parma indicate his place and date of birth (see

N. Pelicelli, *NA*, ix, 1932, pp.112–29, esp.123). His one surviving publication, *Libro primo d'intabulatura da leuto ... con alcuni balli, napolitane, madrigali, canzon francese, fantasie, recercari* (Venice, 1568, ed. G. Lefkoff: *Five Sixteenth Century Venetian Lute Books*, Washington DC, 1960), may have first appeared earlier; it divides into three parts by genre: dances, intablulations, and fantasias and ricercares. The four passamezzos 'alla millanesa' and their saltarello pairs, the romanesca and the *favorita*, each consist of three variations; the final dance *Madama mi domanda*, the title of which refers to a vocal piece, consists of two. Some of the pieces in the second part of the volume seem to be Becchi's own compositions based on popular tunes. This section also includes an intabulation of Rore's *Anchor che col partire*, printed in 1547, and of more recent pieces by Nola and Celano (printed in 1566). The third section of the volume contains anonymous fantasias and some early ricercares: three are by Spinacino, and another, transposed a tone lower, is by Francesco da Milano (in RISM 1546[30]). One piece called 'fantasia' is a literal intabulation of the chanson *L'aultre jour je vis par ung matin* (in 1530[3]).

JEANETTE B. HOLLAND/ARTHUR J. NESS

**Becerra(-Schmidt), Gustavo** (*b* Temuco, 26 Aug 1925). Chilean composer. He attended the Temuco Conservatory, studied with Pedro Humberto Allende and Domingo Santa Cruz (composition), Carvajal (conducting) and Salas Viú (musicology) at the Santiago National Conservatory (1936–48) and graduated from the University of Chile (1949), to which he returned in 1952 as professor of analysis and composition. From 1954 to 1956 he was in Europe, composing and researching music education. Subsequently he held appointments as director of the Instituto de Extensión Musical (1958–61) and secretary-general to the University of Chile faculty of music (1968–70), and was appointed cultural attaché to the Chilean Embassy in West Germany in 1971. Upon the advent of the Pinochet regime in Chile in 1973, he was granted asylum in Germany, where he combined his activities as composer and teacher at the University of Oldenburg. Among the honours he has received are membership of the Chilean Academy of Arts (1969), two Honour Prizes (1958 and 1962), the Olga Cohen Prize (1958), the National Music Prize (1971) and a medal from Spain's Ministry of Culture (1994).

Becerra's extensive output includes works in almost all media and in a great variety of styles including neoclassical, serial, electronic, mixed-media, aleatory and graphic features. He has been concerned with the relationship of music with society and political power, with the need to develop musical participation in all social strata, and with importance of the composer's communication with the public. Becerra's output is a direct application of these ideas. He has rigorously studied all musical styles as signs of society, and has conciously used them as grammar for specific signification. In this context he synthesizes elements from popular and art music, historical styles and cross-cultural influences. As a researcher he has contributed articles to the *Revista musical chilena* and several other publications.

WORKS

JUAN A. ORREGO-SALAS

**Becerra Casanovas, Roger** (*b* Trinidad, Beni, 9 Aug 1924). Bolivian composer and researcher. He studied at the Escuela Normal in Sucre and at the La Paz Conservatory with Eisner. He studied the music of the indigenous peoples of Beni and established the origins of their folkdances, especially the *taquirari*, the *machetero* and the *torito*. He was the first to examine the manuscripts, preserved in the mission of San Ignacio de Moxos, of music used by the Jesuits until their expulsion in 1767 and still used in the local chapel. He invited Samuel Claro of the University of Chile to study the repertory. As a composer he has produced several works for orchestra such as *Suite moxena* and written numerous songs and dances in popular forms such as the *taquirari* (*Misterios del Corazon* and *Viva Trinidad*), *carnaval* (*Vaca vieja*, *No pienso olvidar*, *Soledad*) and waltz (*Ilusión*, *Perdón-ame*). (O. Rojas Rojas: *Creadores de la música boliviana*, La Paz, 1995)

CARLOS SEOANE

**Becher, Alfred Julius** (*b* Manchester, 27 April 1803; *d* Vienna, 23 Nov 1848). German critic, composer and teacher. The son of a Hanau merchant who had settled in Manchester, he was taken as a child to Germany. He studied law in Jena, Berlin, Heidelberg and Leiden, taking a doctorate despite his prosecution for 'demagogic activities'; his first compositions date from this time. Already an ardent revolutionary, in whom Wagner detected 'a certain wildness and vehemence' (*Mein Leben*), he held various posts in rapid succession, including those of lawyer in Elberfeld (*c*1830), editor of a Cologne commercial newspaper founded by his father, the *Handelsblatt* (1834), and critic for the *Kölner Zeitung* and *Neue Zeitschrift für Musik*. On the failure of the *Handelsblatt*, he devoted himself entirely to music. After the death of his father and his wife he moved to The Hague to teach theory and aesthetics at the Royal Music School (1837–40). In 1840 he went to London to teach theory at the RAM, but, sent by a rich Englishman on a legal mission to Vienna at the end of the year, he remained there. He became a successful music critic, writing for the *Allgemeine Wiener Musik-Zeitung* and (from 1842) the *Sonntagsblätter*, encouraged in this by his friend of Cologne days, Mendelssohn, and supported by new friends including Castelli, Lenau, Nicolai and Vesque von Püttlingen (though opposed by Grillparzer and Laube). In 1848, on the outbreak of the March Revolution, he founded with some colleagues the extremist *Der Radikale*, whose staff included Hebbel; in this he was financially supported by Karoline von Perin (a niece of Beethoven's banker friend Pasqualati), with whom he lived. The paper's policies, which included the independence of Italy and Hungary and the dissolution of the monarchy, led to Becher's being placed high on Windischgrätz's blacklist. He went into hiding when Vienna fell, but was discovered, court-martialled for treason, and shot.

Not only Mendelssohn admired Becher: he was respected by Schumann, while Wagner, who was himself involved in the 1848 revolutionary activities, thought him 'a passionate and exceedingly cultured man' (*Mein Leben*), and Berlioz described him as 'a dreamy, introspective spirit, whose harmonic boldness surpasses anything hitherto attempted, whose aim is to enlarge the form of the quartet and give it novel appeal' (*Mémoires*). Becher in turn greatly admired Berlioz, inscribing on a photograph of himself: 'Remember from time to time, my dear Berlioz, one of your sincerest admirers. 27 February 1846' (Berlioz's subsequent comment on the photograph is: 'Shot down in Vienna by Windischgrätz ... Poor Becher!'). His songs and piano pieces achieved some popularity, but he had little success in Vienna with his chamber music, his Symphony in D minor or his *Fantaisie élégiaque* for violin (or cello) and orchestra, though the last was given at a Jenny Lind concert (some of his works were published; others remain in manuscript in *A-Ws*, *Wn* and *Wgm*). His writings include a book on the Lower Rhine Music Festival (Cologne, 1836), a biography of Jenny Lind (Vienna, 1846, 2/1847) and translations of English opera librettos.

JOHN WARRACK

**Bechet, Sidney (Joseph)** (*b* New Orleans, 14 May 1897; *d* Paris, 14 May 1959). American jazz soprano saxophonist and clarinettist. He took up the clarinet as a young boy and studied sporadically with the older clarinettists Lorenzo Tio jr, Big Eye Nelson and George Baquet, but was principally self-taught. By about 1910 he was working with some of the incipient black jazz bands in New Orleans, but around 1916 he left the city to wander (a habit which stayed with him into middle age), playing in touring shows and carnivals throughout the South and Midwest. He arrived in Chicago in 1917 and played with bands led by the New Orleans pioneers Freddie Keppard, King Oliver and Lawrence Duhé.

In 1919 Bechet was discovered by Will Marion Cook, who was about to take his large concert band, the Southern Syncopated Orchestra, to Europe. The orchestra played mainly concert music in fixed arrangements with little improvising, but featured Bechet (who could not read music) in blues specialities. In London the Swiss conductor Ernest Ansermet heard the band, and in an article that has been widely reprinted referred to Bechet as 'an extraordinary clarinet virtuoso' and an 'artist of genius'.

Bechet first discovered the curved soprano saxophone in Chicago; while in London he purchased a straight model and taught himself to play it. It became his primary instrument for the rest of his life, though he continued to play the clarinet frequently. The soprano, although difficult to play in tune, has a powerful, commanding voice, and with it Bechet was able to dominate jazz ensembles.

In 1919 Bechet broke away from the Southern Syncopated Orchestra to work in England and France with a small ragtime band led by Benny Peyton. Crucially, in 1924, he played for two or three months in New York with the Duke Ellington Orchestra. In 1923 the band had acquired the trumpeter Bubber Miley, who awakened Ellington's musicians to the new jazz music. Bechet had by this time acquired a capacity to swing that was matched only by that of Louis Armstrong, and his example led the band further towards jazz.

In 1924 and 1925 Bechet made a group of recordings with Armstrong which were variously issued under the names Clarence Williams's Blue Five and the Red Onion Jazz Babies, among them *Texas Moaner Blues* (1924, OK), *Cake Walking Babies* (1924, Gen.) and *Cakewalking Babies from Home* (1925, OK). These constitute one of the most important bodies of New Orleans jazz. Through the next few years Bechet continued to wander, travelling in Europe and the USA; he even toured the USSR with a jazz band. In the 1930s, as hot dance music lost its popularity to more sentimental styles, Bechet dropped into obscurity, playing when he could find work, though he was frequently a member of Noble Sissle's band between 1931 and 1938. He organized the New Orleans Feetwarmers in 1932 with Tommy Ladnier, but owing largely to the group's musical style it was short-lived, and the following year the two men briefly managed a tailor's shop. However, with the New Orleans revival, from about 1939 Bechet was extolled by critics as one of the greatest jazz pioneers; his fortunes improved and he made many recordings. In 1949 he returned to Europe for the first time in almost 20 years. He was received there with adulation and reverence, and in 1951 he settled permanently in France, where he lived out his final years as a show-business star.

*Sidney Bechet*

Bechet was one of the best of the New Orleans jazz pioneers who spread out from the city in the years around World War I, giving the music its first national popularity. Because he travelled so much, especially abroad, he never developed the large popular following that he might have had if he had chosen to emulate Armstrong or Ellington in leading a large dance band. He was frequently bristly and difficult, with the *amour-propre* of a star even in obscurity. His passions were free: he was expelled from both England and France for fighting, and spent almost a year in jail in Paris. He was certainly not temperamentally suited to the kinds of compromise that Armstrong and Ellington made to achieve popular success. But this same barely controlled passion is one of the hallmarks of his playing, which is everywhere filled with feeling, from the wild exuberance of *Sweetie Dear* (1932, Vic.) to the brooding melancholy of *Blue Horizon* (1944, BN). Bechet mastered the soprano saxophone to such a degree that few other jazz musicians were willing to challenge him, and until John Coltrane renewed the popularity of the instrument in the 1960s he had the field virtually to himself.

Like most of the New Orleans pioneers, Bechet tended to work out his figures in advance, and once he had arrived at a way of playing a tune he seldom changed it. But his playing was nonetheless passionate: his music was filled with movement, at fast tempos dashing headlong through the melody, at slow tempos swirling up and down the full range of the instrument in free-floating arpeggiated figures.

JAMES LINCOLN COLLIER

**Bechi, Gino** (*b* Florence, 16 Oct 1913; *d* Florence, 2 Feb 1993). Italian baritone. He studied in Florence with Raul Frazzi and Di Giorgi and made his dêbut at Empoli in 1936 as Germont. He sang regularly in Rome (1938–52), and at La Scala (1939–53), where he sang the title role of *Nabucco* at the reopening of the theatre in 1946. He established himself as the leading Italian dramatic baritone of the day, especially in the Verdi repertory; his roles also included Gérard, Scarpia, Jack Rance, Tonio and Thomas' Hamlet. In London he appeared with the Scala company at Covent Garden in 1950 as Iago and Falstaff, and at Drury Lane as William Tell in 1958. He sang in the premières of Rocca's *Monte Ivnor* (1939, Rome) and Alfano's *Don Juan de Manara* (1941, Florence). Bechi continued to sing until 1961, when he appeared as Salieri's Falstaff at Siena and in *Il barbiere di Siviglia* at Adria. As

his recordings confirm, he possessed a voice of striking individuality, incisive in both tone and diction.

**Bechler, Johann Christian** (*b* 1784; *d* 1857). American Moravian composer. *See* MORAVIANS, MUSIC OF THE, §3.

**Bechstein.** German firm of piano makers. Friedrich Wilhelm Carl Bechstein (*d* Gotha, 1 June 1826; *d* Berlin, 6 March 1900), who founded the firm in 1853 in Berlin, served his apprenticeship with the Perau firm in Berlin, becoming foreman at the age of 22. He left in 1852 to work under Pape and Kriegelstein in Paris, and returned to Berlin the next year to start his own small business. Three years later he attracted considerable attention with his first grand, which was inaugurated by Bülow with a performance of the Liszt Sonata. Success at the 1862 London exhibition and the more important 1867 Paris exhibition consolidated a fast-growing reputation. Output was expanded vigorously, from 300 instruments a year during the 1860s to 1000 a decade later, 3000 during the 1890s and 5000 in the years preceding World War I.

Large-scale production and extensive use of machinery did not preclude the maintenance of consistently high standards. Bechstein's concert grands were preferred by most leading pianists in Europe, and the firm's smaller grands (notably the *c* 2 metre model B) and uprights (including the superb model 8 and smaller model 9) are acknowledged as among the finest ever made. After 1870 all were iron-framed and overstrung, owing much to the examples of Steinway, but with a less brilliant tone, 'velvety' and somewhat 'thinner' in the bass. The firm's close association with German music was demonstrated at the opening of Bechstein Hall in 1892 with recitals by Bülow, Brahms and Joachim. In 1901 a concert room in London, later known as the Wigmore Hall, was opened, exemplifying Bechstein's secure hold on the English market, which regularly absorbed about half of the firm's annual output. Following the founder's death, his sons Edwin Bechstein and Carl Bechstein assumed control and later Carl's son, also Carl, joined the firm.

Between the wars, while maintaining its reputation for the finest instruments, Bechstein made a bold but unsuccessful attempt to transform the piano by introducing the 'neo-Bechstein' in 1933. The touch and hammer-action were normal, but only one or two strings were used for each note, and the soundboard was replaced by electrical amplification and reproduction. In addition to the normal sustaining pedal a second pedal acted as a volume control. Despite its excellent workmanship, practical advantages and serious intent, this revolutionary instrument failed to win support and was withdrawn.

Bechstein's factory was almost completely destroyed during World War II, but production of grands began again in 1951 and annual production soon rose to approximately 1000 instruments. In 1963 the company was bought by Baldwin, who sold it again in 1987. Bechstein took over production of Zimmerman pianos in 1992. Among current Bechstein models the model 8 upright, model B grand and the concert grand maintain the firm's high reputation.

**Beck.** German family of organ builders. Hans Beck (*fl* Grossenhain, 1514–57) built organs in Halle (1514–17, 1539), Delitzsch (1520) and Oschatz (1555). No organs by by his eldest son, Anton Beck (*d* Halle, 1563), are known to survive. Esaias Beck (*d* Halle, 8 April 1587), Hans Beck's second son, built instruments in Löbejün (1564), Naumburg (1568; praised by Adlung), Halle (1569, 1573), Bitterfeld (1579) and Greiffenberg. Anton Beck's son David Beck (*fl* Halberstadt, 1587–1601) also built in Halle (1587), Löbejün (1588–91), Halberstadt (1590) and Gröningen (1592–6; praised by Mattheson). No organs built by Georg Beck (*fl* Halberstadt, 1592) are known to survive; he is mentioned in conjunction with David, but the nature of their relationship is unkown.

The most famous member of the family was Esaias Beck, whose organs contained a complete diapason chorus and one or two foundation stops in the Great organ, and a full range of foundations and mutations and an open diapason in the second manual, while the Pedal controlled stops both low (16′ Open Diapason, 16′ Untersatz) and high (Zimbel, 2′ Nachthorn, 1′ Bauernflöte). In addition there were reed stops for Great organ and Pedal, as well as those in the second manual. This idea was probably developed by the Beck family and is first found in the organ built by Esaias Beck for Naumburg Cathedral in 1568 (two manuals, 22 stops). David Beck developed a wide range of foundation stops and reeds on all his organs. The Becks created the great central German Baroque organ, to which even the Compenius family added nothing new in principle.

HANS KLOTZ

**Beck, Anthony** (bur. Norwich, 29 Jan 1674). English composer. He was appointed a lay clerk of Norwich Cathedral in 1639, but was subsequently admonished in the Chapter Acts for neglecting his duties (17 June 1642). After the Restoration he resumed his place, and was promoted to minor canon in 1663. He also took his turn as precentor in 1663 and 1668. His anthem *Behold how good and joyful* survives in a Restoration set of partbooks from Norwich (*GB-Ckc*) and creates a favourable impression. He also wrote the anthem *Who can tell how oft he*

*offendeth* (*Cp*). (I. Spink: *Restoration Cathedral Music, 1660–1714*, Oxford, 1995)

IAN SPINK

**Beck, Conrad** (*b* Lohn, canton of Schaffhausen, 16 June 1901; *d* Basle, 31 Oct 1989). Swiss composer and radio producer. After studying mechanical engineering for a short time at the Eidgenössische Technische Hochschule, Zürich, and taking private music lessons from Müller-Zürich, he attended the Zürich Conservatory, where his teachers included Volkmar Andreae (composition), Reinhold Laquai (counterpoint) and Carl Baldegger (piano). In 1924 he moved to Paris, where he studied orchestration with Ibert and mingled with the circle surrounding Arthur Honegger, Albert Roussel and Nadia Boulanger, although he was not a pupil. This period proved very stimulating for Beck, awakening in him a life-long affinity for French culture. At the suggestion of Sacher, who promoted his career more than that of any other composer, he relocated to Basle in 1934. During a period of over 50 years, Sacher commissioned his works and conducted their premières with the Basle Chamber Orchestra and the Collegium Musicum, Zürich. From 1939 to 1966 Beck served as music director of Swiss Radio in Basle, a position that enabled him to do a great deal to promote contemporary music. His honours include the composition prize of the Schweizerischer Tonkünstlerverein (1954), the Ludwig Spohr Prize of the city of Brunswick (1956) and the Basle arts prize (1964).

In terms of form, thematic construction and compositional technique, most of Beck's works incline towards Classical and Baroque models. Even in his earliest works he rejected a late Romantic style, favouring instead linear and often strictly polyphonic writing. The compositions of his Paris period invoke bitonality (such as the third movement of the Violin Sonatina no.1, 1928) and tend towards dissonant formations, tonal stridency and complex textures. The Concerto for String Quartet and Orchestra (1929), winner of the Elizabeth Sprague Coolidge Prize, is remarkable in this respect. Works from his middle years combine Expressionistic elements with a neo-classical approach; an elegiac tone and a certain pathos are perceptible. Although his works move between tonality and atonality, they frequently conclude on triadic chords containing the fifth and octave, but not necessarily the third. 12-note melodies, such as the one that appears in the second movement of the Duo for Two Violins (1960), are exceptional, as Beck did not pursue serialism consistently. In later works metaphorical titles such as *Facettes* (1974), *Cercles* (1978–9), *Centres mobiles* (1980) and *Lichter und Schatten* (1982) replaced the generic descriptions of earlier compositions, but his musical language did not change substantially.

Beck was able to create an extensive body of works, comprising all genres except opera, even though for much of his life he did not compose full-time. Some of his compositions are inspired by local topics. These include the Festspiel for the 500th anniversary of the battle of St Jakob an der Birs (1943–4) and the cantata *Der Tod zu Basel* (1950–52), on the Basle earthquake of 1356. His Symphony no.7 'Aeneas Silvius' (1955–7) is a tribute to the founder of Basle University and thus to the humanistic tradition of the city. He also made many folksong arrangements and conducted research for radio broadcasts into traditional Swiss music. Although his works received frequent performances in Switzerland until the 1960s, they have appeared only rarely since that time.

CHRISTOPH KELLER

**Beck, Franz** [François] **Ignaz** (*b* Mannheim, 20 Feb 1734; *d* Bordeaux, 31 Dec 1809). German composer, conductor, violinist and organist, active in France. He received violin lessons from his father Johann Aloys Beck (*d* 27 May 1742), an oboist and choir school Rektor at the Palatine court whose name is listed in the calendars of 1723 and 1734. He also learnt the double bass, among other

instruments, and eventually came under the tutelage of Johann Stamitz, who arrived in Mannheim in 1741. The Palatine court, under Carl Theodor, recognized Beck's talent and undertook responsibility for his education.

Several sources maintain that Beck left the Palatinate at an early age to study composition with Galuppi in Venice. According to his pupil Blanchard (1845), however, Beck was the object of a jealous intrigue that involved him in a duel during which his opponent was supposedly killed (many years later Beck met his former opponent, who had only feigned death); Beck then presumably fled and travelled in Italy, giving concerts in principal cities. In any event, he spent several years in Venice before eloping to Naples with Anna Oniga, the daughter of his employer.

After Beck's stay in Italy (probably in the 1750s), he moved to Marseilles and became the leader of a theatre orchestra. It is not certain whether he arrived in France before about 1760, but in the late 1750s Parisian firms published more than 20 of Beck's symphonies in fairly rapid succession. In 1757 a symphony by 'Signor Beck' was listed in two Concert Spirituel programmes. The title-pages of his op.1 (1758) and op.3 (1762) describe him as 'chamber virtuoso to the Elector Palatine' but add 'and presently first violin of the Concert in Marseilles'. At least seven performances of his symphonies were given at Marseilles in 1760–61.

Beck soon moved from Marseilles to Bordeaux, where he continued his interest in the theatre, subsequently becoming the conductor of the elegant Grand Théâtre. By 1764, when his first child was born, he was active as a teacher; his students included Pierre Gaveaux, Henri-Louis Blanchard and Bochsa. Beck was appointed organist at St Seurin, Bordeaux, on 24 October 1774 and his exceptional improvisatory skill drew considerable admiration from the congregation. Several sets of his keyboard pieces were printed in Paris and Dresden as well as Bordeaux. In 1783 he travelled to Paris for the first performance of his *Stabat mater* at Versailles and in 1789 the overture and incidental music to *Pandore* were performed in Paris at the Théâtre de Monsieur. He also directed concerts of the Société du Musée in Bordeaux. During the Revolution he composed patriotic music, including a *Hymne à l'être suprême*. In 1803 the new government honoured Beck by naming him correspondent of music composition for the Institut de France.

In the early 20th century the research of Riemann and, particularly, Sondheimer focussed new attention on Beck's symphonies, most of which date from his earliest period (*c*1757–66), and raised them to considerable prominence. Sondheimer regarded Beck as a highly individual and progressive 'Sturm und Drang' composer who grasped the full implications of symphonic style and whose works have a dramatic intensity resulting from 'dualistic' thematic material (well delineated by contrast in instrumentation and dynamics), remarkably bold harmonic progressions and flexible rhythms. Beck's independent part-writing and his emphasis on thematic development led Sondheimer to consider him the predecessor of Haydn, Boccherini and Beethoven. Brook (1962) described Beck's symphonies as 'among the most original and striking of the pre-Classical period'. Progressive traits in the symphonies include the use of wind instruments (usually oboes and horns in pairs) in most works written after 1760 and the expansion from three movements to four. Beck's choice of minor mode for no fewer than four of these works is exceptional.

Beck's published keyboard works, mostly one-movement pieces entitled 'sonata' or 'fantasy', are relatively modest in scope. Two manuscript collections in Paris include many of these pieces, some of them bearing descriptive titles; in addition a small collection of unpublished keyboard music in Bordeaux contains several multi-movement sonatas. Beck also wrote vocal compositions and stage works. His *Stabat mater*, the crowning achievement of his maturity, is in 12 sections (including an extended choral finale) for soloists, chorus and orchestra. He composed a considerable amount of music for the Bordeaux theatre and for St Seurin, much of which is lost.

ANNELIESE DOWNS/PHILIPPE VENDRIX

**Beck, Frederick** (*b* ?Württemberg, bap. 30 May 1738; *d* ?London, *c*1798). German piano maker, active in England. He left Germany for England some time after 1756, and married Mary Coles on 23 September 1770. The rate books of St James, Westminster, show that he lived at a house in Broad Street, London, from midsummer 1771 until the end of 1798. During the early 1780s the numbers in the street were changed, giving the false impression that Beck changed addresses.

Beck is only known to have made square pianos. Several of his instruments, including one dated 1774, were confiscated by the state during the French Revolution (see Bruni). There is a 1775 Beck square piano in the Paris Conservatoire. Up to 1780 at least, Beck's square pianos were not numbered, a typical early nameboard being 'Fredericus Beck Londini fecit 1775/No.4 Broad Street Golden Square', then 'Fredericus Beck Londini fecit 1780/ No.4 Broad Street Soho'. This changed to 'No.1941 Fredericus Beck Londini fecit 1788/No.10 Broad Street Soho', the numbers apparently indicating a prolific output in his early years.

The quality of Beck's pianos ranges from rushed cabinet-work, poor key-carving, and even in one case an adze-mark on the wrestplank, to the fine craftsmanship especially noticeable in his early instruments. The 1775 square piano illustrated in James may have been intended more as a beautiful piece of furniture than a piano, for the elaborately inlaid case into which the piano is built has no recess for the player's legs. Another attractive square piano on four legs but with a music cabinet beneath the keyboard is illustrated by Macquoid and Edwards. Beck's surviving square pianos have a compass of five octaves or slightly less, single action, two or three handstops and very rounded hammer heads covered with doeskin or buckskin.

MARGARET CRANMER

**Beck, Jean** [Johann Baptist] (*b* Gebweiler, Alsace, 14 Aug 1881; *d* Philadelphia, 23 June 1943). Alsatian philologist and musicologist. Beck studied in Paris and later in Strasbourg, where he took the doctorate in 1907. His dissertation formed the first part of his *Die Melodien der Troubadours und Trouvères* (1908), in which he proposed the application of modal rhythm to medieval secular song. In 1907 the French scholar Pierre Aubry became convinced of the validity of modal theory for secular song, and there ensued a bitter dispute between the two men as to who had conceived the idea. In 1909 a judicial tribunal of scholars upheld Beck's claim. The lamentable outcome of this affair was Aubry's death in 1910 while fencing with foils, apparently in preparation for a duel with Beck. In the face of unpopularity, Beck emigrated to the USA, where he held positions at the University of Illinois (1911–14), Bryn Mawr College, Philadelphia (1914–20), and the Curtis Institute of Music, Philadelphia (from 1920). In 1934 he was made a member of the executive board of the AMS at its inauguration.

Beck originally planned a collected edition, with facsimiles, transcriptions and commentary, of all troubadour and trouvère songs surviving with melodies. He aimed to publish in 52 volumes, under the title Corpus cantilenarum medii aevi, 'tout se qui se chantait dans le monde chrétien pendant le XIIe et le XIIIe siècles, à l'exception de la musique liturgique'. The series ran to only two publications, the second edited jointly with his wife Louise Beck.

Beck's theory of modal rhythm, first set out in the second part of *Die Melodien*, rested firmly on the conviction that the few melodies which have survived in mensurally notated form should provide the clues for reconstructing the rhythms of the remaining melodies. He accepted Runge's and Riemann's contention that the poetic metre of a text should influence the rhythm of its melody, but rejected Riemann's 'Vierhebigkeit' in favour of medieval modal theory. By 1927, when he regarded his methods as fully developed, he admitted duple transcription for certain contexts, and occasionally assigned equal values to all syllables in a line.

IAN D. BENT

**Beck, Jeff** (*b* Wallington, Surrey, 24 June 1944). English blues-rock guitarist. Along with Jimi Hendrix and Led Zeppelin's Jimmy Page, he pioneered hard-rock and heavy-metal guitar playing. He played with the YARDBIRDS (1965–7), then created the Jeff Beck Group, which went through several personnel changes, the earliest including Rod Stewart (vocals) and Ron Wood (bass). The album *Truth* (1968), made with this line-up, is important as an extension of the heavy-rock sound formulated by Cream and the Jimi Hendrix Experience and taken further by Led Zeppelin, to whose first album, released in the following year, it has often been compared. In 1973, Beck also formed a trio with drummer Carmine Appice and Tim Bogert and produced two instrumental albums, *Blow By Blow* (Epic, 1975) and *Wired* (Epic, 1976), in which his solo playing was the focus. They were commercial successes despite there being no vocalist, a rarity in rock records. Both albums were produced by

George Martin and with them, and his subsequent collaboration with Jan Hammer, Beck moved into a jazz-rock style.

Beck was influenced by Les Paul's experiments with guitar sound in the 1950s as well as the influx of blues and early rock and roll into Britain in the early 1960s; these styles, among others, are combined in his guitar-playing. He is capable of playing blues with great expression, but is better known for his pioneering exploration of unconventional guitar timbres and approaches to solo playing: this was already apparent in *Nursery Rhyme*, recorded in 1964 with the Tridents and released on *Beckology* (Epic, 1991). On this Beck plays an extraordinary solo, largely outside the key and occasionally abandoning distinct pitches for a percussive sound. He uses microtonal inflections in his string bends for the riff to the Yardbirds' *Over, Under, Sideways, Down*, anticipates Hendrix in his use of feedback in *Shapes of Things* and numerous other pieces, employs scratch-picking in *I'm a Man*, quotation, harmonics, hammer-ons and pull-offs in *Jeff's Boogie*, and wah-wah and various noise effects in *You Shook Me* on the *Truth* album. While Eric Clapton has been hailed as the consummate British rock guitar virtuoso of this era, his style is based largely on a relatively conservative blues style; Beck, however, used the blues as only one of several springboards in his creation of a highly innovatory and influential style.

SUSAN FAST

**Beck, Johann H(einrich)** (*b* Cleveland, OH, 12 Sept 1856; *d* Cleveland, 26 May 1924). American conductor, composer and violinist. He studied at the Leipzig Conservatory from 1879 to 1882, and made his European début as a violinist at the Leipzig Gewandhaus in his own String Quartet in C minor. On his return to Cleveland he continued activity with the Schubert String Quartet, which he organized in 1877, and the Beck String Quartet, giving frequent concerts during the 1880s and 1890s. After 1878 he was active as a conductor. He directed the Detroit SO (1895–6) and local Cleveland orchestras during the early years of the 20th century, and appeared frequently with major orchestras in other cities. He conducted his own works with much success and numerous contemporary articles and reviews give him high praise. Only his *Elegiac Song* op.4 no.1 seems to have been published. Beck was active in the Music Teachers National Association and the Ohio Music Teachers' Association. An extensive collection of his manuscripts and memorabilia is in the Cleveland (Ohio) Public Library.

WORKS

Stage: Salammbo (J.H. Beck), begun 1887, inc.
Vocal: 6 sym. poems, 1v, orch, 1877–89, incl. Elegiac Song, arr. 1v, vn, pf, op.4 no.1 (Cleveland, 1877), 2 inc.; Deukalion (B. Taylor), 4 solo vv, chorus, orch, ?1877, inc.; Wie schön bist du, T, orch; Meeresabend (M. Strachwitz, trans. Beck), Mez/T, orch, ?1908; Salvum fac regem, 4vv, pf; partsongs; songs
Orch: Sym. ('Sindbad'), op.1, *c*1875–7, inc.; 4 ovs., 1875–85; Skirnismael, cycle of 5 sym. poems, *c*1887–93, 3 inc.; 2 scherzos, 1885–95, 1889; Aus meinem Leben, sym. poem, 1917
Chbr: 4 str qts, 1877–80; Str Sextet, 1885–6; Sonata, vn, pf, inc.; piece for fl, pf; other works
Pf: Sonata, inc.; Canone all'ottave, 1875; variations; other works

J.H. ALEXANDER

**Beck, Johann Hector** (*fl* 1650–70). German composer, editor and musician. He is known to have been the principal *musicus ordinarius* in Frankfurt. He was nominated in 1650 but was expelled a few years later for indecent behaviour; he returned to the position in 1670. His name is connected with two collections of dance music for four-part string ensemble and basso continuo. *Continuatio exercitii musici* (Frankfurt, 1666), includes 50 dance pieces bearing his name, presumably as composer, arranged into suites and according to the title pages he arranged and edited the anonymous pieces of this volume and of its successor, *Continuatio exercitii musici secunda* (1670). The 1666 volume was the second edition of *Exercitium musicum* (1660); this publication makes no mention of Beck, although it is possible that he had an editorial role here too. It includes pieces in scordatura and features a wider range of genres than its successor volumes. The latter, however, contain information on the optional deletion of parts, apparently to accommodate varying levels of skill in the performers. Indeed, the idea of bringing together performers with differing levels of ability in an instructional setting may well have had some bearing on the titles of the collections. (Å. Davidsson: *Catalogue critique et descriptif des imprimés de musique des XVIe et XVIIe siècles conservés à la Bibliothèque de l'Université royale d'Upsala*, Uppsala, 1951)

ERIK KJELLBERG/PAUL WHITEHEAD

**Beck, Sydney** (*b* New York, 2 Sept 1906). American music scholar and librarian. He was educated at the College of the City of New York, New York University, the Institute of Musical Art and the Mannes College of Music; his studies included the violin and chamber music with Louis Sveçenski, composition with Bernard Wagenaar and Hans Weisse, and musicology with Sachs and Reese. From 1931 to 1968 he worked in the music division of the New York Public Library as head of the Rare Book and Manuscript Collections, editor of music publications and curator of the Toscanini Memorial Archives; from 1950 to 1968 he taught at the Mannes College of Music. In 1968 he became director of libraries and a member of the faculty at the New England Conservatory of Music in Boston. He retired in 1976.

Beck's principal fields of study were early string techniques and performing practice, textual analyses and criticism (see his *Music in Prints*, New York, 1965, with E. Roth), and instrumental teaching and study, with an emphasis on English Renaissance music. He appeared as director and performer with various concert groups.

During the 1930s and 40s Beck edited many music publications issued by the New York Public Library from manuscript and printed materials; this was reproduced by the Federal Music Project and included composers from the 16th to the 20th centuries, such as Coprario, Locke, Bach, Grétry, Gossec and John Knowles Paine.

PAULA MORGAN

**Becken** (Ger.). *See* CYMBALS.

**Becker (i).** Russian firm of piano makers. Jakob Becker (Yakov Davidovich Bekker) (*b* Neustadt an der Haardt; *d* St Petersburg, 1879) founded a small workshop in St Petersburg in 1841, which was taken over by his brother Franz Davidovich 20 years later. The Russian piano industry developed later and on a smaller scale than the European, and several Germans played a large part in establishing the industry at St Petersburg. Becker became one of the best and most successful piano manufacturers, although its output was lower than that of contemporary English, American or German firms, producing 200 pianos in 1868, 400 in 1878, and 900 annually in the 1880s when 240 workmen were employed. The firm made 11,400 pianos between 1841 and 1891; the concert grands were used by leading virtuosos, including Anton Rubinstein, whose piano (no.4009) is still in his country home. It had been the custom until that time for foreign artists to take their own instruments with them on Russian tours, but the quality of Becker's grand pianos made this unnecessary. Becker adopted the principal improvements introduced by European and American makers, including the American system of cross-stringing; in 1865 Franz became the first Russian maker to adopt Erard's repetition action, and he was awarded a prestigious State Emblem at the All-Russian Exhibition of 1896. When Franz retired in 1871 he was succeeded by M.A. Bitepash [Bietepage], on whose retirement (1903) K.K. Schröder, one of the co-owners, took over the business. In 1918 the factory was nationalized and renamed Piano Factory No.2. It was used as the basis for the 'Red October' (*Krasnïy Oktyabr'*) Piano Factory, founded in 1924, which became the largest piano manufacturer in the USSR.

MARGARET CRANMER

**Becker (ii).** American family of violin makers. Carl G. Becker (*b* Chicago, 20 Sept 1887; *d* Chicago, 6 Aug 1975) was the son of a prominent violinist and teacher, and his maternal grandfather, Herman Macklett, had been a violin maker. He began as a craftsman in 1901, and a year later joined the firm of Lyon & Healy, where he worked under John Hornsteiner until 1908. When Hornsteiner left to start his own business Becker went with him, staying as an assistant until 1923. By 1924 he had become an outstanding violin maker, repairer and connoisseur, and he took a position with William Lewis & Son, another Chicago firm; before 1924 he had already made about 100 violins in his spare time. After he joined Lewis he spent at least three summer months doing new work at Pickerel, Wisconsin; from 1925 to 1947 he made 389 new violins, violas and cellos, each with its serial number (100–488). For the rest of each year he supervised the repair workshop of Lewis & Son, or accompanied the president of the firm on his journeys in search of old instruments.

His son, Carl F. Becker (*b* Chicago, 16 Dec 1919) inherited his father's great ability, and worked with him from 1936. Between them they developed the art of violin restoration to a high level, introducing a number of important innovations and technical improvements. Carl F. Becker's particular speciality is varnish restoration. From 1948 to 1967 new instruments (489–726) were produced by father and son in Wisconsin in association with Lewis & Son. By 1968 the Beckers' rare understanding of their craft and their perfectionism had become incompatible with the increasing pace of big business, and they left Lewis & Son to work on their own account. Both new work (now over 750 instruments) and restoration continue to the same very high standard. In the years before the elder Becker's death they each made a few instruments individually.

Carl F. Becker's children have also become violin makers and restorers. Jennifer Becker Jurewicz (*b* Chicago, 14 Aug 1955), his daughter, began working with her father at the age of 11, finishing her first violin in 1970. She began to work full time at the age of 16. Following her marriage she moved to Minneapolis in 1978, maintaining her association with the family business; in 1986 she opened her own shop in that city. Her brother Paul Becker (*b* Chicago, 21 Dec 1958) began making violins in 1974, working full time after 1976. He later opened his own business in cabinet making, in which he also excelled, pursuing this craft from 1988 to 1992 while simultaneously working in the family business.

CHARLES BEARE/PHILIP J. KASS

**Becker, Albert (Ernst Anton)** (*b* Quedlinburg, 13 June 1834; *d* Berlin, 10 Jan 1899). German composer. He studied in Quedlinburg with Hermann Bönicke and then in Berlin with S.W. Dehn (1853–6). From 1858 to 1869 he worked in Potsdam and Ohlau (now Oława), Silesia, before settling permanently in Berlin where in 1881 he became a teacher of composition at the Schwarwenka Conservatory. In 1891 he was appointed director of the choir of Berlin Cathedral. The following year he was offered the position of Thomaskantor in Leipzig, but declined in deference to Kaiser Wilhelm II. In 1892 he was appointed to the Prussian Royal Academy of Arts.

Becker published primarily vocal music during his lifetime. His G minor symphony (1859, the second of three) shared a prize in a Vienna competition of 1861. His published large-scale instrumental works are the Piano Quartet in D minor op.19, the Piano Sonata in F minor op.40 and Piano Quintet in E flat op.49. His first successes were his songs to texts from Julius Wolff's *Rattenfänger* and *Wilder Jäger* (1877). His Mass in B flat minor won Liszt's admiration and is generally considered his best work. The oratorio *Selig aus Gnade* op.61 (1890) and *Reformationskantate* op.28 (1882) were also much admired. His shorter liturgical works are still performed in Germany. Becker grew from early influences of Schumann to become a conservatively eclectic harmonist. His best work exhibits skillful counterpoint and keen sensitivity to text.

ALAN H. KRUECK

**Becker, Carl Ferdinand** (*b* Leipzig, 17 July 1804; *d* Leipzig, 26 Oct 1877). German organist, musicologist, music collector and bibliographer. He was educated at the Thomasschule under Johann Gottfried Schicht, and also studied with the organists Friedrich Schneider and Johann Andreas Dröbs. He played the violin in the Gewandhaus Orchestra (1820–33) and in the theatre orchestra (1821–4). He was organist at the Peterskirche (1825–37) and later at the Nikolaikirche (1837–54). When the Leipzig Conservatory was founded in 1843, Mendelssohn invited Becker to become its first organ professor; among his pupils was William Rockstro. He also gave organ recitals in Leipzig and other German cities.

In his twenties Becker began to collect early printed music and manuscripts as well as musical literature. Based on his important library he published bibliographies, editions of older music and many articles in such periodicals as the *Allgemeine musikalische Zeitung* and the *Neue Zeitschrift für Musik*. Of his various publications, the *Systematisch-chronologische Darstellung der musikalischen Literatur* is perhaps the most notable, being a remarkable attempt to produce a classified list of older publications. It is clear and concise, and is still used. Becker was interested in various fields of music. One of his special interests was J.S. Bach; he was a founder-member of the Bach-Gesellschaft. He also championed in his writings the late works of Beethoven and the music of Schumann. His compositions (motets, songs, piano music) are of minor importance, although his organ pieces were valued for study purposes. In 1854 Becker retired from his offices. Two years later he transferred his library (3277 volumes) to the city of Leipzig, which still owns it (*D-LEm*).

**Becker, Constantin Julius** (*b* Freiberg, Lower Saxony, 3 Feb 1811; *d* Oberlössnitz, nr Dresden, 26 Feb 1859). German writer, teacher and composer. He began his studies with August Anacker before going to Leipzig in 1835 where he studied further with C.F. Becker. He then assisted Schumann as an editor on the *Neue Zeitschrift für Musik*. His essays continued to appear until 1846 despite his move to Dresden in 1843 to teach singing and composition. In 1846 he retired to Oberlössnitz, where he died after a long illness. His works include a rhapsody *Das Zigeunerleben*, a symphony (1843, Leipzig) and the opera *Die Entstürmung von Belgrad* (1848, Leipzig). He also wrote a noted *Männergesang-Schule* (Leipzig, *c*1845) and translated Berlioz's *Voyage musical* into German.

FRANZ GEHRING/CHRISTOPHER FIFIELD

**Becker, Cornelius** (*b* Leipzig, 21 Oct 1561; *d* Leipzig, 25 May 1604). German theologian and poet. He lived in Leipzig for the whole of his life except for six months' service in 1592 as a deacon in Rochlitz in Saxony. After his education and several years' employment at the Thomasschule he became pastor of the Nikolaikirche in 1594. He was elected a professor at the university in 1599 after gaining his doctorate. As a staunch Lutheran he was an ardent opponent of crypto-Calvinism; this led to his temporary suspension in 1601. In the following year in Leipzig he published his *Der Psalter Davids Gesangweis auff die in Lutherischen Kirchen gewöhnliche Melodeyen zugerichtet* with an introduction by Polykarp Leyser. The Becker Psalter was intended as a Lutheran counterpart to the Calvinist *Lobwasser Psalter*; in it he attacked not only the Lobwasser text, but also specifically 'the outlandish French melodies, which sound lovely to worldly (weltlusternen) ears'. The psalter went through 25 editions by 1712.

Becker's writings have little literary merit and the psalter is no exception; its importance lies in the fact that several musical editions were subsequently published. The first was by Calvisius (Leipzig, 1605), which by 1621 had gone through at least five editions and the second was by Heinrich Grimm (Magdeburg, 1624); both Calvisius and Grimm set the Becker melodies in four-part note-against-note counterpoint. The most important, by Heinrich Schütz, was published in Freiberg in 1628 and later reprinted in Güstrow in 1640 (ed. in *Heinrich Schütz: Neue Ausgabe sämtlicher Werke*, Kassel, 1936, 2/1957, vol.vi). An extended and partly revised version with a figured bass by Schütz appeared at Dresden in 1661, and was republished a further three times with only the melodies and figured bass: it was included in Johann Olearius's *Geistliche Singkunst* (Leipzig, 1671), in the *Geistliche Gesangbuch* (Dresden, 1676), and in the *Sachsen-Weissenfelsische … Gesangbuch* of 1712. Individual psalms also appeared in many hymnbooks. The Becker Psalter was officially recognized in 1661 as the standard psalter for use in Saxony. Calvisius based his *Tricinia teutsche Lieder* (Leipzig, 1603) on 22 Becker texts: 16 are versifications of the psalms and six are completely original. A portrait of Becker is in the Leipzig Universitäts-bibliothek.

WALTER BLANKENBURG

**Becker** [Bekker, Bäkker], **Dietrich** [Diederich, Diedrich, Dierich] (*b* ?Hamburg, ?26 Feb 1623; *d* Hamburg, 12 May 1679). German composer, organist and violinist.

1. Life. According to the dedication of his *Musicalische Frühlings-Früchte* (1668), Becker was born in Hamburg, and he has therefore been identified as the 'Dirik' Becker who was baptized in the Nikolaikirche there on 26 February 1623, but another source names him as the son of the organist Paul Becker from Wernigerode. In 1642 he was appointed organist to Count Rantzau at the Schlosskirche in Ahrensburg, where an organ by Friedrich Stellwagen had been installed two years earlier. On 25 November 1644, he married Maria, daughter of the Hamburg gunsmith Hans de Koning, to whom he dedicated a wedding poem, *Das Orgelwerk* (lost, formerly in *D-Hs*). Between 1654 and 1655 Becker worked as a violinist at the court of Count Magnus Gabriel de la Gardies near Stockholm, and after another period in Ahrensburg he was appointed violinist to Duke Christian Ludwig of Celle in April 1656. On 23 September 1658 he was married for a second time, this time to Clara Catharina, daughter of the court violinist Christian Reinwald.

Becker was granted leave of absence from Celle in 1662 to visit Lübeck and Hamburg 'to improve his skill in his profession', but instead of returning to Celle he became a citizen of Hamburg on 11 April 1662 and worked there as a simple *Musicant*. That he was employed as a town musician by 29 December 1664 is evident from his appointment, with Hans Hake, as director of the *14-tägigen Music* at Hamburg Cathedral, but it was not until 22 July 1667 that he received a salaried appointment, in succession to Johann Schop. The following year he was made sole director of the Hamburg town musicians, having at first shared the duties with Samuel Peter. As a town musician, he played at civic festivities and weddings and in the main churches in Hamburg, and as chief musician had the additional task of 'playing a duet on solo violin' with various organists (Weckmann, Scheidemann, Reincken and others). In addition he was a member of the collegium musicum founded by Matthias Weckmann, which met weekly in Hamburg Cathedral and which he is said to have led for a while. He was probably also involved in the Hamburg opera orchestra during the last two years of his life. A *Trauergedicht* on Becker's death by the opera librettist Christian Richter refers to this.

After Christoph Bernhard's departure for Dresden in 1674, Becker temporarily took over the town choirs in the main churches and the 'kleine Canonicat' at Hamburg Cathedral, which he was allowed to retain after the appointment of Joachim Gerstenbüttel as Hauptkantor, despite Gerstenbüttel's repeated complaints. After Becker's death this division between town and cathedral choirs was retained. In his position as cathedral Kantor Becker composed various sacred concertos and a *St John Passion* (libretto in *D-Hs*), which was performed many times after his death.

2. Works. Although Becker began his career as an organist, not a single organ piece by him survives, which perhaps indicates that he gave up the organ in order to devote himself principally to violin playing. He became one of the most prominent north German violinists of the second half of the 17th century but, surprisingly, no solo violin works by him survive either. However, the short solo passages in some of his ensemble sonatas are extremely rewarding. These are italianate works in several sections contrasted in metre and tempo with, at their centre, a fast fugue in 4/4 or 12/8 time. Some of the sonatas are separate compositions, but most appear along with a suite, which in one case (no.17 in the 1674 set) is even thematically linked to the sonata in a way normally found only in a sequence of dance movements. In Becker's suites the usual 18th-century sequence of allemande, courante, sarabande and gigue predominates; recent research suggests that Becker was the first to use this sequence in ensemble suites.

That Becker was also known beyond the Hamburg area as a composer of vocal music is shown by his two surviving funeral works for Glückstadt in Schleswig-Holstein. When he wrote most of his sacred concertos is not known, but the dating of *Schaff in mir, Gott* (1664) and *Amor Jesu* (1670) suggests these works were performed during the *14-tägigen Music* in Hamburg Cathedral or at the collegium musicum; some of the other works may date from Becker's time as Kantor (1674 onwards). Becker was also known as a lieder composer. Through contacts with Philipp von Zesen's Teutschgesinnte Genossenschaft, Becker's songs were included in two of Zesen's printed collections. Burkhardt reckoned his *Scheidelied* and the *Schattenlied* from Zesen's *Rosen- und Lilienthal* to be among the most important lied compositions of the period. His hymn *Warum sollt ich mich denn grämen* from the *Auszug et licher geistlichen Lieder* was still sung in Hamburg churches as late as 1890.

WORKS

INSTRUMENTAL

Musicalische Frühlings-Früchte, 3–5 insts, bc (Hamburg, 1688, 2/1673 as Musicalische Lendt-Fruchten); ed. in EDM, 1st ser., cx (1995)

Erster Theil . . . Sonaten und Suiten, 2 vn, bc, or vn, va da gamba, bc (Hamburg, 1674); no.6 ed. in Mw, xxxv (1970), no.9 ed. A. Einstein (Leipzig, 1905)

Ander Theil . . . Sonaten und Suiten, 2 vn, bc (Hamburg, 1679), some for vn, va da gamba, bc

5 sonatas etc., 3 vn, bn, bc (no. 1), 2 vn, 2 va da gamba, bc (nos.2–5), *D-Hs*; ed. in EDM, 1st ser., cx (1995)

23 dances, 2 vn, bc (inc.), *Dl*

Sonatas etc., 2 vn, bc (inc.), attrib. 'Sieterich Beckron', *GB-Lgc*

VOCAL

Ehren Gedächtniss oder Begräbniss-Music, S, S/T, A, B, 3 va da braccio, bc (Glückstadt, 1677)

Traur- und Bergräbnüss-Music, 3 va da braccio, 'violino fagotto', bc (Glückstadt, 1678)

2 songs in 1668[8]

13 songs in 1670[6]

7 hymns in Auszug etlicher geistlichen Lieder für das Zucht-Haus (Hamburg, 1677)

Das Leiden und Sterben unsers Herrn Jesu Christi nach dem H. Johanne, 1678, lost, see Seiffert (1907–8)

Sacred concs.: Ach Herr wie ist meiner Feinde so viel, B, 2 vn, 4 va/tbn, lost, see Seiffert (1907–8); Amor Jesu, S, vn, bc, 1670, *S-Uu* (inc.); Der Herr is mein Hirt, S, 2 vn, bc, *D-W* (inc.); Herr Gott du bist unser Zuflucht, B, 4 va, bn, lost, see Seiffert (1907–8); Laeta nobis refulget, 2 S, 2 vn, va, bc, *S-Uu*; O hilf Christe, Gottes Sohn, S, B, 3 vn, va, bn, bc, *D-Bsb*; Schaff in mir, Gott, ein reines Herz, A, 2 vn, 2 va da gamba, vle/bn, bc, 1664, *S-Uu*; Wer unter dem Schirm des Höchsten sitzt, 2 S, 2 vn, va, bn, bc, *D-Bsb*; Wie der Hirsch schreiet, S, B, 2 vn, lost, see Seiffert (1907–8)

ULF GRAPENTHIN

**Becker, Günther** (*b* Forbach in Baden, 1 April 1924). German composer. He fought with the German army in the Soviet Union during World War II and was a prisoner when the war ended. On his release he attended the Badische Hochschule für Musik in Karlsruhe, studying to become a Kapellmeister. Two years later he met Fortner, who became his mentor for the next eight years; in 1953 Becker followed him to the Nordwestdeutsche Musikakademie in Detmold. He completed his studies in 1955–6, passing examinations in choral conducting, music theory and composition. He then moved to Greece to become the music teacher to Crown Prince Constantine. He stayed in Greece for 12 years, first at the Greek National School Anavryta and then at the German Dörpfeld Gymnasium. He was music adviser and choirmaster at the Goethe Institute in Athens and founded a Studio for Contemporary Music. He maintained his ties with Germany, however, several times attending the Darmstadt courses, where his *Vier Epigramme*, *Diaglyphen*, *Moirologi* and two string quartets had their premières between 1962 and 1967; he also lectured there in 1967, 1968 and 1970. Meanwhile two successful radio commissions, for *Nacht- und Traumgesänge* (1964) and *stabil – instabil* (1965) made his name and brought sufficient commissions for him to return to Germany as a freelance composer. In 1969 his interest in the combination of traditional instruments and electronic sound led him to found the live electronic music group MHz in Wuppertal. He also held a series of administrative posts including the presidency of the ISCM (1971–4). In 1973 he was appointed lecturer at the Robert Schumann Institute in Düsseldorf, becoming professor of composition and live electronic music there one year later. During his teaching career (he retired in 1989) he attracted a body of pupils from around the world. He is the editor of the two-volume collection *Neue griechische Klaviermusik* (Cologne, 1967).

Becker no longer acknowledges his youthful works, dismissing them as reminiscent of Hindemith and Schmitt. He distances himself from the earliest of his published works, the Four Bagatelles for piano, whose 12-note writing is derived from the dodecaphonic classicism of Schoenberg and the epigrammatic style of Webern. The new style he adopted shortly after 1960, which emphasizes, colours and surfaces, is exemplified by the First String Quartet, which was given its première by the Parrenin Quartet at the Darmstadt courses in 1964. Uncompromising and highly expressive, the work experiments with tonal extremes and changing degrees of density, directions of movement, layers and intensities. Becker's use of alienating instrumental noise led naturally to the creation of tape pieces (*Meteoron*, 1969; *Epiklesis Alpha*, 1976; *Magnum Mysterium*, 1978–9) and, more significantly, live electronic music, which he employs to defamiliarize the sound of the orchestra (*Transformationen*, 1970), a solo instrument (Oboe Concerto, 1973) or choral groups distributed around the performance area (*Apeiron*, 1972). His natural seriousness and interest in metaphysical ideas is counterbalanced by a liking for Dadaism and nonsense, and an objective attitude that has allowed him to produce a composition with ironic overtones on the subject of a severe illness which has shadowed his later years.

RAINER PETERS

**Becker, Heinz** (*b* Berlin, 26 June 1922). German musicologist. From 1946 he studied conducting, composition, the piano and the clarinet at the Hochschule für Musik in Berlin-Charlottenburg, where in 1949 he passed his final examination in the clarinet; during this time he was a

private student of Hermann Grabner. In 1948 he began studies in musicology at the Humboldt University in Berlin under Walther Vetter, Dräger and Ernst Hermann Meyer, with art history and philosophy as secondary subjects; he took the doctorate there in 1951 with a dissertation on the problems and techniques of cadences. After serving as an instructor at a Volkshochschule (1951–5) and as director of the department of private music teaching at the Petersen Conservatory in Berlin (1952–5), he became assistant lecturer at the musicology institute of Hamburg University in 1956, where he completed his *Habilitation* in musicology in 1961 with a study of the development of ancient and medieval reed instruments. He then taught as an external lecturer at Hamburg University before his appointment as professor of musicology at the Ruhr University in Bochum in 1966. In 1975 he founded the monument series Die Oper, which has made important works once again available. From 1975 to 1987 he served on the advisory committees of the Stiftung Preussischer Kulturbesitz, Berlin, and the Deutsche Bibliothek, Frankfurt. In 1987 he retired and since then he has contributed to the forthcoming edition of Meyerbeer's correspondence (ed. S. Henze-Döhring) and the critical edition of Meyerbeer's stage works, published under the auspices of the International Meyerbeer Institute.

Becker first became known for his research on the history of instruments and his work provided the impetus for further investigation of the history of reed instruments. His chief contribution has been the reintroduction of 19th-century French opera into the scholarly debate brought about by his detailed archival research. Although he focussed on the works of Meyerbeer, his research has inspired the rediscovery and staging of many works from the *grand opéra* repertory. The two Festschriften dedicated to him pay tribute to his position as a doyen of opera research.

HANS HEINRICH EGGEBRECHT/MATTHIAS BRZOSKA

**Becker, (Jean Otto Eric) Hugo** (*b* Strasbourg, 13 Feb 1863; *d* Geiselgasteig, nr Munich, 30 July 1941). German cellist, son of JEAN BECKER. He studied with his father and with Kanut Kündinger, Grützmacher, de Swert and Piatti. After his solo début at Leipzig and quartet tours with his father and siblings, he became solo cellist of the Frankfurt Opera (1884–6), taught at the Hoch Konservatorium in Frankfurt from 1894, and was cellist of the Heermann Quartet (1890–96). He succeeded Hausmann as professor at the Berlin Hochschule für Musik (1909–29). Becker was highly regarded as a teacher. His pupils included Eisenberg, Arnold Földesy, Grümmer, Boris Hambourg, Beatrice Harrison, Ludwig Hoelscher, Mainardi, Rudolf Metzmacher, Piatigorsky, Arnold Trowell, Herbert Walenn and Herbert Withers. His trio performances with Flesch and Carl Friedberg in Berlin were highly praised, as were those with Ysaÿe and Busoni in London, with Marteau and Dohnányi, and with Joachim and Bülow; he was also greatly esteemed as a soloist until illness forced him to give up his solo career in about 1910. According to Cobbett (*Grove5*), the features of Becker's playing were the production of a tone of remarkable richness and sonority, and a fine left-hand technique. For a time he experimented (unnecessarily) with a wooden soundbox to improve resonance. A number of works by established composers, including Reger, were written for him; of his own compositions, including a concerto and solo pieces, only the studies remain in use. He published a number of editions of chamber music and solo works, all of lasting value, and with Dago Rynar he wrote *Mechanik und Ästhetik des Violoncellspiels* (Vienna, 1929, 2/1971). He owned two fine Stradivari cellos: the 'Cristiani' of 1700, acquired in 1884 (but sold in 1894), and later the 1719 instrument now known as the 'Becker'.

LYNDA MACGREGOR

**Becker, Jakob.** *See under* BECKER (i).

**Becker, Jean** (*b* Mannheim, 11 May 1833; *d* Mannheim, 10 Oct 1884). German violinist. He studied with his father, Carl Becker, and with Hugo Hillebrandt, but credited Aloys Kettenus (1823–96), a graduate of the Liège Conservatory, with his principal musical education. From 1855 to 1865 he was Kettenus's successor, leading the orchestra of the Nationaltheater in Mannheim. In 1859 he began his career as a virtuoso, giving concerts in Paris and London. He appeared at the Monday Popular Concerts, was leader of the Philharmonic Society in 1860 and, in the same year, played at both Windsor and Buckingham Palace. During the next few years he toured successfully throughout Europe, earning the nickname 'the German Paganini'. He showed an early interest in chamber music, leading a quartet in London in 1860 and playing the music of Brahms and Schumann with Clara Schumann at Baden in 1863.

On a visit to Florence in 1865 he met Abramo Basevi, founder of the Società del Quartetto, and this acquaintance led to the formation of the Quartetto Fiorentino with Enrico Masi, Luigi Chiostri and Friedrich Hilpert (after 1875, Louis Spitzer-Hegyesi). Unlike ensembles of orchestral musicians or groups dominated by personalities (like those led by Joachim and Hellmesberger), the Quartetto Fiorentino devoted itself exclusively to quartet playing. It was recognized as the outstanding quartet of its time, setting standards of ensemble, musicianship and repertory that signalled the beginning of professional quartet playing; equally important was its role in developing audiences for chamber music and inspiring interest in amateur quartet playing.

Becker's three children all became string players, and for a brief period, after the Quartetto Fiorentino was disbanded in 1880, they played with their father as a quartet. The most illustrious of them, Hugo Becker (1864–1941), was a cellist. (E. van der Straeten: *The History of the Violin*, London, 1933/*R*)

ALBERT MELL

**Becker, John J(oseph)** (*b* Henderson, KY, 22 Jan 1886; *d* Wilmette, IL, 21 Jan 1961). American composer. He belongs, together with Ives, Ruggles, Cowell and Riegger, to the group named the 'American Five' of avant-garde music. Over several decades he served as the group's militant crusader for new music in the American Midwest, seeking to establish a national music with experimental tendencies drawn from the American experience rather than from Europe.

Becker graduated from the Cincinnati Conservatory in 1905 and received the doctorate in composition from the Wisconsin Conservatory in 1923. His principal teachers were Alexander von Fielitz, Carl Busch and the noted contrapuntist Wilhelm Middelschulte. He taught the piano and theory at the North Texas College Kidd-Key Conservatory in Sherman, Texas, from 1906 until about 1914, an otherwise obscure period in his life. In 1917 he began a long career of teaching and administration in Midwestern Catholic institutions, among them the University of Notre Dame (1917–27), the College of St Thomas, St Paul, Minnesota (1929–33) and Barat College, Lake Forest, Illinois (1943–57). After meeting Cowell in 1928, he became an energetic member of the newly organized Pan American Association of Composers. In addition to lecturing and writing (his writings include articles on 20th-century composers, the aesthetics of music and music education), he conducted Midwestern premières of works by Ives, Ruggles and Riegger in the early 1930s. His warm friendship with Ives, documented in a remarkable correspondence between the two men (1931–54), resulted in his orchestration of Ives's *General William Booth Enters into Heaven* for baritone, male chorus and small orchestra (1934). From 1935 to 1941 he was the controversial director of the Federal Music Project in Minnesota and was associate editor of the *New Music Quarterly*. A devout Catholic, he was chosen as the American musical representative to the First International Congress of Catholic Artists in Rome in 1950. His musical activity slackened somewhat in his later years because of declining health and the continual neglect of his music.

Becker's early symphonies and songs reveal the influence of German Romanticism and, to a lesser extent, French Impressionism. In the late 1920s his musical style underwent a radical change, leading to the highly dissonant yet lyrical *Symphonia brevis* of 1929. His creativity culminated in the 1930s in such works as *Abongo*, the Horn Concerto, *Concertino pastorale* and a unique series of 'Soundpieces', abstract chamber works of diversified instrumentation. His most significant contributions were large-scale stage works fusing dance, colour, mime, stage design and music into shapes

*John J. Becker, c1932*

prophetic of 'mixed-media' theatre. He considered his masterpiece to be his Stagework no.3: *A Marriage with Space* (1935), written in collaboration with the Chicago poet Mark Turbyfill. Becker favoured such contrapuntal forms and procedures as chorale, fugue and canon and preferred a dissonant, atonal counterpoint reminiscent of 16th-century polyphony in its even flow. His music employs rhythmic polytonal patterns and large chordal outbursts featuring overtones calculated to blend with and transform the basic sonority. An unusually clear orchestration is characterized by strongly contrasting colours and much use of percussion. The swift change of moods, from violent to darkly tragic, is most clearly revealed in the brilliant Violin Concerto (1948), Becker's last completed orchestral composition. His work, although occasionally gentle and serene, is frequently satirical and forcefully expressive of social protest. At a time when neo-classicism and a return to folk sources dominated American music, Becker insisted on the responsibility of the composer to 'add new resources, evolve new techniques, develop new sound patterns'.

WORKS

*unpubd unless otherwise stated*

*list excludes most lost and unfinished works; for details see GroveA*

STAGE

The Season of Pan (ballet suite), small ens, *c*1910

Dance Figure: Stagework no.1 (ballet, E. Pound), S, orch, 1932 [incl. music from unfinished cinema op Salome]

Abongo, a Primitive Dance: Stagework no.2 (ballet), wordless vv, 29 perc, 1933, pubd, New York, 16 May 1963

A Marriage with Space: Stagework no.3 (ballet, after M. Turbyfill), speaking chorus, orch, 1935, pubd [incl. music from Sym. no.3], arr. as Sym. no.4 'Dramatic Episodes', 1940

**Becker, Judith O.** (*b* Bay City, MI, 3 Sept 1932). American ethnomusicologist. She took the doctorate in South-east Asian studies at the University of Michigan in 1972 under William Malm. After working as assistant (1972–8) and associate professor at Michigan, she was appointed professor there in 1985. She has directed the university's Javanese gamelan programme since its inception. She is one of the few ethnomusicologists to have conducted field work in a number of South-east Asian countries and her contributions have been recognized with awards from the University of Michigan and the Society for Ethnomusicology. Her publications include four books on the music of Indonesia as well as articles on mode in Burmese harp music, Javanese gamelan music, music and ritual, music and trance, and the relations between music and general culture. Although her early work was musicological in orientation, her later work has emphasized anthropological issues. Of special note are several studies of 'iconicity' or the replication of general cultural patterns within musical ones.

TERRY E. MILLER

**Becker, Rudolph Zacharias** (*b* Erfurt, 9 April 1752; *d* Gotha, 28 March 1822). German writer and publisher. The son of a schoolteacher, he graduated in theology from Jena University, and then taught at a school in Klettenberg am Harze for a short time before returning to Erfurt as a tutor. In 1782 he took a teaching position in Dessau, but in 1784 moved to Gotha to help found a teachers' institute. There he continued his career as a writer, established several periodicals and in 1795 founded his own publishing house.

Becker is best known for his literary works, particularly the *Versuch über die Aufklärung des Landsmanns* (1784) and the remarkably popular *Noth- und Hülfsbüchlein für Bauersleute* (1787), both of which deal with his imaginary utopian village of Mildheim. His importance to music rests in the songbook he compiled for the village – the *Mildheimisches Liederbuch von 518 lustigen und ernsthaften Gesängen über alle Dinge in der Welt und alle Umstände des menschlichen Lebens, die man besingen kann, gesammelt für Freunde erlaubter Fröhlichkeit und echer Tugend, die den Kopf nicht hängt* (1799) – and its companion volume of 359 melodies published in the same year. These two works, in their several editions, contain examples of the work of most major poets and lied composers of the pre-Schubert era. The poets include Walther von der Vogelweide, Bürger, Claudius, Dach, Gleim, Goethe, Matthison and Schiller; many of the melodies are by Reichardt, Schulz and Hiller, and other composers represented include Georg Benda, Neefe, André and Mozart. Becker contributed both poetry and music to the collections, which by the time of the 1822 editions included 800 poems and as many melodies. The volume of melodies also appeared in an instrumental arrangement for two violins and bass (1799). Becker edited the *Allgemeine Choral-Buch* (in four-part settings, 1811) by the organist K.G. Umbreit, who may have advised Becker in compiling the melodies to the *Mildheimisches Liederbuch*.

RAYMOND A. BARR

**Becker, Wilhelmine Ambrosch.** Married name of the singer Wilhelmine Ambrosch, daughter of JOSEPH KARL AMBROSCH.

**Beckerath, Rudolf von** (*b* Munich, 19 Feb 1907; *d* Hamburg, 20 Nov 1976). German organ builder. He was the son of Willy von Beckerath, a well-known painter, and his mother Louise was a pianist and harpischordist. The family moved to Hamburg, where Beckerath was educated. Under the influence of Gottlieb Harms and H.H. Jahnn, and having heard the Arp Schnitger organ at the Jacobikirche, Hamburg, he gave up his engineering studies in order to take up organ building. He first undertook an apprenticeship in cabinetmaking at the Kunstgewerbeschule, Hamburg (1925–8), and in 1926 he began building a house organ. To widen his knowledge and gain practical experience he worked with Victor Gonzalez in Châtillon-sous-Bagneux, near Paris (1929–30) and in 1931 with Theodor Frobenius in Lyngby, Denmark, where he specialized as a voicer and made a study of the pipe measurements of Baroque organs. During this time his relations with Jahnn cooled. He then returned to Gonzalez (Victor and his son Fernand), where he took over the pipe-making and voicing (1932–6). In 1936 he began to work as an organ consultant in Hamburg and in November 1938 he became consultant on organs to the Reichs- und Preussische Ministerium für kirchliche Angelegenheiten in Berlin.

During the war Beckerath served for four years in the army and was an American prisoner of war in 1945. On his return to Germany in 1946 he made an inventory of the organs in churches of the Hannoversche Landeskirche. In 1949 he passed his Meisterprüfung and set up an organ workshop in Hamburg. From the beginning he made all his own reeds. His organs (all with tracker action) soon gained a worldwide reputation, especially because of their fine voicing. He built 143 organs in Europe, the USA, Canada and Australia. His most important organs are those in the Johanneskirche, Düsseldorf (1954); the Petrikirche, Hamburg (1955); Trinity Lutheran Church, Cleveland, Ohio (1957); Oratoire St Joseph-du-Mont-Royal, Montreal (1960); St Paul's Cathedral, Pittsburgh (1962); Dwight Chapel, Yale University (1971); Great Hall, University of Sydney (1970); and the Hochschule für Musik und Theater, Hanover (1973). The last organ he planned (op.148) was for the University of Cape Town. Beckerath also restored historic organs in northern Germany, Denmark and Sweden. In his last two restorations, at Neuhaus an der Oste (1972) and Neuenkirchen (1973), both near Cuxhaven, he retuned the organs to meantone temperament.

After Beckerath's death three members of staff carried on the workshop. Timm Sckopp was manager from 1990, superseded in 1996 by Holger Redlich and Rolf Miehl. Since 1977 the firm has built, among others, organs for the Cultural Hall, Narashinō, near Tokyo (1978); the American Church, Paris (1988); the Concert Hall, Krasnodar, Russia (1994) and Immanuel Methodist Church, Seoul, Korea (1996). Restoration work has included organs in Mariana, near Ponte Nova, Brazil (1984); the abbey church at Bassum, near Bremen (1985), and at Steinkirchen, near Stade (1987).

SUSI JEANS/ALFRED REICHLING

**Beckett** [Becket], **Philip** (*d* ? London, May 1679). English violinist, cornett player and composer. He is perhaps the Philip Beckett recorded in the London parish of St Olave Hart Street between 1654 and 1661. He was sworn in as a member of the Twenty-Four Violins on 19 June 1660, was given a place as a wind musician by a warrant dated 3 January 1661, and was paid £18 on 2 September 1661 for 'a Vyolin to be used in the Chamber of Vyolins and for a Cornett to be used in his Majesties Chappell Royall'. He was evidently well thought of, for John Banister chose him for his 'select band' in April 1662, and he directed members of the Twenty-Four Violins on at least one occasion: on 31 October 1666 nine members were ordered 'to meet and practise with Mr. Becket, his lessons'. The first violin part of a 12-movement suite in B♭ by Beckett survives (*GB-Och* Mus.1066), and it could be the work in question, as it is the sort of music the Twenty-Four Violins would have played on duty at court. The only other surviving music attributed to him is the bass part of an air (*Ob* Mus.Sch.D.220), though there are divisions on a ground by 'Mr. P.B.' in Playford's *The Division Violin* (London 1684/*R*). Beckett surrendered his place in the Twenty-Four Violins in August 1674, though he kept his place as a wind player until at least May 1678, perhaps as a sinecure. His successor, Richard Robinson, was sworn in on 17 May 1679, and Beckett was described as 'late musician' on 3 September 1679.

PETER HOLMAN

**Beckett, Walter Koehler** (*b* Dublin, 27 July 1914; *d* Dublin, 3 April 1996). Irish composer and organist. Born to a musical family, he was a student of George Hewson and John Larchet at the Royal Irish Academy of Music and completed the MusD (1947) at Trinity College, Dublin. He began his varied career as the organist at St Canice's Cathedral, Kilkenny, and later taught in Dublin, London and Venice. Beckett's output, though small, is both lyrical and accessible. Early works show the influence of Vaughan Williams and Delius, while later works, such as the String Quartet no.1 (1980) attest to the composer's high regard for chamber music. A fondness for things Irish is also apparent in a number of his works. The *Irish Rhapsody* (1957) is based on traditional melodies. The song cycle *Goldenhair* (1980) sets texts by James Joyce, while the *Dublin Symphony* (1990), one of the composer's largest

undertakings, is based on texts by Joyce and Rhoda Coghill. The composer's particular literary sensitivity may have been a family trait he shared with his distant relation, Samuel Beckett.

JOSEPH J. RYAN

**Beckford, William** (*b* Fonthill, 29 Sept 1760; *d* Bath, 2 May 1844). English writer, patron and amateur composer. He is chiefly remembered as author of the oriental tale *Vathek* (1786). Although he was an accomplished performer on the harpsichord and pianoforte, it is unlikely that, as he later claimed, Beckford studied with Mozart when both were children. Beckford met Pacchierotti in Italy in 1780; he encouraged the castrato to return to England to sing at the Italian opera and became one of his most important patrons. For Beckford's coming-of-age party at his Fonthill estate the following year a cantata (*Il tributo*) composed by Rauzzini was performed by the composer together with Pacchierotti and Tenducci. Beckford provided music for Elizabeth, Lady Craven's opera *The Arcadian Pastoral* (1782), which was written for private performance at Queensberry House in London; his other compositions include an *Overture du Ballet de Phaeton* (1784/1788–91) and over 30 short works including songs, keyboard sketches and pieces for small orchestra. After a scandal in 1784 Beckford travelled (his published journal comments on musical performances in Lisbon) and then lived a reclusive life in England, devoting himself to the creation of Fonthill Abbey. His papers including musical manuscripts are in the Bodleian Library, Oxford.

LINDA TROOST

**Becking, Gustav (Wilhelm)** (*b* Bremen, 4 March 1894; *d* Prague, 8 May 1945). German musicologist. He studied in Berlin with Wolf and in Leipzig with Riemann. He became Riemann's assistant and took the doctorate in 1920. From 1922 he was successively lecturer at the University of Erlangen (where he completed the *Habilitation* with a work on rhythm and was promoted to reader in 1928), professor at Utrecht (1929) and professor at the German University of Prague (1930, in succession to Heinrich Rietsch), where he remained until his death. Becking's earliest researches were devoted to rhythm, and led to the so-called 'Becking curves' – graphic representations of what he conceived to be the constant element in each composer's musical personality. He also did valuable work on Bohemian art music and Balkan folk music, as well as editing several series of studies by his pupils. Against the rising tides of nationalism, Becking pointed out the futility of pinpointing national characteristics in music, but he later championed the cause of Sudeten-German culture in Czechoslovakia as the German annexation of the Sudetenland in 1938 approached.

KARL GEIRINGER/ MALCOLM TURNER/PAMELA M. POTTER

**Beckman, Bror** (*b* Kristinehamn, 10 Feb 1866; *d* Ljungskile, 22 July 1929). Swedish composer and administrator. He studied counterpoint with Lindegren; the award of a state grant (1894–5) enabled him to study abroad, principally with F. Würst in Berlin. After working in music shops he earned a living in insurance during the period 1888–1909. In 1910 he was appointed director of the Stockholm Conservatory, where he introduced the Jaques-Dalcroze method of aural training and instituted a class in conducting. He became a member of the Swedish Royal Academy of Music in 1904 and a professor in 1911. His compositions reveal a skilled handling of form, together with an imaginative, if sometimes reserved, temperament. The later works show Nielsen's influence.

WORKS

I sommarnätter, str orch, op.3 (1890); Sonata, a, op.1, vn, pf (1893); Sym., F, op.6 (1895); Flodsånger [River Songs], 1v, orch (1897); En lyckoriddare (incid music, H. Molander) (1900); Om lyckan, sym. poem (1905); Gambla gastar, 1v, orch, op.7 (1906)
Pf and hmn pieces, songs

AXEL HELMER

**Beckmann, Johann Friedrich Gottlieb** (*b* Celle, bap. 6 Oct 1737; *d* Celle, 25 April 1792). German composer. He was organist at the Neuenhäuser Kirche in Celle by 1757, and at the Stadtkirche there from 1784 until his death. He also gave lessons in singing and keyboard playing and conducted the town's orchestra in subscription concerts. This orchestra was supplied with recent music by the Hamburg publisher Westphal, through whom some

connection with C.P.E. Bach may have been established, as Beckmann distributed Bach's works on commission in Celle. He was held by his contemporaries Gerber and Cramer to be one of the greatest keyboard players of his age, with an extraordinary gift for improvisation. His works show an open-minded acceptance of 18th-century forms and styles, and a distinctive warmth of melody. An opera *Lukas und Hannchen* (1768) was performed in Brunswick, Hanover, Hamburg and Cologne by the Ackermann troupe.

WORKS

Lukas und Hannchen (op, J.J. Eschenburg), Brunswick, 1768, kbd score, Herrenhofmuseum Valdemars Slot, Svendborg, Denmark

Songs: In dem rosafarbnen Kleide, Die weissen Rosen, An die Erde, in E. von Berlepsch: *Sammlung kleiner Schriften und Poesien*, i (Göttingen, 1787), ed. Müller (*Celler Chronik*, iii, 1987); Stets sey es Frühling um dich, 1v, pf, 1790, *D-CEbm**; Elegie an Dorinde (J.J. Eschenburg), *D-FRva*

Inst: 6 Kbd Sonatas, i–ii (Hamburg, 1769–70); 2 syms., hpd, vn, 2 hn, op.1 (Lyons, before 1777), lost; 6 Hpd Concs., opp.1–2 (Berlin and Amsterdam, 1779–80); 6 Sonatas, hpd/pf, acc. fl/vn, vc, op.3 (Berlin and Amsterdam, 1790); Solo, hpd/pf (Hamburg, 1797)

Other works mentioned in Beckmann's will, lost

HARALD MÜLLER

**Beckwith, John** (*b* Victoria, BC, 9 March 1927). Canadian composer, writer and pianist. He studied the piano with Alberto Guerrero at the Toronto Conservatory (1945–50), took the MusB at the University of Toronto (1947) and continued his studies with Boulanger in Paris (1950–52). He joined the University of Toronto music department in 1952, broadcast regularly on CBC radio (1956–65) and was music critic for the *Toronto Star* (1959–62, 1963–5). In 1961 he received the MMus from the University of Toronto, where he later served as the dean of music (1970–77), Jean A. Chalmers Professor in Canadian Music and director of the Institute for Canadian Music (1984–90). A founding member of the Canadian League of Composers (1951), he has served on the boards and committees of innumerable artistic organizations. He was a co-founder of the Canadian Musical Heritage Society, for which he edited two volumes, and has produced transcriptions, arrangements and reconstructions of much early Canadian music. His honours include the Annual Medal (1972) and Composer of the Year award (1985) from the Canadian Music Council, the diplôme d'honneur of the Canadian Conference of the Arts (1996) and a number of honorary doctorates. In 1987 he was appointed a member of the Order of Canada.

Beckwith's commitment to Canada and Canadian culture has been the thread running through his various musical pursuits. As a composer he has frequently explored Canadian subjects, as a writer he has been a staunch supporter of Canadian music, and as a scholar he has helped to uncover and restore a wealth of Canadian vernacular and art music. While his early works are neoclassical, the radio collages of the 1960s, co-produced with James Reaney (an Ontario writer), experiment with musical textures layered into complex mosaics, a technique used extensively in his later instrumental and choral works, especially *Circle with Tangents* (1967), the String Quartet (1977) and *Keyboard Practice* (1979). The last of these quotes from a number of well-known keyboard pieces; other compositions use material borrowed from a wide spectrum of styles. Beckwith and Reaney have also collaborated on four operas, *Night Blooming Cereus* (1958), *The Shivaree* (1978), *Crazy to Kill* (1988) and *Taptoo!* (1993–4), all of which are based on southern Ontario stories. Beckwith's fascination with the activities of The Children of Peace (a 19th-century Ontario religious community) has produced such compositions as *Sharon Fragments* (1966), the *Upper Canadian Hymn Preludes* (1977) and Three Motets (1981), as well as historical and restorative work.

Beckwith's outlook and compositions also explore horizons beyond Canadian borders. His theatrical interests have influenced instrumental works such as *Taking a Stand* (1972), which requires players to use their performing space in a dramatic manner. A puckish sense of humour, encapsulated in the children's story *All the Bees and All the Keys* (1973), surfaces repeatedly, especially in his vocal works, which include settings of highway signs (*Gas!*, 1969) and animal calls (*Mating Time*, 1981), as well as texts by Margaret Atwood, e.e. cummings and b p Nichol. The *Etudes* for piano (1983) are a fine example of his approach to serialism, while the flute concerto, *A Concert of Myths* (1983), is based upon three Greek stories of metamorphosis.

WORKS
(*selective list*)

DRAMATIC

Stage: Night Blooming Cereus (chbr op, 1, J. Reaney), 1958, CBC radio, 4 March 1959, staged, Toronto, 5 April 1960; The Shivaree (chbr op, 2, Reaney), 1978, Toronto, 3 April 1982; Crazy to Kill (detective op, Reaney, after A. Cardwell), 1988, Guelph, ON, 11 May 1989; Lucas et Cécile (op), 1989–91 [restoration of op by J. Quesnel, *c*1808]; Taptoo! (op, Reaney), 1993–4; Montreal, 13 Mar 1999

Radio collages (texts by Reaney, unless otherwise stated): A Message to Winnipeg, 3 spkrs, cl, vn, pf, perc, 1960; 12 Letters to a Small Town, 4 spkrs, fl, ob, gui, pf + hmn, 1961; Wednesday's Child, 3 spkrs, S, T, fl, va, pf, perc, 1962; Canada Dash, Canada Dot, 4 spkrs, 5 solo vv, 10 insts: I The Line Across, 1965, II The Line Up and Down, 1966, III Canada Dot, 1967; The Journals of Susanna Moodie (M. Atwood), 2 kbd, perc, 1972, rev. 1990

VOCAL

JOHN MAYO

**Beckwith, John 'Christmas'** (*b* Norwich, 25 Dec 1759; *d* Norwich, 3 June 1809). English organist and composer. He was the son of the Norwich organist Edward Beckwith. His published works name him simply as John; the name 'Christmas', though used at his burial, seems to have been no more than a nickname. In 1775 he was placed under William Hayes, whom he assisted at Magdalen College, Oxford, continuing afterwards under Philip Hayes. After returning to Norwich in 1784, initially as a teacher of singing and harpsichord, he took an active part in local concert life. By 1785 he had succeeded his father as assistant organist at Norwich Cathedral, and in April that year he married Mary Elizabeth Cox of Oxford. They had three children; the youngest, John Charles (1788–1819) served the cathedral as lay clerk and ultimately, organist. In 1788 and 1790 John the elder joined the oboist Michael Sharp in organizing the ambitious Norwich music festivals. In January 1794 he succeeded his father as organist of St Peter Mancroft, Norwich, and as master of the cathedral choristers. His interest in church and congregational singing had encouraged him to introduce the first sung service at St Peter Mancroft in late 1792, and he was in some demand to 'open' new organs in country towns around Norwich. In 1803 he took the Oxford degree of DMus, and finally became organist of Norwich Cathedral in August 1808, retaining his post at St Peter Mancroft.

His *Six Anthems in Score* appeared in 1785. The anthems are innocently melodious, though *The Lord is very great*, by which he was long best known, attempts the dramatic and picturesque albeit somewhat naively. He also published some harpsichord and organ music. He enjoyed a great reputation as an extemporizer, and in an exceptionally long obituary notice, the *Gentleman's Magazine* for 1809 extolled 'the genius with which he conceived ... and ... the style in which he performed his inimitable voluntaries' (p.589). His publication *The First Verse of every Psalm of David, with an Ancient or Modern Chant* (London, 1808) contains a historical preface on church singing and a germ of the idea of a pointed psalter. It also contains his admission that almost every day he was occupied for up to 14 hours 'in the most slavish part of my profession'.

WORKS

*printed works published in London*

VOCAL

6 Anthems in Score, 1–5vv (1785)

The Chimney Sweepers, glee, 3vv (1795)

The First Verse of every Psalm of David, with an Ancient or Modern Chant (1808)

My Soul is Weary of Life, anthem, vv, org, orch (n.d., repr. 1848)

Anthems, unpubd, Norwich, Cathedral Library, all inc.: Bow Down; Hear O Thou Shepherd; I cried unto the Lord; O All Ye Works; O Lord My God; O Praise God in His Holiness; O Praise the Lord; O Sing to Thee, O God

2 chants, *GB-Lcm*

INSTRUMENTAL

6 Voluntaries, org/hpd (1785)

A Favourite Concerto, org/hpd/pf (1795)

A Favourite Sonata, hpd/pf, op.3 (1795)

5 Lessons, hpd/pf, 1779, lost

WATKINS SHAW/JONATHAN BAXENDALE

**Béclard d'Harcourt** [née Béclard], **Marguerite** (*b* Paris, 24 Feb 1884; *d* Paris, 2 Aug 1964). French composer and ethnomusicologist. She studied the organ with Abel Decaux, composition with d'Indy at the Schola Cantorum, and, later, counterpoint with Maurice Emmanuel, and developed a deep interest in modes and folksong. From 1912, interrupted briefly by the war, she and her husband, the anthropologist Raoul d'Harcourt, carried out fieldwork in the Andes, which resulted in various publications from 1922, including the first notated collection of Quechua songs (1923). *La musique des Incas et ses survivances* (1925) contains descriptions of musical instruments, festivals, dances and folklore as well as analyses and transcriptions of 200 melodies with words and popular urban harmonizations. Their research was not confined to South America, as the comprehensive study *Chansons folkloriques françaises au Canada* (1956) testifies.

Béclard d'Harcourt's compositions are strikingly modal in character. Imitative and fugal writing alternates with block harmony in the syllabic setting of Charles d'Orléans' *Au printemps* (1956), while *L'Amour par terre* (1905) evokes a *fin-de-siècle* atmosphere with its static vocal line, abrupt changes of mood and repetitive pianistic figurations. (*HoneggerD*; *MGG1*, G. Rouget)

WORKS
(*selective list*)

Dramatic: Raïmi ou la fête du soleil (ballet), 1925; Dierdane (op, after J.M. Synge: *Deirdre of the Sorrows*), 1937–41

BARBARA L. KELLY

**Becuadro** (Sp.). *See* NATURAL.

**Bečvařovský** [Beczwarzowsky, Betschwarzowski, Betzwarzofsky], **Antonín František** [Anton Franz; Franz Anton] (*b* Mladá Boleslav, Bohemia, 9 April 1754; *d* Berlin, 15 May 1823). Czech composer, pianist and teacher, grandfather of CARL FERDINAND POHL. He attended the Piarist college at Kosmonosy (1767–74) where he probably received his first musical education. Later he studied music in Prague with Kuchař and became organist at the Minorite church of St Jakub (*c*1777). Having left for Germany, he worked in Brunswick (*c*1779–96) as organist of the Hauptkirche and Kapellmeister to the duke. Thereafter he spent several years in Bamberg as a piano teacher. About 1799 he settled in Berlin, again as a private music teacher, and remained there until his death. The Berlin newspapers (*Königlich privilegierte Berlinische Zeitung*, later *Vossische Zeitung*, and *Berlinische Nachrichten von Staats- und Gelehrten Sachen*, later *Spenersche Zeitung*, 1799–1823) provide some evidence that he was also active in public music-making. In 1804 and 1805, for example, he conducted Haydn's *The Creation* and *The Seasons* at the Königliches Nationaltheater; in 1814 he was referred to as 'Kapellmeister' in the *Allgemeine musikalische Zeitung*.

Bečvařovský's output, most of which was published in his lifetime, reflects the stylistic transition from the Classical to the early Romantic idiom of Schubert and Weber. In his vocal compositions the romantic traits are most obvious in several large-scale songs shaped as dramatic scenes, with introduction, interludes, declamatory and arioso sections; some other songs are in strophic form and many of them have the character of canzonettas. The piano part is diversified and plays an important role in depicting the meaning of the poetry. Romantic elements of melodic inspiration also appear in Bečvařovský's chamber works. The concertos opp.1 and 2, intended for dilettante keyboard players, show a marked difference from those of opp.5 and 6, which tend to more virtuoso and specifically pianistic stylization. In the sonata form of the first movements of his instrumental works the 'singing-allegro' type often appears, whereas the rondo finales make great use of folklike dance rhythms. Bečvařovský was a prominent piano teacher. Most of his piano compositions were written as teaching material and some of them are still used and reissued for that purpose. The progressive orientation of his teaching can be seen from the fact that by about 1803 he was assigning works of Beethoven (piano concertos and sonatas), Cramer and Dussek to his more advanced pupils.

MILAN POŠTOLKA/UNDINE WAGNER

**Bédard, Hubert (François)** (*b* Ottawa, 28 Dec 1933; *d* Brignoles, France, 16 June 1989). Canadian harpsichord maker and harpsichordist. After classical studies he entered the Conservatoire de Musique in Montreal (1956), where he studied organ with Bernard Lagacé and harpsichord with Kenneth Gilbert. In 1959–60 at the Vienna Music Academy he studied harpsichord with Eta Harich-Schneider and had private lessons with Isolde Ahlgrimm (1959–60); he also studied at the Amsterdam Conservatory with Gustav Leonhardt (1960–61). After resuming his career as organist in Montreal, he served as musician-in-residence at the Shakespeare Festival, Stratford, Ontario (1962–3), and then entered the workshop of Frank Hubbard in Waltham, Massachusetts, to learn the craft of instrument making. In 1968 he moved to Paris as chief restorer in the Conservatoire workshop then being established under Frank Hubbard's direction. At the same time Bédard set up his own workshop with a small staff where he undertook restorations for other collections and produced harpsichords modelled on historical prototypes.

During the following 20 years over 40 early keyboard instruments were restored under his direction, both for private collectors and for a number of museums, including the Vleeshuis (Antwerp), the Musée des Arts Décoratifs (Lyons), the Musée des Beaux-Arts (Chartres), the Horniman Museum (London) and the Musée de la musique (Paris). Bédard's approach to restoration was both conservative and intuitive. He held that any intervention on historical instruments should be reversible, in case new elements were one day to come to light; at the same time he believed that the instruments should be both played and heard. During his years in Paris he taught a number of younger makers who subsequently established their own workshops. He also developed several harpsichord kits which are marketed by the Heugel-Leduc publishing firm in Paris.

Bédard made a recording (1964) of Froberger and Louis Couperin on the 1646 harpsichord by Andreas Ruckers held in the Vleeshuis, and prepared editions of Rameau's *Hippolyte et Aricie* and *Les Fêtes d'Hébé* for a perfomance on Radio-Canada Television (1964). He also published French translations (with Félia Bastet) of Frank Hubbard's *Three Centuries of Harpsichord Making* (Cambridge, MA, 1965; Fr. trans., 1981), and of Andreas Streicher's *Kurze Bemerkungen über das Spielen, Stimmen und Erhalten der Forte-piano* (Vienna, 1801/*R*; Fr. trans., 1982).

HOWARD SCHOTT, KENNETH GILBERT

**Bede** [Beda venerabilis] (*b* Northumbria, 673; *d* Jarrow, 735). Anglo-Saxon monk, writer and historian. His works, particularly the *Historia ecclesiastica gentis Anglorum* ('Ecclesiastical History of the English People'), provide important evidence for the practice of music in the Anglo-Saxon Church during the 6th, 7th and early 8th centuries. At the age of seven, he was placed under the care of Benedict Biscop (628–90), abbot and founder of the Northumbrian monastery of St Peter at Wearmouth. When Biscop founded the brother abbey of St Paul at Jarrow in 682 Bede was sent there to join its abbot Ceolfrith (642–716). Bede spent the rest of his life at Jarrow, where he became a dedicated teacher, never travelling outside Northumbria. Biscop and Ceolfrith acquired many books on their frequent journeys to Rome and Gaul and were largely responsible for the substantial collection of manuscripts owned by the abbeys; they also created one of the most important scriptoria in Anglo-Saxon England. Wearmouth became a major centre for the teaching of liturgical music in Northumbria when in 680 Biscop acquired the services of John, archcantor of St Peter's basilica and abbot of St Martin's in Rome, to teach his monks how to celebrate the liturgy and to chant according to the practice of the Roman churches.

Bede's writings were intended to aid his work as a teacher and include a number of commentaries on the scriptures, hagiographical texts, a book of hymns, a history of the abbots of Wearmouth and Jarrow and treatises on orthography and metrics; a list of his writings (to which should be added *De locis sanctis*) may be found at the end of his most important work, the *Ecclesiastical History*. Many spurious texts have also been attributed to Bede, including a *Musica theorica* and a *Musica quadrata seu mensurata* (*PL*, xc, 909ff); the former is an anonymous commentary on Boethius's *De institutione musica* and the latter is the treatise on mensural theory by MAGISTER LAMBERTUS. Music as a theoretical discipline was practically unknown to Bede and his contemporaries in the Anglo-Saxon Church; he was not acquainted with the works of Boethius, Martianus Capella or Cassiodorus's *Institutiones* and, according to his biographer Cuthbert, he remained distrustful of Isidores of Seville's 'falsehoods'.

Although none of his works discusses music directly Bede's writings nevertheless constitute some of the most

important and informative evidence for liturgical music in the Anglo-Saxon Church. *De orthographia* contains definitions of several musical terms, for example, *bucina*, *cantator* and *rhythmos*; and *De arte metrica* includes a discussion of the definition and difference between rhythm and metre, a passage later quoted by Aurelian of Réôme. His biblical commentaries refer to the singing of the Gloria in excelsis and Agnus Dei in the Mass, the omission of the alleluia from the Mass during Lent and its reinstatement at Easter.

The *Ecclesiastical History* was completed in 731, a few years before Bede's death, and traces the history of the Anglo-Saxon Church from the arrival in Kent in 597 of the Roman missionary St Augustine. Bede's view of this history was coloured by a strongly pro-Roman bias that led him to present much of the work in terms of the gradual spread of Roman traditions, including chant, throughout the English Church (*see* CELTIC CHANT, §1). In particular, he mentions several times that there was a tradition of Roman chant practised in Kent that had been transmitted by 'the disciples of Pope Gregory' (*Ecclesiastical History*, v.20). Although Bede never stated that he thought Gregory I was the original creator of the repertory, the emphasis he and other Anglo-Saxon writers placed on Gregory I's role in introducing Roman chant, as well as Christianity, to England is thought to have laid the foundations for the later legend of Gregory I's authorship.

CALVIN BOWER/JANE BELLINGHAM

**Bedeckher, Philipp Friedrich.** *See* BÖDDECKER, PHILIPP FREIDRICH.

**Bedford, Arthur** (*b* Tiddenham, Glos., 8 Sept 1668; *d* Hoxton, London, 13 Aug 1745). English clergyman, scholar and writer. He held clerical positions in Bristol from 1693, in Newton St Loo, near Bath, from 1713, and at the Haberdashers' Hospital, Hoxton, from 1724. He supposedly was chaplain to the first two dukes of Bedford, and in his later years to Frederick, Prince of Wales, but does not seem to have served actively in their households. He was a major figure in the campaign against the theatres, publishing *The Evil and Danger of Stage Plays* (Bristol, 1706) and a sermon (London, 1730) given in 1729 at St Botoph Aldgate, against the building of Goodman's Fields Theatre. In doing so he and the Nonjuror Jeremy Collier (1650–1726) prepared the way for the Licensing Act of 1737 that instituted the first censorship of plays. He also exerted an important influence on writings on musical taste, especially on 16th-century music, or 'ancient music', as it became called around 1700. In *The Great Abuse of Music* (London, 1711) he condemned the increasing commercialization of music for the home and the theatre and championed the works of the Elizabethan masters as models of good taste and morality. As a scholar he published works on issues of astronomical chronology raised by Isaac Newton and contributed to an Arabic psalter and an edition of the New Testament for Asians. His *Excellency of Divine Musick* (1733) includes at least three hymns composed by him.

WILLIAM WEBER

**Bedford, David (Vickerman)** (*b* London, 4 Aug 1937). English composer. He studied at the RAM between 1958 and 1961, where he was taught composition by Berkeley; he was later appointed FRAM. In 1962 he was a pupil of Nono in Venice and also worked at the RAI electronic music studio in Milan. Since 1963 he has spent some of his time as a schoolteacher, in particular at Queen's College, London (1968–80), where he was also composer-in-residence in 1981; between 1983 and 1987 he was associate visiting composer at Gordonstoun School, Scotland. He became youth music director of the English Sinfonia in 1986, and from 1994 also the orchestra's composer-in-association.

In 1963–6, in particular, Bedford reaped the fruits of an obsession with the American poet Kenneth Patchen, whose texts he set to powerful effect in the dense but evocative textures of the *Two Poems* for unaccompanied chorus (1963), his first work to receive international recognition. Subsequently one of the most individual aspects of his output became his deployment of experimental techniques of the time in music designed for performance by children. An enthusiastic contributor to Universal Edition's groundbreaking *Music for Young Players* series, Bedford drew on graphic scoring methods, space-time (or proportional) notations, extended instrumental and vocal techniques, and the chance-determined procedures of such composers as Cage, Earle Brown and his for-a-time close colleague Cornelius Cardew, to produce pieces which elegantly combine simplicity of realization and directness of effect; the ensemble composition *An Exciting New Game for Children of All Ages*

(1969) is a good example. Another dimension of his ability to transcend the common barriers between different fields of musical endeavour is demonstrated in *The Tentacles of the Dark Nebula* (1969) for tenor and eight strings – commissioned and first performed by Peter Pears – which sets prose from a short story by Arthur C. Clarke with an urgent lyricism amid its instrumental glissandos and quarter-tones.

From 1969 onwards, Bedford was involved with Kevin Ayers, whose group The Whole World took part in Bedford's *Star's End* for rock group and orchestra (1974). This work is probably the best of his pieces to combine elements from cultivated and vernacular traditions during a period of particular optimism for such concerns.

Since those years of maximum exposure, Bedford has been active in popular, commercial and film music (for instance, producing, in 1973, a live instrumental version of Mike Oldfield's *Tubular Bells*) as well as composing for both the concert hall and the operatic stage, and for professional and amateur forces. His prolific output has continued to reflect the changing values and conditions of its time; *Twelve Hours of Sunset* for chorus and orchestra (1974), for example, sets words by Roy Harper to shimmering sounds typical of 1960s 'texture' music with greater consonance than many at the time would have dared. His Symphony no.1 (1984) initially suggests a less flamboyant demeanour, yet as a whole is an excellent example of the composer's skills as an orchestrator as well as of the more symphonic, less static approach that characterises his later output. Bedford's work for children has continued with the composition of eight operas for schools and several innovative large-scale projects, such as *A Charm of Blessings* for vocal soloists, children's choir, chorus and orchestra (1997).

WORKS
*(selective list)*

INSTRUMENTAL

KEITH POTTER

**Bedford, Steuart (John Rudolf)** (*b* London, 31 July 1939). English conductor, brother of DAVID BEDFORD. He studied at the RAM and was an organ scholar at Worcester College, Oxford (where he conducted university productions of Britten's *Albert Herring* and Menotti's *The Consul*). In 1965–6 he joined the Glyndebourne music staff, and in 1967 the English Opera Group, with which he made his conducting début that year in *The Beggar's Opera* at Sadler's Wells Theatre. In 1965 he became a professor at the RAM and conductor of the opera class, with which he conducted his own version of *L'incoronazione di Poppea* in 1969 (which he discussed in *Opera*, xx, 1969, pp.94–100) and gave the first modern British performances of Donizetti's *Belisario* as an RAM centenary production (1972). He conducted the première of Gardner's *The Visitors* (1972, Aldeburgh Festival), the first stage performances of Britten's *Owen Wingrave* (1973, Covent Garden), and was widely praised for his

preparation, conducting and recording of Britten's *Death in Venice* (1973, Aldeburgh). He conducted many later performances of that work at Covent Garden and on tour abroad; also the US première at the Metropolitan Opera in 1974 (his American début). He returned to the Metropolitan for *Le nozze di Figaro* in 1975 and *Billy Budd* in 1997. In December 1973 he was appointed an artistic director of the Aldeburgh Festival, and in 1975 joint artistic director of the English Music Theatre Company, for which he conducted the première of Stephen Oliver's *Tom Jones* in 1976, the first British production of Britten's *Paul Bunyan* also 1976, and the première of Minoru Miki's *Ada* (1979). He also conducted the première of Britten's cantata *Phaedra* op.93 at the 1976 Aldeburgh Festival, the revised version of Oliver's *Duchess of Malfi* at Santa Fe (1978), and in 1995 the première of Lowell Liebermann's *The Picture of Dorian Gray* at Monte Carlo. Bedford was appointed principal conductor of the English Sinfonia in 1982, and has appeared as guest conductor throughout the world. Among his recordings are Holst's *The Wandering Scholar* and vital, idiomatic readings of many works by Britten.

NOËL GOODWIN

**Bedient, Gene R.** (*b* Alliance, NE, 23 Aug 1944). American organ builder. After graduating from the University of Nebraska, he was apprenticed to Charles McManis of Kansas City and in 1969 established his own firm in Lincoln, Nebraska. In 1971 he received the master's degree from the same university; one of his first organs was built for the Wesley Foundation there in 1975. Bedient's earlier organs were strongly influenced by historic north German models and were usually tuned in non-equal temperaments. By the 1980s Bedient was also building organs in the French classic style (St Mark's Church, Grand Rapids, Michigan, 1985) and the French romantic style (Idlewild Presbyterian Church, Memphis, Tennessee, 1989) as well as more ecletic organs. Other notable organs include those at Ripon College, Ripon, Wisconsin (1982) and Queen's College, New York (1991). The firm also builds a line of pre-designed one- and two-manual organs for small churches.

BARBARA OWEN

**Bedingham, John.** *See* BEDYNGHAM, JOHANNES.

**Bedini, Domenico** (*b* ?Fossombrone, *c*1745; *d* after 1795). Italian soprano castrato. His career began intermittently in comic opera at Pesaro (1762) and Rome (1764), and as secondo uomo in *opera seria* at Venice (1768). In 1770–71 he was secondo uomo in five Italian houses and then entered the service of the Munich court, resuming his career in Italy in 1776 and soon becoming primo uomo in leading houses. He is mostly remembered as the first Sextus in Mozart's *La clemenza di Tito* (1791, Prague). He retired after singing at Florence in Carnival 1792 and by 1795 was in the *cappella* of the Santa Casa of Loreto in his native region.

DENNIS LIBBY

**Bédos** [Bedos] **de Celles, François** (*b* Caux, nr Béziers, 24 Jan 1709; *d* St Denis, Paris, 25 Nov 1779). French organ builder and writer on organs and organ construction. He entered the Benedictine Congregation of St Maur at La Daurade, Toulouse, on 7 June 1726. On 30 October 1745 he became secretary of Sainte-Croix abbey at Bordeaux, where in 1748 he built an organ in the monastery church; after the Revolution it was transferred to St André, Bordeaux, and much original pipework survives. In 1759 he was elected a member of the Académie des Sciences, Bordeaux, and was subsequently elected a corresponding member of that of Paris. In 1761–2 he built an organ at St Vincent, Le Mans; he was also consultant for many other new organs. Bédos de Celles is best known for his writings, particularly his *L'art du facteur d'orgues*. This work is among the earliest to describe in detail the design and physical construction of the pipe organ and provides a valuable description of classical French organ building. His extensive and highly detailed plates, charts and diagrams deal with aspects of organ design, mixture compositions, pipe scales, pipes and pipe making, and tools and their use. Working from the writings of MARIE DOMINIQUE JOSEPH ENGRAMELLE, he gave exhaustive instructions on the transfer of musical scores to organ barrels for mechanical playing and provided two complete pieces in the form of pinning charts. This aspect of his work inspired the makers of mechanical organs from his time forward. Bédos de Celles also described a mechanism for a square piano combined with an organ, a claviorgan and a *vielle organisée* and included a detailed discussion of ornamentation, articulation and principles of organ registration. He contributed reports on new organs to the *Mercure de France*.

**Bedouin music.** 'Bedouin', derived from the Arabic *badū*, refers to tribal peoples found in the Arab world and Israel. The Bedouin are nomadic desert pastoralists found in the deserts of West Asia, the Arabian peninsula and the North African Sahara. Through changing circumstances many Bedouin have now become sedentarized. Organized within the tribe (*qabīla*), clan (*'ashīra*) and extended

family, these peoples lead an independent way of life. Since antiquity they have had close associations with date palm trees and camels, which also adapted to the harsh nature of the desert.

Bedouin music developed slowly and internally, through long periods of semi-isolation. But trade contact with villages and towns at the edge of the desert also had an impact, especially recently, with Bedouin sedentarization. Radio and television have entered Bedouin tents and houses, bringing many new impulses. Outside influences on Bedouin music include the use of certain tetrachords, ornamentation and musical instruments. Today, although the nomadic way of life is disappearing, Bedouin cultural values and music have assumed symbolic importance within some Arab nation-states such as Jordan and Oman.

1. General musical characteristics.

*(i) Melody.* Bedouin melodies are short and usually fall within the ambitus of a 4th (extension to a 5th occurs, but is rare). The melodic line is mostly formed of stepwise intervals. Intervals of 3rds and 4ths are found, but a 5th is rare. Melodies are resistant to change, usually following a melodic formula. When small nuances of variation in rhythm or melody occur, they are perceived as highly significant. There is much melodic repetition: sometimes the whole poem is sung to a one-line melody. The melody of the first hemistich is either repeated exactly or with some alteration in the second hemistich, and if the same words are repeated, they take the same melody.

*(ii) Mode.* Bedouin songs are based on the tonic (*qarār*). The melody moves around it and leads to it, and most songs begin with it. Various characteristic cadences (*qafl*) are used; see ex.1 (*d* as tonic). The Bedouin use a special

Ex.1 Bedouin cadences (a, b, c, d, e)

tetrachord (*jins*): *d–e♭–f♯–g*. The interval *e♭–f♯* is approximately a whole tone, and it gives Bedouin singing its special character. Other tetrachords that are used probably derive from urban music: *Ṣabā*, *Ḥijāz* and *Bayātī* (Table 1).

*(iii) Vocal style.* Most types of song are interpreted in an alternating or antiphonal manner, although some are performed by a solo poet-singer accompanying himself on the *rabāba* (one-string fiddle). Singing is in a high-pitched nasal voice, especially when sung solo. The declamatory style is almost always syllabic, except during cadences.

TABLE 1: Tetrachords used in Bedouin music: The Bedouin tetrachord (*jins*) and others

| | |
|---|---|
| Bedouin *jins* | d – e♭ – f‡ – g |
| *Ṣabā* | d – e♭ – f♯ – g♭ |
| *Ḥijāz* | d – e♭ – f♯ – g |
| *Bayātī* | d – e♭ – f – g |

*(iv) Text.* Verses usually consist of two hemistiches. Songs are performed in a Bedouin poetic dialect (*shi'r al-badawi* or *shi'r al-malḥūn*) which differs from everyday speech. New words are improvised to existing melodies. Themes usually relate to Bedouin values and experience (nomadism, heroism and life-cycle events). Some urban influences occur, especially among sedentarized Bedouin. Religious or Sufi themes appear within North African Bedouin songs, for instance the *'aiyāī* singing of the Algerian Bedouin.

2. Genres. The main features of many Bedouin genres are consistent throughout the Arab world, although genres may be known by different names. Variation, due to contact with local townspeople over a long period, reflects the specialities and tastes of different regions. Some genres are performed with dancing.

*(i) Ḥudā' and hjenī (camel songs).* *Ḥudā'* was an Arab vocal genre used from the pre-Islamic period in connection with camels: to pasture them, gather them when dispersed, and on journeys to ease their fatigue and increase their pace as well as entertaining human travellers. Today Bedouin camel-related songs with the same functions are known as *hjenī* or *frāqī*. The *hjenī* melody consists of three measures in a four-beat metre (totalling 12 beats). A melodic leap (sometimes of a 3rd) may precede the cadence. Ex.2 shows three variants: 2*a* and 2*b* from

Ex.2 Examples of *hjenī*

nomad sources, and 2*c* from the city. 2*b*, with only 11 beats as opposed to 12, shows the possible changes which could affect a Bedouin type in the process of internal development. 2*c* shows the influence of urban singing, containing some melismatic figures.

*(ii) Ḥidā (battle and work songs).* Before, during or after battle Bedouin warriors used to sing short plain melodies in a rhythmic declamatory style in a three-beat metre (ex.3). The contemporary poet-singer (*ḥādī*) usually

Ex.3 *Ḥidā* (Jordan)

improvises new verses, singing them alternately with the other participants. (Agricultural labourers also sing another form of *ḥidā* as work songs in a two-beat metre.) In Palestine the *ḥidā* is an open-air song accompanying the *saḥja* dance (*see* Palestinian music, §2).

*(iii) Uhzūja (heroic songs).* From ancient times to the Abbasid period a related term, *hazaja*, meant to dance and sing in joy. In pre-Islamic Arabia women encouraged

*1. Bedouin dance with weapons, accompanied by frame drums (ṭār) and barrel drums (mirwās); Abu Dhabi, United Arab Emirates, 1998*

warriors by singing and playing the frame drum (*duff*); Bedouin women still sing songs of this type, known in some regions as *uhzūja*. In modern folk music this category contains sung poems dealing with war, battle and heroism. There are no special forms or melodies; usually new words are set to a well-known and lively folksong, which then becomes an *uhzūja*. These songs are mostly sung in processions and at some national festivities (*see* JORDAN (i), ex.2).

*(iv) Qaṣīd (poetic ode).* From the earliest period of Arab history poetry has been connected with singing or recitation, sometimes with instrumental accompaniment. The Bedouin *qaṣīd* is related to the *qaṣīda*, an old form of monorhyme poetry consisting of many two-line verses (*bayt*) (ex.4). Bedouin singers prefer to be called 'poet'

**Ex.4** A *qaṣīd* melody

(*shā'ir*) rather than 'singer'; some use *rabāba* accompaniment. The Bedouin *qaṣīd* is performed with the *sāmer* dance (see below).

*(v) Sāmer, saḥja and daḥḥiyya (dances with female soloist).* The *sāmer* ('entertainment') or *saḥja* is performed by a circle of male dancers on happy occasions (ex.5). A leader

**Ex.5** *Sāmer* (Jordan)

(♩ =120)

sings the *qaṣīd* verses and participants either repeat them or sing the verse '*Halā halā...*' ('Hallelujah, hallelujah ...'). After some time the leader asks a female member of the tribe to join the dance; in Jordan she is known as *al-ḥāshī* ('defender') because she defends herself with a sword from the surrounding male dancers who try to touch her. This last part of the dance is called *daḥḥiyya*, a wild and active performance with aspects of mystical eroticism. (For the *daḥḥiyya* dance of the Negev desert Bedouin *see* PALESTINIAN MUSIC, §2; *see also* ARAB MUSIC, §II, 4(ii).) *Habīsh* is another Bedouin dance with a female soloist (*see* YEMEN, §I, 2).

The *sāmer* is believed to be an antecedent of the Jewish and Christian 'hallelujah', and may originate from the *tahlīl* (song of joy) performed by pilgrims circumambulating the Ka'ba at Mecca prior to the advent of Islam.

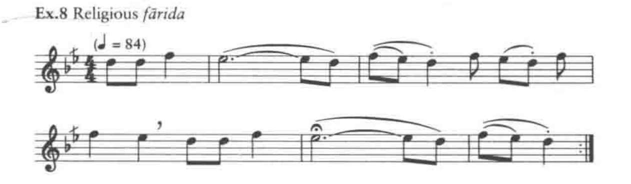
*(vi) 'Arḍa and razfah (combat dances).* In the Arabian peninsula a dance named *'arḍa* ('exposition'; *see* SAUDI ARABIA, §5(i)) recalls pre-Islamic tribal battles (ex.6). Two

**Ex.6** 'Arḍa (Saudi Arabia)

['You are a believer [in God] young man']

rows of men face one another, clapping, singing and dancing in a lively manner, accompanied by large frame drums (*ṭār*). At the peak of the dance two swordsmen perform a duel between the rows of dancers. This dance may be related to the ancient *rakbānī* ('riders' singing') or *rajaz* (improvised verses performed during battles or work). In the extreme south of Iraq the *'arḍa* and *samrī* dances are both performed (*see* IRAQ, §II, 1). Dances of Bedouin origin which use weapons (often known as *razfah* or *ayyala*) have achieved significance and popularity in the Arab Gulf states (fig.1) and Oman (*see* ARABIAN GULF and OMAN, §2 and 3).

*(vii) Fārida (bridal and pilgrim songs).* The term *fārida* denotes both the group of women accompanying the bride from her parental home, and their singing performed within this ritual journey. They sing in slow tempo, insistently prolonging one particular note (ex.7; *see also*



**Ex.7** Bridal *fārida*

JORDAN (i), ex.1). There is no ornamentation; the sound is empty and dry like the wide desert that they cross, enlivening the journey as they sing and improvise new texts.

Certain *fārida*s accompany the departure of pilgrims (ex.8). They may be related to pre-Islamic and early

**Ex.8** Religious *fārida*

Islamic songs called *talbia* which pilgrims sang while travelling to Mecca. Muslim pilgrims still recite *talbias*, but without any melody; it is possible that original *talbia* melodies are preserved in *fāridas*.

*(viii) Ma'īd or 'adīd (lamentations).* Women perform funeral lamentations (also known as *nwāḥ*). During such performances they used to beat their cheeks and breasts, tear their clothes and put ashes on their faces and hair. In some areas they perform a mourning dance in a semicircle, holding hands and moving slowly as they sing and cry.

*(ix) Tarwīda (women's songs).* Various songs are included within this category. Some deal with stages in the marriage process: the bride's bath, ritual application of henna (*see* JORDAN (i), ex.3), or her farewell to her girlfriends. Lullabies are also known as *tarwīdah*.

*(x) Hilālī epic.* This is a well-known folk epic describing incidents occurring during the Banī Hilāl tribe's migration to North Africa. It originated in Bedouin culture and was adapted by non-Bedouin performers and taken into a wider repertory. Banū Hilāl bin 'Āmir bin Ṣa 'ṣa'a is a branch of Hawāzin, a large Arabian tribe who lived in al-Shām (Greater Syria) and then moved to al-Hijaz (on the upper Red Sea coast of Arabia). Abū Zayd is the main figure of the story.

*Hilālī* epic performances usually occur during the evening (especially in winter) in many varied settings such as a tent, house, *dīwān* (family meeting-house), or coffee-house. The narrator, who should have a beautiful voice, might be Bedouin or non-Bedouin. He recites the story in a dramatic style, using special vocal effects, facial expression and body movements. According to region, he may accompany himself on the *rabāba* (one-string fiddle) or frame drum (*ṭār*). During the performance he adds improvised poetic commentary on the various incidents or characters within the story.

3. MUSICAL INSTRUMENTS. The most common instrument of Bedouin music is the *rabāba*, a monochord fiddle with a rectangular frame covered on both sides with skin and played in an upright position. It is unclear when this instrument entered the Arab world, but it is mentioned in the 10th-century 'Great Book of Songs' by al-Farābī. It is not exclusive to the Bedouin.

The *mihbāsh*, a carved wooden mortar and pestle used to grind coffee, is originally associated with Bedouin culture and hospitality; rhythms are created by striking the base and walls of the hollow body with a stick inserted through the top (fig.2). The Bedouin also use the *quṣṣāba* or *shibbāba*, short oblique six-holed flutes. In North Africa the *quṣṣāba* (known locally as the *qaṣba*) varies in size and pitch. Frame drums (*ṭār*, *bandīr*) of different sizes are used in some Bedouin music.

2. *Coffee mortar and pestle (mihbāsh), Shamār Bedouin, Iraq, 1970s*

ABDEL-HAMID HAMAM

**Bedyngham** [Bedyngeham, Bedingham, Bodigham, Bellingan, Benigun; perhaps also Boddenham, Bodenham, Bodneham and Bodnam], **Johannes** (*d* ?Westminster, London, reported between 3 May 1459 and 22 May 1460). English composer. The unusually wide distribution of works ascribed to him and the existence of contrary ascriptions to Du Fay, Dunstaple (two works) and Frye suggest that he was a composer of some stature. In 1453–4 Johannes Bedyngham was paid for his robes as one of the four singing-men in the Lady Chapel choir at Westminster Abbey (Bowers). In 1456 he wrote to the king requesting the freedom of his cousin Thomas Bedyngham, wrongly imprisoned in the jail of Ilchester (*GB-Lpro* C 81/1478/25); the pardon was granted on 31 May. On 15 January 1456/7 he made over all his property by letters-patent to David Selly and John Rudolf, gentlemen, and to John Bristowe and Henry Stoneham, clerics; he confirmed this in person at the Westminster Royal Chancery on 30 March 1457/8 (*GB-Lpro* C 54 308, m.21*d*). These documents describe him as verger at the collegiate chapel of St Stephen, Westminster. The same position was later held by Nicholas Ludford; and further documentation corroborates the theory that it was a position for a composer of distinction. Bedyngham was a member of the London Gild of Parish Clerks when its first known membership list was compiled in February 1448/9; in the same source (*GB-Lgc* 4889) his death was

registered during the year Ascensio Domini 1459 to Ascensio Domini 1460.

It is possible that he was the same man as John Bodenham who was born in Oxford in 1422, was a chorister and scholar of Winchester College and then proceeded to New College, Oxford, where he was a scholar and a fellow, taking degrees in civil law (1449) and canon law (1455); Bodenham also cannot be traced beyond 1459. One of the beneficiaries of Bedyngham's letters-patent, John Bristowe, cleric, may be the man of that name who was five years younger than Bodenham, born in the same Oxford parish, and also went to Winchester and New College, later becoming a priest-vicar of St Stephen's, Westminster, where Bedyngham had been verger. Neither Bedyngham nor Bodenham seems ever to have been ordained priest.

It is possible, though unlikely, that the Ferrara court musician 'Johannes de arpa de Anglia', recorded in 1449–50, or the Ferrara cathedral singer 'Johannes quondam alterius Johannis presbiter Londini', 1448, might be Bedyngham. However, Bedyngham's name does not appear in any continental theory treatise of the time – and Hothby, for instance, would probably have mentioned him had he been in Italy. The theory that he remained in England is supported by this and by the relative sparseness of ascriptions to him in the musical sources on the Continent.

Both his mass cycles are unusually free in form. The *Dueil angoisseux* cycle parodies all three voices of its model but in a loose manner that often leaves doubts as to the precise relationship (see analysis in Sparks, 457–8). No models have been found for the other mass music. The two cycles are similar in scope and style; Strohm has drawn attention to similarities in the mass of Johannes Pullois and the Mass *sine nomine* of Benet, and it might be appropriate to see in them the roots of the style Du Fay used in his mass for St Anthony of Padua. The other mass movements, if they are his, are later, to judge from their more expansive style.

His motets are classified as such only because of their Latin text incipits. They are intricate and florid pieces of the utmost rhythmical and notational complexity. If anything in 15th-century music may be termed unvocal, it is these pieces. They bear witness to a composer of a profoundly intellectual bent, and indeed the ascription 'Mr: Jo: bedyngeham' suggests that he had a university degree. They appear only in a manuscript from the very end of the 16th century; but their style is firmly that of the mid-15th century, their context is a group of similar early pieces (perhaps the other four are his too), and their scribe, JOHN BALDWIN, showed a marked interest for earlier music in both the scope and the compilation of this manuscript.

The correct attribution of some of the songs will always be open to discussion. However, authorities on Dunstaple and Du Fay have been unanimous in regarding *Durer ne puis* and *Mon seul plaisir* as of doubtful authenticity, and therefore probably by Bedyngham. These two pieces and *O rosa bella* (original version, no.14) seem authentic, since they are ascribed to Bedyngham in *P-Pm* 714, where the compiler showed a strong interest and understanding for English music. *So ys emprentid* is ascribed in one source to Bedyngham and in one to Walter Frye; it is perhaps more in doubt than any of the other works. Because of its similarity of style to *So ys emprentid*, *Myn hertis lust* has also been attributed to Frye in much modern literature, although there is no ascription other than to Bedyngham.

The list of 26 different texts in four languages underlaid or applicable to songs ascribed to Bedyngham speaks for itself. Evidently the transmission of his works was circuitous, but their distribution wide. It is unwise to be too dogmatic in attempting to establish the original form of these works. The Italian *lauda* texts are not in music manuscripts but in collections of poems expressly written for known music; and the Latin contrafacta are merely part of the common practice of writing new texts so as to make secular music acceptable in a sacred context. But most of the other texts listed are possible. The poem of *Mon seul plaisir* is by Charles d'Orléans, except that the first three words are changed in all its musical appearances; the only explanation for this would seem to be that the music was originally written for the contemporary English version of Charles' poem (considered by some authorities on the poet to have been the original) and that the French version needed a little juggling to match the music as well as the English poem had done. *Gentil madona* and *O rosa bella* both show curious tensions between musical form and the poetic form of their Italian texts: either the composer did not fully understand the Italian poems or the music was originally written for some other text, possibly in English. The 'rhyming cadences' normally associated with ballade form and with English song in the later 15th century are found in *Gentil madona*, *Le serviteur*, *Myn hertis lust*, *So ys emprentid* and in *Vide Domine*.

The number of sources for some of the songs is impressive. *Mon seul plaisir*, with a contrary ascription to Du Fay, appears in 14 mensural sources, which is more than any authenticated piece by Du Fay; *O rosa bella*, in its original form in 18 sources, has more than any other work of Dunstaple, to whom it is normally attributed; *So ys emprentid* in ten sources is found more often than any other piece by Frye except the ubiquitous *Ave regina celorum*; in addition, *Gentil madona* has 15 sources, which is unusually many for any song written before the 1470s.

The influence of Bedyngham's music was equally great. *O rosa bella* served as a model and a basis for numerous works, including three mass cycles. The anonymous rondeau *Puisque je vis* is apparently modelled on *Mon seul plaisir*, which is several times cited in the literature of the time. *Gentil madona* and *So ys emprentid* each gave rise to a mass cycle and various other pieces. If, as seems likely, all these works are really his, Bedyngham must be accounted one of the more important composers of the mid-15th century.

WORKS

*sources listed in editions*

MASS ORDINARY SETTINGS

1 Mass 'Dueil angoisseux' (on Binchois' ballade), 3vv; ed. in DTÖ, lxi, Jg.xxxi (1924/*R*). In *I-TRmp* 88 it appears without Kyrie but with a Benedicamus Domino (not in edn); Kyrie immediately preceding cycle is in a different style but possibly by Bedyngham. *TRmp* 90 contains Gloria and Credo only, but Gloria carries the only ascription for cycle, and Credo has an additional voice.

2 Mass sine nomine, 3vv, *TRmp* 88, ff.46*v*–54; *TRcap* 93 contains 4 movts only. *GB-Ob* Add.c.87 contains Sanctus, ascribed; Sanctus ed. in Apfel, ii, 139

3 Sanctus and Agnus, 3vv, *I-TRmp* 90, ff.389*v*–395 (anon.), ed. in Gozzi. An annotation on *TRmp* 90, f.73, implies

that they are part of no.1; they are not, but they may be by Bedyngham.

MOTETS

4 Manus Dei, 2vv, *GB-Lbl* R.M.24.d.2 (John Baldwin's Commonplace Book), ff.105*v*–106
5 Salva Jesu, 3vv, *Lbl* R.M.24.d.2, ff.106*v*–107
6 Vide Domine, 2vv, *Lbl* R.M.24.d.2, ff.104*v*–105, ed. in Fallows, 1996

BALLADES

7 Myn hertis lust, 3vv; ed. in CMM, xix (1960), and in Perkins and Garey
8 So ys emprentid, 3vv (also ascribed Frye); ed. in CMM, xix (1960), and in Perkins and Garey

RONDEAUX

9 Durer ne puis, 3vv (also ascribed Dunstaple); ed. in MB, viii (1953, 2/1970)
10 Mon seul plaisir, 3vv (also ascribed Du Fay); ed. in CMM, i/6 (1964, 2/1995)
11 Se belle, 3vv, *I-TRmp* 90, ff.290*v*–291, *TRcap* 93, f.370*v* (both ascribed 'Benigun'); intabulated in Buxheimer Orgelbuch (*D-Mbs* Cim 352b), f.91*v*, as Sebelle anglicum, ed. in EDM, 1st ser., xxxviii (1958)

SONGS OF DOUBTFUL FORM

12 Gentil madona, 3vv, ed. in Perkins and Garey and in Thibault and Fallows
13 Le serviteur, 3vv; ed. in DTÖ, xiv–xv, Jg.vii/1–2 (1900/*R*)
14 O rosa bella, 3vv (also ascribed Dunstaple); ed. in MB, viii (1953, 2/1970)

ADDED VOICES

15 O rosa bella, 3 additional voices to no.14 in *I-TRmp* 89 with annotation 'concordan*cie* O rosa bell*a* cu*m* aliis *tribus* ut posuit bedingham et sine hiis no*n* concorda*nt*'; ed. in MB, viii (1953, 2/1970). The Latin could mean that Bedyngham wrote either the original voices (no.14) or the 3 new ones (no.15); Bukofzer, in MB, viii, accepted the latter interpretation. On account of their style (which must be after 1460), these voices are probably not by Bedyngham.

TEXTS

*including alternative texts for nos.4–14 of work-list*

ENGLISH

Fortune alas, alas what have I gylt (possible orig. Eng. rhyme-royal text for no.12), *GB-Lbl* Harl.7333, Harl.2251, Add.34360; ed. in Hammond
Mi verry ioy and most parfit plesere (possible orig. Eng. version of no.10), *Lbl* Harl.682, f.67*v* (Charles d'Orléans poetry MS); ed. in Steele and Day
Myn hertis lust, sterre of my confort (no.7); ed. in Menner and in Perkins and Garey
So ys emprentid in my remembrance (no.8); ed. in Menner and in Perkins and Garey (2nd half of stanza also in *GB-Ob* Rawl.C.813, f.2; ed. in Padelford)

FRENCH

Durer ne puis se ie ne vous voy belle (no.9)
Fortune elas (text incipit for no.12 in several MSS; possibly Fr. but probably Eng.; no subsequent Fr. text has been found in any 15th-century source
Grant temps ai eu et desiree (no.7 in most MSS)
Le serviteur (no.13, text incipit only, but possibly continuing like the poem set by Dufay, ed. in Droz and Piaget, and in Löpelmann)
Ma seule plaisant doulce joye (opening of Charles d'Orléans' poem, otherwise identical to no.10); ed. in Löpelmann, and in Champion
Mon seul plaisir, ma doulce joye (no.10); ed. in Löpelmann
Pour une suis desconfortee (no.8 in several sources)
Se belle (no.11; no further text survives)
Soyez aprentiz en amours (no.8, presumably an adaptation of the Eng. text opening; no further Fr. text survives)

ITALIAN

Gentil madonna de non m'abbandonare (no.12)
Humil madonna non mi abandonnare (lauda by Francesco d'Albizo for no.12); ed. in Galletti
Madre che festi colui che ti fece (lauda for no.10); ed. in Galletti
Nessun piacere ho sanza te Iesu (lauda by Feo Belcari for no.10); ed. in Galletti
O diva stella, o vergine Maria (lauda for no.14); ed. in Galletti
O rosa bella, o dolze anima mia (no.14; text probably by Leonardo Giustiniani)
Vergine bella non mi abbandonare (lauda by Feo Belcari for no.10 and no.12); ed. in Galletti

LATIN

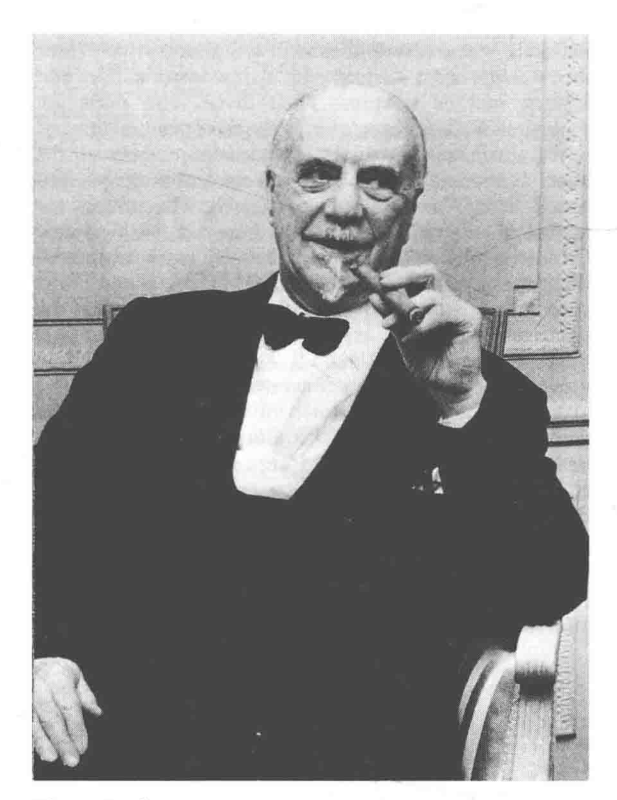
DAVID FALLOWS



**Beecham,** Sir **Thomas** (*b* St Helens, Lancs., 29 April 1879; *d* London, 8 March 1961). English conductor. Educated at Rossall School and (briefly) Wadham College, Oxford, he studied composition privately with Charles Wood in London and Moszkowski in Paris. As a conductor he was self-taught, making the most of easy circumstances (his father, Sir Joseph Beecham, was a successful manufacturing chemist with a fondness for music) to attend opera and concerts at home and abroad, forming an orchestra at St Helens, and deputizing there for Richter at a concert by the Hallé Orchestra for a civic function when his father was mayor. His professional début as a conductor came in 1902, when, at the Shakespeare Theatre, Clapham, he opened a tour of the ramshackle but impressively named Imperial Grand Opera Company with *The Bohemian Girl*. In 1906 Beecham was invited to become conductor of the New Symphony Orchestra; originally a chamber orchestra, its strength was increased in the following year to 70 players. Delius attended one of its concerts at Queen's Hall and, impressed by what he had heard, introduced himself to Beecham. It was to prove an auspicious meeting for both men. In 1909 Beecham founded his own orchestra, the Beecham Symphony Orchestra, a band of adventurous young players who included Albert Sammons, Lionel Tertis and Eric Coates; in June of that year Beecham gave with it the first complete performance of Delius's *A Mass of Life*. In 1910, with his father's financial backing, he embarked on a five-year period of glittering operatic activity as both conductor and impresario, with seasons at Covent Garden, His Majesty's Theatre and Drury Lane. In the course of them he mounted a festival of Mozart operas, during which he reintroduced to London the almost completely forgotten *Così fan tutte*, and conducted the British premières of five operas by Strauss: *Elektra*, *Feuersnot* and *Salome* in 1910, *Der Rosenkavalier* and the original version of *Ariadne auf Naxos* in 1913. The Beechams also brought Diaghilev's Ballets Russes to London, thus giving British audiences their first opportunity to see and hear *The Firebird*, *Petrushka*, *The Rite of Spring*, *Jeux* and *Daphnis et Chloé* (all conducted by Monteux). In addition, there were the British premières (1913–14, Drury Lane) of key Russian operas, among them Musorgsky's *Boris Godunov* and *Khovanshchina*, Rimsky-Korsakov's *The Maid of Pskov* and Borodin's *Prince Igor*, all with Chaliapin, as well as Stravinsky's *The Nightingale*.

The war did not reduce Beecham's activities. He conducted for, and gave financial support to, three institutions with which he was connected at various times: the Hallé Orchestra, the LSO and the Royal Philharmonic Society. In 1915 he formed the Beecham Opera Company, with mainly British singers, performing in London and the provinces, which (Manchester especially) owed to Beecham a significant widening of their operatic experience. After the war there were joint Covent Garden seasons with the Grand Opera Syndicate in 1919 and 1920, but by now Beecham's financial affairs were in a condition that demanded temporary withdrawal from musical life to put them in order. In 1923 he emerged, more or less solvent, from a long series of hearings in the Court of Chancery. He was no longer in a position to underwrite his own schemes – in future they would by financed by others – but his enthusiasm and energy were undimmed. He stumped the country, making hundreds of speeches in support of a scheme to establish an Imperial League of Opera, to be paid for by subscriptions. After it failed for lack of public support, he consolidated his international reputation by conducting the New York PO, Boston SO and Philadelphia Orchestra (1928), the Concerts du Conservatoire and Lamoureux orchestras in Paris (also 1928), the Berlin PO (two visits in 1930; seven years later he was to make his celebrated recording of *Die Zauberflöte* with the orchestra), and the Vienna PO (1931, Salzburg Festival).

In 1932, dissatisfied as usual with orchestral conditions in Britain and goaded by the inception of the BBC SO, Beecham formed the London Philharmonic and brought it swiftly to the front rank, a position confirmed by visits to Brussels (1935), Germany (1936) and Paris (1937). Once again he showed his flair for choosing the finest players. The year 1932 also saw Beecham's return to Covent Garden, as artistic director. By 1935 he was in sole control, and it is a measure of his confidence in his own abilities as conductor that he had no qualms about inviting guests of the calibre of Furtwängler, Reiner, Knappertsbusch, Erich Kleiber and Weingartner to join him. Live recordings of Beecham conducting at Covent Garden during this period – notably a spine-chilling Act 2 of *Götterdämmerung* with Leider and Melchior – demonstrate that he indeed had nothing to fear by way of comparisons with such colleagues. In 1939 Covent Garden was closed for opera for the duration of World War II, and in 1940 Beecham went first to Australia for a concert tour and then to the USA, where he was conductor of the Seattle SO (1941–3) and of opera at the Metropolitan, New York (1942–4).

When Beecham returned to Britain in September 1944 he was welcomed back by the British public and by his old orchestra; but the LPO was now a self-governing body, neither able nor willing to offer any conductor the autocratic power Beecham had previously enjoyed. The result was the creation in 1946 of yet another orchestra, the Royal Philharmonic. With it he maintained his supremacy at home, increased his celebrity abroad (touring the USA and Canada in 1950), and made a large number of recordings. He returned to Covent Garden as guest conductor for *Die Meistersinger* and *The Bohemian Girl* in 1951. His last operatic performances were given at the Teatro Colón in Buenos Aires in 1958, and his last concert was with the RPO at the Guildhall, Portsmouth, on 7 May 1960.

This dynamic, many-sided, restless founder of orchestras and planner of opera seasons was first and foremost, in the words of the critic Richard Capell, 'the most gifted executive musician England has ever produced', a verdict that arguably still stands. In any assessment of his gifts the state of music in England during his formative years must be taken into account. Much energy had to be devoted to creating conditions (reliable orchestras, regular opera seasons) which leading conductors on the Continent could take for granted. Experience and temperament inclined him to regard music neither as a sacred calling nor a job to be done, but as an immense, essential pleasure to be shared with his audiences. His repertory, in orchestral music as in opera, was enormous. He cultivated the byways as assiduously as the highways. Bach meant little to him, but Handel he refreshed with a zest and

*Thomas Beecham*

brilliance far removed from the old massiveness (although his arrangements of ballet or concert suites would fail any 'authenticity' test, they revealed in their day some of the unsuspected riches lying beyond the popular oratorios). In later years Beecham's Mozart tended to mannerism, but he had long before done more than any other English conductor to demonstrate Mozart's greatness. He loved Grétry, Méhul and other minor French and Italian masters of the late 18th and early 19th centuries. Although in Beecham's lifetime his Beethoven was criticized for a lack of Teutonic gravitas, his best recordings of the composer sound surprisingly convincing and undated: a Fourth Symphony from 1945 with the LPO is particularly notable for its fierce attack and rhythmic energy. His Berlioz was masterly, as can be heard in his recording, also from 1945, of the Royal Hunt and Storm from *Les Troyens*, where his evocation of the dramatic details so carefully delineated by the composer is heightened by a matchless response to the romantic ache in the music. (Behind the extrovert public persona Beecham cultivated so assiduously there lurked a strong streak of melancholy.) He performed Haydn, Mendelssohn, Bizet and Dvořák with particular grace and affection, and was the most effective British exponent of both Richard Strauss and Sibelius. Although in 1916 he made the first recording of excerpts from *The Firebird* (and a year earlier had introduced its composer's *Tri stikhotvoreniya iz yaponskoy liriki* ('Three Japanese lyrics') to Britain), he was wary of most 20th-century music after early Stravinsky. In his younger days he played a great amount of British music, although there were composers (Vaughan Williams for one) not wholly congenial to him. An outstanding exception was the cosmopolitan Delius, who became a close friend, and whose music Beecham edited, propagated and interpreted with tireless, unique understanding. In 1929 he organized and conducted a Delius Festival in London in the presence of the blind composer.

Beecham's mastery of the orchestra depended not only on unusually strong gifts of communication with players, but on firm rhythm, singing melody and shapely phrasing. He was meticulous over the marking of parts, and conducted mostly from memory, sometimes without a stick. He could give ill-prepared or downright bad performances of scores he did not care for, but he was rarely pedestrian. To many of those fortunate enough to hear him often, he gave greater satisfaction and more sheer enjoyment than any other conductor. Beecham's appearance and personality were as unforgettable as his music-making: the stately, ceremonious walk, the pointed beard, the flashing eye and equally flashing wit, the oracular pronouncements. In his last years he developed a streak of demagogy, the teasing or trouncing of audiences turning into everlasting railing against institutions whose help or hospitality he would subsequently have no compunction in accepting. He could be cruel, preposterous or wildly inconsistent; yet there remained a bigness, and a fund of warm and genuine geniality: 'We are nationally and individually a more musically aware people because of him and what he gave us' (Cairns). He was knighted in 1916, and succeeded to the baronetcy on his father's death in the same year. He was made a Companion of Honour in 1957.

RONALD CRICHTON/JOHN LUCAS

**Beecham Opera Company.** Company organized in London by Thomas Beecham during World War I. *See* LONDON, §VI, 1(i). In 1920 it became the BRITISH NATIONAL OPERA COMPANY.

**Beecke, (Notger) Ignaz (Franz) von** (*b* Wimpfen-im-Tal, 28 Oct 1733; *d* Wallerstein, 2 Jan 1803). German composer and pianist. He served as a military officer early in the Seven Years War, joining the Zollern Dragoons of the Bavarian Electorate in 1756 and, according to his own account, going on campaigns with Field Marshall Joseph Friedrich, Prince of Sachsen-Hildburghausen, who was also Dittersdorf's patron. Late in 1759 or early in 1760

Beecke, now a first lieutenant, arrived in Wallerstein, near Nördlingen, to join a contingent of Prince Friedrich Eugen of Württemberg's regiment of dragoons. Prince Philipp Karl of Oettingen-Wallerstein, who maintained a small court Kapelle, took him up as a courtier. Promoted to captain in 1763, Beecke acquired increasing respect at Wallerstein, both as a pianist (he was self-taught) and, at least from the 1770s, as a music director (Intendant). He was personal adjutant to the young Count Kraft Ernst, and when the count assumed the control of government in 1773 and became prince in 1774, Beecke's influence grew further. He remained single, and in 1792 was promoted to major, also being granted a pension; he was promoted again in 1797. Although likeable and witty, he led a dissipated life and was heavily in debt on his death.

Beecke travelled extensively. In the early part of his career he spent much time in Paris (1766, 1769, 1772–3) and in 1766 secured a privilege to publish his own music there. Several years later a Parisian première of his opera *Roland*, which Gluck and Hasse had encouraged him to complete in Vienna in 1770, was thwarted by intrigues between Louis XV's mistress Mme du Barry and Marie-Antoinette. Beecke later returned to Vienna several times; he wrote *Claudine von Villa Bella* (1780) for the German company at the Burgtheater, but it was unsuccessful. In Mannheim in 1782 the Intendant Wolfgang Heribert von Dalberg had Beecke's *Die Jubelhochzeit* and *Die Weinlese* performed. Beecke was also a regular visitor to the Thurn und Taxis court at Regensburg. He played a four-hand piano concerto with Mozart when in Frankfurt for the coronation of Emperor Leopold II in 1790, and in 1791 was a guest at the court of King Friedrich Wilhelm II of Prussia in Berlin, performing in a concert that included his own 'Sinfonia di caccia' and Sonata for three pianos. The many manuscripts of Beecke's works preserved in Berlin suggest that he was successful there. Six copies of string quartets (now in *D-Bsb*) seem to comprise a presentation set, one of them including a prominent cello theme that was perhaps meant for the king himself to play.

Beecke's journeys brought far-reaching contacts and valuable stimuli to the musical life of the Wallerstein court. Among the musicians recruited under his leadership were Rosetti, Josef Reicha, P.A. Wineberger and Friedrich Witt. He established a wide musical repertory at Wallerstein, much of which survives in the court library (now in *D-HR*); string quartets were especially popular. A particular influence on his own style was Haydn, who eventually visited Wallerstein in 1790.

As a pianist Beecke developed an expressive style of his own. One of his pupils was the celebrated pianist Nanette von Schaden (who visited the young Beethoven in Augsburg in 1787). The poet and composer Schubart, who dedicated to Beecke a poem and a volume of his *Musikalische Rhapsodien* (Stuttgart, 1786), numbered him among those 'blessed of the gentle piano'; Mozart and his admirers, however, found his playing shallow and undisciplined.

Beecke's music reveals a composer of considerable versatility and skill. While he was quite at home in the tuneful idioms of Singspiel and song, many of the instrumental works composed for court and domestic use are more intricate and serious, sometimes at the expense of a sense of harmonic direction, and the 12 string quartets have some strikingly ambitious devices. Most of Beecke's mature (unpublished) symphonies have four movements, often starting with a slow introduction, and include motivic textures. Their divisi viola parts are typical of Wallerstein works, as are their prominent wind parts, which were no doubt intended for members of the court *Harmonie*. However, Beecke seems to have composed little *Harmoniemusik* as such. His output for keyboard originally included as many as 24 concertos (Munter); the few surviving works seem more substantial than the sonatas. Although most of the manuscripts specify 'cembalo' (harpsichord), it seems likely that the piano was often used, at least for the later works. Mozart wrote a cadenza (K624/626*a* II, *K*, now lost) for the slow movement of one of these concertos.

Among the most celebrated of Beecke's vocal works was *Auf den Todt des Ritter Gluck*, composed on the death of Gluck in 1787 and notable for its expressive chromaticism. He also wrote a piece on the untimely death of Gluck's adopted niece Marianne ('Nanette') (1776). An oratorio, *Die Auferstehung Jesu* (1794), and several cantatas and song collections were also published.

ADOLF LAYER/FIONA LITTLE

**Beecroft, Norma (Marian)** (*b* Oshawa, ON, 11 April 1934). Canadian composer and radio producer. She studied composition with Weinzweig in Toronto, Foss and Copland at Tanglewood, and Maderna and Petrassi in Europe. Her early compositions tend towards neo-classicism, but, a pioneer in Canadian electro-acoustic music, she went on to compose post-serial, improvisational and collage works. Both her attention to timbre and her formal structures demonstrate the influence of Debussy and Xenakis.

Beecroft's broadcasting career began in television (1954–9). She became a radio producer in 1963, originating numerous CBC-FM music series. In 1969 she began to produce freelance documentaries on Canadian composers and music technologies. Her programme *The Computer in Music* won the Major Armstrong Award for excellence in FM broadcasting (1976). From 1984 to 1987 she taught electronic music and composition at York University (Toronto), which awarded her an honorary Doctor of Letters in 1996. She has served as the president of Canadian Music Associates and Ten Centuries Concerts, and co-founded, with Robert Aiken, the New Music Concerts. Her numerous composition prizes include two Lynch-Staunton Awards from the Canada Council.

ANDRA McCARTNEY

**Beeland** [Bealand, Beland, Biland, Byland], **Ambrose** (*b* *c*1597; *d* London, *c*1674). English composer, violinist and wind player. He was apprenticed to a musician in the London Drapers' Company, became a freeman on 3 September 1619 and married the first of his three wives the next day. He was apparently already connected with the King's theatre company, and was certainly a member in 1624. He joined the London Waits in 1631 and the court violin band in 1640, resuming both places at the Restoration. He retired from court in 1672, though he continued to pay fees to the Drapers' Company until 1674. He seems to have played the viola in the Twenty-Four Violins, and 14 fragmentary dances by him survive (*GB-Ob* Mus.Sch.D.220, *US-NH* Filmer 3).

PETER HOLMAN

**Beer, Friedrich.** *See* BERR, FRIEDRICH.

**Beer** [Bähr, Baer, Behr, Ursus, Ursinus], **Johann** (*b* St Georg, Upper Austria, 28 Feb 1655; *d* Weissenfels, 6 Aug 1700). Austrian-German composer, singer, violinist, keyboard player, music theorist and novelist. At seven his father sent him to the Benedictine monastery at Lambach, a short distance north-east of St Georg, where he began his musical education. Beer pursued further general and music studies at Reichersberg, south of Passau, as well as in Passau itself. In 1670 his parents took him to Regensburg, where they had moved to preserve their Protestant faith. As a student at the Gymnasium Poeticum Beer became a friend of his fellow student Pachelbel. He continued to study music, including composition, and he wrote the score for a school play, *Mauritius imperator*. At the end of his studies at the gymnasium, the city of Regensburg awarded him a scholarship to enter the university at Leipzig in 1676 as a student of theology. He soon became acquainted with the musicians there, including the Thomas Kantor Sebastian Knüpfer, and Werner Fabricius, organist at the Nikolaikirche.

Mattheson, who published an autobiographical sketch by Beer in *Grundlage einer Ehren-Pforte*, praised his musical talent as a fine tenor, violinist and keyboard player. Beer remained at the university for only six months before moving to Halle as a singer in the court chapel of Duke August of Saxe-Weissenfels. It was here that he married on 17 June 1679. On 4 June 1680 Duke August died, and his successor, Duke Johann Adolph I, took the court to Weissenfels, where Beer also moved on 6 December. In Weissenfels, Beer rapidly gained fame as a performing musician, actor, teacher and composer. His patron clearly appreciated these talents, and Beer's wealth grew proportionately with his musical successes. He turned down a financially attractive position as Kapellmeister at Coburg in 1684, and on the Saturday before Easter 1685 he was named Konzertmeister of the court orchestra at Weissenfels. Later he also became librarian of the ducal library.

Beer was a close confidant and frequent travelling companion of the Duke of Weissenfels; he was also constantly in demand as an opera and concert singer. In addition to his numerous musical responsibilities and achievements he wrote a number of books on music as well as satirical novels. In the autumn of 1691 he declined the offer of a position at the Danish court in Copenhagen. His distinguished career was ended prematurely by his accidental death when, watching a shooting contest, he was struck by a stray bullet. (For additional details about Beer's life, taken from his autobiographical sketch, see Schmiedecke.)

Beer was a greatly talented, versatile figure in late 17th-century German music. As a composer he is not important; he is known to have written three operas, and a few instrumental and sacred vocal pieces survive (in *D-Bsb*, *GMl*, *SWl*, Bibliothek Stolberg Grimma). His reputation as a gifted singer and instrumentalist is well documented. As a writer he deserves continuing attention. His little-known satirical novels, in which music and musicians play an important role, tell us much about the social and cultural status of 17th-century musicians. His exceptional sense of humour also enlivens his several music treatises. In *Ursus murmurat* he attacked traditional music values and the educational methods of church musicians as embodied in Gottfried Vockerodt's treatise *Missbrauch der freyen Künste insonderheit* (1697). His *Musicalische Discurse* is particularly valuable in its wide-ranging comments on music and musicians as well as on the philosophy and aesthetics of his art. No-one writing on music in 17th-century Germany should fail to consult Beer's extensive writings, but unfortunately no comprehensive study of his works exists to make them accessible in English.

GEORGE J. BUELOW

**Beer** [Baehr, Baer, Baher, Bähr, Bär, Beere, Behr, Paer, Pär, Pehr], **(Johann) Joseph** [Jan Josef] (*b* Grünwald, [now Pastviny], 18 May 1744; *d* Berlin, 28 Oct 1812). Bohemian clarinettist and composer. After moving to Paris at the age of 16 he was employed as a clarinettist by the Duke of Orléans (1767–77) and by the Prince of Lambesc (1778–9, 1781–2). He made his first solo appearance at the Concert Spirituel playing a concerto by Carl Stamitz on 24 December 1771 and subsequently performed there on 27 occasions until 1779, playing his own concertos and others by Stamitz. Most of Stamitz's solo concertos were written for him and on the manuscript of one (published in 1793) Beer is named as joint composer. Fétis credited Beer with the addition of a fifth key to the clarinet, but it seems more likely that in the 1770s Beer played his solo performances in Paris on a five-key clarinet made in Germany or Bohemia; this was at a time when other professional players in Paris were still using four-key clarinets.

During the 1770s Beer travelled extensively. For example, in 1774 he took part in the earliest performances of J.C. Bach's cantata *Amor vincitore*, in London; he also performed in Holland, Sweden, Denmark, Italy, and his native Bohemia. Late in 1779 he left Paris to perform in Frankfurt, St Petersburg, Moscow, and Warsaw. From 1783 Beer was employed as a clarinettist in the orchestra of the imperial theatre in Moscow and as a soloist, but he continued to travel and performed in Berlin, Vienna, Prague and Pressburg. By 1792 he had been called to Potsdam and engaged to direct concerts for King Friedrich Wilhelm II of Prussia, though during the next four years he also visited Copenhagen, Weimar, Gotha, Vienna and Prague. In 1809, at the age of 65, he performed in a concert at the Gewandhaus in Leipzig and was overwhelmingly praised.

Beer was important not only because he was the earliest well-known virtuoso clarinettist but because he popularized the German style of playing, which incorporates a soft expressive tone quality with a brilliant technique. He taught several influential clarinettists including Michel Yost (1754–86), Etienne Solère (1753–1817) and Heinrich Baermann (1784–1847).

ALBERT R. RICE

**Beer-Walbrunn, Anton** (*b* Kohlberg, nr Weiden in der Oberpfalz, 29 June 1864; *d* Munich, 22 March 1929). German composer and teacher. He came from a family of schoolteachers and received his first musical instruction from his father; he continued his studies at Regensburg (1877–80) and Amberg (1880–83). His father wanted him to become a teacher and refused to let him make his career as a musician, so Anton taught in Amberg (1883–6) and Eichstätt (1886), where he was also cathedral organist, and qualified as a teacher in 1886. When his father died in 1886, the Eichstätt Cathedral Kapellmeister Wilhelm Widmann enabled him to study at the Königliche Musikschule, Munich (1888–91), where he was a pupil of Joseph Rheinberger for composition, W.H. Riehl for music history and H. Bussmeyer for the piano. On completion of his studies, he was active as a freelance composer for a decade at Munich, where Count Schack enabled him to have his music performed. He was appointed teacher of the piano, theory and composition at the Munich Akademie der Tonkunst in 1901, and was named professor in 1908; his pupils there included Furtwängler, Orff and Einstein.

Although Beer-Walbrunn was open to new ideas, his basic attitude was more conservative and rooted more firmly in Romanticism than that of the Munich school around Ludwig Thuille, to which he is often erroneously supposed to have belonged. His works never achieved widespread acclaim. He was at his best in his chamber music and settings of Shakespeare's sonnets. Of his other works, the most successful were the tragicomedy *Don Quijote* (given its première by Mottl, although he did not think highly of the opera) and the three preludes to *Wolkenkuckucksheim*.

WORKS

STAGE

Die Sühne (tragische Oper, 2, Beer-Walbrunn, after T. Körner: *Liebe*), Lübeck, 16 Feb 1894, vs (Berlin, 1896); rev. 1916–18 (Volksoper, 1)
Don Quijote (musikalische Tragikomödie, 3, G. Fuchs, after M. de Cervantes), Munich, National, 1 Jan 1908, vs (Munich, 1911)

GAYNOR G. JONES/STEPHAN HÖRNER

**Beesly, Michael** (bap. Sunningwell, Oxon., 23 June 1700; *d* after 1758). English psalmodist and singing teacher. He was a farmer's son. One of the first itinerant singing teachers to engrave and print his own music, he was arguably the 'father' of the fuging-tune, which became popular in England and America during the late 18th century. A psalmody book, apparently produced in the mid-1720s, has not survived, but four later publications, all undated, make a substantial contribution to our knowledge of country psalmody. The different editions had identical titles, but the use of separate engraving plates meant that contents could vary according to the purchaser's requirements. The music, which Beesly collected but may not have composed, exemplifies the bare harmony and unresolved dissonance of much early Gallery music. Although a few previous examples exist, his claim that the 20 new psalm tunes were 'Compos'd with veriety of Fuges after a different manner to any yet extant' is fully justified; his tune to Psalm viii was widely reprinted.

WORKS

Psalmody book (mid-1720s), lost, mentioned in Salter

A Book of Psalmody, Containing Instructions for Young Beginners . . . to Which is Added a Collection of Psalm-Tunes and Anthems, 3–4vv, (n.p., *c*1740)

A Collection of 20 New Psalm Tunes Compos'd with Veriety of Fuges After a Different Manner to Any Yet Extant (n.p., *c*1746, 2/ *c*1750)

A Collection of 10 Psalm-Tunes and 10 Anthems (Upton, Berks., *c*1755) [only copy in Local Studies Library, Reading]

An Introduction to Psalmody . . . to Which is Added a Collection of Psalm-Tunes and Anthems (Oxford, *c*1756)

SALLY DRAGE

**Beeson, Jack (Hamilton)** (*b* Muncie, IN, 15 July 1921). American composer and teacher. He attended the Eastman School (BM 1942, MM 1943) as a pupil of Phillips, Rogers and Hanson, and had private lessons with Bartók in New York (1944–5). From 1945 to 1948 he did graduate work in conducting and musicology at Columbia University, where he was an accompanist and conductor for the opera workshop; this apprenticeship strengthened the leaning towards opera which he had had from childhood. In 1945 he began to teach at Columbia, becoming MacDowell Professor of Music in 1967 and serving as chairman of the music department (1968–72); meanwhile he also taught at the Juilliard School (1961–3) and lectured at various universities in the USA. Among the awards he has received are a Rome Prize, a Fulbright Fellowship, a Guggenheim Fellowship, the Marc Blitzstein Award for the Musical Theater and the Gold Medal of the National Arts Club. He has held office in many music organizations, including the AMC, the American Composers Forum, the American Academy of Arts and Letters and ASCAP.

Beeson's operas may be considered to continue some of the qualities of those of Douglas Moore, one of his predecessors at Columbia. Though his style is of a later generation, it shares with Moore's a feeling for lyrical line, occasionally suggesting an American folk idiom; and Beeson, like Moore, has shaped successful opera subjects from American life and literature. In *Captain Jinks of the Horse Marines* (1975) he exploits the period charm of traditional operatic forms, as he did earlier with that of evangelical hymns and flapper dances in *The Sweet Bye and Bye* (1956). Beeson borrows from a variety of sources (popular songs, European Expressionism, folksong and dance, jazz and Italian opera) to enrich the musical dramatic background; any theatrical work that lasts for two hours, Beeson has said, should have a range of styles (Johns). Beeson's symphonic music is notable for its expert orchestration and effective use of polyphony.

WORKS

*all published unless otherwise stated*

OPERAS

Jonah (2 or 3, Beeson, after P. Goodman), 1950

Hello out There (chbr op, 1, Beeson, after W. Saroyan), 1954, New York, Brander Matthews, 27 May 1954

The Sweet Bye and Bye (2, K. Elmslie), 1956, New York, Juilliard Concert Hall, 21 Nov 1957

Lizzie Borden (family portrait, 3, Elmslie), 1965, New York, City Center of Music and Drama, 25 March 1965

My Heart's in the Highlands (chbr op, 2 or 3, Beeson, after Saroyan), 1969; NET, 17 March 1970

Captain Jinks of the Horse Marines (romantic comedy, 3, S. Harnick, after C. Fitch), 1975, Kansas City, Lyric, 20 Sept 1975

Dr. Heidegger's Fountain of Youth (chbr op, 1, Harnick, after N. Hawthorne), 1978, New York, National Arts Club, 17 Nov 1978

Cyrano (heroic comedy, 3, Harnick, after E. Rostand), 1990, Hagen, 10 Sept 1994

Sorry, Wrong Number (chbr op, 1, Beeson, after L. Fletcher), 1996, New York, Kaye Playhouse, 25 May 1999

Practice in the Art of Elocution (chbr operina, 1, Beeson), 1998, New York, Merkin Hall, 12 May 1998

HOWARD SHANET

**Beethoven, Ludwig van** (*b* Bonn, bap. 17 Dec 1770; *d* Vienna, 26 March 1827). German composer. His early achievements, as composer and performer, show him to be extending the Viennese Classical tradition that he had inherited from Mozart and Haydn. As personal affliction – deafness, and the inability to enter into happy personal relationships – loomed larger, he began to compose in an increasingly individual musical style, and at the end of his life he wrote his most sublime and profound works. From his success at combining tradition and exploration and personal expression, he came to be regarded as the dominant musical figure of the 19th century, and scarcely any significant composer since his time has escaped his influence or failed to acknowledge it. For the respect his works have commanded of musicians, and the popularity they have enjoyed among wider audiences, he is probably the most admired composer in the history of Western music.

1. FAMILY BACKGROUND AND CHILDHOOD. Three generations of the Beethoven family found employment as musicians at the court of the Electorate of Cologne, which had its seat at Bonn. The composer's grandfather, Ludwig (Louis) van Beethoven (1712–73), the son of an enterprising burgher of Mechelen (Belgium), was a trained musician with a fine bass voice, and after positions at Mechelen, Leuven and Liège accepted in 1733 an appointment as bass in the electoral chapel at Bonn. In 1761 he was appointed Kapellmeister, a position which – although he seems not to have been a composer, unlike other occupants of such a post – carried with it the responsibility of supervising the musical establishment of the court.

With his wife Maria Josepha Poll, whom he had married in 1733, and who later took to drink, he had only one child that survived. Johann van Beethoven (*c*1740–1792) was a lesser man than his father. He, too, entered the elector's service, first as a boy soprano in 1752, and continuing after adolescence as a tenor. He was also proficient enough on the piano and the violin to be able to supplement his income by giving lessons on those instruments as well as in singing. In November 1767 he married Maria Magdalena (1745–87), daughter of Heinrich Keverich, 'overseer of cooking' at the electoral summer palace of Ehrenbreitstein, and already the widow of Johann Leym, valet to the Elector of Trier; she was not yet 21. The couple took lodgings in Bonn at 515 Bonngasse. Their first child Ludwig Maria (bap. 2 April 1769) lived only six days; their second, also called Ludwig and the subject of this narrative, was baptized on 17 December 1770. Of five children subsequently born to the couple only two survived infancy: Caspar Anton Carl (bap. 8 April 1774) and Nikolaus Johann (bap. 2 October 1776). Both brothers were to play important parts in Beethoven's life.

Inevitably the early years of the son of an obscure musician in a small provincial town are themselves sunk in obscurity, and though speculation and myth-making have both been productive, facts are rather scarce. It is clear that at a very early age he received instruction from his father on the piano and the violin. Tradition adds that the child, made to stand at the keyboard, was often in tears. Beethoven's first appearance in public was at a concert given with another of his father's pupils (a contralto) on 26 March 1778, at which (according to the advertisement) he played 'various clavier concertos and trios'. A little later, when he was eight, his father is said to have sent him to the old court organist van den Eeden, from whom he may have received some grounding in music theory as well as keyboard instruction. He appears also to have had piano lessons from Tobias Friedrich Pfeiffer, who lodged for a while with the family, and informal tuition from several local organists. A relative, Franz Rovantini, gave the boy lessons on the violin and viola. His general education was not continued beyond the elementary school, but this was in accordance with the usual custom in Bonn at that time, only a few children going on to a Gymnasium (high school). The comparative brevity of Beethoven's formal education, combined with the fact that most of his out-of-school hours must have been devoted to music, explains some of the gaps in his academic equipment, such as his blindness to orthography and punctuation and his inability to carry out the simplest multiplication sum.

In 1779 a musician arrived in Bonn who was to be Beethoven's first important teacher. This was Christian Gottlob Neefe, who came as the musical director of a theatrical company that the elector took into his establishment. The point at which he began instructing Beethoven is not known. But in February 1781 Neefe succeeded to the post of court organist, a position that evidently required an assistant, and by June 1782, when Neefe left Bonn for a short period, Beethoven was acting as deputy in his absence; he was then 11½. Neefe's estimate of his pupil is contained in a communication to Cramer's *Magazin der Musik* dated 2 March 1783 – the first printed notice of Beethoven:

> Louis van Beethoven, son of the tenor singer already mentioned, a boy of 11 years and of most promising talent. He plays the piano very skilfully and with power, reads at sight very well, and I need say no more than that the chief piece he plays is *Das wohltemperirte Clavier* of Sebastian Bach, which Herr Neefe put into his hands ... So far as his other duties permitted, Herr Neefe has also given him instruction in thoroughbass. He is now training him in composition and for his encouragement has had nine variations for the piano, written by him on a march [by Ernst Christoph Dressler], engraved at Mannheim. This youthful genius is deserving of help to enable him to travel. He would surely become a second Wolfgang Amadeus Mozart if he were to continue as he has begun.

The reference to Mozart was presumably to the child prodigy and not to the mature composer whose years of fame in Vienna were yet to come; but Neefe's affection for his young pupil and confidence in his ability are plain. The variations on Dressler's march (WoO63), published by Götz of Mannheim, were Beethoven's first published work.

Further experience came to Beethoven via Neefe in 1783 when his teacher, overburdened with the work of the temporarily absent Kapellmeister Lucchesi, employed him as 'cembalist in the orchestra', not only a position of some responsibility but also one that will have enabled him to hear all the popular operas of the day. The autumn saw the publication of his first significant composition, the three piano sonatas dedicated to the Elector Maximilian Friedrich (WoO47). Towards the close of the year Beethoven undertook a trip to Holland, where he is reported to have performed on numerous occasions, notably including an orchestral concert at The Hague (at which he probably played his Concerto in E♭, WoO4).

2. YOUTH. Although Beethoven by now enjoyed a sturdy reputation as a virtuoso in the regions surrounding Bonn, he still drew no salary from the court for his duties as Neefe's assistant. His petition (in February 1784) for an official position as assistant to the court organist was granted, but the elector died before his salary, if any, could be fixed. But the new elector, Maximilian Franz, brother of the Habsburg Emperor Joseph II, instituted economies on his accession in 1784 that transferred some of Neefe's salary to his pupil. Beethoven's salary as organist was thus fixed at 150 florins. Increased attention to his activities as a performer may have been a factor in his diminished output as a composer in the years from 1785 to 1789. Apart from a set of three piano quartets from 1785 (WoO36), possibly intended for dedication to the new elector but not published until after Beethoven's death, there exists little evidence of compositional activity during these years. About this time, too, he seems to have had violin lessons from Franz Ries, a good friend of the family, and to have begun giving piano lessons himself.

Neefe, as quoted above, had declared that the young genius should be given the chance to travel, and in the spring of 1787 Beethoven visited Vienna. In the absence of documents much remains uncertain about the precise aims of the journey and the extent to which they were realized; but there seems little doubt that he met Mozart and perhaps had a few lessons from him. It seems equally clear that he did not remain in Vienna for longer than about two weeks. The news of his mother's deteriorating health precipitated his sudden journey back. He returned to Bonn to find his mother dying of tuberculosis, and his first surviving letter, to a member of a family in Augsburg that had befriended him on his way, describes the melancholy events of that summer and hints at his own ill-health, depression and lack of financial resources.

For the fortunes of the Beethoven family were in decline. This was not always the case. It is now known that Beethoven did not spend his early childhood in great poverty, as most biographers have assumed. Johann van Beethoven managed to support his family in reasonably moderate circumstances until the mid-1780s, when a series of misadventures severely reduced his capacity as breadwinner.

This is perhaps the place for a word or two about Beethoven's parents. The personality of the mother whom he now mourned (she had died on 17 July 1787) does not emerge in very distinctive terms; the accounts speak in conventional phrases of her piety, gentleness and kindness, and of her gravity of manner. This is contrasted, again somewhat conventionally, with Johann van Beethoven's harsher and perhaps even violent temperament. In these years the talents on which he relied to support his family, at no time outstanding, seem to have been observed to decline. An official report of 1784 described his voice as 'very stale', and for some time before his wife's death he had begun to drink heavily, as his mother had done. In 1789, therefore, Beethoven – who was not yet 19 – took the extraordinary step of placing himself at the head of the family by petitioning for half his father's salary to enable him to support his brothers; this was granted, and the old tenor's services were dispensed with. The psychological significance of this act of self-assertion has not escaped his biographers.

The next four years, the last that Beethoven spent in Bonn, can be portrayed in a sunnier light. From 1789, when the musical life of the town under the new elector was fully resumed, Beethoven played the viola in the orchestras both of the court chapel and of the theatre, alongside such fine musicians as Franz Ries and Andreas Romberg (violins), Bernhard Romberg (cello), Nikolaus Simrock (horn) and Antoine Reicha (flute); some of these were to remain almost lifelong friends. He also began to be active again as a composer, producing, among other works, the most impressive composition of the Bonn years, the cantata on the death of the Emperor Joseph II (WoO87).

Joseph II was not merely the elector's elder brother but a powerful symbol of those intellectual, social and political ideas of the 18th century known as the Enlightenment (*Aufklärung*). His reformist ideas found a ready welcome in Bonn among Beethoven's contemporaries and immediate superiors in age, so that the grief caused by the emperor's death in Vienna on 20 February 1790 was no doubt more than merely formal. On hearing the news four days later the literary society (Lesegesellschaft) of Bonn at once planned a memorial celebration for 19 March. Beethoven was commissioned to produce a cantata, but for unknown reasons the work was not performed. It may be that there was insufficient time to rehearse it; that it was found unimpressive seems unlikely, since in the autumn a second cantata 'On the Accession of Leopold II to the Imperial Dignity' (WoO88) was commissioned and completed – though that too seems not to have reached performance.

One further commission was undertaken to please Beethoven's talented and powerful friend Count Ferdinand Waldstein: on 6 March 1791 the count produced a ballet in old German costume, performed by the local nobility, and the music for this *Ritterballett* (WoO1) was by Beethoven, though his name was not made public. The dedication to the Countess von Hatzfeld of 24 variations for piano on the theme of Righini's arietta 'Venni amore' (WoO65), published in the summer of 1791, indicates another aristocratic connection.

But for Beethoven the chief excitements of this year may have been outside Bonn itself. As Grand Master of the Teutonic Order, the elector had to preside for many weeks over its sessions at Mergentheim, and he saw to it that he had his orchestra with him. The players' journey up the Rhine was accompanied by much revelry and clowning; in later years Beethoven retained many happy memories of this, as well as one curious memento (a mock diploma). An ambitious series of concerts was given at Mergentheim, and Beethoven also seized the opportunity of going with friends to Aschaffenburg, a summer palace of the Electors of Mainz, to visit the famous pianist Sterkel. It is said that Sterkel's light touch and graceful,

*1. Autograph MS of Beethoven's scena and aria 'Primo Amore'* WoO92, composed *c*1790 (D-Bsb Artaria 167)

fastidious style were a revelation to Beethoven. But when Sterkel challenged him to play his own Righini variations, doubting his ability to do so, it was Beethoven's turn to cause amazement, particularly since he improvised extra variations in a style that imitated Sterkel's.

By this time, it is clear, it was not only other professional musicians who recognized his worth or valued his friendship. He had formed a considerable circle of friends, drawn from some of the most discerning, progressive and respected families in Bonn. A few at least deserve mention here. Count Waldstein, eight years older than Beethoven, had come to Bonn from Vienna in 1788. A close associate of the elector and highly musical himself, he proved a devoted friend and patron of Beethoven, whom he came to know in the cultivated circle of the von Breuning family. Frau von Breuning, whose husband had died in a fire in 1777, had four children, all slightly younger than Beethoven: Eleonore, later to marry another friend of Beethoven's Bonn and early Vienna years, Franz Gerhard Wegeler; Christoph; Stephan, a lifelong friend; and Lorenz, who died young. The young widow herself became something of a second mother to Beethoven and seems to have had a keen insight into his character. She used her authority to dissuade him from neglecting duties that he found tedious, while evidently recognizing his tendency to self-absorption, since she would often remark: 'He has his raptus again'. She exercised some control, too, over his friendships; of the less suitable ones he remarked in later years: 'She understood how to keep insects off the flowers'. This kindly supervision, and the provision of what became almost a second home, meant much to Beethoven, who in spite of his many admirers remained in some ways a solitary youth, and on occasion a painfully shy one.

There were other opportunities for agreeable social life in Bonn. The elector was often absent, leaving Beethoven free for musical activities unconnected with the court. He spent much of his time in a circle of aristocratic friends and prosperous citizens such as the Westerholts, the Eichhoffs and the Kochs. The Kochs ran a kind of social and political club, the Zehrgarten, that was a centre for intellectual life in Bonn, and a number of Beethoven's early compositions were written for members of this circle.

It may have been Waldstein whose voice was decisive in the proposal that Beethoven should now go to Vienna to study with Haydn. When Haydn had passed through Bonn on his way to England in December 1790 he had met some of 'the most capable musicians', but it is not known whether Beethoven was among them. (Neefe, Beethoven's enthusiastic mentor, must surely have been.) But in July 1792, according to Wegeler, the electoral orchestra assembled at Godesberg to give a breakfast for Haydn, now on his journey back to Vienna, and Wegeler adds that on this occasion Beethoven showed him a cantata (doubtless WoO87 or 88) and received Haydn's commendation. More probably that had happened earlier, on Haydn's outward journey. But it was now that the matter of Beethoven becoming Haydn's pupil was no doubt raised; the elector, to whom it fell to pay for the journey and the living expenses in Vienna, in due course sanctioned the arrangement. Beethoven's departure was fixed for the beginning of November. An *album amicorum* from this time records the good wishes of a large number of his friends, who had no reason to expect that he would be leaving Bonn for ever. None of the entries was more prophetic than that of Waldstein:

> Dear Beethoven: You are going to Vienna in fulfilment of your long-frustrated wishes. The Genius of Mozart is still mourning and weeping over the death of her pupil. She found a refuge but no occupation with the inexhaustible Haydn; through him she wishes once more to form a union with another. With the help of assiduous labour you shall receive *Mozart's spirit from Haydn's hands.* Your true friend, Waldstein.

3. 1792–5. Beethoven arrived in Vienna, the city that was to be his home for the rest of his life, in the second week of November 1792. He was not quite 22. His entry into Viennese circles was unobtrusive, and the sporadic entries in the little diary that he had started on his journey and kept at least until 1794 are the best guide to his immediate preoccupations. They show him looking for a piano and for a wig-maker, buying clothes, noting the

address of a dancing-master, and the like. Later entries are concerned with the renting of some lodgings. And on the same page that records 'on Wednesday, 12 December [1792], I have 15 ducats', there is a variety of small sums of money set against the name of 'Haidn'. Within weeks of his arrival, therefore, the instruction from Haydn which had been the purpose of his journey had already begun. Of another event of the same month, the death of his father in Bonn on 18 December, there is no mention in the diary.

Haydn's tuition lasted for no longer than about a year; in January 1794 he left Vienna for his second London visit. The arrangement proved a disappointment to Beethoven, but he concealed this at the time from Haydn, and throughout 1793 the relations between pupil and teacher were outwardly cordial. Haydn appears to have had no corresponding misgivings – at any rate until later, when Beethoven had some very harsh things to say about him. Temperamentally, however, they were set for conflict. The childless Haydn no doubt wished for affection and even love from his most brilliant pupil – but that was the one thing that Beethoven was too mistrustful to give. Though he could write to the only moderately gifted (and no longer present) Neefe, 'If ever I become a great man, yours will be some of the credit', he was almost bound to feel the genius of 'Papa' Haydn standing in his way, one more father to be defied or circumvented. Beethoven's unease crystallized into the groundless suspicion that his teacher 'was not well minded towards him' and was neglecting or perhaps even sabotaging his tuition. (The formal side of the instruction can be seen from the surviving exercises, which consist of strict species counterpoint; they are in Beethoven's handwriting, with somewhat intermittent corrections by Haydn.) The lack of thoroughness on Haydn's part formed one of Beethoven's grievances. According to the composer Johann Schenk (whose testimony has, however, been contested), Beethoven secretly enlisted Schenk's help with these exercises.

It is not clear whether Haydn also instructed him in free composition. A clue here is provided by an episode that seems to reflect better on Haydn than on his pupil. Since leaving Bonn Beethoven had found himself with insufficient money for his living expenses. He continued, it is true, to receive his Bonn salary each quarter, and after his father's death he had successfully petitioned the elector to double it; but some part of this must have gone to support his brothers, who were still in Bonn. For his subsistence in Vienna he had only 100 ducats (nearly 500 florins) per annum. He had hoped to receive the whole of it on his arrival in Vienna, at which time he had to make considerable outlays, but it seems to have been paid quarterly. The result was that he had to borrow. On 23 November 1793 Haydn wrote on his behalf to the elector, enclosing five pieces of music, 'compositions of my dear pupil Beethoven', whom he predicted would 'in time fill the position of one of Europe's greatest composers'. He added (with characteristic generosity): 'I shall be proud to call myself his teacher; I only wish that he might remain with me a little while longer'. Haydn's letter next turned to the question of Beethoven's subsidy; it described the elector's 100 ducats as a sum quite inadequate to Beethoven's needs, pointed out that he himself had had to lend him 500 florins, and ended by suggesting that the elector might do well to increase the subsidy to 1000 florins in the coming year. The elector's reply was both accurate and icy. Four of the five submitted works had been composed and performed in Bonn long before the move to Vienna, and were therefore no evidence of progress. Moreover Beethoven was being paid not only the 100 ducats but also his ordinary salary of 400 florins, so had no reason to be in particular difficulty. The elector concluded:

> I am wondering if he would not do better to begin his return journey, in order to resume his duties here; for I very much doubt whether he will have made any important progress in composition and taste during his present stay, and I fear he will only bring back debts from his journey, just as he did from his first trip to Vienna.

It looks as though Beethoven had misled Haydn in respect of his total income, and thus exposed Haydn to the elector's withering reply. He may also have misled Haydn as to the dates of the works the latter submitted to the elector, although it is hard to know whether Haydn actually thought that they were new works or knowingly submitted them as newly revised works. In any event, this suggests that Beethoven completed hardly anything new under Haydn's immediate supervision, though he seems to have revised and polished several of the later Bonn works.

When Haydn left for England in 1794, he passed Beethoven on to another tutor, Johann Georg Albrechtsberger, the Kapellmeister at the Stephansdom and the best-known teacher of counterpoint in Vienna. The lessons, three times a week, started after Haydn's departure and continued throughout 1794 to the spring of 1795. They were more thorough-going than Haydn's had been, and covered not only simple counterpoint but contrapuntal exercises in free writing, in imitation, in two-, three- and four-part fugue, choral fugue, double counterpoint at the different intervals, double fugue, triple counterpoint and canon – at which point they were broken off. Albrechtsberger proved a most conscientious, though at the same time very dry, teacher.

A third name is often linked with Haydn's and Albrechtsberger's: that of the imperial Kapellmeister Antonio Salieri. It was Salieri's genial custom to offer free tuition to impecunious musicians, especially in the setting of Italian words to music; and it is usually stated that Beethoven availed himself of this informal help soon after his arrival in Vienna. The only surviving evidence of any serious study with Salieri, however, dates from the years 1801–2, when he set a large number of unaccompanied partsongs with Italian words and a scena and aria for soprano and string orchestra (WoO92*a*). These were followed in 1802 by two final pieces scored for orchestra, the terzetto *Tremate, empi, tremate* (op.116) and the duet *Ne' giorni tuoi felici* (WoO93). They are more than exercises and may have been intended for a concert. In spite of Salieri's help Beethoven never fully mastered Italian prosody, though something had no doubt been gained in the skill of setting words by the time that he turned in the direction of opera.

But that is to jump far ahead. Aside from his studies, Beethoven's first task in Vienna was to establish himself as a pianist and composer. This was something that he achieved both rapidly and with remarkable success. His gifts apart, there were at least two reasons for this, and they not only helped to launch him but continued to sustain him after he had gained an ascendant position. The first was his immediate contacts with aristocratic

circles. He had arrived from Bonn as the court organist and pianist to the Emperor Franz's uncle, and with a reputation already spread by high-born Viennese who had heard him while visiting the elector; he was a protégé of Count Waldstein, who was connected by birth or by marriage with several of the greatest houses of the Austrian, Bohemian and Hungarian nobility; and he was the pupil of Haydn. Thus he was in the strongest possible position to be introduced into the best aristocratic circles.

The second reason had to do with the character of the circles themselves. The aristocracy based on the Austrian capital surpassed all others of Europe in its devotion to music, and much of its time and a considerable part of its fortunes – a ruinous amount in some cases – was spent in the conspicuous indulgence of this taste. Not only did these aristocrats welcome virtuosos to their town palaces and country estates, but some of them, such as Prince Lobkowitz, kept private orchestras and even – like the Esterházys – opera companies as well. If their support was not on quite so lavish a scale, at least they employed a wind band or, like Prince Karl Lichnowsky and the Russian Count Rasumovsky, a quartet of string players. The Court Councillor von Kees was among the many who organized private concerts; a large library of music was assembled by the Baron van Swieten, a patriarch whose distinction it was to cultivate the music of Bach and Handel and introduce it to Viennese audiences. The names of van Swieten and some of these others are found in the records of Mozart's and Haydn's lives; and they now gave a welcome to Beethoven.

He certainly needed more than their mere approval. His salary from Bonn was paid only until March 1794, and in a list of the elector's musicians from the autumn of the year he was entered as 'Beethoven, without salary in Vienna, until recalled'. (The elector now had his own difficulties as a result of the military victories of the neighbouring French. He had visited Vienna in January 1794, and Beethoven may have called on him and discussed his position.) Since many of the aristocracy had spacious accommodation or several houses, it was natural for them to provide Beethoven with lodging. One of the first houses in Vienna (if not the very first) in which he had rooms was owned by Prince Lichnowsky, who soon established himself as a leading patron of the composer. Both he and his wife Princess Christiane (née Thun) were intensely musical, and lavished a steady stream of kindnesses on him. But others were scarcely less generous or hospitable, so that it is no surprise to find Beethoven setting off in June 1793 for Eisenstadt, where Haydn was staying; doubtless the Esterházys looked after him. Another early supporter who became a lifelong friend was the Hungarian Nikolaus Zmeskall von Domanovecz. A capable amateur cellist and composer of quartets, he ardently promoted performances of Beethoven's music and continually rendered him small services, including the provision of quill pens, which Beethoven could never cut properly himself.

Beethoven's instant and striking successes as a virtuoso were at first confined to performances in private houses. Regular public concerts of the sort given throughout the season in London and Paris were not then a feature of Viennese musical life; there were only a few annual charity concerts and an occasional subscription concert of a virtuoso or Kapellmeister. But in the salons the stunning effect of Beethoven's solo playing, and particularly perhaps of his improvising, was immediately recognized. A glimpse of what this aspect of his life was like to Beethoven is to be found in one of his letters to Eleonore von Breuning in Bonn, to whom – because of a quarrel before his departure from there – he did not write until he had been in Vienna for almost a year. He had dedicated to her the first of his works to be published in Vienna (composed in part in Bonn), his variations for violin and piano on Mozart's 'Se vuol ballare' (WoO40), and in alluding to the difficult trills in the coda confessed to her:

> I should never have written down this kind of piece, had I not already noticed fairly often how some people in Vienna after hearing me extemporize one evening would next day note down several peculiarities of my style and palm them off with pride as their own. Well, as I foresaw that their pieces would soon be published, I resolved to forestall those people. But there was another reason, too; my desire to embarrass those Viennese pianists, some of whom are my sworn enemies. I wanted to revenge myself on them in this way, because I knew beforehand that my variations would here and there be put before the said gentlemen and that they would cut a sorry figure with them.

The pugnaciousness of the virtuoso is characteristic, and it was not long before he displayed his powers before wider audiences.

An early opportunity came at a charity concert in the Burgtheater on 29 March 1795. Beethoven appeared as composer as well as virtuoso, for he played a piano concerto of his own, probably the work in B♭, later published as the Second Concerto (op.19). His old friend from Bonn, Franz Gerhard Wegeler, who was in Vienna from October 1794 to the summer of 1796, witnessed the preparations for this concert – or it may have been the one nine months later in December and the concerto may have been the First (op.15) in C – and relates how Beethoven completed the finale only at the very last moment while suffering from severe abdominal pains. At a second charity concert the next day Beethoven again appeared on the platform; this time he gave an improvisation. And on 31 March he played for the third time in three days at a performance of Mozart's *La clemenza di Tito* organized by his widow; this time the concerto was one of Mozart's.

Apart from the variations dedicated to Eleonore von Breuning he had not yet published anything in Vienna. The decision was deliberate, for his op.1 was intended to be an event. He chose a set of three piano trios, a genre dear to aristocratic devotees of chamber music, and he dedicated it to Prince Lichnowsky. The trios had already been heard and admired, possibly in earlier versions. There is a well-known story of what purports to have been their first performance at a soirée of Lichnowsky's at which Haydn was present; although he praised them, he is said to have advised Beethoven not to publish the third of them, in C minor. If this story is true down to the details, the soirée must have taken place before Haydn's departure for England in January 1794, for when he returned to Vienna in August 1795 op.1 had just been published. But it seems more likely that he heard the trios only on his return, and expressed regret about the inclusion of the C minor one. Since the third trio ultimately proved the most successful, Beethoven suspected malice on Haydn's part; years later Haydn confirmed that he had had misgivings about its publication, adding that he had not believed it would be understood and received so well. Beethoven published his op.1 by subscription, the edition being produced by the publisher Artaria. The subscription

list contained 123 names (many of them recruited by Lichnowsky), and the subscriptions amounted to 241 copies at one ducat (roughly four and a half florins) each; since Beethoven paid the publisher only a florin per copy he made a handsome profit.

According to Wegeler, Haydn's return to Vienna was marked by the performance at Lichnowsky's of another substantial composition by Beethoven: the three piano sonatas that he subsequently published in March 1796 as his op.2 and dedicated to Haydn. It is said that Haydn had hoped Beethoven would append to his name on the title-pages of his earliest works the words 'pupil of Haydn' – a common enough custom – and that Beethoven declined to do so, privately declaring that although he had had some lessons from Haydn he had never learnt anything from him. At all events the sonatas (like the trios before them) were published without any acknowledgment of pupillage.

Outwardly, however, relations between the two did not appear to be strained. On 18 December 1795 Beethoven made his second public appearance in Vienna as a composer-virtuoso, playing a piano concerto at a concert which Haydn organized and which included three of his latest symphonies, written for London. It is probable that this was the first performance of the C major concerto. Another sign of Beethoven's growing popularity was the invitation this year to write the minuets and German dances for the November ball held in the Redoutensaal by the Pensionsgesellschaft Bildender Künstler.

4. 1796–1800. Beethoven's sights were now set on still wider audiences. His youngest brother Nikolaus Johann had arrived from Bonn at the very end of 1795 and had found employment in an apothecary's shop; and Caspar Carl, the other brother, had been in Vienna from the middle of 1794, apparently supporting himself by giving music lessons. With his brothers thus established in Vienna, Beethoven now felt able to embark on a concert tour. In February 1796 he set out for Prague, travelling (as Mozart had done seven years earlier) with Prince Lichnowsky. Writing from Prague to his brother Johann in Vienna he announced his intentions of visiting Dresden, Leipzig and Berlin, and added: 'I am well, very well. My art is winning me friends and respect, and what more do I want? And this time I shall make a good deal of money'. On 11 March he gave a concert in Prague; on 29 April he played before the Elector of Saxony in Dresden. On reaching Berlin, he appeared several times before the King of Prussia (Friedrich Wilhelm II), and with the king's first cellist, Jean Louis Duport, he played the two op.5 cello sonatas, written for this performance. Another *pièce d'occasion* was the set of 12 variations for cello and piano on a theme of Handel; the cello was of course the king's instrument, and the choice of theme ('See the conqu'ring hero comes') may have contained a courteous nod towards the throne. The king gave Beethoven a gold snuffbox filled with louis d'ors: 'no ordinary snuffbox', Beethoven later declared with pride, 'but such a one as it might have been customary to give to an ambassador'. He seems to have stayed for about a month in Berlin, making the acquaintance of the Kapellmeister, Himmel, as well as of Zelter and Fasch, and twice giving improvisations before the Singakademie.

By the time that Beethoven returned to Vienna his friend Wegeler had gone back to Bonn, together with Christoph von Breuning, though Christoph's brother Lorenz remained in Vienna. Beethoven and Wegeler – who completed his studies in medicine, married Eleonore von Breuning in 1802, and set up practice in Koblenz – never met again, but they remained friends and exchanged letters from time to time. Wegeler's contribution to the *Biographische Notizen über Ludwig van Beethoven* that he compiled with Ferdinand Ries after Beethoven's death and published in 1838 (with a supplement, 1845) is a valuable source of information on Beethoven's childhood and adolescence in Bonn and on his life in Vienna up to 1796.

At the end of 1796 Beethoven again travelled. He played at a concert at Pressburg (now Bratislava) on 23 November. The next year, 1797, is almost devoid of incidents that have left any record. At the end of May he wrote to Wegeler that he was doing well – in fact, better and better; on 1 October he penned some warm lines in the album of Lorenz von Breuning, who was leaving Vienna to return to Bonn. Between those dates nothing is known, and it is even possible that he was seriously ill at that time. One source assigns such an illness to the second half of the previous year, where there is also a gap in the records (from July to November). The year 1797 saw the publication of several compositions: his opp.5–8, the most important of which were the E♭ Piano Sonata (op.7) and the cello sonatas written for Berlin (op.5), as well as the song *Adelaide* (op.46), dedicated to the author of its words, the poet Matthisson. The publications of 1798 were even more assured, including the three op.9 string trios, his most impressive chamber works to date, and the three op.10 piano sonatas. The trios were dedicated to Count Johann Georg von Browne, a patron whom Beethoven described in the dedication as the 'first Maecenas of his Muse', while op.10 was dedicated to Browne's wife.

Early in 1798 considerable interest was aroused by the arrival in Vienna of the emissary of the French Directoire, General Bernadotte; in his retinue was the violinist Rodolphe Kreutzer. Both were only a few years older than Beethoven, whose acquaintance they made. Bernadotte's sojourn in Vienna was brief, but he is said to have suggested to Beethoven the idea of writing a 'heroic' symphony on the theme of the young General Bonaparte.

Later in the year (the exact date is unknown) Beethoven visited Prague and gave two public concerts, as well as a private recital. They were attended and described in some detail by the Bohemian composer Václav Tomášek (Wenzel Tomaschek). He heard Beethoven play the Adagio and Rondo from the Piano Sonata in A op.2 no.2, improvisations on 'Ah perdona' from Mozart's *Tito* and on 'Ah vous dirai-je maman', and both the B♭ and C major piano concertos (Tomášek described the former as having just been written for Prague, so it was probably a revised version that was performed). For Tomášek, who by the end of his life had heard all the outstanding virtuosos from the age of Mozart to the 1840s, Beethoven remained the greatest pianist of all – though Beethoven the composer came in for more criticism. Only in 1798–9, in fact, did Beethoven's virtuosity, which seems until then to have had no serious rivals in Vienna, come under challenge from the Salzburg-born pianist Joseph Wölfl (with whom Beethoven directly engaged in a piano duel) and from Johann Baptist Cramer of London; both were about his age. The stimulus of competition from two such excellent players, whose strengths were nevertheless rather

different from his own, could only have had a salutary effect on his playing, which he was to describe in 1801 (to a correspondent who had not heard him for two years) as having 'considerably improved'.

It was probably a living composer whose challenge Beethoven was finding more dispiriting. In 1795–6 he had reacted to the brilliant symphonies that Haydn had brought back from London by attempting to write a symphony of his own in C major, but although he worked at it vigorously it remained unfinished and was abandoned. Now, in April 1798, Haydn gave private performances of his new oratorio *Die Schöpfung* (*The Creation*), and Beethoven might well be excused for believing his old teacher's confession that the inspiration for some passages was more than human. Furthermore, Haydn continued to produce masterly string quartets with unabated vigour: six had been written in 1793 and six more in 1797. Although all the works with opus numbers that Beethoven had so far published in Vienna, apart from the piano sonatas, could loosely be called chamber works, the particular genre that was most closely associated with Haydn, and indeed with Mozart as well – the string quartet – was noticeably unrepresented. That Beethoven was only too aware of their formidable example there can be no doubt, and he copied out movements from several of their quartets in score for closer study. Still, the challenge was one for which he now felt himself ready, and in the second half of 1798 and through the winter and spring he worked on a set of quartets.

It is tempting to draw a connection between the selfconsciousness of this undertaking and a change in his working methods which coincided with it. Beethoven had always made sketches of the compositions that he was engaged in writing, and as time went on they became more voluminous. But hitherto they had been written on loose single leaves or bifolia of music paper. From the middle of 1798 he began to make his sketches in books of music paper. The first two of the sketchbooks contain sketches for four of the quartets that he was now writing, as well as for a considerable number of other works that he completed, revised or attempted to write in the same months. (The completed works include a song, *La tiranna* WoO125, which he wrote to English words, working in part from a phonetic transcription.) The sketchbooks evidently retained some value for him long after they had been filled up, for he kept them by him and preserved most of them in a growing pile for the rest of his life. Some aspects of their importance, a particular preoccupation of Beethoven scholarship in recent years, are discussed below in §19.

In 1798 Karl Amenda, a student of theology and a competent violinist, arrived in Vienna from his native Courland (Latvia), and became tutor to Prince Lobkowitz's children and music teacher at the home of Mozart's widow. He and Beethoven soon became fast friends; indeed they were almost inseparable. But in the late summer of 1799 Amenda was obliged to depart again for Courland, and on 25 June 1799 Beethoven gave him a copy of a quartet 'as a small memorial of our friendship'. This quartet was later published in a somewhat altered form as the first of the op.18 quartets. It is not clear how many of the six quartets had been completed by the end of 1799; but the ones written first were in any case revised later before being sent to the publisher.

Other friendships formed around this time were ultimately more fateful for Beethoven. In May 1799 the Countesses Therese and Josephine von Brunsvik, then 24 and 20, came to Vienna from Hungary on a short visit with their widowed mother, who wished them to take lessons from Beethoven. He was charmed by them, proved a very attentive teacher, and for their album composed a 'musical offering' consisting of a song with some variations for piano duet (WoO74). Through them he became friends with the other members of the family, their brother Franz and their youngest sister Charlotte; Julie (Giulietta) Guicciardi, who came to Vienna from Trieste with her parents in 1800, was their very young cousin. Beethoven was soon a welcome guest on visits to their estates in Hungary. But the short trip to Vienna had unhappy consequences for Josephine. The family made the acquaintance of Count Joseph Deym (or Herr Müller; he had been exiled after a duel and returned under a pseudonym); Deym was the proprietor of a famous museum of waxworks, and although he was almost 30 years older than Josephine, her mother pressed his claim as a suitable husband for her, partly no doubt in an attempt to redeem the family fortunes. Josephine reluctantly assented, and they were quickly married; but Deym was in fact badly in debt, so that even financially the match had nothing to be said for it. The visits of Beethoven to the wing of the 80-room museum house in Vienna in which the Deyms lived must have afforded some consolation to the unhappy young countess.

On 2 April 1800 Beethoven gave his first concert for his own benefit, in the Burgtheater. The music included, besides a Mozart symphony and numbers from Haydn's *Creation*, two new works by Beethoven, the Septet (op.20) and the First Symphony. The former soon became one of his most popular works; the reception of the latter was appreciative, although the heavy scoring for the wind was remarked on. His piano playing was on display in an improvisation and a piano concerto – probably the C major. No doubt he had planned to produce a new concerto, the Third, in C minor, written around this time but not performed until the spring of 1803 (the score, with a heavily revised solo part, is dated '1803'). Perhaps, then, the C minor concerto could not be completed in time for the concert. For his appearance later in the same month with the Bohemian horn player Johann Wenzel Stich (or 'Giovanni Punto', the name that Stich preferred to use) he very rapidly wrote a horn sonata (op.17); they gave a second concert three weeks later in Pest. Beethoven may have spent part of the summer of 1800 with the Brunsvik family in Hungary.

The second half of 1800 was outwardly uneventful; it doubtless saw the final revision of the op.18 string quartets, and the writing of the B♭ Piano Sonata (op.22) and of the A minor and F major violin sonatas (opp.23, 24). There was less inducement to prepare new works for a possible concert in the following spring, since he had received an important commission for the court stage: he was to write the music for a ballet designed by the celebrated ballet-master Salvatore Viganò, *Die Geschöpfe des Prometheus* (op.43). This was given its first performance at the Burgtheater on 28 March 1801 and was successful enough to be repeated more than 20 times. Only a sketch of the scenario survives. In the finale Beethoven used a melody that evidently came to assume a certain emotional importance for him, perhaps even

embodying something of his spirit of determination and heroism in battling against difficulties, for he used it again as the theme for two important and challenging sets of variations completed in 1802 and 1803: the op.35 piano variations and the variation-finale of the 'Eroica' Symphony.

By this time several publishers were competing for Beethoven's newest works, and though a number of important compositions had lately appeared – the highly individual *Sonate pathétique* (op.13), for instance, dedicated to Prince Lichnowsky, at the very end of 1799 – others had not yet found a buyer. An entertaining correspondence with the publisher Franz Anton Hoffmeister, who had lately moved from Vienna to Leipzig, dates from around this time. Hoffmeister finally bought several works beginning with the First Symphony, the Second Piano Concerto, the Septet and the B♭ Piano Sonata.

It comes as a surprise to find that Beethoven was intending to dedicate the symphony to his former overlord and employer, the Elector of Cologne. The preceding years had been harsh to Maximilian Franz. After being forced by French military successes to leave Bonn in October 1794, and having stayed for a while in various cities, he had finally returned to Vienna in April 1800 and settled in Hetzendorf just outside the city. Beethoven is believed to have spent some time in summer 1801 in and around Hetzendorf, and may well have called on the elector and paid his homage or made his peace with him, for the instructions for the symphony's dedication are contained in a letter to Hoffmeister written about 21 June 1801. Beethoven's wishes were not to be carried out, for the elector died on 26 July and the symphony was subsequently dedicated to Baron van Swieten.

5. 1801–2: DEAFNESS. At a time of personal crisis it was natural for Beethoven's thoughts to turn to his last years in Bonn and to the friends he still had there. One of these – his friend of longest standing, trained in medicine, discreet, remote from Vienna – was particularly suited to be the first recipient of a secret that Beethoven had kept to himself for some years and that had not yet been guessed by his circle of friends in the capital: the appalling discovery that he was going deaf. These tidings were now conveyed to Wegeler in Bonn in a letter of 29 June 1801, and to another absent friend, Karl Amenda in Courland, two days later.

Exactly when Beethoven first detected some impairment in his hearing cannot be determined. Perhaps he did not quite know himself, for no doubt its onset was insidious, and he probably did not regard any temporary periods of deafness or diminished hearing as sinister, especially since he had long become used to spells of fever, abdominal pain and episodes of ill-health. A young man does not expect to go deaf, and although in one account he implied that he had noticed the first symptoms in 1796, other statements set the date somewhat later, and the crisis came only with the growing realization that his deafness was progressive and probably incurable. From the descriptions of his symptoms there is general agreement among modern otologists that his deafness was caused by otosclerosis of the 'mixed' type, that is, the degeneration of the auditory nerve as well – by no means a rare condition.

At this time Beethoven had not yet given up hope that his doctors could do something for his hearing, but he could already foresee incalculable troubles both for his professional life and – what it is easy to forget was equally important to him – for his social life. As he wrote to Wegeler:

> I must confess that I am living a miserable life. For almost two years I have ceased to attend any social functions, just because I find it impossible to say to people: I am deaf. If I had any other profession it would be easier, but in my profession it is a terrible handicap. As for my enemies, of whom I have a fair number, what would they say?

To Amenda he wrote in similar terms: 'Your Beethoven is leading a very unhappy life, and is at variance with Nature and his Creator', but he added that when he was playing and composing his affliction still hampered him least – it affected him most when he was in company. A curious feature of these letters, in fact, is that each includes not only a melancholy account of the despair which his deafness had brought about but also an almost lyrical portrait of his professional and financial successes. Lichnowsky had agreed to pay him an annuity of 600 florins for some years; six or seven publishers were competing for each new work; he was often producing three or four works at the same time; his piano playing had considerably improved: 'why, at the moment I feel equal to anything'.

Four and a half months later Beethoven again wrote at length to Wegeler: his doctors had been unable to help his hearing, but he was leading a slightly more pleasant life.

> You can scarcely believe what an empty, sad life I have had for the last two years. My poor hearing haunted me everywhere like a ghost; and I avoided all human society. I was forced to seem a misanthrope, and yet I am far from being one. This change has been brought about by a dear charming girl who loves me and whom I love . . . and for the first time I feel that marriage might bring me happiness. Unfortunately she is not of my class.

This letter is similar to the earlier ones in containing phrases that are very exalted in tone: 'I will seize Fate by the throat; it shall certainly not crush me completely – Oh it would be so lovely to live a thousand lives'. Such passages, and their more gloomy counterparts, are characteristic of his conflicting moods as he faced the prospect of permanent deafness and the quite unexpected threat to what had hitherto been a triumphant career. An attitude of pious resignation, with which he tried to master such unruly feelings, did not come easily to him but found expression in the six hymn-like settings of sacred poems by Gellert (op.48), which he completed at about this time.

The 'dear charming girl' who was brightening Beethoven's days was no doubt the Countess Giulietta Guicciardi. She was now not quite 17: too young, and perhaps too spoilt, to take Beethoven's devotion very seriously, though no doubt she was flattered for a time by the attentions of a famous composer, a man much admired by her cousins. Much, probably too much, has been made of the fact that it was to her that he dedicated the 'Moonlight' Sonata (op.27 no.2), written in 1801. But it is clear that for a time he was under her spell – she even boasted of this – and he must have had mixed feelings when in November 1803 she married Count Wenzel Robert Gallenberg, a prolific composer of ballet music, who was only a year older than herself.

By the end of 1801 Ferdinand Ries, the son of Franz Anton Ries who had befriended the Beethoven family in Bonn, was living in Vienna, and Beethoven agreed to take him as his piano pupil. Ries was then just 17 and he remained with Beethoven until the autumn of 1805, when

he had to return to Bonn for military service. During those four years he had unrivalled opportunities for observing Beethoven at his work, on his walks in the countryside, with his brothers and his friends, or at the social functions of the aristocracy. His recollections of this time, set down somewhat artlessly in the *Biographische Notizen* which he compiled in collaboration with Wegeler in the 1830s, form a valuably unsentimental picture of Beethoven. A recurring theme in Ries's account is Beethoven's unwillingness, or inability, to conform to the normal conventions of social punctilio, and especially to play the courtier and to oblige by performing to a private audience when requested to do so. These last attitudes, indeed, hardened in later life into a stance in which he felt himself a prince of art and entitled to behave as one.

One particular aspect of Beethoven's behaviour that obviously baffled Ries was his relations with his brothers: he was appalled to see grown men come to blows in the street in the middle of an argument. In ascribing to the scheming of his brothers many of the difficulties that Beethoven was experiencing both in his relations with friends and in his practical arrangements, Ries may have been loyally taking his teacher's side. There is no doubt, however, that Caspar Carl in particular then played an important part in Beethoven's business affairs. For several years, starting in 1802, he was entrusted with the offer of new compositions to publishers, and with the subsequent negotiations. But on 25 May 1806 he married Johanna Reiss, the daughter of a well-to-do upholsterer; their only child, Karl, was born on 4 September. After that Beethoven largely dispensed with his brother's help, but his nephew later assumed a position of great importance in his life.

The summer of 1802 was spent just outside Vienna in the village of Heiligenstadt. It was there, no doubt, that Beethoven put the finishing touches to the Second Symphony and completed several other works of this prolific year: the three op.30 violin sonatas, the op.33 bagatelles, and perhaps the first two of the op.31 piano sonatas. He had gone to Heiligenstadt in the spring, perhaps with the thought of spending longer in the country than usual for the sake of his health and hearing. Now in October, as he prepared to return to the city, he wrote out a strange document with carefully crafted rhetoric, addressed to his two brothers (though wherever his brother Johann's name was implied there was a blank space). Found among his papers after his death and known as the 'Heiligenstadt Testament', it is dated 6 October 1802 at the beginning and 10 October at the end, and its contents mark it as representing a trough of despondency in his fluctuating moods. His hearing had shown no improvement in the country, and he recognized that his infirmity might be permanent; he defended himself against the charge of misanthropy, and taking leave of his brothers declared that though he had now rejected the notion of suicide, he was ready for death whenever it might come. The Testament has always been recognized as a poignant witness to the despair that often overwhelmed Beethoven at this time.

6. 1803–8. From that nadir of despondency Beethoven seems to have recovered quickly, and probably by his usual means: hard work. His next activities certainly indicate a firm repudiation of the notion that his deafness would handicap him professionally. Caspar Carl wrote to Breitkopf & Härtel on 12 February 1803:

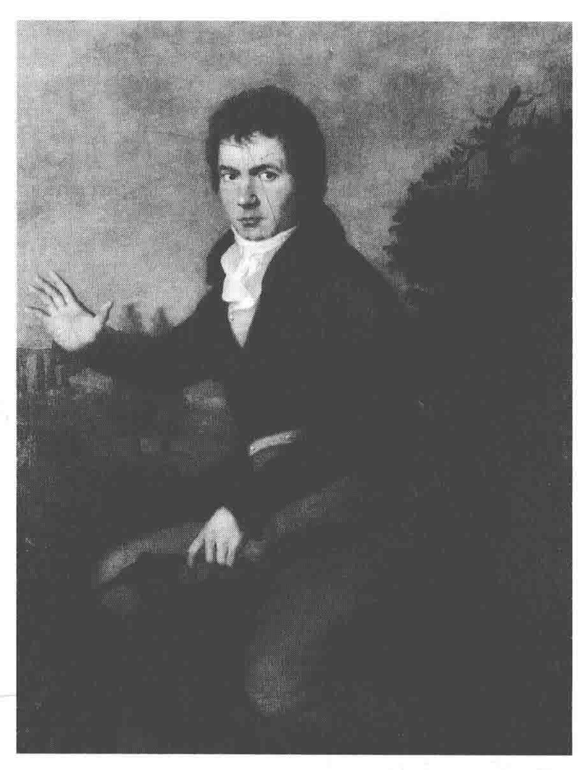
*2. Ludwig van Beethoven: miniature by Christian Horneman, 1803 (Beethoven-Haus, Bonn)*

You will have heard by now that my brother has been engaged by the Wiedener Theater [i.e. Theater an der Wien], he is writing an opera, is in charge of the orchestra, can conduct if necessary, seeing that there is a director already available there every day. He has assumed the chief direction mostly so as to have a chorus for his music.

Although Beethoven had already gained a reputation throughout Europe as a composer of instrumental music, opera was still the royal road to fame. At the time there was something of a dearth of local talent in opera at Vienna, but from the spring of 1802 the importation of operas from Paris had more than compensated for this. Those of Cherubini and to a lesser extent of Méhul became extremely popular; so great indeed was the clamour for Cherubini's music that one of his operas (*Les deux journées*) was staged at rival theatres on successive nights. Like the other Viennese, Beethoven responded enthusiastically to these operas from revolutionary France, with their contemporary realism and heroic plots (copied in some cases from recent political history). Thus he eagerly took up the invitation to write an opera for Schikaneder's theatre and moved his lodgings to the Theater an der Wien.

An immediate bonus for this appointment was the opportunity to give a concert. He quickly wrote his oratorio *Christus am Oelberge*, and it was performed on 5 April 1803 together with the First and Second Symphonies and the Third Piano Concerto (with Beethoven as soloist), all but the First Symphony being new to the audience. The oratorio, which tells of the Agony in the Garden (and is known in English-speaking countries as *The Mount of Olives*), marked Beethoven's first appearance in Vienna as a dramatic vocal composer. Another rapidly written piece was occasioned by the arrival in Vienna of the young violinist George Polgreen Bridgetower: the Kreutzer Violin Sonata (op.47) was played by Bridgetower and the composer on 24 May. He may also

have started to look at the opera, *Vestas Feuer*, with a libretto by Schikaneder.



But something else was evidently pressing: the inner demand to complete a great instrumental work. The writing of the Third Symphony, the *Sinfonia eroica*, was the major effort of the summer of 1803, which was spent in Oberdöbling. The symphony was originally entitled simply 'Bonaparte', in tribute to the young hero of revolutionary France, who was almost exactly Beethoven's age. But this idealization of Napoleon as a heroic leader gave way to disillusionment when the First Consul proclaimed himself Emperor in May 1804. The story of Beethoven's rage when the news of this reached Vienna is well known: he went to the table where the completed score lay, took hold of the title-page and tore it in two. On its publication in 1806 the symphony was given its present title of 'heroic symphony', and was described as having been 'composed to celebrate the memory of a great man'. The 'great man' may well have been Prince Louis Ferdinand of Prussia, who was an esteemed friend of the symphony's dedicatee, Prince Lobkowitz, and who in fact died a hero's death in 1806.

The 'Eroica' Symphony was not the only work by Beethoven from these years that appears to reflect or embody extra-musical ideas of heroism. A similar spirit pervades the so-called Waldstein Sonata (op.53), for instance, composed immediately after the symphony in the last months of 1803, and the 'Appassionata' Sonata (op.57), begun in the following year. Even the string quartets of this period, the three of op.59 completed in the summer of 1806 and dedicated to Count Rasumovsky, are cast in the same mould.

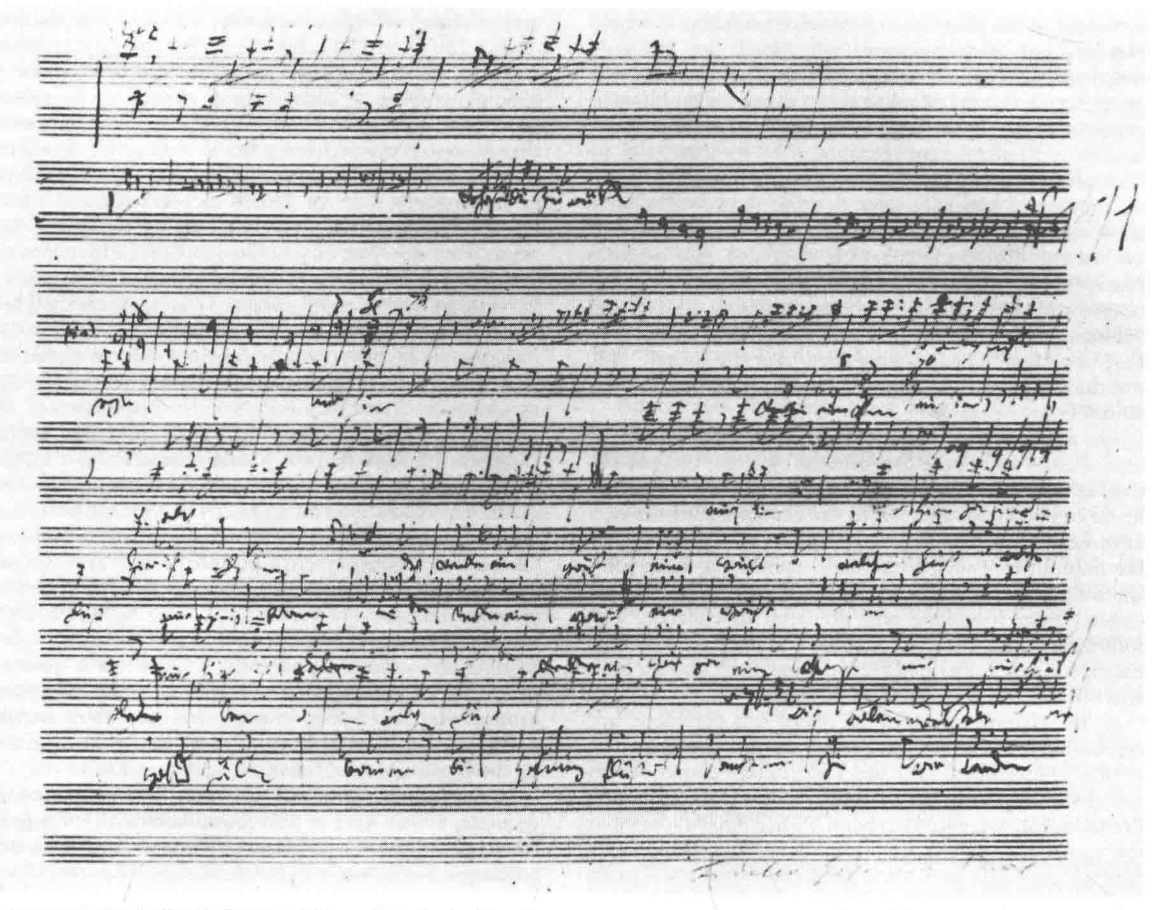
In comparison with the exhilarating work on these instrumental pieces, the opera dragged: by the end of 1803 Beethoven had completed less than two scenes of *Vestas Feuer*, and he abandoned it. For a more attractive operatic libretto had come his way, and was to capture his imagination to a profound extent. This was J.-N. Bouilly's *Léonore, ou L'amour conjugal*. The plot – the tale of a political prisoner's rescue from a Spanish Bastille, engineered by his wife disguised as a man – is said to have been based on a real incident in the French Revolution. At first, no doubt, Beethoven was drawn by the opportunity that it afforded of writing a grand 'rescue' opera similar to those of the admired Cherubini, and on 4 January 1804 he informed the Leipzig critic Rochlitz that he was beginning to work on it. But the profounder implications that the story held for his own psychology will have emerged as the labour progressed; oppressed and isolated by his undeserved deafness, it was easy for him to identify with the unjustly imprisoned Florestan who lay alone in the dark with no apparent hope of rescue. (In the same way Christ's 'cup of sorrow' in the oratorio of 1803 seems to have been linked in Beethoven's mind with his own affliction.) And it was surely another side of his nature that could feel empathy with the spirited and ever-devoted Leonore; sustained by her vision of hope and longing, and following her 'inner drive', she is in some ways an even more Beethovenian figure than Florestan.

A change in the ownership of the Theater an der Wien in February 1804 rendered void Beethoven's contract to write an opera for the house. It may also have obliged him in due course to find new lodgings; at all events he arranged to share rooms with Stephan von Breuning, but a serious quarrel – induced mainly by Beethoven, it seems – broke out between the two friends, and by July Beethoven had moved for some weeks to Baden, a resort some 16 miles south of Vienna. Breuning reacted philosophically and with forbearance, and in November wrote to Wegeler, who knew them both well: 'You cannot conceive what an indescribable, I might say fearful, effect the gradual loss of his hearing has had on him'. The breach was made up, but in spite of some invigorating events, such as the first (private) performance of the 'Eroica', this was not a happy summer for Beethoven, and for a time he may have thought of leaving Vienna altogether – perhaps for Paris. But towards the end of the year his contract for the opera was renewed, and he set to work on it again.

Apart from the opera there was another reason for Beethoven to remain in Vienna. In January 1804 Count Deym, the husband of Josephine von Brunsvik, had died; the young widow, who now had four small children, continued to spend much of her time in Vienna, and by the autumn Beethoven, who had remained in touch with the family, became a frequent visitor to the house. He gave Josephine piano lessons. An intense relationship soon developed between them, the nature and course of which must be inferred from the contents of 13 letters that Beethoven wrote to Josephine between the autumn of 1804 and the autumn of 1807, and from drafts of some of her replies (these documents were first published in 1957). Beethoven, it is clear, was passionately in love; Josephine, though moved by his devotion and keenly concerned with his happiness, his ideals and his art, retained a certain reserve throughout and rejected any

*3. Ludwig van Beethoven: portrait by Joseph Willibrord Mähler, c1804 (Historisches Museum der Stadt Wien); the first of four portraits of Beethoven by Mähler, Beethoven kept it on his wall until his death*

intimacy closer than that of warm friendship. It would not be hard to find reasons why, after one unhappy marriage and with a young family now claiming her concern, she should be reluctant to throw in her lot with someone of Beethoven's uncontrolled nature, his want of much that passed for conventional good manners, and his unimpressive social standing. In the view of her sentimental unmarried sister Therese (writing many years after these events) it was consideration for her children that proved the decisive factor with Josephine. But a social barrier surely worked to keep the pair apart as well; it is noteworthy both that they were anxious to conceal the extent of their intimacy from the Brunsvik relatives, and that in addressing each other they used the formal 'Sie', not the more intimate 'du', which he kept for her brother, Count Franz Brunsvik.



The most intense period of the relationship was at the end of 1804 and in the first months of 1805: close to the time at which Beethoven was composing the triumphant finale of his opera, a paean to the accomplishments of a virtuous wife and to 'married love'. It came to an end by the autumn of 1807, with rueful scenes and misunderstandings, and with Beethoven still asking for closer contact than Josephine was prepared to concede. The following summer she left Vienna, and in 1810 married a Baron von Stackelberg; her second marriage, like her first, was not a happy one. She died in 1821.

By the summer of 1805 the opera was complete, but censorship difficulties postponed its first performance until 20 November. This had unfortunate consequences for its success, for in the preceding weeks the conquering French armies were advancing on Vienna. On 9 November the empress departed, and four days later Napoleon's troops entered the city. Thus the audience for the opera's first night consisted not of the Austrian nobility and moneyed classes, Beethoven's natural supporters and admirers, who had mostly fled from the capital, but of a miscellaneous crowd that included a sprinkling of French officers. Its reception was not enthusiastic, and after the third performance it was dropped. But with the return of Beethoven's friends to Vienna and the resumption of normal conditions there was pressure for the opera's revival, though also a general agreement that it had failed in part from its excessive length and in particular from the slowness of some of the earlier scenes. Beethoven was persuaded to make drastic cuts, which he did only with the greatest reluctance, for while some of these undoubtedly speeded the dramatic pace, others were mutilating. For the new version he provided an overture, *Leonore* no.3, which was itself a revision of the first production's overture (*Leonore* no.2). In its altered form the opera was now given two performances (29 March and 10 April 1806); then Beethoven was involved in a dispute with the director of the theatre, Baron Braun, and withdrew his score. It was not for another eight years that the opera was again seen on the stage. It had always been Beethoven's intention for the opera to be known as *Leonore*; but in both 1805 and 1806 it was billed as *Fidelio*, and for the 1814 production (see below) he acquiesced in that name. (The title *Leonore* is nowadays often used to distinguish the 1805 and 1806 versions from the more familiar 1814 one.)

The twin distractions of his opera and of his love for Josephine, and perhaps (at a deeper level) his slow adjustment to the fact of his deafness, may have led to some falling off in the quantity of new compositions during 1804 and 1805. But the period from the spring of 1806 to the end of 1808 must be regarded as one of prodigious fertility, with a steady stream of completed works, many of them on the largest scale. A comment that he wrote down among the sketches that date from the summer of 1806, some of which was spent in Silesia at the country seats of Prince Lichnowsky and Count Oppersdorff, reveals something of his optimistic and resolute mood: 'Just as you plunge yourself here into the whirlpool of society, so in spite of all social obstacles it is possible for you to write operas. Your deafness shall be a secret no more, even where art is involved!'.

Among the works completed before the end of the year were the three string quartets dedicated to the Russian ambassador Count Rasumovsky, the 'Appassionata' Sonata, some at least of which had been composed earlier, the Fourth Symphony, the Violin Concerto (op.61), and in all essentials the Fourth Piano Concerto. They were quickly introduced to the public. The Violin Concerto, a work completed very rapidly, was performed by Franz Clement on 23 December 1806, and the Fourth Symphony and Fourth Piano Concerto were included at two concerts given at the palace of Prince Lobkowitz in March 1807, together with a new overture, to Collin's tragedy *Coriolan*. A further overture, apparently written for a planned production of his opera at Prague, was also composed around this time but never performed in public; it came to light only after Beethoven's death and is now known by the illogical title of '*Leonore* no.1' (op.138).

With the exception of the first two Rasumovsky quartets, which were at first found 'difficult', these great works delighted the discerning Viennese audiences and enhanced Beethoven's fame throughout Europe. There were many signs of this. In April 1807 Muzio Clementi, then head of a prominent London firm of music publishers and piano makers, called on Beethoven in Vienna and secured the exclusive English rights to some of his newest compositions. And, nearer home, he received an invitation from Prince Nicolaus Esterházy II, Haydn's last patron, to produce a mass in celebration of his wife's name day in September 1807. This was a commission that made Beethoven unusually nervous. The type of composition required was not merely one in which he was inexperienced; it was one that had been mastered with special excellence by Haydn, who in the years up to 1802 had written six such masses for the princess's name day. Comparisons between Haydn's works and that of his one-time pupil were therefore inevitable. And in the event the Mass in C (op.86) was not well received, though Beethoven himself regarded it highly. After passing the summer in Baden working on the mass, he went to Eisenstadt for its first performance, on 13 September; later he spent some time at Heiligenstadt, no doubt completing the Fifth Symphony and his A major Cello Sonata (op.69) in the next few months. Some of the ideas for the symphony had been jotted down as early as the first months of 1804, but 1807 was the year that the main writing was done – and probably not before the mass was out of the way. Nor was there any slackening in the pace of composition in the next year, 1808. In fact that summer (which he again spent at Heiligenstadt) saw the writing of one of his largest and most characteristic works, the Sixth Symphony, called *Sinfonia pastorale*. He followed this directly with the two op.70 piano trios.

*4. Autograph sketches for the Prisoners' Chorus from Act 2 of Beethoven's 'Leonore' (1805 version) (D-Bsb Landsberg 12, p.44)*

Yet behind all this flurry of creative activity there was one problem to which Beethoven had not yet found a satisfactory solution. He had no regular or dependable source of income. He could of course count on the generosity of the aristocratic circles that continued to admire him, on the fees payable for dedications, and on the sales of his music to publishers. Yet this was little enough to rely on; he was, after all, living in the city in which Mozart had died in poverty a decade and a half earlier, partly no doubt from having no adequately paid position. It was not easy for him to arrange a concert from which he could secure the receipts, since most concerts were private aristocratic affairs, or they were given for charity – at which Beethoven usually offered his services. There was occasionally the opportunity of obtaining one of the theatres for a benefit performance at a time when they were otherwise closed (Holy Week or around Christmas), but this often led to disappointments – in 1802, for instance, and again in 1807. In the latter year, therefore, he petitioned the Directors of the Imperial Theatres for a commission to compose an opera every year, for an income of 2400 florins; and he urged strongly his claim, whether this petition was granted or not, for an annual benefit day at one of the theatres. The petition contained a hint that otherwise he might have to leave Vienna. The reply (if any) of the Directors has not survived. No operatic commission followed, but after several postponements the Theater an der Wien was finally put at his disposal for the night of 22 December 1808, partly in just recognition of his services to charity; so he arranged to give an enormous benefit concert.

The working out of that evening contained many features characteristic of Beethoven. The programme was injudicious, consisting as it did of four hours of music, virtually all of it unfamiliar: first performances of the Fifth and Sixth Symphonies, and first public performances in Vienna of the Fourth Piano Concerto (with Beethoven as soloist) and portions of the Mass in C, as well as a piece written in Prague 12 years before, the scena and aria *Ah! perfido* (op.65); in addition Beethoven was to improvise. As if that were not enough for the audience, he decided the evening needed a finale; and since a chorus was already available, he rapidly threw together the work now known as the 'Choral Fantasy' (op.80). This consisted of an introduction for piano solo (extemporized by Beethoven at the first performance), several variations for piano and orchestra on a simple song melody that he had written in the 1790s, and a short choral conclusion.

Written at the last minute, the work was under-rehearsed; the orchestra, already on bad terms with Beethoven after a dispute in rehearsals for an earlier charity concert, broke down in the middle of the Fantasy and had to be restarted; Beethoven had quarrelled with the original soprano for the aria and her very young replacement was inadequate; and the theatre was bitterly cold. Thus the success of the evening was very mixed. The financial results are not known.

7. 1809–12. Even before the concert took place Beethoven had received the offer of a regular position: that of Kapellmeister at Kassel, where Napoleon's youngest brother Jerome Bonaparte, a youth in his early 20s, had been installed as 'King of Westphalia'. But although Beethoven usually had some sharp words for the Viennese, and continued to criticize them for the rest of his life, it is plain that he had no intentions of leaving Vienna if that could possibly be avoided. The Kassel appointment, with few obligations attached, was worth 600 ducats, plus 150 ducats travelling expenses: a total corresponding to about 3400 florins annually; moreover it was for life, or at any rate for as long as the 'king' retained his throne. Beethoven now used it to obtain a matching offer from Vienna. Although his initial conditions for remaining there included the guarantee of an annual concert and contained a strong desire for the title of Imperial Kapellmeister, their essence was a yearly salary of 4000 florins. And this after a month or two of negotiation he was able to obtain. A document dated 1 March 1809 guaranteed that its three signatories would provide Beethoven with an annuity for as long as he remained domiciled in Vienna; since it covered accidents and old age it also amounted to an insurance policy and a pension. The signatories were the Archduke Rudolph (1500 florins) and the Princes Lobkowitz (700 florins) and Kinsky (1800 florins). There were, as will be seen, difficulties in ensuring the regularity and the full value of the payments, but once those problems were overcome Beethoven was relieved from any rational grounds for financial worry.

Something must be said here about the Archduke Rudolph, the Emperor Franz's youngest brother, and not only the highest born but the most devoted of Beethoven's patrons. Born in 1788, he was destined for the church. As a boy he showed an aptitude for music, and at some time in his teens – perhaps in the winter of 1803–4, when he became 16 – he chose Beethoven as his piano teacher. Later he became Beethoven's only pupil in composition. The relationship, which lasted without interruption until Beethoven's death (Rudolph himself died four years later at the age of 43), was characterized by genuine respect on both sides. Rudolph treated Beethoven with consideration and humorous understanding; and Beethoven, though irked and sometimes provoked into ill-behaviour by the inevitable court protocol that surrounded a royal archduke, showed an almost childlike devotion to Rudolph, to whom he dedicated several of his greatest works. There are, it is true, many letters that show him begging off giving a lesson because of particularly pressing business or 'illness'; most of those pleas were accepted by the benevolent Rudolph as polite fictions.

The warmth of this relationship was to be highlighted by several incidents in the months that followed the signing of the annuity. For the second time within four years a French army bore down on Vienna, causing the imperial family, including Rudolph, to leave the city. Nevertheless it was decided that Vienna should be defended. As a result the city was bombarded by French howitzers throughout the night of 11 May and the following morning. Beethoven is said to have taken refuge in the cellar of Caspar Carl's house, and to have covered his head with pillows. On the afternoon of 12 May the city surrendered, and there was a second French occupation; it lasted for two months and proved a heavy drain on the inhabitants' pockets.

The summer of 1809 was a miserable one for Beethoven. Almost all his friends had, like the court, fled from the city, and communication with the outside world was greatly restricted. Nor could he search for inspiration and recreation in the countryside. He spent some weeks therefore in copying extracts from the theoretical works of C.P.E. Bach, Türk, Kirnberger, Fux and Albrechtsberger, as part of a course of instruction that he was preparing for the Archduke Rudolph. But his thoughts about his absent patron were expressed more touchingly in the programmatic 'Lebewohl' or 'Les adieux' Sonata (op.81*a*), the three movements of which depict his sorrowful farewell ('Das Lebewohl') to Rudolph on his departure from Vienna on 4 May 1809, his sadness at Rudolph's absence ('Abwesenheit'), and his rejoicing at seeing him again ('Wiedersehn') on his return on 30 January 1810. (Beethoven intended not only the titles but the dates to be inserted in the published work.) The sonata seems to have been completed in 1809 in anticipation of Rudolph's return, and was dedicated to him. Earlier in the year, before the French invasion, Beethoven finished the greater part of the Fifth Piano Concerto, also dedicated to Rudolph. The third important work of the year – like the concerto and the 'Lebewohl' Sonata in E♭ – was the so-called 'Harp' String Quartet (op.74). Several other smaller pieces were also completed before the end of the year: not only the F♯ major Piano Sonata (op.78), a work of which he himself thought very highly, but also the Sonata in G (op.79), the Piano Fantasia (op.77) and a number of songs. Beethoven's productivity even in one of his less productive years could be formidable.

Towards the end of the year a highly congenial commission came Beethoven's way, since it brought him in touch with the theatre once more, and since the play in question was by Goethe, whom he admired above all writers then living. It had been decided to furnish Goethe's *Egmont* with incidental music, and Beethoven was invited to supply it; he completed it by June 1810 and it was immediately performed. Apart from the excitement of the plot itself, in which Count Egmont foresees the liberation of the Netherlands from Spanish rule but dies as a result of his own brave stand, it is possible to suggest a deeper reason behind Beethoven's heartfelt response to it: it may represent his own delayed reaction to the conquest and occupation of his adopted city by the French, and his hopes of being delivered from them. In the spring or summer of 1810 he also wrote three songs (op.83) to words by Goethe, and he learnt about the poet's character through the friendship that he now formed with the very young, talented and seductive Bettina Brentano, a friend of Goethe – whom in turn she kept informed by letter about Beethoven.

Bettina obviously charmed Beethoven; rather less is known about another woman with whom he had been more seriously involved only a little earlier. For it seems clear that in the spring of 1810 Beethoven was more or less solemnly considering marriage. Not only did he turn his attention to his wardrobe and personal appearance; he even wrote to his old friend Wegeler in Bonn for a copy of his baptismal certificate, necessary evidence of his exact age. The woman who was the object of these concerns was a certain Therese Malfatti, the niece of Dr Johann Malfatti who had become his physician for a short while after the death of the trusted Dr Schmidt in 1808 (his doctor since about 1801). It looks as though

Beethoven made a proposal of marriage and it was turned down. No doubt it was radically misconceived; there is no evidence that the family of Therese, who was not yet 20, would have found Beethoven, then in his 40th year, an acceptable suitor, and the one surviving letter from him to her, though warm enough, is not particularly intimate. Beethoven's disappointment is hard to gauge. He was urged to travel, perhaps because of his distracted state, but instead he merely moved to Baden for two months. The compositions on which he worked that summer include the String Quartet in F minor (op.95) – the 'quartetto serioso' – and the so-called 'Archduke' Piano Trio in B♭ (op.97); although their autograph scores bear dates of October 1810 and March 1811 respectively, it is possible that both works were completed later than the dates suggest. The earlier months of 1811 seem to have been a time of comparative inactivity in composing, though a number of larger works, including the Choral Fantasy and the oratorio written several years earlier, had to be seen through the press.

Beethoven's health was still not satisfactory, and in the summer of 1811, on Dr Malfatti's orders, he visited the Bohemian spa Teplitz (now Tepliče) to take the cure. While there he wrote the incidental music to two stage works by Kotzebue, *König Stephan* (op.117) and *Die Ruinen von Athen* (op.113), designed as prologue and epilogue to the ceremonial opening of the new theatre at Pest. He evidently returned to Vienna refreshed and began work on the Seventh Symphony, which he completed in the spring of 1812, going on without a break to the Eighth Symphony. (To judge from the sketchbook used for work on these symphonies, he at one time considered following them with a third, probably in D minor.) For the second year running Beethoven decided to visit Teplitz, travelling via Prague and arriving there on 5 July. Next morning he started to write a love-letter to an unknown woman, which – since it has been discussed almost as much as any music he ever wrote – will be considered shortly. Because of the international situation (Napoleon's invasion of Russia was just getting under way), Teplitz, which was neutral territory, became the meeting-place of many imperial personages and diplomats. But what was even more interesting to Beethoven was the presence there of Goethe, and the long-awaited meeting between them finally took place. The contact was a cordial one, the reactions of the two men predictable. To his friend Zelter, Goethe confided:

> His talent amazed me; unfortunately he is an utterly untamed personality, who is not altogether in the wrong in holding the world to be detestable but surely does not make it any the more enjoyable either for himself or for others by his attitude. He is easily excused, on the other hand, and much to be pitied, as his hearing is leaving him, which perhaps mars the musical part of his nature less than the social.

Beethoven's somewhat more censorious comment in a letter to Breitkopf & Härtel was: 'Goethe delights far too much in the court atmosphere, far more than is becoming in a poet'. In fact Beethoven's admiration for his fellow men usually flourished best at a distance.

From Teplitz he went, allegedly on a new doctor's advice, to Karlsbad (now Karlovy Vary), and from there to Franzensbrunn, where he participated in a charity concert held for the victims of a fire at Baden that had destroyed a large part of the resort. He then revisited Karlsbad, and finally returned once more to Teplitz, still apparently in search of improved health. At the beginning of October he was in Linz, where he started the score of the Eighth Symphony; he stayed with his brother Johann, who had bought an apothecary's shop there in 1808. But this was less of a visit than a visitation, for the principal purpose of his journey to Linz was to interfere in his brother's private life. Johann had let part of his house to a physician from Vienna, whose wife's unmarried sister, one Therese Obermeyer, later joined them. Subsequently Therese became Johann's mistress, and Beethoven now descended to expostulate with his brother and to attempt to end the relationship. He applied both to the bishop and to the civil authorities, and ultimately obtained a police order to have the girl expelled from Linz. But before it could be effective Johann played a trump card by marrying Therese, on 8 November. Beethoven's extravagantly high-handed behaviour had ended in defeat, and he retired angrily to Vienna. Nothing more is heard of him that year apart from the preparations for a concert with the French violinist Pierre Rode on 29 December, for which he completed the G major Violin Sonata (op.96).

*5. Ludwig van Beethoven: bust by Franz Klein, bronze, 1812 (Beethoven-Haus, Bonn)*

The rebuff by his brother was the second emotional crisis of 1812, a year that represented some sort of watershed for Beethoven. To return to the letter of 6–7 July: usually known as the letter to the 'Immortal Beloved' ('unsterbliche Geliebte'), it was found among Beethoven's papers after his death, and first published in 1840. There is no direct indication to whom this passionate love-letter, the only one of his to a woman that uses the intimate 'du' throughout, was addressed. Even the year in which it was written (it refers only to 'Monday, 6 July') was for long uncertain. Thus the names of many women known to

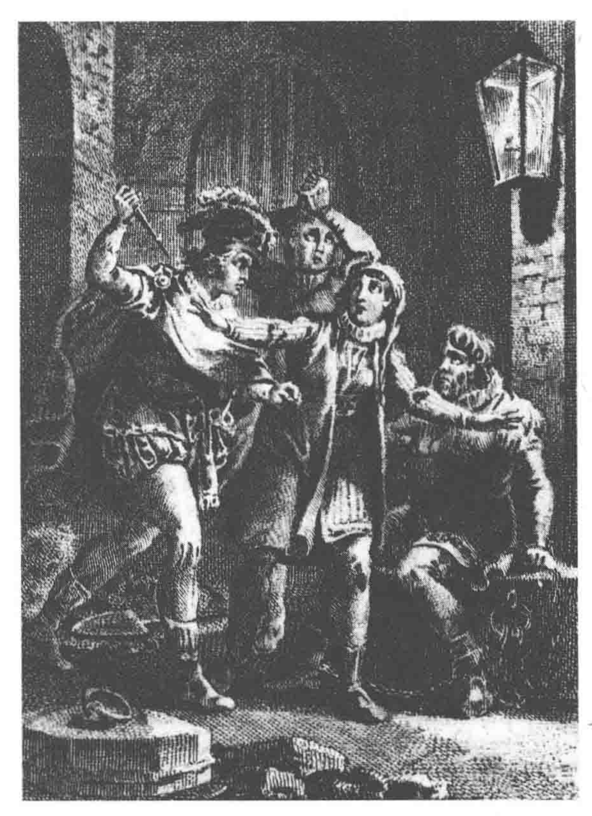
have been admired by Beethoven were proposed by his early biographers; but nearly all of them have had to be ruled out, since 1812 is now established as the correct date of the letter, Teplitz as its place of origin and Karlsbad ('K' in the letter) as its addressee's temporary residence.

Maynard Solomon showed in the 1970s that she was Antonie Brentano, an aristocratic Viennese lady ten years younger than Beethoven who at 18 had married a Frankfurt businessman, Franz Brentano, Bettina Brentano's half-brother (As there are no explicit letters from Antonie Brentano to Beethoven, some do not accept that the case is closed; but no plausible alternative has been presented.). The Brentanos were in Vienna in the years 1809–12, so that Antonie could be with her dying father and subsequently wind up his estate. It is clear not merely that she disliked the idea of returning to Frankfurt, where she was most unhappy, but that she did everything possible to postpone it, delaying the event until the last months of 1812. Beethoven had been introduced to the family by Bettina in 1810, and became a warm friend not only of Antonie but of her husband Franz and their ten-year-old daughter Maximiliane – for whom in June 1812 he wrote an easy piano trio in one movement (WoO39). Since the Brentanos had not only been in close contact with Beethoven in Vienna shortly before his departure at the end of June, but were also in Prague while he was there (2–4 July) and moved on to Karlsbad on 5 July, Antonie Brentano fulfils all the chronological and topographical requirements for being the addressee of the famous letter.

Although in many ways a dutiful wife, Antonie's admiration of Beethoven was profound, and she may have become emotionally dependent on him, especially when the return to Frankfurt seemed inevitable. And there is no doubt that Beethoven, though vociferous in his condemnation of adulterous relations, was especially attracted to women who were married or who were in some other way already involved with a man. Beethoven's letter is not only passionate but also confused, agitated and more than a little ambiguous. Beethoven describes his harrowing trip to Teplitz from Prague, where the relationship reached a crisis; Antonie may have known or suspected that she was pregnant (she gave birth on 8 March 1813). Mingled with the ardently expressed desire for complete union with the beloved ('I will arrange it with you and me that I can live with you') there are many phrases expressing resignation or acceptance of the lack of fulfilment, and it is possible to read it as a cautious rejection of a shared domesticity: 'At my age I need a steady, quiet life – can it be so in our connection?'. Doubtless the ambiguities were clarified when, later in the month, Beethoven joined the Brentanos at Karlsbad. The family duly returned to Frankfurt in the autumn; Beethoven never saw them again, though he remained in touch with them, calling on Franz's services as a businessman in 1820 and dedicating important works to Antonie (op.120, in 1823) and Maximiliane (op.109, in 1821).

8. 1813–21. However the turmoil of the summer of 1812 is to be understood, it proved to be a profound turning-point in Beethoven's emotional life. It initiated a long period of markedly reduced creativity, and there is evidence that he became deeply depressed. Henceforth Beethoven accepted the impossibility of achieving a sustained relationship with a woman and entering into a shared domestic routine, though he was scarcely reconciled to it; even in 1816, as will be seen, he had by no means overcome his longing. Some of the hints contained in the letter are stated more baldly in diary entries made about this time. As in past crises, a dedication to art was evidently to replace a commitment to a human being: 'Thou mayst no longer be a man, not for thyself, only for others, for thee there is no longer happiness except in thyself, in thy art – O God, give me strength to conquer myself, nothing must fetter me to life'. '13 May 1813. To forgo a great act which might be and might remain so . . . O God, God, look down on the unhappy B., do not let it continue like this any longer'.

But by a stroke of irony that may contain an inner truth, at this very time he pledged himself to a responsibility that was increasingly to encroach on the exercise of his art and indeed to dominate his emotional outlook in the last 12 years of his life. Caspar Carl became seriously ill with tuberculosis, and on 12 April 1813 he signed a declaration appointing Beethoven guardian of his son Karl, then aged six, in the event of his death. This, it will emerge, came ultimately to involve Beethoven profoundly; but for the moment Caspar Carl's health improved, though Beethoven was obliged to help him to borrow money.



At this time Beethoven too was financially embarrassed. The severe depreciation of the Austrian currency as a result of the war against Napoleon, leading to an official devaluation in February 1811, had reduced the value of his annuity of 4000 florins to little more than 1600 florins. It was open to the princes to restore the intended income, and they were prepared to do so; but unfortunately Prince Kinsky was killed by a fall from his horse at the end of 1812 before he could leave clear instructions, and Prince Lobkowitz's payments were suspended for four years from 1811 owing to the mismanagement of his affairs. So although Beethoven was ultimately to receive the full amount from Kinsky's heirs, from Lobkowitz and from the Archduke Rudolph, it was only the last-named whose subventions continued without interruption or depreciation.

This may be one reason why Beethoven, even though he was still nursing secret sorrows, nevertheless became more of a public and social figure in the next year or so, reaching for popular acclaim by way of the concert hall and the theatre. He not only engaged a servant, but appears to have kept him for three years. And he entered with some zest into the proposal of Johann Nepomuk Maelzel, the inventor of a mechanical organ called the 'panharmonicon' (and later, inventor of a metronome), for the two of them to collaborate on a piece that both celebrated and depicted Wellington's military victory at Vittoria on 21 June 1813. This bombastic piece of programme music, with its fanfares, cannonades, and fugal treatment of *God Save the King*, was thunderously acclaimed at two charity concerts on 8 and 12 December 1813 – together with the Seventh Symphony, which had not been heard before. The 'Battle Symphony' had to be repeated three weeks later, and again on 24 February 1814. On that occasion the Eighth Symphony was one of its companion pieces.

The most gratifying (and unexpected) consequence of this sudden popularity was a request from the Kärntnertortheater for permission to revive the opera *Fidelio*. Beethoven agreed but stipulated that there would have to

be a good many changes. The poet G.F. Treitschke was then stage manager at the theatre, and he undertook to make the necessary alterations in the libretto. Some weak numbers were omitted, the two finales were rewritten, Leonore's aria was supplied with a new recitative ('Abscheulicher!') and Florestan's with a new final section, and there were many smaller changes throughout. Beethoven also furnished the revival with a new overture in E major, called today the 'Overture to *Fidelio*'. Although he grumbled at the labour and claimed in a letter to Treitschke that the opera would win him a martyr's crown, the revision was effective, and the work's success dates from this production, first given on 23 May 1814 (fig.6). The new overture, not ready for the opening night, was given at the second performance, on 26 May.

The vocal score of the opera was prepared by the young pianist Ignaz Moscheles, then just 20. Since he worked under Beethoven's supervision, the task brought him for a time into regular contact with someone he had for long ardently admired. And March 1814 was the date at which another enthusiastic follower of Beethoven later said he had first been introduced to him: this was the 18-year-old Anton Schindler, at the time a law student and a good violinist. For Schindler the claims of music proved stronger than those of the law, and by 1822 he was leader of the orchestra at the Theater in der Josefstadt. From about that time he began to spend many of his leisure hours in Beethoven's company, and for a while he virtually became his unpaid secretary and servant. Beethoven found his 'factotum' useful in practical matters, though Schindler's obsequiousness used to irritate him. Some years after Beethoven's death, in 1840, Schindler published a hastily written biography – translated into English a year later, with notes by Moscheles – in which uncritical devotion to 'the master' was combined with polemics against many of the others who had been close to him. Thus it is unfortunately unreliable even in its account of the years after 1821 during which Schindler was often in very close contact with the composer; the material of value that it contains is hard to distinguish from his fabrications. A later (1860) edition of his biography, although greatly expanded and indeed largely rewritten, was no more accurate.

*6. Dungeon scene (Act 2 scene i) from Beethoven's opera 'Fidelio', Kärntnertortheater, Vienna, 1815: engraving by Vincenz Raimund Grüner from the 'Wiener Hoftheater Almanach' (1815)*

In the summer of 1814 excitement began to mount in Vienna as preparations were made to welcome the crowned heads of Europe for the Congress of Vienna. This gave Beethoven the opportunity for producing more 'occasional pieces'. But before starting work on anything of that nature, he quickly completed a piano sonata (op.90), his first in four years. The earliest of the congress works was a short chorus of welcome to the visiting sovereigns, *Ihr weisen Gründer* (WoO95). Next, he made a strenuous attempt to complete an overture in C that he had taken up and worked on at various times in the previous five years; it was planned for the celebration of the emperor's name day on 4 October and is now known as the *Namensfeier* Overture (op.115). But the score could not be completed in time, and Beethoven put it aside until the spring of 1815, setting to work instead on a cantata celebrating the present 'glorious moment' in the destiny of Europe. The fawningly inflated text of *Der glorreiche Augenblick* (op.136) was by a distinguished surgeon from Salzburg, Alois Weissenbach, who had come to the capital for the festivities. Beethoven could not have had a more enthusiastic admirer than Weissenbach; when the two men met, they took a great liking to each other, and the cantata was a result of their collaboration. They had more than music in common, for Weissenbach too was deaf. The cantata was announced for a concert on 20 November, but it was postponed three times and finally given before the assembled royalty on 29 November, with the 'Battle Symphony' and Seventh Symphony forming the rest of the programme.

From the point of view of Viennese popular acclaim and fame the year 1814 must be regarded as the high-water mark in Beethoven's life. Not only were his compositions applauded by large audiences, but he also received in person the commendations of royal dignitaries. This last aspect is typified in one final congress piece, the little Polonaise (op.89) that he wrote in December 1814 in honour of the Empress of Russia, who was especially generous to him. And 1814 was also a more sombre turning-point for Beethoven, for two performances of the 'Archduke' Trio in April and May marked his last appearance in public as a pianist (except as accompanist). His deafness had latterly become much more severe.

Beethoven now found himself possessed not only of fame but of a good deal of money, which he invested in bank shares. Moreover, as a result of a settlement reached with the Kinsky family and the goodwill of Prince Lobkowitz, most of the original value of the annuity had now been restored and the arrears made up. In spite of this, his worries about his financial situation continued to be voiced in letters to publishers and friends abroad (such as his former pupil Ries, now resident in London), whom he was trying to interest in the large number of his more

recent works that were still unpublished. But towards the end of 1815 an unhappy event occurred that immediately focussed all his concerns and anxieties. His brother Caspar Carl's health suddenly deteriorated; the tuberculosis had evidently made inconspicuous but rapid progress, and he collapsed and died on 15 November. The will, dated 14 November, appointed Beethoven sole guardian of his only child, the nine-year-old Karl, but a codicil of the same day cancelled this and made the boy's mother co-guardian:

> Having learnt that my brother ... desires after my death to take wholly to himself my son Karl, and wholly to withdraw him from the supervision and training of his mother, and inasmuch as the best of harmony does not exist between my brother and my wife, I have found it necessary to add to my will that I by no means desire that my son be taken away from his mother, but that he shall always and so long as his future career permits remain with his mother, to which end the guardianship of him is to be exercised by her as well as by my brother ... for the welfare of my child I recommend *compliance* to my wife and more *moderation* to my brother. God permit them to be harmonious for the sake of my child's welfare. This is the last wish of the dying husband and brother.

The dying man's anxieties were all too prophetic. It proved a tragedy for Beethoven that he could not do what his brother asked. It was not simply that he was unable to achieve any 'harmony' with his sister-in-law Johanna. The situation in which he found himself was one that aroused deep passions and longings that he doubtless did not fully understand. Frustrated in his several attempts – however ambiguously conceived and executed – to marry and have a family of his own, he began to feel that if he had sole responsibility for Karl he could combine the discharge of a sacred duty to his brother with some of the satisfactions and fulfilments of parenthood. But for that to be possible, he had first to convince himself and others that Johanna was quite unfit to have the custody of Karl and should be excluded from the guardianship. The struggle for possession of the nephew lasted some four and a half years, to be followed by another six in which his care and upbringing weighed heavily upon Beethoven. As will be seen, the burdensome intensity of the relationship between uncle and nephew – or as Beethoven preferred to see it, between father and son – led to something near disaster in the summer of 1826. Before then an incalculable number of hours had been spent by Beethoven in litigation, letter-writing, quarrels, reconciliations and private agony of mind.

On 22 November 1815 the Imperial and Royal Landrechte of Lower Austria appointed Johanna guardian and Beethoven 'co-guardian'. Six days later Beethoven appealed to the court requesting the guardianship to be transferred to himself. In a later court appearance he claimed he could produce 'weighty reasons' for the total exclusion of the widow from the guardianship: four years earlier Johanna had been convicted and jailed on a charge of embezzlement. The result of Beethoven's submissions was that on 9 January 1816 he was assigned sole guardianship by the court. He took vows for the performance of his duties on 19 January. On 2 February Karl was taken from his mother and entered the private school of a certain Cajetan Giannatasio del Rio as a boarder.

Beethoven seems to have had little difficulty in persuading himself that Johanna was morally quite unfit to have charge of Karl, and he was ready to denounce her character and her way of life on every possible occasion, calling her the 'Queen of Night' and insinuating that her allegedly deviant behaviour included prostitution and theft. She was certainly no moral exemplar, and some time after her husband's death she took a lover and gave birth in 1820 to an illegitimate daughter. But Viennese society was permissive in sexual matters. Few of her contemporaries saw her in the same lurid light as her brother-in-law, in spite of the forceful and relentless way that he marshalled the case against her.

Although convinced of Johanna's unsuitability for bringing up the child, Beethoven felt rather guilty about restricting them from seeing each other. Yet that is what he now asked the Landrechte to put in his control, and the court agreed that Johanna should visit her son only at hours and places that Beethoven sanctioned – which at times was liable to mean once a month, or even less frequently. An uneasy truce was maintained between Beethoven and Johanna through 1816 and 1817, although he suspected her of making clandestine visits to Karl's school. At the end of January 1818 he withdrew Karl from Giannatasio's care and took him into his own home, engaging a private tutor; then in May he moved with Karl to Mödling and placed him in a class taught by the village priest, named Fröhlich. But after a month, to Beethoven's indignation, Fröhlich expelled Karl for his bad behaviour. This seems to have consisted of a series of minor offences against discipline, but Karl particularly shocked the priest by speaking of his mother in abusive terms – a breach of the Fifth Commandment in which, it was later noted, Beethoven had gleefully encouraged him.

It was at this point in the summer of 1818, when Beethoven was taking preparatory steps to enter Karl in the Vienna Gymnasium, that Johanna made a further effort to gain some control of her son's education and welfare. With the help of a relative with legal training, Jacob Hotschevar, she presented a series of petitions to the Landrechte. The first two were rejected, but after Karl had run away from Beethoven's lodgings to his mother on 3 December – he was returned later by the police – she used the incident as the basis of a third appeal, supporting it by a careful summary of the whole situation from Hotschevar and appending a statement from Father Fröhlich on the boy's neglected physical state and moral lapses. In the course of giving evidence in court on 11 December Beethoven incautiously let slip the fact that Karl was not of noble birth. He was then forced to concede that neither he nor his late brother had ever had documents to prove their own nobility; 'van' was a Dutch prefix that was not restricted to those of noble birth. Thereupon the Landrechte, which were courts confined to the nobility, woke up to the fact that the case should never have come before them and transferred the whole matter to the Vienna Magistracy or commoners' courts.

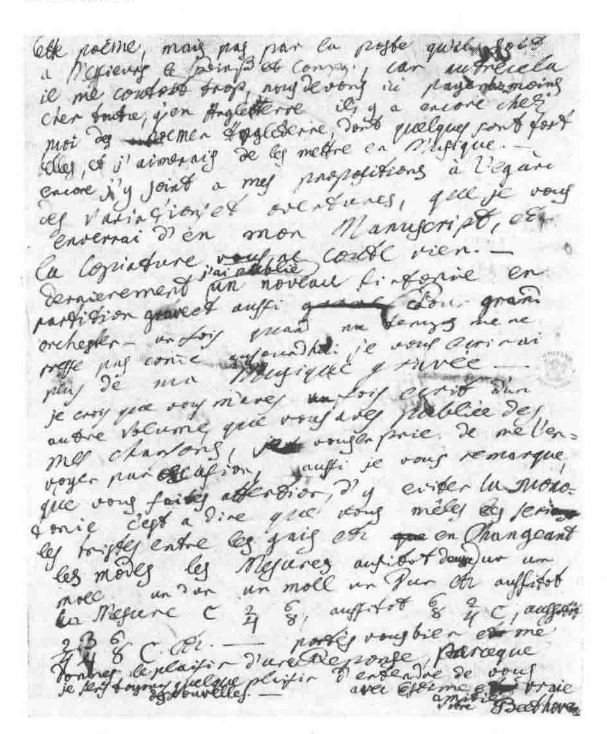
How severe a blow this was to Beethoven's pride has been debated; but even from a practical point of view it was very inconvenient. From the start the Magistracy seems to have been more sympathetic to Johanna than to Beethoven. Its first action was to suspend him temporarily from the guardianship. Karl returned for a time to his mother, being instructed by a tutor and also being taught at an institute run by one Johann Kudlich. From March to July Beethoven resigned the guardianship in favour of a Councillor Tuscher, and applied for a passport to enable Karl to be educated in Bavaria. This was refused, and his right to resume the guardianship in July was also challenged; on 17 September the court decided, reasonably

enough, that Karl (who had meanwhile been moved to yet another school, one run by a Pestalozzi disciple, Joseph Blöchlinger) had been 'tossed back and forth like a ball from one educational institution to another'. The mother, therefore, should remain as legal guardian in collaboration with a certain Leopold Nussböck, the municipal sequestrator.

This was of course a defeat for Beethoven. His first move was to protest at the decision; this was rejected by the Magistracy on 4 November. Next, with the help of a legally qualified friend, Johann Baptist Bach, he proposed as a substitute for Nussböck his friend Karl Peters, who was tutor to the children of Prince Lobkowitz. This application too was rejected. He now had recourse to the Court of Appeal, for whose benefit he prepared a 48-page draft memorandum (the longest extant document in his handwriting). This denounced in turn Johanna, a certain Herr Piuk who was a member of the Magistracy, and Father Fröhlich, and defended his own conduct and educational policies in great detail. It is unlikely that the memorandum was ever submitted in the form in which it survives. Beethoven's case was shrewdly and discreetly presented by Dr Bach; less discreet were Beethoven's attempts to influence the Court by making known his connection to the Archduke Rudolph. Demanding the guardianship of Karl and requesting Karl Peters as associate guardian, Beethoven asked at the same time for Johanna and Nussböck to be deposed. After further scrutiny these claims were upheld by the Court of Appeal on 8 April 1820; a petition by Johanna to the emperor against the decision was rejected three months later. Thus in July 1820 Beethoven found that he had finally won in a struggle that had lasted for over four years.

Beethoven's preoccupation with the care of his nephew – especially in the period from the end of 1815 to the beginning of 1818 – can be regarded as a continuation, and in some ways as an attempted solution, of the unresolved matrimonial crisis of 1812. At that time he had decided, however confusedly and irresolutely, that his creative activity was incompatible with having a wife; now he was testing whether it could be reconciled with caring for a child. The cost of those years to Beethoven is reflected in the paucity of valuable music completed in them. Productively the years 1813–15 were lean; apart from two cello sonatas (op.102) written in the second half of 1815, most of the compositions were 'occasional pieces' such as the 'Battle Symphony' and the works written for the Congress of Vienna. This trend was continued in the following years. 1816 at least brought two important compositions, the song cycle *An die ferne Geliebte* (op.98, April) and the Piano Sonata in A (op.101, November), but 1817 was completely barren in respect of completed major works. Instead, Beethoven during these years contented himself with elegant trivia, such as the polished march that he wrote in June 1816 for the Vienna artillery corps (WoO24), as well as continuing to compose the instrumental and vocal settings of Scottish airs that he provided for George Thomson of Edinburgh (from the years 1809 to 1820 he worked intermittently on close to 200 such settings). He also refurbished some variations for piano trio that he had written many years earlier on a theme from one of Wenzel Müller's Singspiele, and he revised and to some extent rewrote an arrangement for string quintet made by someone else of his youthful C minor trio from op.1 (these were subsequently published as his op.121*a* and his op.104). And, even more significantly, he toiled hard on a number of new compositions without managing to complete them; they included a piano concerto in D, a piano trio in F minor, and a string quintet in D minor. Scores of these three works were in fact begun.

These were indeed unhappy years for Beethoven. He was now thoroughly out of sympathy with the kind of music being written and being applauded in Vienna. The aristocratic milieu that had welcomed and sheltered him in his earlier years in Vienna had been shattered by the military, political and financial upheavals of the Napoleonic wars, with the result that he had lost or broken with almost all his high-born friends apart from the Archduke Rudolph. In spite of his popular successes in 1813 and 1814, his general acceptance as the greatest living composer, and a resurgence of Viennese performances of his works from 1816 onwards (testifying to their growing status as part of the standard repertory), Beethoven found no wide public in Vienna that he could respect, and daydreams of journeys abroad – to England, even to Italy – filled his mind. Nor should it be supposed that the attachment to Antonie Brentano, though he had not seen her for some years, was forgotten. The best informant here is Fanny, one of Giannatasio's daughters, who observed Beethoven at this time with a sensitivity sharpened by her own unavowed devotion to him. In September 1816 she recorded in her diary a confession of Beethoven to her father that she had overheard. Five years before, he had wanted a more intimate union with a woman, but it was 'not to be thought of, almost impossible, a chimera. Nevertheless, it is now as on the first day, I have not been able to get it out of my mind'. Some months earlier, on 8 May 1816, Beethoven had ended a letter to Ries in London with the words: 'My best greetings to your wife. Unfortunately, I have no wife. I found only one whom I shall doubtless never possess'. This nostalgic retrospection forms the background to the song cycle on the subject of the 'distant beloved' that he wrote in April 1816.



There were also difficulties of a more practical kind. Beethoven was consumed with misgivings as to his ability to look after his nephew and to run an orderly household. The year 1817, in particular, is marked by an immense number of letters to the kindly Nannette Streicher, a pianist and wife of the piano maker Johann Andreas Streicher, on the minutiae of domestic administration, the cost of household commodities, the employment of servants, and the like. Deeper doubts about the decisions that he was taking on Karl's behalf and about his treatment of Johanna were committed to his diary:

> God, God, my refuge, my rock, my all. Thou seest my inmost heart and knowest how it pains me to be obliged to compel another to suffer by my good labours for my precious Karl!!! O hear me always, thou Ineffable One, hear me – thy unhappy, most unhappy of all mortals.

Further problems were created by his slowly but unmistakably deteriorating health and especially by one aspect of it, his deepening deafness. By 1818 he was virtually stone deaf, so conversation had to be carried on with pencil and paper. This was the start of the 'conversation books', nearly 140 of which have survived. In the main they are a record of only one side of each discussion; they show what Beethoven's friends and visitors wanted to say to him, but not his own observations, since those were normally spoken. Unfortunately

Schindler, who took possession of the conversation books after Beethoven's death, saw fit not only to destroy some of them but to make false entries in the remainder, so that as documents they must be treated with some caution.

Beethoven's recovery from his compositional stagnation seems to have begun in the autumn of 1817. It was at first very slow. At that time he decided to accept an offer made earlier in the year by the Philharmonic Society of London. This invited him to write two grand symphonies for the Society, and to appear in person in London for the winter season of 1817–18. But he made no start on a symphony, or plans for a journey to London, afterwards explaining that his health had not allowed it. Instead, he set to work on a gigantic four-movement piano sonata in B♭, known today as the Hammerklavier Sonata (op.106). Its first two movements were probably ready by April 1818, and the remaining two were worked on during his summer stay at Mödling, the whole being completed by the autumn. Thus its composition, carried out (as he said) 'in distressful circumstances', had taken the best part of a year. Beethoven dedicated it to the Archduke Rudolph, for whom he was now planning a work on an even grander scale. For the archduke was being made the recipient of ecclesiastical honours. He was created a cardinal on 24 April 1819, and on 4 June he was appointed Archbishop of Olmütz (now Olomouc) in Moravia. 'The day', wrote Beethoven in offering his congratulations on the latter elevation, 'on which a High Mass composed by me will be performed during the ceremonies solemnized for Your Imperial Highness will be the most glorious day of my life', and it looks as though by then he had already been at work for some time on the composition now known as the *Missa solemnis* (op.123). Evidently the news that the archduke was to be elevated had been known to friends in advance.

*7. Part of an autograph letter from Beethoven to George Thomson of Edinburgh, 21 February 1818 (GB-Lbl Add.35265, f.8v)*

Since the installation of the archbishop was set for 9 March 1820, some way ahead, Beethoven must have felt that he could afford to proceed at a measured pace. In the first half of 1819, he even interrupted work on the Mass to write down some 20 variations on a theme of Anton Diabelli's before tackling the Gloria and Credo. But he had not allowed for the time about to be lost in litigation in 1819 and the first months of 1820, or for the tendency of each section of the work to expand to a vast scale. Beethoven had to abandon any hope of the mass's being ready for the installation. But he persevered with it, making substantial progress in the summer and autumn of 1820. He even took on new commitments at this time, undertaking at the end of May 1820 to produce three piano sonatas within three months for the Berlin publisher Adolf Martin Schlesinger. Although nothing like that optimistic pace was achieved, the first sonata was apparently completed and a start made on the other two shortly after his return to Vienna from Mödling in the autumn of 1820. The sonata that was now ready was the one in E, published as op.109. But in 1821 illnesses both at the start of the year and in July – this time an attack of jaundice – as well as continued work on the mass resulted in the other two sonatas not coming near to completion until the end of the year. The autograph of the second, in A♭, is dated 25 December 1821, that of the third, in C minor, 13 January 1822; but revisions to both postponed their completion for a little longer. Unlike op.109, published in Berlin, the other two (opp.110 and 111) first appeared in Paris from the firm that Adolf Martin Schlesinger's son Maurice had started there.

9. 1822–4. There was no longer any question of checks on Beethoven's creativity. 1822 saw not only the finishing touches on the two sonatas, the last he was to write, but the virtual completion of the Mass by the autumn, and an almost immediate start on another very large composition that he was impatient to get to grips with. This was the work now known as the Ninth Symphony. Before that he had also assembled a set of 11 bagatelles for the piano (op.119), five of which had been written by the beginning of 1821 for an instructional book of studies (most of the others were based on much earlier material); and he resumed work on the set of piano variations on Diabelli's theme that he had broken off in 1819. He found time, too, to compose a fine overture (op.124) and a chorus (WoO98) for the opening of the new theatre in the Josefstadt on 3 October 1822. The overture, *Die Weihe des Hauses* ('The Consecration of the House'), takes its title from the inaugural drama at the theatre.

The piano variations need a word of explanation. In 1819 Diabelli, no doubt responding to post-Congress patriotic fervour and in search of attractive publishing material for the new firm of Cappi & Diabelli, conceived the idea of inviting a large number of eminent or popular composers from the Austrian states to submit a single variation on a simple theme of his own that he circulated; the intention was to make an album. Such an album was indeed published by Diabelli, though not until 1824, with variations from 50 composers including Schubert and the 11-year-old Liszt. But from the start Beethoven had decided to contribute not one variation but a set of them. In time these reached the number of 33, and Diabelli decided to publish Beethoven's variations (op.120) as a separate album; in fact it came out before the other one.

*8. Autograph MS of part of Beethoven's Symphony no.9, composed 1822–4 (D-Bsb Artaria 204, p.89)*

The nature of the symphony to which Beethoven now turned his attention can be understood as the coalescence of several diverse elements that had been stirring in his imagination, in some cases over many years. The notion of composing a vocal setting of Schiller's *An die Freude* ('Ode to Joy') goes back to his last days in Bonn, as a letter of January 1793, from the Bonn professor of jurisprudence Fischenich to Schiller's wife, makes clear: 'He proposes to compose Schiller's *Freude*, strophe by strophe. I expect something perfect, since he is wholly devoted to the great and sublime'. This was an intention to which he returned a number of times – in 1798 for instance, and in 1812, in connection with sketches for an overture that later became the *Namensfeier*. Another element was the desire to complete at least one symphony for the Philharmonic Society, and possibly the promised two. For a time it seems that he conceived of one of these symphonies as containing a choral section – a 'pious song in a symphony in the ancient modes' – and the other as being in D minor without any such special feature. Only in 1822 were these diverse concepts united in the plan for a D minor symphony with a setting of Schiller's *Ode* as its finale: this he now intended to conclude with Turkish music and a full choir.

1823 was the year in which the main work on the Ninth Symphony was done, though the last details were not completed until the following March. It was also a year of great concern with copyists and publishers. Beethoven made the mistake of offering manuscript copies of his mass on a subscription basis – at a price of 50 ducats – to the crowned heads of Europe; this involved him first in a tedious correspondence with the courts, and then in a no less irksome scrutiny of the handwritten scores (a task for which Schindler was put to use). The difficulties were increased by the illness and death on 6 August 1823 of Wenzel Schlemmer, who had been Beethoven's chief copyist for a quarter of a century and on whom he relied greatly. This year also saw the publication of the op.111 piano sonata and the Diabelli Variations. The mass formed the centre of an immensely complicated series of negotiations with publishers in Vienna and abroad, in which other works completed and uncompleted, such as the op.124 overture and the Ninth Symphony, also featured. It must be remembered that he regarded the mass as his greatest work, the result of some two years' labour and not lightly to be disposed of; if anything was outrageous it was not the size of the fee demanded but the fact that by the end no fewer than seven publishers had been involved. The final result was satisfactory: a firm that he could trust, Schott of Mainz, agreed to publish several of his important works, including the mass and the Ninth Symphony.

With the symphony completed Beethoven allowed himself some relaxation; according to Schindler, 'he could again be seen strolling through the streets, using his black-ribboned lorgnette to examine attractive window displays, and greeting many acquaintances or friends after his long seclusion'. But as he had long been unhappy with the Viennese reception of serious art, he was reluctant to risk a concert, and made an inquiry of Berlin whether a performance of the mass and the symphony might be given there. News of this fact became known in Vienna and led to a touching document being presented to him by a number of his friends and admirers. This was an eloquent declaration of their confidence in him, and a plea for him to allow his latest works to be heard in Vienna. Beethoven responded by agreeing to give a concert. It took place in the Kärntnertortheater on 7 May 1824 and consisted of the op.124 overture, the Kyrie, Credo and Agnus Dei from the mass, and the Ninth Symphony. The theatre was crowded and the reception enthusiastic. Many years later the pianist Thalberg, who was among those present, recalled that after the scherzo had ended Beethoven stood turning over the leaves of the score, quite unaware of the thunderous applause, until the contralto Caroline Unger pulled him by the sleeve and

pointed to the audience behind him, to whom he then turned and bowed (Schindler and Mme Unger also remembered the moving incident, though they placed it at the end of the concert). A second performance of the symphony and the Kyrie of the mass (with some other pieces) 16 days later was much less successful.

Around the time of the symphony's first performance in May 1824, Beethoven turned once more to the piano and wrote a 'cycle of bagatelles'. Unlike the earlier ones he had written (opp.33, 119), the six bagatelles of op.126 were conceived not as separate pieces but as forming a set. At the end of the year he returned to a poem that he had come to value highly. This was Matthisson's *Opferlied*, which he seems to have regarded (in Nottebohm's phrase) as 'a prayer for all seasons'. He had set it in 1795 and again in 1822; now he produced his final version, a setting for soprano, chorus and orchestra (op.121*b*). In these years, when Beethoven was hoping that his smaller pieces at any rate would prove easy to sell, he was no doubt tempted to refurbish drafts of songs written many years earlier and to put them on the market. But with the *Opferlied*, as with the much better-known instance of Schiller's *Ode to Joy*, one may detect some elements of a desire in Beethoven around this time to gather up the unfinished business of the past and attend to ideas that had waited long for definitive expression. He was already beginning to suspect that not much time was left to him.

10. 1824–7. It seems unlikely that anyone could have predicted that the remaining years of Beethoven's life would be devoted to works in a single medium – that of the string quartet. Since 1810 he had composed no quartets. In the miraculously fertile year of 1822, however, he had written to the publisher Peters on 5 June quoting his price (50 ducats) for a string quartet 'which you could have very soon'. A letter of a month later explained that the quartet was 'not yet quite finished, because something else intervened'. It is unlikely, however, that by then he had even started to work on the Quartet in E♭ (op.127). The impetus to complete it and to compose others was provided by a commission from Prince Nikolay Golitsïn, a music lover and cellist of St Petersburg. In a letter of 9 November 1822 Golitsïn invited Beethoven to compose 'one, two or three new quartets' for whatever fee was thought proper; they were to be dedicated to the prince. In his reply of 25 January 1823 Beethoven accepted the invitation, fixing his honorarium at 50 ducats per quartet and promising to complete the first by the end of February or by the middle of March at latest. But he had not allowed for the claims of the mass and the symphony; not until after the concerts of May 1824 was the work resumed in earnest. The quartet was finished in February 1825, nearly two years after it had been promised, and was privately rehearsed before being sent to Golitsïn. In the meantime Golitsïn, who had been among the princely subscribers to the manuscript copies of the mass that Beethoven had advertised in 1823, gave the first performance of that work at St Petersburg on 7 April (26 March, Old Style) 1824 – a whole month before the partial performance in Vienna.

9. *Ludwig van Beethoven: drawing by Johann Stephan Decker, chalk, May 1824 (Historisches Museum der Stadt Wien)*

The E♭ Quartet was performed by the Schuppanzigh Quartet on 6 March 1825, but did not please the Viennese audience. Later performances, however, in which Joseph Boehm led instead of Schuppanzigh, were well received. Beethoven at once turned his attention to the second quartet for Golitsïn, in A minor (op.132). Some progress had already been made when a sharp illness in April sent him to his bed. He was ill for about a month, but felt well enough by 7 May to move to Baden, and there the quartet was completed in July. Its slow movement contains allusions to his illness; the initial melody is inscribed 'Hymn of thanksgiving to the divinity, from a convalescent, in the Lydian mode', and the contrasting section in 3/8 time is entitled 'Feeling new strength'. This work received two private performances from the Schuppanzigh Quartet on 9 and 11 September 1825; among the audience was the publisher Maurice Schlesinger, who agreed to buy it, as well as another quartet not yet written, at the price of 80 ducats per quartet (the one in E♭ had already gone to Schott). The first public performance of the A minor Quartet was on 6 November, again by the Schuppanzigh Quartet.

Without any break Beethoven started work on Golitsïn's third quartet, which occupied him from July to December 1825. The Schuppanzigh Quartet gave its première on 21 March 1826. This work, in B♭ (op.130), consisted of six movements, the last of which, an immense fugue, proved something of a stumbling-block to players and listeners. No doubt this work too should have gone to Schlesinger to publish, but in the end Beethoven gave it to the Viennese firm of Matthias Artaria.

Beethoven had now fulfilled his commission, but Prince Golitsïn had paid only for the first of his three quartets; he still owed Beethoven 125 ducats – 50 ducats for each of the other two quartets, and 25 ducats for the dedication of the op.124 overture. Although the prince acknowledged the debt, and expressed himself immensely pleased with the quartets, he was financially embarrassed at the time, and his promise to pay was not carried out before Beethoven's death.

By the beginning of 1826, if not earlier, Beethoven was at work on a fourth quartet, in C♯ minor (op.131). Just as in the previous year, while he had been engaged on the A minor quartet, so now illness once again interrupted him. As before it was abdominal pain, and seemingly pain in his joints; his eyes were also affected. But before the end of March he was better, and completed the quartet in all essentials by June. This quartet was plainly intended for Maurice Schlesinger, to whom he had written on 22 April with a request for 80 ducats straight away, 'for quartets are now in demand everywhere, and it really seems that our age is taking a step forward'. But Schlesinger's Paris firm had been damaged by fire, and on getting no reply Beethoven impatiently offered the quartet to Schlesinger's father in Berlin, to Probst of Leipzig, and to Schott of Mainz, who secured the work.

To understand the events of the summer of 1826 it is necessary to go back some way and resume the story of the nephew at the point that it was broken off in 1820. After the guardianship issue had been resolved in Beethoven's favour in that year, Karl remained at Blöchlinger's educational institute until the summer of 1823. Having by then matriculated, he proceeded to the university and attended the philological lectures that were given there. He was just 17, and in spite of the earlier forebodings of Beethoven and Blöchlinger about his character and his industry, the almost complete segregation from his mother that he had to endure, and the conflicts of loyalty constantly imposed on him, he had developed well and had shown good progress in his studies. He was also making himself useful to his uncle, with whom he spent the summer of 1823 in Baden, acting as messenger and handyman, and sometimes as amanuensis and ready-reckoner. When Beethoven returned to Vienna for the winter Karl moved in with him, and remained until Easter 1825, when he left the university for the Polytechnic Institute and moved to lodgings run by a certain Matthias Schlemmer.

Whether they were living together or apart, it was not an easy relationship. From the conversation-book entries Karl appears as good-natured, lively and shrewd, but perhaps also a little sly and prone to tell tales; he must after all have been used to hearing people slandered recklessly, and he was eager to please his intimidating uncle. Beethoven's helplessness in practical matters, which included dealing with the servants, put a heavy load on Karl's time; but his possessiveness, suspiciousness and irritability must have been even more of a burden. Beethoven was jealous of Karl's young friends, and not only disparaged them but tried to prevent him from seeing them; at the same time, when he had moved for the summer to Baden, he expected Karl to come out to visit him on Sundays and holidays, thus greatly interfering with his nephew's studies.

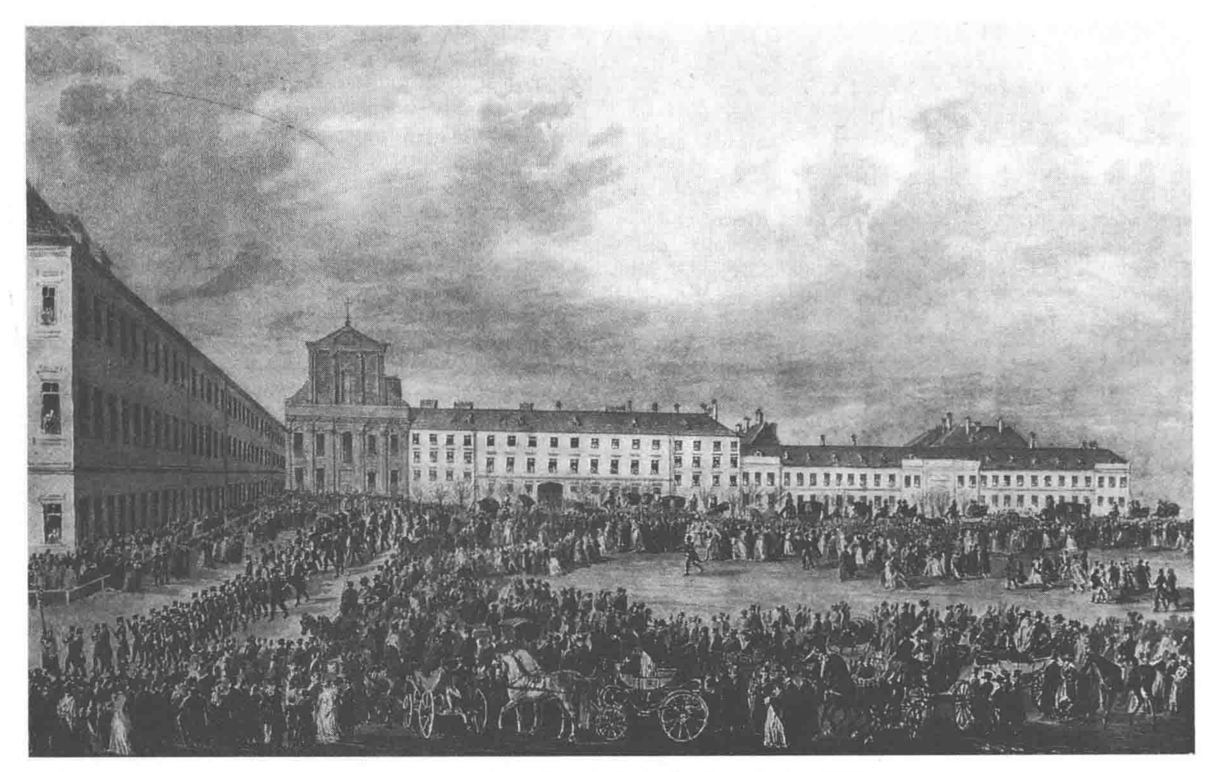
In 1825 Beethoven himself acquired a friend nearer to Karl's age than to his own. This was Karl Holz, the second violin in the Schuppanzigh Quartet, who was then 27. Holz came to occupy something of the same place in his household that had previously been held by Schindler; Schindler was more or less completely displaced by Holz during 1825 and most of 1826, and never forgave him. The conversation-book entries suggest that Beethoven began to use Holz to spy on Karl.

The letters of Beethoven to Karl in the years 1825 and 1826 are full of reproaches and recriminations, and demands for his affection and attention. There are also violently emotional attempts at reconciliation. The conversation books tell the same story: Beethoven was ceaselessly suspicious of the friends Karl had, the use he made of his spare time, the way he spent his money, and made him accountable for all three. By the summer of 1826, at least, Karl seems to have grown more contemptuous of his uncle, and started seeing his mother clandestinely, as well as one of his 'forbidden' friends, Niemetz. It may be that this produced conflicts in him that he could not handle; there are suggestions too that he had also got into debt. On 5 August, at all events, he pawned his watch, bought two new pistols and drove to Baden. Next morning he went to the Helenenthal, one of his uncle's favourite spots, and discharged both weapons at his temple. Neither bullet penetrated the skull, and when the injured young man was found he was carried back to Vienna – to his mother's house.

Karl's attempted suicide proved shattering to Beethoven; Schindler describes him soon after as looking like a man of 70. He was urged by his friends to give up the guardianship and to reach a decision about Karl's future, for the penal aspects of the case were a constant threat. Two years earlier Karl had expressed a wish to enter the army, and now, through the help of Stephan von Breuning, it was arranged for him to be taken as a cadet into the regiment of a certain Baron von Stutterheim. Beethoven's gratitude for this outcome is shown by the fact that he changed the dedication of his C♯ minor Quartet, which he had declared to be his greatest, so that it could be dedicated to this unmusical warrior.

Since 1819 Beethoven's brother Johann had owned a country property at Gneixendorf near Krems. Beethoven had often been asked to stay, but his dislike of his sister-in-law Therese had led him to turn the invitations down; shocked by her infidelities, in fact, he had from time to time urged Johann to divorce her and to make a will leaving his fortune to Karl. On this occasion, judging it prudent to be absent from Vienna, he accepted Johann's invitation; and three days after Karl had been discharged from hospital on 25 September the two brothers travelled to Gneixendorf with their nephew, arriving after an overnight stop at a village. Beethoven was ill when he left Vienna; he seems also to have been very depressed and withdrawn, and his eccentricities of behaviour were found comic by the country folk. Yet as usual he managed to work. Since July he had been occupied with a quartet in F (op.135); he completed it at Gneixendorf by the middle of October, copied out the parts himself, and sent it straight away to Schlesinger in Paris. Then he turned to a problem that had arisen with the B♭ Quartet (op.130). Because of the difficulty that had been found with the fugue that formed its last movement, he was asked by the publisher to supply a new, easier finale (which would be paid for). After reflection he undertook to do so, and delivered it to the publisher in the middle of November. It was the last complete piece that he composed. The 'Grosse Fuge', it was agreed, should be published as well, but as a separate opus (op.133).

Beethoven started back to Vienna with Karl on 1 December, arriving there the next day, and having got to his lodgings in the building known as the Schwarzspanierhaus he immediately called a doctor. He had already had swollen feet in the country, but the underlying pathology became manifest on 13 December when he developed



jaundice and ascites (dropsy). His doctors appear to have perceived correctly that his liver was affected (the autopsy indicates cirrhosis of the liver caused either by hepatitis or alcohol and related multiple organ failure), but there was little they could do beyond relieving his swollen abdomen by tapping off the fluid. This was done on 20 December, and again on 8 January, 2 February and 27 February 1827. Meanwhile news of the seriousness of his condition, and exaggerated reports about his financial needs, had spread far and wide. The firm of Schott sent him a dozen bottles of Rhine wine; the Philharmonic Society of London resolved to provide £100 for his relief. There were occasional letters from Karl, now with his regiment, and some entertainment for the sick man was provided by Breuning's 13-year-old son Gerhard, who called daily. There was also a stream of other visitors.

When it was clear that the end was near Breuning drafted a simple will, which bequeathed Beethoven's whole estate to Karl; on 23 March Beethoven copied and signed it ('luwig van Beethoven') with great difficulty. He died at about 5.45 p.m. on 26 March. The funeral on 29 March was a public event for the Viennese; the crowd was estimated at 10,000 (fig.10). The funeral oration, written by Franz Grillparzer, was delivered at the graveside in the cemetery at Währing by the actor Heinrich Anschütz. In 1888 Beethoven's remains were removed, together with Schubert's, to the Zentralfriedhof (Central Cemetery) in Vienna, where they now rest side by side.

11. THE 'THREE PERIODS'. The division of Beethoven's life and works into three periods was proposed as early as 1828 by Schlosser, taken up by Fétis in 1837, and then elaborated and popularized by Lenz in his influential *Beethoven et ses trois styles* of 1852. Though each of these critics grouped Beethoven's works differently, the three-period schema took hold and settled into something like a concensus: a first formative period ending around 1802, a second period lasting until around 1812 and a third period from 1813 to 1827. This schema has been attacked, not without reason, as simplistic and suspiciously consonant with evolutionary preconceptions (some of which are discussed below in §19). Yet it refuses to die, because in spite of all it obviously does accommodate the bluntest style distinctions to be observed in Beethoven's output, and also because the breaks between the periods correspond with the major turning-points in Beethoven's biography. There can be no doubt that with Beethoven – not to speak of other composers – a very close relationship existed between his creative energies and his emotional life.

The three-period framework should not be scrapped, then, but it is certainly in need of some refining. The following takes account of a number of suggestions made in the more recent literature. First, a fourth period should be added, or rather, divided off from the traditional first period: the music composed at Bonn, about which the 19th century knew little and probably cared less. Second, examination shows that each of the four periods breaks naturally into two sub-periods, and so they are best conceived of in this way. Third, allowance must be made not only for the general development of a composer's style, but also for the inner necessities of certain genres and the effects of his experience with them. For example, works in genres which he was attacking for the first time may have less 'advanced' stylistic features than works of the same date in familiar, much used genres.

It is also necessary to understand that in each of the four periods the nature of the two sub-periods and their relation to each other differ considerably. In the Bonn

*10. Beethoven's funeral procession: lithograph by B. Kühlen and M. Gladbach after Franz Stöber, 1827*

period the first sub-period (1782–5) contains juvenilia of small importance. Then there seems to be a pause; it is known that the years 1786–9 were very eventful ones for Beethoven but little is known of any music he composed in this period. From 1790–92 a group of much more mature works survives – a rather impressive corpus, indeed, which could reasonably support the young composer's ambitious plan of study in Vienna.

In the early Vienna period, Beethoven first had to gain control over the Viennese style and assert his individuality within it (1793–9). Then from 1800 to 1802 he produced at high speed a series of increasingly experimental pieces which must be seen in retrospect as a transition to the middle period. It is in this sub-period that the relative effects of genre and familiarity are especially clear. In 1798 and 1799 the piano sonatas are fluid and visionary but the earliest string quartets are relatively stiff. By 1800 the quartet writing moves more easily but the first of his symphonies is still decidedly conservative.

The middle period begins with a famous series of compositions in the heroic vein (1803–8): the 'Eroica' Symphony, *Leonore* (*Fidelio*) and others. The music of the sub-period 1809–12 follows the same general stylistic impetus, but becomes rather less radical and turbulent as it becomes more and more effortless in technique. Most of Beethoven's orchestral music dates from the middle period.

The late period is in every way the most complex. In 1813–18, years marked by emotional upheavals, Beethoven's output fell off sharply. Naturally enough, most attention has been directed to the few compositions in this sub-period of a more serious nature; increasingly intimate and even 'private', they convey unmistakable hints of a new style. But the years 1813–16 also saw many 'public' works, such as the 'Battle Symphony', *Der glorreiche Augenblick* and the *Chor auf die verbündeten Fürsten* for the Congress of Vienna. These, as Maynard Solomon has observed, 'regressed to a pastiche of the heroic style' and show just as unmistakably that the style change was now being worked out slowly and with great difficulty – not at all like the earlier transition in 1800–02. The Hammerklavier Sonata of 1818 represented a kind of breakthrough, but only after the matter of his nephew's guardianship was settled by the courts did Beethoven's compositional energies flow easily again, in the unbroken series of late-period masterpieces written from 1820 to 1826.

12. Music of the Bonn period. Ten compositions by Beethoven are known from the years 1782–5, when efforts were being made to promote him as a prodigy. Publication was gained for most of these works. Another 30 or so from the years 1787–92 are extant; of these, few appear to pre-date 1790 and only one was published at the time. As a good many of the others are known only from later sources, scholars have always suspected that they may be known in considerably revised versions. It was a pet theory of Thayer, the great 19th-century Beethoven biographer, that the young composer brought a thick portfolio of music from Bonn to Vienna and drew on it liberally for compositions of the next decade and even later. Rather more than most composers, as Thayer had observed, Beethoven was inclined to publish his juvenilia in later life and also to incorporate parts of them into mature pieces. And this in turn suggests a special motive for studying the unassuming music of Beethoven's Bonn years.

The most substantial of the earliest compositions are sets of three piano sonatas and three piano quartets. The main musical influences on the boy have been seen as, first, Neefe and Sterkel, and then Mozart; each of the piano quartets is modelled on a specific work by Mozart, from the set of violin sonatas published in 1781 (K379/373*a*, 380/374*f*, 296). Beethoven looked to Mozart again and again during his first decade in Vienna (see opp.3, 16, 18 no.5).

During the second Bonn sub-period Beethoven produced about a dozen lieder of considerable interest. He published some of them later in op.52 (1805), but only the simpler ones; the more elaborate and intense Bonn songs are not well known because they were discovered relatively late and buried in the 1888 supplement to the Gesamtausgabe. In 1790, the important commission to prepare official cantatas on the death of Emperor Joseph II and the accession of Leopold II spurred Beethoven on to the most ambitious of his youthful projects. The funeral cantata gave him the opportunity for some admirably expressive writing in the pathetic C minor chorus which frames the work and in the serene soprano aria with chorus. He was to use this again with superb effect at the dénouement of *Leonore*, 15 years later. In addition to the five large arias within these cantatas, he also composed three accomplished concert arias: *Prüfung des Küssens*, *Mit Mädeln sich vertragen* (his first Goethe setting) and *Primo amore*.

A genre in which any budding virtuoso had to excel was the variation set. In 1790–92 Beethoven wrote out two brilliant sets for piano, on Righini's 'Venni amore' and Dittersdorf's 'Es war einmal ein alter Mann'; one set for piano duet on a theme by Count Waldstein; and one for violin and piano on Mozart's 'Se vuol ballare' (completed in Vienna). While many of the variations are of the insipid decorative variety, others deal with the theme in a more interesting, substantive fashion. It is in these 'analytical' variations, perhaps, more than in the other Bonn music, that the Beethoven to come can be glimpsed.

Less impressive, in these years, is the instrumental music in the sonata style. There is an incomplete draft for a passionate symphony movement in C minor; fragments of a big violin concerto and of some sort of concertante for piano, flute and bassoon; a complete trio for the same three instruments; a piano trio (WoO38) and what looks like part of a movement from another, and a few rather colourless sonata movements for piano. There are also many sketches. (Is it accidental that so much of this music has been transmitted in an incomplete form? An oboe concerto and the original version of the B♭ Piano Concerto, both dating from this period, have vanished with barely a trace.) Where Beethoven departed from formula in these works he seems to have straggled helplessly, as in the violin concerto fragment. Although there are some bold strokes, they are seldom integrated convincingly into the total musical discourse.

Greater sophistication is shown by the Wind Octet op.103, but here there is reason to believe that Beethoven rewrote what was originally a Bonn score during his first years in Vienna, with an eye to publication. Leaving this work out of consideration, one is bound to conclude that Beethoven at Bonn was a less interesting composer of

works in the sonata style than of music in other genres – variations, lieder and large vocal-orchestral pieces. In view of his later output, this conclusion may seem surprising. Yet the sonata style as it is generally known was very much a Viennese speciality. The Bonn works in the sonata style make clear how important and right it was for Beethoven to have gone back to Vienna in late 1792, and how large a part Vienna was to play in the formation and nurture of his musical personality.

13. MUSIC OF THE EARLY VIENNA PERIOD. During his first year or so in Vienna Beethoven appears to have composed considerably less than in the years just preceding and following. There are signs that he spent some time revising or recasting an amount of his Bonn music to reflect Viennese standards and taste. The Wind Octet has already been mentioned; sketches show that he also started reworking his violin and oboe concertos. Fragments of the juvenile piano quartets were incorporated into some of the first sonatas composed in Vienna, op.2 nos.1 and 3.

By the time opp.1 and 2 were published (July 1795, March 1796) Beethoven certainly had the musical wherewithal to make Vienna sit up and listen. Probably the best-known movement from this impressive group of six pieces is the opening Allegro of the Piano Sonata in F minor op.2 no.1, a remarkable precursor of Beethovenian concentration and intensity (and the more remarkable in that the sketches go back to Bonn). In 1795, however, this movement was an exception. Most of the early music is scaled very broadly, weighty and discursive, even overblown. Thus for many years Beethoven most often wrote sonatas in four movements, rather than three, as was common with Haydn and Mozart, and it seems indicative that his op.3 was a string trio in six movements, modelled on the large Divertimento K563 by Mozart. There is inconclusive evidence that op.3 goes back to a Bonn original, but in its final form it was certainly written in Vienna, like the Wind Octet.

Opp.1 and 2 provide examples of the rather ponderous slow movements characteristic of the first Vienna period, and also of that famous innovation the scherzo. Beethoven's early scherzos move no faster than most Haydn minuets and sound no more humorous, but they last considerably longer and tend to be constructed out of more symmetrical periods. As for movements in sonata form, most of them contain a great deal of musical material – and a great many modulations in the second group. Though Beethoven's still emerging powers of organization were sometimes overtaxed, sometimes they were not and there are passages of authentic Beethovenian power, especially in the matter of long-range control over bold harmonic action. Cases in point are the passing modulations in the first movement of the A major Sonata op.2 no.2, and the expanded recapitulation in the Adagio of the G major Trio op.1 no.2.

In these early years Beethoven made his name as a pianist and improviser and as a composer primarily for piano. Some ideas of his improvising style can be formed from his published piano variations, from copious notations on his early sketchleaves, and from certain incomplete piano scores which are perhaps better viewed as *aides-mémoires* than as unachieved compositions. The well-known *Rondo a capriccio* was completed probably by Diabelli after Beethoven's death and published as op.129 under the irresponsible title 'Rage over a Lost Penny', and an interesting cyclic 'Fantasia' in three movements has come to light in the so-called 'Kafka sketchbook' (British Library). In later years he improvised less, of course, but evidence of his improvising style is still to be found in the Fantasias opp.77 and 80, the cadenzas to piano concertos, and shorter cadenza-like passages in a very large number of other pieces.

Beethoven was naturally open to the influence of other pianist-composers at a time when the technique of the instrument was expanding significantly. Too much can be made, however, of similar themes and pianistic textures in Beethoven and Clementi, Dussek and other such composers. From the start, and even at his most discursive, Beethoven had a commitment to the total structure that makes Clementi seem very lax. His well-known insistence on making transitional and cadential matter sound individual is already in evidence; he had little use for the debased coin of the *style galant* which was still in circulation in the 1790s. And in his 'serious' compositions piano virtuosity is always used in the service of a musical idea, never for its own sake. These compositions may sound pompous or gauche, sometimes, but they never sound meretricious and they never lack a certain intellectual and imaginative quality.

As has been mentioned above, when Haydn heard the op.1 trios he praised them but thought the public would not understand or accept the third, in C minor. One suspects that Haydn himself may have been put off by the extremes of tempo, dynamics, texture and local chromatic action in this piece, and still more by the resulting emotional aura. He would not have been the last listener to find something callow and stagey, which is to say essentially impersonal, in these insistent gestures of pathos and high drama. Beethoven of course paid no attention to his advice and published increasingly sophisticated C minor items in nearly every one of his composite sets of works over the next eight years (opp.9, 10, 18, 30). In these years C minor was practically the only minor key he used for full-length pieces (though D minor is used for the impressive slow movements of op.10 no.3 and op.18 no.1, as well as for the 'Tempest' Sonata op.31 no.2). The most successful early embodiments of Beethoven's 'C minor mood' are no doubt the *Sonate pathétique* op.13 (1797–8) and the Third Piano Concerto (?1800–03). Still to come were the 32 Variations on an Original Theme, for piano, the *Coriolan* Overture, the Fifth Symphony and the last piano sonata.

The first movements, in sonata form, of the C minor Trio and the F minor Sonata have quiet main themes which are designed to return *fortissimo* at the point of recapitulation. This is a characteristic Beethoven fingerprint. In the early works it often makes for a rather blustery effect. Yet it adumbrates a new view of the form whereby the recapitulation is conceived less as a symmetrical return or a climax than as a transformation or triumph. The sonata style is always inherently 'dramatic', in the special sense expounded and illuminated by Tovey. Tovey also pointed out that at their most characteristic Haydn and Mozart use the style to project high comedy, the musical equivalent of a comedy of manners. Beethoven was already groping for ways of using it for tragedy, melodrama or his own special brand of inspirational theatre of ideas.

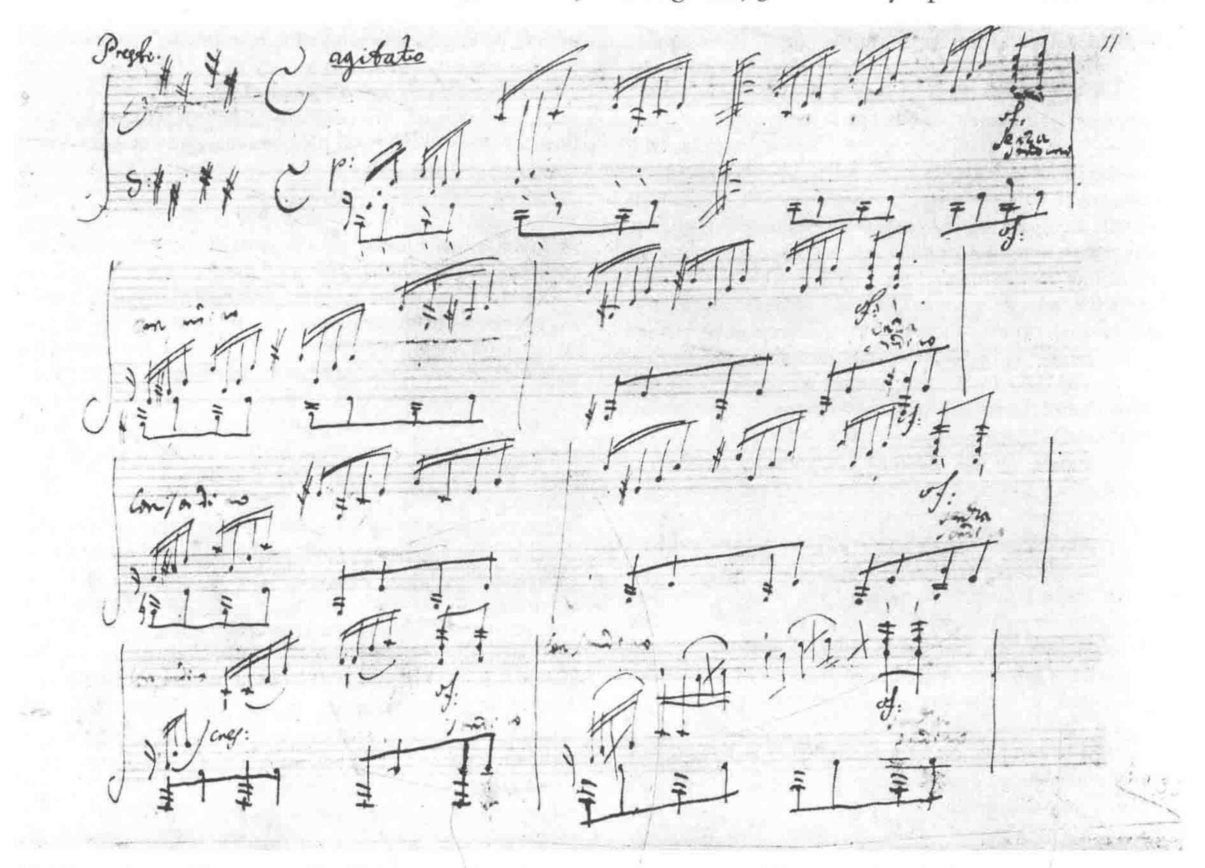
This radical approach to sonata form (which encompasses all its aspects, of course, not only the enhanced

recapitulation) becomes clearer in the piano sonatas of 1796–9: op.7, op.10 nos.1–3 and op.13. In op.13 and in the fine Sonata in D op.10 no.3, although the main theme does not return loudly, there is still a compelling impression that something urgent is at stake in the musical dialectic. Broadly speaking, it was this sense of urgency in dealing with what became known as the Classical style that Viennese aristocratic circles found most novel and impressive in the 'grand Mogul', as Haydn called him, from the provinces.

A deliberate campaign to annex all current musical genres can be read into Beethoven's activities in these years. He wrote an effective concert aria – a scena and rondò – to a text adapted from Metastasio, *Ah! perfido*, some deft little songs to lyrics by Goethe, and an interesting extended lied, the once-popular *Adelaide*. He produced two rather Mozartian piano concertos, one of them (the B♭, op.19) evidently revised several times from a Bonn original, and a good deal of miscellaneous wind music, including a Quintet for Piano and Wind op.16 which incautiously invites comparison with a similar work by Mozart (K452). In 1795–6 he sketched long and hard at a symphony in C. As it was turning out to be too big, he wisely shelved it, though he returned to some of its musical ideas when he wrote the First Symphony (also in C) in 1799–1800.

The three Violin Sonatas op.12 are not as impressive as the contemporary piano sonatas; the two Cello Sonatas op.5 are also lesser works but interesting in their bold virtuoso stance, looking ahead to the Kreutzer Sonata of 1802–3. After completing the three String Trios op.9 Beethoven launched into his most ambitious project yet, the set of six String Quartets op.18 (1798–1800). All the while he was contributing copiously to the ephemera of Viennese musical life: easy piano variations, ballroom dances by the dozen, patriotic marching songs, arias to be inserted into a Singspiel, pieces for mechanical clock-organ and a Sonatina for mandolin and piano.

There is no single work that demarcates the second sub-period within the early Vienna years, the time when Beethoven began to show signs of dissatisfaction with some of the more formal aspects of the Classical style and reached towards something new. In a way the signs were present from the beginning. Novelties of conception can be detected all along. They are multiplied in the *Sonate pathétique* of 1798 – the integration of the introduction into the first movement proper, the perfectly managed bold modulations in the second group, the prophetic breakdown on the dominant in the middle of the rondo; not to speak of the overall coherence of mood which has made the *Pathétique* the most famous piece in Beethoven's early output. Another famous early piece, the first movement of the Quartet in F op.18 no.1, is his first exhaustive study in motivic saturation. The turn-motif of bars 1–2 forces its way into every available nook and cranny of the second group, the transitions, the development and coda. (When Beethoven revised op.18 no.1, after having given a fair copy of it to Amenda, he reduced the appearances of the turn-motif by nearly a quarter.)



The last two quartets of op.18, composed around 1800, show a rather new treatment of the traditional four-movement form (one that had recently been essayed by Haydn in several of his op.76 quartets). The first movements are not extensive and decisive but instead swift, bland and symmetrical, so that the later movements all seem (and were surely meant to seem) weightier or more arresting. The most visionary of these later movements is the composite finale of the Quartet in B♭ op.18 no.6, where a slow, strange-sounding chromatic labyrinth entitled 'La malinconia' alternates with a swift, limpid little dance evocative of the Viennese ballrooms.

More far-reaching experiments with the weight, character and balance of the various movements in a work were made within the impressive series of about a dozen piano sonatas composed in 1800–02. These included op.26 in A♭ with its 'Marcia funebre sulla morte d'un Eroe' (cf the 'Eroica' Symphony), op.27 no.1 in E♭, op.27 no.2 in C♯ minor (each marked 'quasi una fantasia') and op.31 no.3 in E♭. Some of the movements are run together, and there is a significant shift in weight away from the first movement and towards the last. Experiments of this kind with multi-movement works slowed down during the next period, when under the sway of his developing 'symphonic' ideal Beethoven found fresh resources in the traditional four-movement dynamic. But they played an important part in the growing flexibility of his art, and after 1812 they were resumed with much greater force and consciousness.

Greater flexibility already allowed for the incorporation of movements of widely different characters and forms. It is perhaps at this time that one first begins to be aware of the striking individuality of all Beethoven's pieces, a characteristic that has often been noted. Prime examples are the so-called 'Pastoral' Sonata in D op.28 (also the *locus classicus* for successive thematic fragmentation in a development section), the Sonata in E♭ op.31 no.3, and those great and deserving favourites of the Romantic era, the *Pathétique*, the 'Moonlight' and the D minor op.31 no.2.

The opening reverie of the 'Moonlight' is such a startling conception, even today, that Beethoven's very careful plotting of the sequence of the movements in this sonata seems to pale by comparison. Unprecedented for a sonata opening is the half-improvisatory texture, the unity of mood, and especially the mood itself – that romantic *mestizia* which will have overwhelmed all but the stoniest of listeners by the end of the melody's first phrase. An equally bold and emotional, but also more intellectual, experiment marks the opening of op.31 no.2. Here the first theme in a sonata form movement consists of antecedent and consequent phrases of radically different characters: a slow improvisatory arpeggio and a fast, highly motivic *agitato*. Both of these ideas can be heard echoing in the later movements of the sonata.

The inner pressure of his developing musical thought drove Beethoven on to more and more novelty, no doubt; and mixed in with this was a measure of artistic vanity. About 1801–2 he appeared much concerned with being original, even advising a publisher to point out the innovations in his Piano Variations on Original Themes opp.34 and 35 by means of a special advertisement. And that would certainly have been justified. Op.34 has its six variations in six different keys. Op.35 abstracts the ludicrous bare bass line of the contredanse theme from *Prometheus* and builds up from it fantastically in 15 variations and a full-length fugue. The finale of the 'Eroica' is a second building exercise on the same bass, this time involving variations in different keys and two fugato sections.

*11. Autograph MS of the opening of the third movement from Beethoven's Piano Sonata no.14 'quasi una fantasia' ('Moonlight'), op.27 no.2, composed 1801 (Beethoven-Haus, Bonn)*

According to Czerny, his young pupil in those years, Beethoven spoke of a 'new path' he was following, a path which later Czerny associated with the important op.31 sonatas of 1802. Mention has already been made of op.31 no.2. Another novelty of conception was the key plan of the first movement of the Sonata in G op.31 no.1, which has the second group not in the dominant but in the mediant key (major and minor; cf the String Quintet op.29 of 1801). This looks ahead to Beethoven's thorough exploration and extension of the tonal range of Classical music, a process that was to run parallel with his expansion of all aspects of Classical form in the next years. In the late period it is the exception rather than the rule to have the second group in the dominant.

Other important, but more conservative, works of the years 1799–1801 are the music for the ballet *Die Geschöpfe des Prometheus*, Beethoven's introduction to the Viennese stage; the amiable but rather mindless Septet, whose great popularity soon came to irritate the composer; and the slender First Symphony, which can seem almost to wilt when commentators examine it for clues to future symphonic greatness. The Second Symphony of 1802 must also be counted among the more conservative works – this in spite of its great advance in assurance over the First and its inspired play with the notes F♯ and G as a means of unifying the whole. Although one would not easily mistake this for a work by Haydn, the Second Symphony stands as a final realization of the concept of a large concert piece which he had developed. This impression is confirmed by Beethoven's quotation of a sensational modulatory passage from *The Creation*, as Tovey observed.

One feels that in the Second Symphony Beethoven for the first time really engaged with the symphony orchestra and began to understand how it could serve his own emerging purpose. He had taken its true measure. In the middle period, from 1803 to 1812, he wrote most of his famous works for orchestra, evolving through them a new 'symphonic ideal' that also inspired most of his non-orchestral music.

14. The symphonic ideal. After the period of inner turmoil expressed (and perhaps resolved) by the Heiligenstadt Testament of October 1802, Beethoven began to engage seriously with large public works involving explicitly extra-musical ideas. It was the first time he had done so since going to Vienna. An outer impetus was his association first with the Burgtheater and then with the Theater an der Wien, but the decision to embark on a 'Bonaparte symphony' at just this time came from inner pressures. The oratorio *Christus am Oelberge*, musically not a great success, was written hastily in early 1803. The opera *Leonore* was written very slowly in 1804–5. Between them came the 'Eroica' Symphony, no.3: an authentic 'watershed work', one that marks a turning-point in the history of modern music.

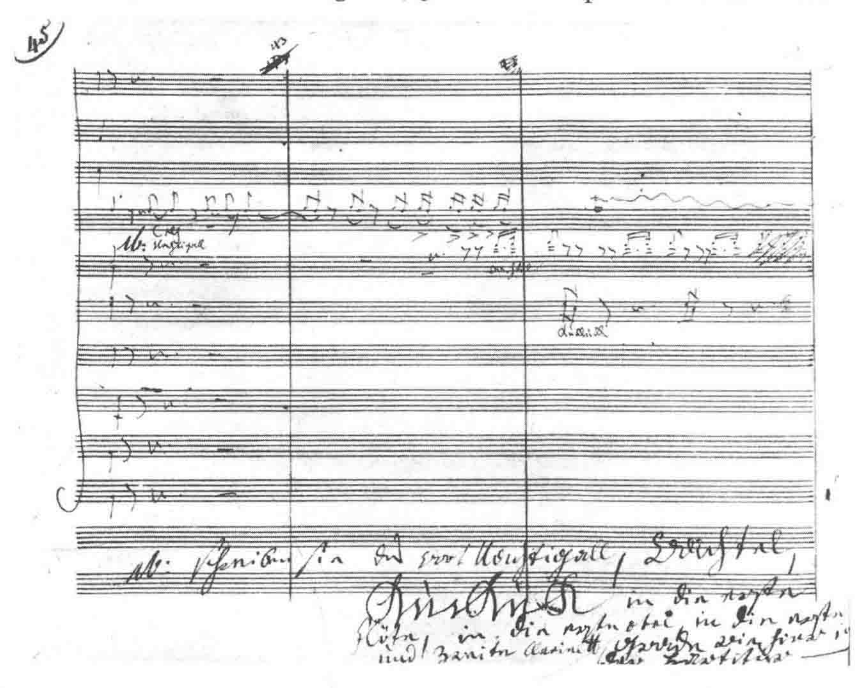
Thanks to Nottebohm's monograph on the 'Eroica' sketches, more is generally known about the composition of this work than any other by Beethoven. The sketches show a minimum of false starts and detours. The most

radical ideas were present from the start, if in cruder form, and work seems to have proceeded with great assurance. This is striking indeed, for however carefully one studies Beethoven's evolving style up to 1803, nothing prepares one for the scope, the almost bewildering originality and almost continuous technical certainty manifested in this symphony. In sheer length, Beethoven may well have felt that he had overextended himself, for it was many years before he wrote another instrumental work of like dimensions.

In the first movement, one must marvel at the expansion in dimensions on every level; at the projection of certain melodic details of the main theme into the total form – the bass C♯ (D♭) instigating moves to the keys of the supertonic and the flat seventh degree in the recapitulation, the violins' G–A♭ returning vertically as the famous horn-call dissonance; at the masterly coagulation of diverse material into the second group; and at the whole concept of the panoramic development section, with its passage of deepening breakdown redeemed by the introduction of a new theme (if it is indeed really new). The moving thematic 'liquidation' at the end of the Marcia funebre, the four *alla breve* bars in the da capo of the scherzo, the novel structure of the finale, the powerful fugatos throughout – none of these could have been predicted. Also astonishing is the quality of 'potential' that informs the main themes of the three fast movements. Two of them require (and in due course receive) horizontal or vertical completion, and the other is presented in a state of almost palpable evolution.

These themes were made to order for the new 'symphonic ideal' which Beethoven perfected at a stroke with his Third Symphony and further celebrated with his Fifth, Sixth, Seventh and Ninth. The forcefulness, expanded range and evident radical intent of these works sets them apart from symphonies in the 18th-century tradition, such as Beethoven's own First and Second. But more than this, they all contrive to create the impression of a psychological journey or growth process. In the course of this, something seems to arrive or triumph or transcend – even if, as in the Pastoral, what is mainly transcended is the weather. This illusion is helped by certain other characteristic features: 'evolving' themes, transitions between widely separated passages, actual thematic recurrences from one movement to another, and last but not least, the involvement of extra-musical ideas by means of a literary text, a programme, or (as in the 'Eroica') just a few tantalizing titles.

In technical terms, this development may be viewed as the projection of the underlying principles of the sonata style on the scale of the total four-movement work, rather than that of the single movement in sonata form. This view takes account of the impression Beethoven now so often gives of grappling with musical fundamentals. He had the power – and it must be called an intellectual power – of penetration into the gestural level below sonata form. He could manipulate the basic elements of the sonata style in a more comprehensive, less formalistic way than ever before. One senses the same grasp of essences when Beethoven now isolates a melodic, harmonic or rhythmic detail of a theme and then appears to 'compose it out' – to spell out its implications later in the piece. Doubtless this also happens in earlier music, by Beethoven or by other composers, but in the middle period he began to draw attention to the process in a much more pointed fashion.



Beethoven's fascination for musicians of a certain turn of mind rests on his continuing investigation of basic musical relationships in this sense. The investigations grew more momentous in the late period, and also more subtle and pervasive, as will be seen if one compares the 'composing out' of C♯ and A♭ in the 'Eroica' first movement, mentioned above, with the treatment of the Neapolitan D in the Quartet in C♯ minor op.131.

For musicians and listeners of another turn of mind, Beethoven's attraction rests on another aspect of the 'symphonic ideal', one that is less technical but probably no less essential. The combination of his musical dynamic, now extremely powerful, and extra-musical suggestions invests his pieces with an unmistakable ethical aura. Even Tovey, the most zealous adherent of the 'pure music' position, was convinced that Beethoven's music was 'edifying'. J.W.N. Sullivan taught the readers of his influential little book to share in Beethoven's 'spiritual development'. Concert-goers of the 19th and 20th centuries gladly attached programmatic suggestions to those symphonies that lack them: to the Fifth, Beethoven's alleged remark about fate knocking at the door, and to the Seventh, Wagner's less happy evocation of an apotheosis of dance. In 1937 the eccentric musicologist Arnold Schering proposed detailed Shakespearean and other literary programmes for a whole clutch of Beethoven compositions.

An important influence on the 'Eroica' Symphony and other works of this period is that of French post-revolutionary music. In 1802 and 1803 operas by Cherubini and Méhul enjoyed enormous success in Vienna. Their impact on Beethoven has been traced in such diverse areas as his driving orchestral tutti style, his partiality for marches and march-like material, the free form of his overtures (*Leonore* no.2, 1805, stands in the same relation to *Prometheus*, 1801, as the 'Eroica' Symphony does to the First), and various points of harmony and orchestration. Beethoven's symphonic ideal itself is foreshadowed in the French repertory of the 1790s, in the grand revolutionary symphonies, sometimes with chorus, by Gossec, Méhul and their contemporaries. But with Beethoven there is not only an incomparably more arresting musical technique but also a decisive change in emphasis. He personalized the political symphony. The 'Eroica' was conceived as a tribute not to the idea of revolution but to the revolutionary hero, Napoleon, and really to Beethoven himself. Later concert-goers have been able to respond to Beethoven's heroic quests and spiritual journeys in a way they could never respond to celebrations of long-past political ideologies.

The conception of this symphonic ideal, and the development of technical means to implement it, is probably Beethoven's greatest single achievement. It is *par excellence* a Romantic phenomenon, however 'Classical' one may wish to regard his purely musical procedures. It is also a feature that has offended certain critics, especially in the early part of the 20th century, and set them against Beethoven. The composer himself was capable of producing a cynical and enormously popular travesty of his own symphonic ideal, in the 'Battle Symphony' of 1813.

15. Middle-period works. Soon after the 'Eroica' Symphony the Fifth Symphony was conceived, but

*12. Autograph MS of the end of the second movement of Beethoven's Symphony no.6 ('Pastoral'), composed 1807–8 (Beethoven-Haus, Bonn); the passages imitating birds are indicated by their names, nightingale (flute), quail (oboe) and cuckoo (clarinet)*

somehow work got deflected into certain other C major and minor projects, and things did not come together until late 1807 and 1808. More than any other piece of music, the Fifth Symphony has come to typify the thematic unification, or 'organicism', as the 19th century viewed it, that Beethoven developed to such a high degree in these years. The famous opening motif is to be heard in almost every bar of the first movement – and, allowing for modifications, in the other movements. The opening theme expands into the horn-call before the second subject, and the second subject employs the same note pattern as the horn-call. Then, in the development section, the horn-call is fragmented successively down to a single minim, alternating between strings and woodwind in a passage of extraordinary tension achieved primarily by harmonic means. As in many other works of the time, the last two movements are run together without a break; this device, obviously, contributes to the continuity and to a feeling of necessary sequence. But more than this: here the long transition passage between the movements, and the recurrence of a theme from the third movement in the retransition before the recapitulation of the fourth, give the sense that one movement is triumphantly resolved by the other – a sense confirmed by the enormously emphatic last-movement coda.

Such codas now become very common. They tend to assume the important function of finally resolving some melodic, harmonic or rhythmic instability in the first theme – an instability that has infused the movement with much of its energy up to the coda. This new weighting of sonata form towards the coda is associated, and sometimes coordinated, with another tendency, which is that of withholding full rhythmic or even harmonic resolution at the moment of recapitulation. Thus in the first movement of the Fourth Symphony, as Robert Simpson has observed, solid dominant–tonic resolution waits in the recapitulation until the appearance of the second theme (compare the first movements of two other works in the same key, B♭, the Hammerklavier Sonata and the Quartet op.130). The Fourth Symphony, said Tovey, 'is perhaps the work in which Beethoven first fully reveals his mastery of movement'.

Hardly less original than the Fifth Symphony is the Sixth ('Pastoral', 1808), though here for once the first movement is made as quiet as possible. This is done with the help of a development section devoid of tensions, a recapitulation approached hymn-like from the subdominant, and countless pedal points throughout. In compensation, a passage of fury comes elsewhere in the piece, as an extra movement (trombones and piccolo enter for the first time in the symphony to enforce this 'Storm'). Each of the five movements bears a programmatic inscription, and one of these is frankly pictorial in nature – the 'Scene by the brook' inscribed over the slow movement, which includes a series of stylized birdcalls at the end, in a sort of woodwind cadenza (Beethoven was careful to identify the quail, nightingale and cuckoo – see fig.12). On the other hand, he stressed the word 'Gefühle' ('feeling') in two other inscriptions and so could quite properly observe that his reference was less to musical 'Malerei' ('painting') than to emotions aroused by the countryside. A sequence of such feelings guides the listener through the familiar therapeutic progress of a Beethoven symphony, in a somewhat gentler version.

The symphonic ideal inspires most of the non-symphonic pieces written between 1803 and 1808. That is true to an extent even of the Kreutzer Sonata, composed in early 1803, just before the 'Eroica'. The Waldstein Sonata, composed just after the 'Eroica', adopts an idea for the groundplan of its opening paragraph from an earlier piano sonata, op.31 no.1 in G. But there is all the difference in ambition, scale and mood; what served in the earlier piece as a witty constructive device becomes in the later one an earth-shaking, or at least a piano-shaking, declaration. The slow movement was originally going to be the somewhat bovine piece now known as the 'Andante favori' (compare the Kreutzer and op.31 no.1). When Beethoven replaced this by the *adagio* 'Introduzione'

which makes momentous preparations for the finale, he gave the sonata the characteristic 'symphonic' sweep even while shortening it, and also motivated (or validated) the grandiose coda of the finale. Planned on broader lines still, the 'Appassionata' Sonata (1804–5) is an even more imaginative work, a work of the greatest extremes – as witness the *fortissimo* chord handfuls that shatter the brooding quiet of the very first page.

This and other equally violent effects were hardly thinkable on the Walter fortepiano owned by Beethoven before 1803, when he got his Erard (now in the Vienna Kunsthistorisches Museum). Yet even when dealing with instruments that were not in a state of radical development, he acted as if they were. The string quartets of op.59 so strained the medium, as it was understood in 1806, that they met with resistance from players and audiences alike. The first movement of the F major Quartet op.59 no.1, though in mood very different from the 'Eroica' Symphony, resembles it in its unexampled scope and also, rather surprisingly, in a number of technical features. The second movement is Beethoven's largest, most fantastic scherzando – not a true scherzo, but a free essay in the tradition of the sonatas op.31 no.3 and op.54. All three quartet slow movements, surely, cry out for evocative titles, and the last two finales are all but orchestral in conception.

Each quartet was supposed to include a Russian melody, for the benefit of the dedicatee Count Rasumovsky, the Russian ambassador to Vienna. Here for the first time may be seen Beethoven's interest in folksong, which was to grow in later years. Folksongs did not much help the first two quartets, but Rasumovsky's notion came to superb fruition in the third, where Beethoven gave up the idea of incorporating pre-existing tunes and instead wrote the haunting A minor Andante in what he must have conceived to be a Russian idiom.

In some ways the 1805 *Leonore* stands apart from other major works of these years. In local musical terms, the innovations and expanded horizons of the instrumental works are not deeply reflected in the separate operatic numbers, and probably could not have been. Apart from the overtures, there is a certain stiffness about many numbers which is understandable in a first opera. This quality is also discernible in Beethoven's first oratorio and mass, *Christus am Oelberge* (1803) and the Mass in C (1807).

In broader musical terms, however, the importance of *Leonore* can scarcely be exaggerated. Faced by the task of matching music to an explicit narrative, and doubtless instructed by the Mozart operas which we know he consulted at the time, Beethoven here established a very large-scale dramatic continuity largely by tonal means. The *Leonore* overtures are famous for forecasting the opera's turning-point by incorporating the trumpet signals for the arrival of the Minister who confounds the villain Pizarro. But the overtures also assert C major as the opera's tonic key and A♭ and E as subsidiary keys, and *Leonore* no.3 precedes its final triumphant tonic section with a recapitulation in G major; then the C minor/major of the first vocal number leads through many detours to moments central to the drama in E and A♭ and then to G major, C minor and C major in the last two numbers. Even more than the 'Eroica' Symphony, *Leonore* prefigures the more abstract (and of course more concise) tonal structures of the later instrumental works.

In terms of idea, furthermore, *Leonore* provides a shining prototype for the heroic progress implied in a less explicit way by the instrumental music. And what is remarkable is to see Beethoven gradually evolving a personal operatic style in the course of writing, and rewriting, *Leonore*. From the somewhat servile echoes of French and German light opera in the opening numbers, he moved on to find an increasingly individual and elevated voice – for example, in the Prisoners' Chorus, the scena for Florestan, the duet 'O namenlose Freude' (revised from the *Vestas Feuer* fragments of 1803) and the long recitative before it, which was the most regrettable of Beethoven's cuts for the 1814 version. To say that Beethoven approached his libretto with utter seriousness and idealism may seem like a truism; but of how many other first operas of the time can as much be said?

Around 1808 the enthusiasm and high daring of Beethoven's music begins to be tempered by ever-increasing technical virtuosity. Even when the pieces are still very powerful, as is often the case, they are smoother and a little safer than before. The stage work of this period is *Egmont* (1809–10), consisting not only of the well-known overture but also incidental music lasting 40 minutes, including a final 'Siegessymphonie' ('Symphony of Victory') in the face of disaster. Feelings that were turned inward in *Leonore* were turned outward in *Egmont*. Whereas the *Leonore* no.2 and no.3 overtures were involuted, explosive works dedicated to gigantic struggle, the *Egmont* overture is a tough, lucid one that comes by its Pyrrhic victories easily.

The change is clearest of all between the op.59 quartets and the 'Harp' Quartet of 1809 (a nickname deriving from its insistent functional pizzicatos). Nothing about this work is problematic. The climax of the first movement is a climax of sheer technical exhilaration, for in the coda Beethoven seems at last to have solved the problem of simulating orchestral idiom in a quartet. The second movement is serene and the third (in C minor) sounds like a speeded-up but smoothed-down version of the third movement of the Fifth Symphony. The finale is a set of simple variations on a suave 2/4 tune. This type of light finale recurs in the Violin Sonata op.96 (1812).

There are now no 'symphonic' sonatas, except perhaps the smaller-scaled 'Lebewohl' op.81*a* (1809–10). Beethoven's new concern in the first movements of sonatas and chamber music is lyricism, which inspires works of such different character as the Piano Sonata in F♯ op.78 (1809), the 'Archduke' Trio (1810–11) and the Violin Sonata op.96. Beethoven had never written such beautiful slow movements as he now wrote for the 'Harp' Quartet, the 'Archduke' Trio and the Fifth Piano Concerto (1809). The so-called 'Emperor' is by far the most 'symphonic' of his concertos and one of the strongest works he conceived. Yet in the very first bars, where the soloist and tutti join in a thunderous cadential celebration, the battle seems to be won even before the forces have been drawn up – as was certainly not the case in the introverted, searching Fourth Concerto first performed in 1807.

Writing his Seventh Symphony in 1811–12, Beethoven again reached for new horizons: the expanding introduction, the 6-4 chords spanning the Allegretto, the rolling ostinatos at the ends of the outer movements, the rhythmic preoccupation throughout. This work is perhaps less immediate in its emotional effect than the 'Eroica' or the Fifth, but its élan and its effortless control over musical

processes at every level can make those earlier works seem more than a little hectic. The finale, all sinew, represents a particular advance, not only in elegance but also in sheer power.

Beethoven immediately capped this work with the delightful Eighth Symphony (1812), a salute to the symphonic ideal of the previous age. It has a comical slow movement and a slowish minuet in place of the now customary scherzo. Flashes of middle-period power occur only in the outer movements. Beethoven could hardly have planned a more genial gesture of farewell for a time to the symphony and to the decade of work produced under its aegis.

Another of the greatest works written between 1808 and 1812 refuses to fit any norms one may try to adduce for this period or, indeed, for any other – the Quartet in F minor op.95. The piece is unmatched in Beethoven's output for compression, exaggerated articulation and a corresponding sense of extreme tension. The harmonic layout is radical. Like op.57 and op.59 no.2, the first movement treats Neapolitan relationships, both in the first group (F–G♭) and in the second (D♭–E𝄫 or D♮). D is the key of the second movement, one of Beethoven's most beautiful, as well as one of his most disturbed – D major shadowed by D minor, with a chromatic fugato plunging into enharmonic mysteries. The F minor scherzo has a trio ranging from G♭ to D and B minor.

This *quartetto serioso*, as Beethoven called it, looks back to the impressive minor-mode compositions of the period 1803–8 and looks forward to the style and mood of the late quartets. It was some time, however, before this promise of a new style could be realized.

16. Late-period style. For a considerable time after 1812, Beethoven's production of important works fell off strikingly. These were difficult years for him, encompassing deep emotional turmoil and endless lesser distractions. In addition, he was probably suffering from something like exhaustion after the truly immense labours of the previous period. To speak only of the decade from the 'Eroica' Symphony to the Eighth, he had composed some 30 major works which in most cases involved serious rethinking of musical essentials. He had composed nearly as many slighter works and he had seen about 80 items through the press. Long or short, great or slight, they all required negotiations with publishers, correction of copyists' scores, and proofreading – unfortunately an activity that Beethoven never fully mastered.

But more generally, these were difficult years for any serious composer of Beethoven's generation. One can perhaps appreciate the growing sense of uncertainty that he must have felt as to artistic ends and means. On some level he was responding to powerful musical currents, which were soon to come flooding to the surface; the last works of Weber and Schubert and the first works of Berlioz, Chopin and Bellini all appeared during the 1820s. Like other great composers whose lives bridged a time of deep stylistic change – such as Josquin, Monteverdi and Schoenberg – Beethoven was facing a major intellectual challenge, whether or not he formulated it in intellectual terms. He had already met one such challenge, or one part of the challenge, by his reinterpretation of the sonata principle in his 'symphonic' works of 1803–12. Now the very basis of the sonata style was thrown in doubt. Beethoven had no easy answer. There is something private and problematic about the corpus of late-period works, and it is hardly accidental that their deep influence on the course of music came only much later, past the time of Beethoven's own younger contemporaries who learnt so much from the middle period.

Beethoven's concern for lyricism deepened throughout the late period. He has sometimes been criticized as an inept melodist, and it will be granted that when he was 23 he could not, like Rossini at a like age, produce the deathless melodies of a *Barbiere*. Yet some of his early Bonn songs make impressive lyric statements, and in the mid-1800s he developed a very effective type of slow hymn-like melody. This is continued, intensified and much refined in the late period; the melodic outline of Leonore's 'Komm, Hoffnung' (1805) recurs in the Adagio of the Quartet op.127 (1824–5). A new feature is the intimacy and delicacy already apparent in the Violin Sonata in G op.96 (1812), the Piano Sonatas in E minor op.90 (1814) and A op.101 (1816) and the Cello Sonata in C op.102 no.1 (1815).

There is also a growing interest in folklike melody, hardly surprising in one who made arrangements of over 150 folksongs for Thomson in these years. The song cycle *An die ferne Geliebte* op.98 (1816) marks Beethoven's closest approach to Goethe's ideal of the *Volksweise* as a basis for song composition (closest except for the tiny *Ruf vom Berge* WoO147, 1816, which adapts an actual folksong melody). Simple little tunes evocative of folksong and folkdance are constantly turning up in the late quartets and other music.

In all this Beethoven appears to have been reaching for a more direct and intimate mode of communication. Two verbal adjuncts to such folklike essays can be regarded as symbolic: in the song cycle, the line 'ohne Kunstgepräng, erklungen' ('sounding without the adornments of Art'), set to music of rock-like simplicity, and in the Ninth Symphony, Schiller's famous apostrophe to universal brotherhood. In the best early Romantic spirit, Beethoven was seeking a new basic level of human contact through basic song, as though without sophistication or artifice. Another manifestation of this powerful – and sometimes disruptive – urge is the now rather frequent use of instrumental recitative and arioso, such as the 'beklemmt' ('constricted') passage in the Cavatina of the Quartet in B♭ op.130. Here instrumental music seems painfully to strive for articulate communication.

Several of the late works contain variation movements of a new kind. Earlier Beethoven had written many brilliant piano variations, from the precocious 'Venni amore' set of 1790–91 to the C minor Variations of 1806 – a series now to be capped by the encyclopedic Thirty-Three Variations on a Waltz by Diabelli. In his first Vienna period, however, important variation movements within larger works are not frequent. More of these occur in the middle period. Generally the variations are of the progressively decorative variety (opp.57, 61, 67, 74, 97), a type that also continues into the late years (opp.111, 125). But in the Sonata in E op.109 and the late quartets, as well as in the Diabelli set, Beethoven evolved a new type of variation in which the members take a much more individual and profoundly reinterpreted view of the original theme. The theme seems transformed or probed to its fundamentals, rather than merely varied. All this suggests a changing concept of musical unity, now seen as an evolution from within rather than as a conciliation

of contrasting forces: a Darwinian concept, perhaps, rather than a Hegelian one.

In the most general sense, variation may also be said to inspire the transcendent fugal finales of the Hammerklavier Sonata and the Quartet in B♭ (the 'Grosse Fuge'). The fugatos that occur in not a few of Beethoven's earlier pieces hardly prepare one for his preoccupation with contrapuntal forms in the late years; scarcely a significant work now lacks an impressive fugal section or even a full-scale fugue bristling with learned devices. Evidently he was looking for some other means of musical movement than that provided by the style he had inherited from Haydn and Mozart; fugue is a more dense, even style which places harmonic action in a very different light. In Beethoven's hands fugue became a means of flattening out the dramatic aspects of tonality. (It was not the only means that he devised, as witness the second and third movements of the Quartet in A minor.) Related to this general tendency is Beethoven's frequent avoidance in the late music of obvious dominant effects, his characteristic undercutting of tonic triads by 6-4 chords, and his somewhat wayward experiments with the church modes. As noted above, his early plans for a ninth symphony include a 'pious song . . . in the ancient modes'.

There is in fact a persistent retrospective current in Beethoven's late period. He published or considered publishing several of his old songs (*Bundeslied*, *Der Kuss*, *Mit Mädeln sich vertragen*), reworked the *Opferlied* of 1794, resuscitated some old piano bagatelles for op.119 and reworked another in the second movement of the A minor Quartet. He finally set Schiller's *Ode to Joy* – a project first considered about 1790 – to a tune adumbrated in works of 1795 and 1808 (WoO118, op.80). An archaizing urge is manifest in his interest in strict counterpoint and modality, even if the resulting pieces hardly sound archaic; over and above this, some of them look back to certain specific academic exercises recommended by Beethoven's old teacher Albrechtsberger. It was only in his late years that Beethoven developed his well-known penchant for writing canons *d'occasion*. Whereas in the 1800s he had spoken well of Cherubini, now his interest settled on Palestrina, Bach – he sketched an overture on the notes B–A–C–H – and especially Handel. Handel's influence on the overture *Die Weihe des Hauses* (1822) is startling.

Yet ultimately Beethoven's real concern with fugue, as with variation and lyricism, was to mould these elements so that they could be embedded integrally into the global concerns of the sonata style. The presentation, development and return of musical material within a finely controlled tonal field remained central to his artistic endeavour. Fugues perform the function of development sections in opp.101, 106, 111 and less directly in op.110 and the Ninth Symphony finale. Then the fugue at the beginning of the C♯ minor Quartet acts as an exposition, presenting the basic tonal and thematic material that is worked out in the rest of the piece. The variation movements of opp.127 and 135 have a powerful tonal dynamic built in. So does the Diabelli Variations – thanks to another fugue, which precedes the final, recapitulatory variation. Even *An die ferne Geliebte* arranges its cycle of six artless melodies in a purposeful order of keys and features a recapitulation followed by a miniature 'symphonic' coda.

17. LATE-PERIOD WORKS. In some ways the few compositions finished between 1814 and 1816 – the song cycle and the sonatas op.90, op.102 nos.1 and 2, and op.101 – stand closer to Romantic music of the 1830s than any other Beethoven pieces. The opening movement of op.101, a genuine miniature sonata form in an unbroken lyrical sweep, begins quietly on the dominant as though the music was already in progress: an almost Schumannesque effect. The returns of the first-movement themes (marked 'mit der innigsten Empfindung' and 'teneramente') later in the course of this sonata and in op.102 no.1 do not sound like characteristic Beethovenian recapitulations. They are nostalgic recollections which again suggest Schumann and his generation. All four sonatas carry on much further than before Beethoven's search for more fluid solutions to the problem of the form of the total sonata, in terms of the weight, balance and mood of the various movements.

The Sonata in B♭ op.106, arbitrarily, but not inappropriately called the 'Hammerklavier' (both op.101 and op.109 are also subtitled 'für das Hammerklavier'), occupied Beethoven from late 1817 to late 1818; it was his first really large project in five years. Like the 'Eroica' Symphony, it occupies a pivotal position in his output, though the differences between the two works are striking. The 'Eroica' is one of the most popular and 'available' of his compositions, while the Hammerklavier is probably the most arcane. In different ways each represented a breakthrough for Beethoven, one like the crest of a great wave and the other like the breaking of a dam. And while both were works of revolutionary novelty, the Hammerklavier also paradoxically represents a reaction, in that Beethoven reverted to the traditional four-movement pattern in place of the fluid formal experiments of the

*13. Ludwig van Beethoven: stipple engraving by Blasius Höfel after Louis Letronne, 1814*

sonatas of 1814–16, and turned away from their tone of lyrical intimacy.

One feature Beethoven did pick up from them was the idea of an abrasive fugal finale, present in the Cello Sonata in D op.102 no.2. The Hammerklavier fugue with its famous *cancrizans* section is integrated into the total conception with astonishing care and rigour. An improvisatory introduction to the finale seems to grope for the fugue or, perhaps, to will it into existence (something of the kind happens in other late finales: opp.110, 125, 133, 135). Then the shape of the subject and the modulation plan both follow a pattern that has been established firmly (not to say exhaustively) in each of the previous movements. This is construction by means of descending 3rds, acting to a large extent as a substitute for the traditional dominant relation, and creating large-scale conflict between the tonic B♭ and B♮ that is arrestingly resolved.

Beethoven had never written a work that depended so thoroughly, in all its aspects, on a single musical idea. The extremity of its conception, and of its demands on the performer, are as much a part of the character of this piece as are ideas of heroism in the 'Eroica'.

In the three sonatas of 1820–22 Beethoven returned to the proportions and preoccupations of the sonatas of 1814–16. Of all his works, the Sonata in E op.109 is perhaps the most original in form, in respect both to its first movement and to the total aggregate. The first movement is another sonata form in an unbroken lyrical sweep, like the first movement of op.101, but much more complex and shadowy in quality, thanks first of all to the change from Vivace, ma non troppo to Adagio espressivo at the second group – after a mere eight bars. The next movement, an explosive Prestissimo, combines the functions of a more lucid sonata-form statement and a scherzo. A slow theme and variations follows, concluding with an extraordinarily serene da capo of the original hymn-like theme.

Under the lyrical spell of the Sonata in A♭ op.110, even the fugue in the finale is tuneful and positively smooth in counterpoint. And in the Sonata in C minor op.111, after the first movement has recalled in a spiritualized way all the 'C minor' gestures of the early Vienna years, the variations of the second (and last) movement create a visionary aura that had never been known in music before. This mood is recaptured at the end of the Diabelli Variations.

Between October 1822 and February 1824 Beethoven completed three works which are in one way or another as gigantic as the Hammerklavier Sonata: the Diabelli Variations, the Mass in D (*Missa solemnis*) and the Ninth Symphony. Work on the variations and the mass had been in progress since early 1819. Beethoven's slowness in composing the mass can be explained in part by his inevitable resolve to approach the text in the highest seriousness and treat the setting as a personal testament. Indeed, the religious impetus spilled over into his next composition, the Ninth Symphony, with its setting of stanzas from Schiller's half-bacchanalian, half-religious *Ode to Joy*. Mass and symphony stand together as the crowning statement about non-musical ideas in Beethoven's later life – a 'religious' statement to match or, rather, to supplant the 'heroic' statement made in the 'Eroica' Symphony and *Leonore* nearly 20 years earlier. Between the two late works there are many parallels of musical gesture and language.

But whereas the Ninth Symphony, despite grumblings that are heard from time to time about the finale, has always been and remains one of Beethoven's most successful and influential compositions, the same cannot be said of the Mass. It is perhaps unfortunate for the dissemination and appreciation of this work that the relaxed concert conventions of Beethoven's day – at the première only three separate movements were ventured – no longer obtain. If they did, the musical public might well come to appreciate and love the simpler movements, at least: the restrained and lyrical Kyrie, one of the composer's loveliest inventions; the Sanctus, with its organ-like interlude and ethereal violin solo in the Benedictus; and the Agnus, whose touching plea for what Beethoven described as 'inner and outer peace' is twice interrupted by exciting military fanfares and melodramatic recitatives, not to speak of one giddy modulating fugue.

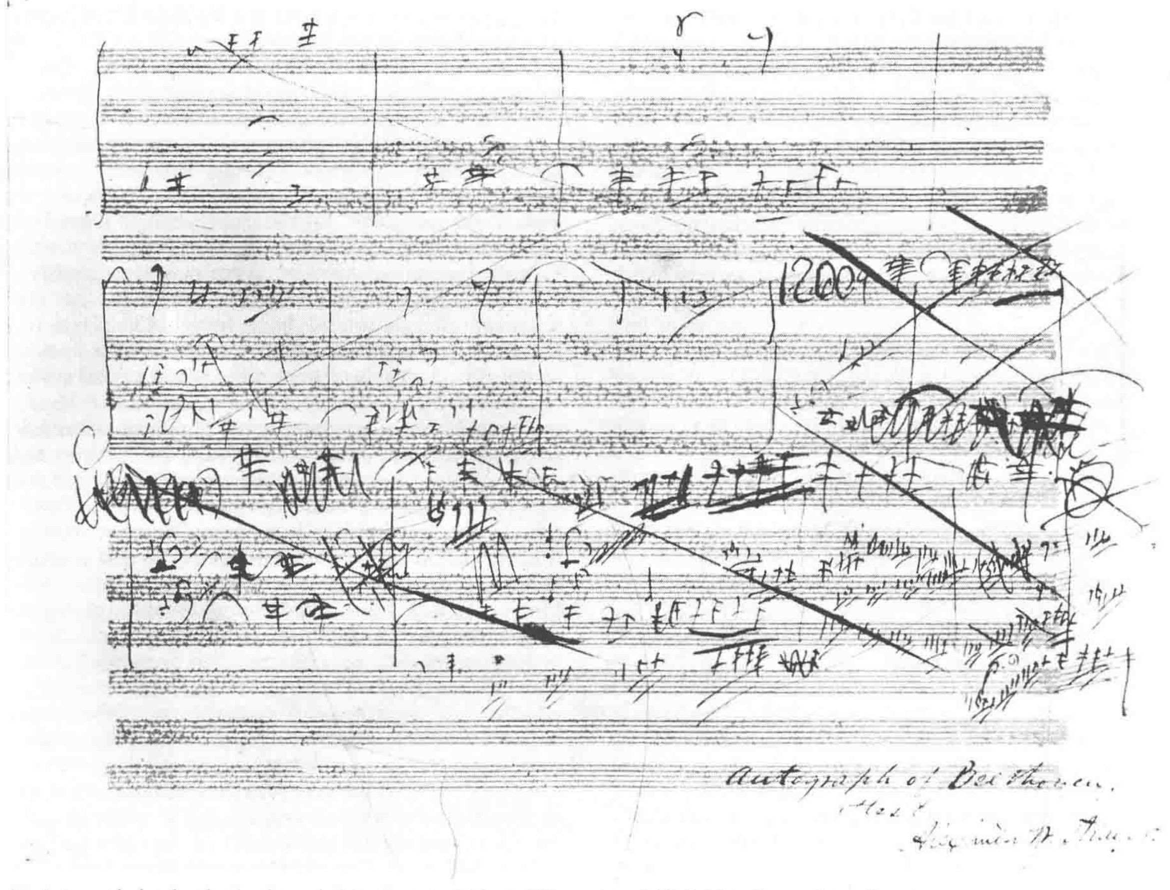
Even the few statements made above are enough to suggest how much of this mass is unorthodox, both musically and liturgically. Unorthodoxies are multiplied in the Gloria and Credo (always the problematic movements for composers of masses). It is particularly in these two central movements that the traditions of the Viennese mass are made to accommodate older traditions deliberately resuscitated; Beethoven rubs shoulders with Haydn (the Haydn of the masses), Palestrina, Handel and Bach. Sublimity, awe and pathos are evoked unforgettably, but they are perhaps evoked too frequently and in too rapid a succession to leave a satisfactory total impression. One can feel this even while acknowledging Beethoven's strenuous efforts at organization: the use of recurring themes for 'Gloria in excelsis Deo' and 'Credo, credo', the powerful tonal dynamic, and the weighting effect of the tremendous fugues 'In gloria Dei Patris' and 'Et vitam venturi'.

In the Mass Beethoven was obviously constrained by the pre-set text; in the symphony he chose his own text. He also chose the context for it: not within an intellectual liturgical structure, but in the real world of experience – for paradoxically or not, that is what the three opening instrumental movements seems to have meant to Beethoven. Ultimately, in the introduction to the finale, this world is rejected in favour of Schiller's transcendent vision of the joys of brotherhood, set 'without the adornments of Art' as an unaccompanied melody of universal folklike simplicity. From his experience of oneness with his fellows and with nature, says Schiller, man receives his intimation of a loving Father dwelling above the stars. This passage of the poem Beethoven set in a solemn religious style recalling that used in parts of the Mass in D.

As the one late-period Beethoven symphony, the Ninth is in a sense retrospective in resuming the 'symphonic' ideal which for a decade had inspired little music. Retrospective, too, is the frank echo of revolutionary French cantatas in the choral finale. Yet as a gesture, this finale shows once again Beethoven's uncanny grasp of essences below 'the adornments of Art'. As Wagner always insisted, words and a choir with soloists to sing them seem to force their way into the symphony in order to make instrumental music fully articulate, to resolve the conflict of the earlier movements with a consummation of unexampled ecstasy.

In the late period Beethoven's treatment of sonata form grows more and more subtle and even equivocal. For

*14. Autograph MS of part of the fifth movement of Beethoven's String Quartet in A minor op.132, composed 1825 (D-Bsb Mendelssohn 11, p.111)*



example, he now tended to minimize the formal development section and place a major climax after, not at, the point of recapitulation (see opp.106, 130, 132). In the face of this, the first movement of the Ninth provides a magnificent reassertion of the traditional dynamic – though with a difference. During the famous and much imitated introduction, the main theme (another 'evolving' theme, one which seems to evolve out of timeless infinity) grows up over a hollow dominant 5th, A–E; then at the recapitulation this returns *fortissimo* as a tonic D–A with F♯ in the bass: an enhanced recapitulation from which all sense of bluster has been filtered away and replaced by what Tovey called catastrophe, and others brutishness. The subsidiary tonal areas of this movement, B♭ and a momentary B♮, are 'composed out' in memorable fashion throughout the rest of the symphony, as is the basic D minor/major tropism of the first-movement recapitulation.

After completing the Ninth Symphony in early 1824, Beethoven spent the two and a half years that remained to him writing with increasing ease, it seems, and exclusively in the medium of the string quartet. The five late string quartets contain Beethoven's greatest music, or so at least many listeners in the 20th century came to feel. The first of the five, op.127 in E♭ of 1824–5, shows all the important characteristics of this unique body of music. It opens with another lyrical sonata form containing themes in two different tempos (as in op.109); the Maestoso theme melts into a faster one, wonderfully intimate and tender – even though it is constructed in three-part species counterpoint over a cantus firmus. The slow variation movement is of the new, more integral kind and the scherzo takes its impetus from a fugato. The finale burgeons with country-dance tunes, of a kind associated in the other late quartets with the interior dance movements (which one can scarcely call scherzos; certainly Beethoven no longer did so). In a brilliant coda, this finale submits to a sort of spirtualized dissolution, an effect prefigured in the Quartet in F minor op.95 and repeated in the next quartet, the A minor op.132.

The composition of op.132 was interrupted by a serious illness in April 1825, and an extraordinary 'Hymn of thanksgiving to the divinity, from a convalescent, in the Lydian mode' forms the central movement (of five). Beethoven's intimations of mortality take the form of modal cantus firmus variations dimly recalled from Albrechtsberger; they alternate movingly with a purely tonal section entitled 'Feeling new strength'. Cantus firmus writing is also in evidence in the first movement, as the themes in different tempos are now closely woven together. Extreme rhythmic fluidity combines with extreme concentration of detail. Beethoven had never before written such a deeply anguished composition.

In the Quartet in B♭ op.130, the confrontation of themes in different tempos gives the opening movement an elusive, even whimsical feeling. A deliberate sense of dissociation is intensified by the succession of five more movements, often in remote keys, with something of the effect of 'character pieces' in a Baroque suite. The feverish little Presto is followed by movements labelled by Beethoven Poco scherzando, Alla danza tedesca and Cavatina – and then by the 'Grosse Fuge', which seems to bear on its convulsive shoulders the responsibility for asserting order after so much disruption earlier in the piece. Its sections, built on various transformations of a cantus firmus subject almost have the weight of separate movements, as in the Ninth Symphony finale. The lyric beauty of the slow G♭ section and the *Gemüthlichkeit* of the recurring section in 6/8 metre sometimes go unappreciated, it seems, by listeners awed by the determined dissonant fury of the others. A closed book to the 19th century, to Stravinsky the 'Grosse Fuge' was 'this absolutely contemporary piece of music that will be contemporary for ever'.

Years before, Beethoven had begun to extend the underlying principles of the sonata style to embrace the

*15. Autograph sketches for Beethoven's String Quartet in B♭ op.130, composed 1825–6 (Beethoven-Haus, Bonn)*

entire aggregate of movements in a piece. Now he found his largest movements breaking down into 'sub-movements' with a subsidiary integrity of their own. In the event, the Quartet in B♭ proved to be quite literally disruptive. Beethoven sanctioned the removal of the fugal finale after the first performance, had it issued separately as op.133 and provided the quartet with a new, less radical (and less splendid) finale.

As though in reaction to this study in musical dissociation, Beethoven next wrote the most closely integrated of all his large compositions. From this point of view, the Quartet of C♯ minor op.131 may be seen as the culmination of his significant effort as a composer ever since going to Vienna. The seven movements run continuously into one another, and for the first time in Beethoven's music there is an emphatic and unmistakable thematic connection between the first movement and the last – not a reminiscence, but a functional parallel which helps bind the whole work together. A work of the deepest subtlety and beauty, at the end this quartet still seems to hinge on a stroke of the most elemental nature, as rushing D major scales in the finale recall the Neapolitan relationship set up between the opening fugue in C♯ minor and the following Allegro in D. Charles Rosen has remarked on Beethoven's continual

> attempt to strip away, at some point in each large work, all decorative and even expressive elements from the musical material so that part of the structure of tonality is made to appear for a moment naked and immediate, and its presence in the rest of the work as a dynamic and temporal force suddenly becomes radiant.

A comparison with the analogous Neapolitan articulation at the end of the Quartet op.59 no.2 of 1806 shows how Beethoven could make such effects tell at the end of his lifetime.

The last quartet, op.135 in F, is a brilliant study in Classical nostalgia, though it does not lack a vision of the abyss in the second movement and a characteristic response through hymnody in the third. (A highly compressed variation set in the key of D♭, marked 'Lento assai, cantante e tranquillo', this piece was originally drafted as a postscript to the finale of op.131.) In the finale of op.135, when the main theme (marked with the words 'Es muss sein!') appears as a simple-minded inversion of the motif of the slow introduction (marked 'Muss es sein?'), a strong suspicion arises of parody – a self-parody of the familiar evolutionary slow introductions of these late years (cf op.111). The thematic tag itself was taken over from a contemporary humorous canon (WoO196).

Like the Eighth Symphony, op.135 seems to mark the composer's farewell to a fully realized episode in his artistic journey. The writing of the late quartets was stimulated by external factors – Prince Golitsïn's commission and the return of the Schuppanzigh Quartet to Vienna – but it continued under its own impetus after the commission was fulfilled. The cohesiveness of this

crowning episode of Beethoven's compositional activity is underlined by the observation made by various critics that three (or more) of the late quartets share melodic material. Even without this, they share some special stylistic characteristics; but even with all that, it is hard to accept the further implication that the individual works are aesthetically incomplete unless viewed as some sort of 'triptych' or 'cycle'. This may be true of the poems by T.S. Eliot which they inspired but not of the original quartets, any more than it is of other clearly associated works in Beethoven's output, such as the Mass in D and the Ninth Symphony.

18. PERSONAL CHARACTERISTICS. Beethoven left an indelible impression on all those who encountered him in the years of his maturity, and even for his contemporaries there were certain features of his life – his idiosyncratic working methods, for example, his mournful isolation through deafness, and the nobility of his total dedication to his art – that endowed him as an almost mythical figure. The course subsequently taken by a romantic image of the composer in the years after his death is discussed in §19 below. Here something must be said of the realities from which the myths drew their strength.

He was neither good-looking nor equipped with more than a very rudimentary education; it was by the force of his character that he produced such a powerful effect on those around him. This, notoriously, had its thorny side. As a young man he was already known to be difficult, impatient and mistrustful, an 'unlicked bear'. A basic problem, it seems, was his ineptness at reading his own motives and interpreting those of others; thus misunderstandings were frequent, which his hot temper magnified into quarrels, even fisticuffs. But typically these were followed by reconciliations and scenes of penitence or remorse. What his capricious and at times outrageous behaviour could not dim was the enormous appeal of his personality. He fascinated and endeared himself to men and women of many sorts, who continued to value his friendship no matter how rough a ride he gave them. This magnetic quality was most in evidence in his earlier years, but even near the end of his life, when he was often wretchedly ill and his deafness was impenetrable, there was competition for the privilege of rendering him services, and devoted friends were never far off.

In his relationships certain recurrent patterns can be observed. His male friendships fell into two broad types. There were the warm and intimate ones with companions such as Wegeler, Amenda and Stephan von Breuning, and perhaps also Franz von Brunsvik and Ignaz von Gleichenstein, men with whom he felt he could share his most private feelings and aspirations. Some considerable way behind came his relations with many others who were valued more for their disinterested usefulness to Beethoven than for any depth of shared emotion. Chief of these was the amiable bachelor Zmeskall; the two Lichnowksy brothers can also be counted among them, and in later years his factotum Schindler and perhaps the young Karl Holz, for whom however Beethoven also entertained some genuinely warm feelings. Most of the first select class of true friends were unmarried at the time of Beethoven's greatest intimacy with them. It is noteworthy, too, that both Wegeler and Amenda, the two with whom he maintained a serene relationship for the longest time, were in distant countries for most of his life; the friendship with Breuning, who remained in Vienna, was interrupted by a breach that lasted many years.

Beethoven's relations with women have been discussed much more fully than his friendships with men; they form the subject of a large but mainly speculative and sometimes very silly literature. He was certainly highly susceptible to feminine beauty and charm. The reliable Wegeler reported that 'he was never without a love, and most of them were from the upper ranks'. Of his attachments in Bonn little is known beyond a name or two, but in his early years in Vienna – again according to Wegeler – he was always involved in love affairs and 'made some conquests that many an Adonis would have found difficult if not impossible'. What these affairs amounted to is another matter. No doubt there were some trivial sexual adventures, but it is hard to avoid the impression that he also spent much time in a showy pursuit of women who could not, or would not, return his affection, and the very fact that most of them were 'from the upper ranks' meant that there was usually an insuperable barrier of social class to prevent the relationship from going too far. Though Beethoven always professed his desire for a true union of hearts, many of the women that he admired were contentedly married or were already committed to another man. Thus he was usually doomed to get nowhere – as perhaps, unconsciously, he intended. Something of the same pattern can be seen in the two or three relationships with women, described earlier, that involved Beethoven most deeply. To judge from the course that they took it seems plain that he shrank from a total involvement with a woman, and that he came to regard the household that he established with his nephew as in some ways a substitute for marriage and family.

That his life was in many respects lonely, therefore, comes as no surprise. It is of course the overwhelming fact of his deafness that makes his personal history so poignantly different from that of other musicians. Its effect on his career was the long-term one of confirming the direction in which his interests were probably already turning; it obliged him at all events to commit himself almost entirely to composing, and to renounce any thoughts he may have had of pursuing fortune as a travelling virtuoso. But the impact of deafness on his social life was sharper and more immediate. It sank him in deep depression and led him to shun company for a time. In fact the years from 1800 to 1802, in which he brought himself to face the likelihood that his handicap would be permanent, were marked by a profound personal crisis, the resolution of which set the pattern for much of the rest of his life. Forced to recognize more and more that he was to be cut off from a part of human experience, he succeeded in coming to terms with an unusual and essentially solitary style of life. No doubt this reinforced his conviction, manifest even before the onset of deafness, that some of the rules of normal social behaviour did not apply to him.

There are many anecdotes of his peculiarities in this respect. Several concern his attitude to his superiors in rank, and to authority in general. Doubtless only too aware that he depended on aristocratic families for his financial support, he resolutely declined after his departure from Bonn to 'play the courtier' or to show the deference and obedience normally expected from musicians in circles of the nobility. He was often most unwilling, for instance, to perform on the piano if called on unexpectedly

by his hosts to do so; sometimes he refused outright, and even left the soirée in a temper. He would also break off playing if people showed their inattention by chattering. The formal court etiquette that surrounded the Archduke Rudolph was especially irksome to him, and in the end it was Rudolph who surrendered by giving orders that the rules were not to be applied to Beethoven. Even in matters of dress Beethoven seems to have been unwilling to show the conformity expected of him, though in his earlier years in Vienna he was often smartly turned out.

This impatience with discipline and authority had more than one aspect. Temperamentally he was utterly unable to adopt a submissive attitude, and even in music he found it distasteful to accept the direction of living teachers (such as Haydn) or dead theoreticians. Moreover, as a child of his time, he was swayed by the ideals of the French Revolution; they must have dominated his student days, although a certain ambivalence can be detected in his attitude to them, as well as to the man who for a time embodied them, Napoleon. In his brusque dismissal of the conventions of an aristocratic society, in fact, Beethoven was less of the egalitarian than the élitist. He had little use for the common run of humanity, regarding himself as an artist – he was fond of the rather grand term 'Tondichter' ('poet in sound') – and, as such, at least the equal of anyone raised to eminence by birth or wealth. He accorded the greatest respect to other artists, particularly writers, and was puzzled and disappointed when he discovered that Goethe, whom he admired above all other poets, behaved over-deferentially to royal personages: was not Goethe as great as they were?

In matters of religion his views, as might be expected, were idiosyncratic and somewhat incoherent. It was not a subject that he discussed much with others. He was brought up in the tolerant Catholicism of the late 18th century, but the formal side of religion held little interest for him, though he went to some trouble while composing the *Missa solemnis* to ensure that he fully understood the words of the Mass. The deity of his faith was a personal God, a universal father to whom he constantly turned for consolation and forgiveness. That much is clear from the many private confessions and prayers scattered throughout his papers. Among philosophical books he was moved by the moral reflections of Kant. Perhaps more surprisingly, he found certain oriental writings on the immaterial nature of God sympathetic to him, and he copied out a number of their texts. He even framed some ancient Egyptian inscriptions on the nature of the deity and kept them on his writing-desk.

He also felt the presence of God in the beauty of nature, and sought to worship him in the countryside, having been greatly influenced by Christian Sturm's *Betrachtungen der Werke Gottes in der Natur*. Beethoven's love of the country was an enduring characteristic. He left Vienna for some months almost every summer and settled in one of the outlying villages such as Mödling or Heiligenstadt, or in the spa of Baden somewhat further afield. There he would take long, solitary walks in the woods and find refreshment of spirit. 'No-one', he wrote to Therese Malfatti in 1810, 'can love the country as much as I do. For surely woods, trees and rocks produce the echo which man desires to hear'.

When on his walks he would usually carry a bundle of folded music paper, and pause from time to time to make entries in it with a pencil. This activity was regarded by his contemporaries as a harmless eccentricity. They laughed too at his singular behaviour in restaurants, where he would sometimes sit for hours sunk in thought and then offer to pay for a meal that he had not eaten. Beethoven was certainly often strangely unaware of his physical surroundings and preoccupied with his own thoughts – even in Bonn the word 'raptus' had been jokingly applied to his fits of emotional inaccessibility – and the squalor of his rooms was such that only he could tolerate it.

Yet in relation to the thing about which he cared most – composing, and presenting his works to the public – Beethoven could hardly be said to be ill-organized. He had a regular domestic routine, rising early, making coffee by grinding a precise number of coffee-beans, and then working at his desk until two or three o'clock, when he had a meal. The morning's work was interrupted, though also in a sense maintained, by two or three short excursions out of doors, during which he continued to make sketches on music paper. Several of these 'pocket' sketchbooks have survived, together with a much larger number of 'desk' sketchbooks in which Beethoven worked when at home. The significance of these volumes, with page after page of seemingly illegible entries, was not understood by his contemporaries, who regarded his devotion to them as yet one more sign of his eccentricity. Only later did it come to be recognized that the sketchbooks provide a unique documentation, although a somewhat fragmentary and at times enigmatic one, of his creative processes.

When a work had been completed it was Beethoven's concern to find a publisher for it. The importance that he attached to publishers throughout his life is shown by the extent and range of his correspondence with them – for

*16. Ludwig van Beethoven: drawing by Johann Peter Theodor Lyser, first published 1833 (Beethoven-Haus, Bonn)*

he contrived to persuade himself that his livelihood depended on selling his music to them, though he was in fact maintained largely by aristocratic subventions. At that time all a composer could expect was a lump sum for the sale of a work. Royalties were unknown. Nor was there any international copyright; within his own country a publisher usually enjoyed some protection for the works he had bought, but they could be freely copied (pirated) abroad. Thus it was a composer's concern to obtain the largest sum for each composition. In the case of Beethoven, whose later works involved many months or even years of labour, there was every inducement to compare the offers of various publishers and to play them off against each other – a form of behaviour that some modern critics, alerted no doubt by Beethoven's shrill protestations of commercial probity, have found unattractive.

One plan that interested him was that of publishing a work simultaneously in more than one country – something that Haydn had done with success. The advantage was that a composer could count on receiving two or more fees, and was thus able to settle for a lower sum from each publisher. From the publisher's point of view little was lost by sharing a work with a foreign publisher, since in practice the market of each country was more or less independent. In spite of the many practical difficulties of delivering manuscripts and synchronizing publication, Beethoven succeeded in getting a fair number of his compositions published by two or more firms in different countries at about the same time.

Beethoven's chief publishers may be briefly listed, together with the dates at which they were most active in publishing him: Artaria & Co., Vienna (1795–8), and two of Artaria's former partners, Tranquillo Mollo (1798–1801) and Giovanni Cappi (1802); Hoffmeister & Kühnel, Leipzig (1801–4); Bureau des Arts et d'Industrie, Vienna (1802–8); Breitkopf & Härtel, Leipzig (1802–3, 1809–12); Steiner & Co., Vienna (1815–17); A.M. Schlesinger, Berlin, and M. Schlesinger, Paris (1821–3 and 1827); Schott, Mainz (1825–7). Other publishers, such as Simrock of Bonn, occasionally issued important works. In the English market one firm predominated: that of Muzio Clementi (1810–23), who secured the English rights to a large number of works by direct dealings with Beethoven, and brought them out at the same time as the Viennese, Leipzig or Paris editions. Since these English editions were produced independently of the continental ones, each is potentially important for establishing an authentic text. George Thomson of Edinburgh also deserves a word or two. A civil servant and musical amateur who devoted much of his life to collecting national (and particularly Scottish) folksongs, he had already published several volumes of melodies with accompaniments by Pleyel, Kozeluch and Haydn before he approached Beethoven in 1803 with the request that he should write six sonatas introducing Scottish melodies. Although nothing came of this suggestion or other similar ones, Beethoven did in the end undertake to write piano trio accompaniments to a great quantity of Scottish, Welsh and Irish melodies submitted by Thomson. The work was carried out between 1809 and 1820, a period that included some otherwise barren years. In 1818 and 1819 Beethoven also wrote for Thomson some simple variations for flute and piano on national melodies (opp.105, 107: see fig.7).

Physically Beethoven was of no more than average height, but his stocky frame conveyed a sense of great muscular strength. He had broad shoulders and a short neck. His pockmarked face, with its wide nose and bushy eyebrows, was described by some as ugly and was certainly remote from the conventional good looks of the time, although it was recognized as having a quality of nobility about it. In youth his hair was coal-black and his complexion swarthy; in middle age, partly as a result of ill-health, his hair became grey and his face rather florid. What impressed those who met him was the intensity of the gaze from his deep-set eyes, and the enormous animation of his melancholy features and indeed of the whole of his restless body. This vitality is not captured in most of the portraits and sketches made in his lifetime. The best representation is probably the 1814 engraving by Blasius Höfel (based on a pencil drawing by Louis Letronne, but touched up from the life; fig.13 above). The bust by Franz Klein (fig.5 above) is based on a life-mask of 1812, so the features have claims to authenticity; and the sketches by Lyser showing Beethoven walking in the street, though not authenticated, also carry conviction (fig.16 above). The idealized portraits and busts of more recent years must be regarded as part of the Beethoven cult; they owe nothing to literal or even to poetic truth.

19. Posthumous influence and reception. The Beethoven we know today cannot be separated from the history of his critical and popular reception. No other Western composer has been amplified to the same degree by posterity; and none has come to embody musical art the way Beethoven has. More than a composer, he remains one of the pre-eminent cultural heroes of the modern West. For a comprehensive view of the full impact of Beethoven, three related strands of the history of his reception must be considered: the myth of the artist as hero; the deep and pervasive influence of his music on later music and thought about music; and the often disturbing political appropriations of his music.

*(i) History of the myth.* Beethoven's music enjoyed an almost immediate appeal among the growing class of bourgeois music lovers, and its popularity has never wavered. Moreover, due to an irresitible conjunction of powerfully communicative music and compelling biographical circumstances, the mythically viewed image of Beethoven the creative artist took hold quickly and tenaciously, finding little or no resistance until the 20th century. To this day, the Beethoven myth remains an indelible part of the popular imagination.

Even within his lifetime, Beethoven began to be seen within emergent conceptions of the creative artist, which are developed in a growing literary tradition of Romantically-conceived works about artists and their lives. Writers such as Bettina Brentano, who invoked the newly fascinating power of electricity as a metaphor for Beethoven's creative powers, or E.T.A. Hoffmann, who placed Beethoven at the very portals of the 'infinite realm of the spirit', embraced him as a living example of the artist as suffering outsider and as courageous hero.

Public awareness of Beethoven's socially isolating deafness was galvanized by the posthumous discovery of the 1802 Heiligenstadt Testament. This selfconscious account of a wracking martyrdom for the sake of art may itself have relied on themes from the same literary tradition that Brentano, Hoffmann and others were to draw upon when writing about Beethoven. Beethoven's

famous letter to the 'Immortal Beloved', also discovered after his death, help confirm his stature as a true Romantic. Here was a creative artist who felt cut off from the simple communal joys of society, who yearned for an idealized love, and who was able to react to these privations with an outpouring of music conceived on an unprecedented scale. A more potent model for the Romantic view of the artist could hardly be imagined. Add to this the fact that music itself was newly elevated by leading aesthetic theories to the sublime copestone of all artistic endeavour, and the mythic ascension of Beethoven seems virtually inevitable.

Several defining aspects of the critical reception of Beethoven contributed to the perpetuation of the Beethoven myth. He was widely held, from the earliest years of the 19th century, to be the culminating figure in a progressive triumvirate of musical greatness: Haydn, Mozart and Beethoven. Not only is he here placed as the highest term of a triad, he was also understood to have descended from a line of genius: he was possessed of a secure spiritual patrimony. In the benevolent formulation of his patron Count Waldstein, Beethoven went to off to Vienna to receive 'Mozart's spirit from Haydn's hands'. Such early consecration is a powerful trope in myths of the great artist.

Another decisive triadic formation in the composer's reception is found in the early and sustained adherence to the idea of three style periods in his musical output. Here, too, the attractions of a triadic framework are manifest: they include the importance of the triad as a venerable organizing strategy (beginning, middle, end) and as a narrative structure that can support both an organic view of Beethoven's compositional development (the middle period as bloom, the late period as decay) as well as a teleological view (the first two periods as preparatory to, and culminating in, the third).

These two views have coloured much of the history of Beethoven's critical reception. In the broadest account of that history, one may discern a turn from the organic view to the teleological view, from regarding the middle period as the peak of Beethoven's output to regarding the late period as such. Indeed, of all his music, the music of the so-called late period has undergone the biggest transformation in its reception. Many early critics held these works to be the symptoms of illness; the prevailing later view prefers to understand them as the highest testimony to his genius.

The decisive turn to this latter view was helped by Wagner's influential monograph of 1870, written for Beethoven's centenary, in which he glorified Beethoven's deafness as a trait of enhanced interiority — the deaf composer forced to listen inwardly. The turn inward is a leading characteristic of 19th-century subjectivity; in this cultural field, Beethoven's deafness was initially understood as the tragic plight of the suffering artist and then as the guarantee of interiority, the *sine qua non* for the production of the highest art. This view reached its summit in the treatment by J.W.N. Sullivan, writing in 1927, for whom the late-period music marked a synthesizing vision of life in which all suffering is subsumed, 'a final stage of illumination' in the composer's spiritual development.

But around the same time as Wagner's quasi-mystical invocation of Beethoven's creative process, a more empirical approach to the composer was gaining ground. Taking advantage of an enormous amount of existing documentation, Alexander Thayer gradually published his celebrated biography, in which he sought to counteract mistaken views of previous biographers by carefully restricting himself to the known facts about Beethoven's life. Imaginative speculation about the composer's spiritual life yielded to a thickly detailed account of Beethoven's personal and professional circumstances. That he never completed the biography may well be due to his Victorian distaste for what he began to descry under the varnish of the myth.

Thayer prided himself on his use of Beethoven's actual sketchbooks to help solve problems of chronology. The study and transcription of Beethoven's sketches was pioneered by Gustav Nottebohm, again in the 1870s; they have since been the object of assiduous labour by analysts and musicologists. For in their sprawling and unruly traces, Beethoven's voluminous sketches provide a palpable sense of the composer's workshop, one which at once confirms the compositional act as both a human undertaking and a titanic struggle. Maintaining a status that hovers between holy relic and evidentiary documentation, the sketches offer the attractions of objectivity while keeping signature tenets of the myth alive and well. Thayer's biography and Nottebohm's work on the sketches together furnished the foundation for modern Beethoven scholarship.

If late 19-century positivism thus began to peer behind the aura of the Beethoven myth, a full frontal assault on it was not launched until the 20th century. Like so many other products of early 19th-century culture, the Beethoven myth faced the cleansing fires of 20th-century disillusionment — but the figure itself remained as potent as ever. The early years of the century witnessed a concerted effort to wrest Beethoven away from the Romantics and reclaim him for Classical art. In 1927, the centenary year of Beethoven's death, a spate of essays, including those by Hermann Abert, Guido Adler and D.F. Tovey, argued for the classical virtues of Beethoven's music. Arnold Schmitz wrote an entire book polemically engaging what he called 'the Romantic image of Beethoven'. For Schmitz, Beethoven did not inhabit some romanticized realm of art separate from reality and its laws but rather deeply respected and supported the traditions of musical art in the service of a distinctly moral vision. In Germany, this view of the composer as a standard bearer of normality and moral health began to spread in conjunction with overtly nationalistic appropriations of Beethoven. In England, the criticism of Tovey also stressed the healthy normality of Beethoven's art.

Several decades later, Beethoven the man would submit to uncompromising psychoanalysis, emerging as anything but healthy. In their 1954 study *Beethoven and his Nephew*, the psychoanalysts E. and R. Sterba portray Beethoven as something like a hero of a lurid naturalist drama; they describe a disturbed man and the people he hurt. Maynard Solomon's more tempered account of 1977 (revised 1998) sympathetically relates the foibles and pretensions of a humanly flawed artist. Both accounts refuse to flinch from the more troubling aspects of the creative persona, and both go far to transform the mythical figure into a flesh and blood man.

Related to these efforts are recent attempts to augment our knowledge of the economic conditions of Beethoven's era, the system of patronage that served him so well, and

the exact nature of his own financial circumstances. All these studies choose to observe Beethoven from the perspective of the social, commercial and psychological forces of the modern world. Thus they serve to place him within the traffic and commerce of a recognizable reality; he no longer appears as a tortured but transcendent onlooker from some romanticized realm of genius.

Perhaps the most unmistakable sign of demythification is the steadily growing interest in reception studies, for here the Beethoven myth is treated and studied as a cultural construction – the interest now lies in the nature of its formation and persistence. Initially prompted by the attractions of reception theory in literature and further motivated by a more strictly postmodern interest in the ways and means of the musical canon, the study of reception is now one of the more active branches of writing about Beethoven.

Meanwhile, traditional historical scholarship is by no means finished with Beethoven. The 1980s and 90s witnessed several crucially important additions to the foundation laid by Thayer and Nottebohm. First and foremost, the Beethoven-Haus in Bonn has continued to produce its indispensable editions: by the end of the 20th century Beethoven's letters were published in a new and definitive seven-volume edition (1996–8); the transcription and publication of the conversation books were lacking only two of its twelve projected volumes (1968–); and the even longer-term projects of the *Neue Ausgabe* (of all Beethoven's works) and the *Skizzenausgabe* (all the sketchbooks) were both moving forward. In 1985, Alan Tyson, Douglas Johnson and Robert Winter published *The Beethoven Sketchbooks*, a groundbreaking reference work that reconstructs the bewilderingly scattered corpus; and in 1996, Theodore Albrecht published three volumes of letters written to Beethoven. The long awaited establishment of these primary materials will give Beethoven scholars much to do in the 21st century.

Although the Beethoven myth has been dressed down in the academy, it remains alive as ever in mainstream commercial culture. A good deal of its vitality stems from the kitsch industry: the standard image of Beethoven's face and mane – the 'Lion King' of Western music – is reproduced ubiquitously, while the opening motive of the Fifth Symphony is still Western art music's most recognizable roar. An almost 200-year-old stream of minor novels, novellas and films about Beethoven continues unabated, less accomplished descendants of the Romantic *Künstlerroman*; the most substantial of these is Romain Rolland's *Jean-Christoph* (1904–12). (There is even a subtradition detailing the dangerous effects of listening to Beethoven's music: Robert Griepenkerl's 1838 novel about a fatally boisterous Beethoven cult, *Das Musikfest; oder, Die Beethovener*, finds a distant echo in the ultra-violence of Anthony Burgess's 1962 novel *A Clockwork Orange*, strikingly filmed by Stanley Kubrick.) Above all, the more explicitly highbrow commodification of classical music, in music shops and concert programmes, continues to provide supply for demand. It is indeed the perennial appeal of Beethoven's music that perhaps tells most heavily for the persistence of the myth in popular culture.

*(ii) Beethoven's influence on music and musical thought.* Beethoven's music seemed almost at once to establish a watershed in Western musical history, both as a culmination of the Viennese Classical style and as the beginning of a new musical age. He is treated time and time again as the most imposing feature in the landscape of 19th-century music, the mountainside from which the music of the rest of the century would echo. Wagner, breathing the intoxicating air of his own heights, clamorously proclaimed Beethoven's music as a transhistorical force leading to the Wagnerian *Gesamtkunstwerk*. Even nowadays, in the lapidary invocation of 'the three Bs', Beethoven is popularly imagined as rising above the historical terrain of Western music, linking Bach to Brahms.

The sheer drama and scope of Beethoven's most ambitious works fostered an overriding perception that his music coheres organically even to the point of inevitability. Beethoven's art registered as a sublime force of nature: here was a music that fully embodied the recently propounded shift in aesthetics from mimetic imitation of the products of nature to expressive emulation of her processes. The overmastering coherence felt in Beethoven's music became an imposing measure of the greatness of musical artworks. Not only individual works but whole genres in his output came to assume a wholeness and totality, as well as a sense of teleology: the symphonies, the string quartets and the piano sonatas are all treated as coherent narratives of creative development. Playing these 'cycles' in their entirety continues to be a standard test for ambitious performers.

Mainstream symphonic composers above all chafed under the magnitude of Beethoven's accomplishment; as Schubert put it, 'who would be able to do anything after Beethoven?'. Few escaped this stifling anxiety, and for some, like Brahms, it was practically overwhelming. Musical reactions to Beethoven range from the obvious to the subtle, and are both epigonal and agonistic. The Ninth Symphony by itself may be said to have fathered, for better or for worse, any number of later works: its opening alone furnished Bruckner with a problem he tackled anew in each of his symphonies. There are isolated cases of consuming interest: the teenage Mendelssohn's precocious modelling of several of Beethoven's late string quartets – the enigmatic sounds of the late style incorporated into the melodramatic emotional life of adolescence; or Schubert's modelling, in his Piano Sonata D959, of the proportions and textures, but not the themes or motifs, of the rondo finale of op.31 no.1. We have Schumann's quasi-philosophical reaction to Beethoven, in his Fantasy for piano, where he muses on a wistful theme from *An die ferne Geliebte*, and Berlioz's parodistic reaction in his anti-heroic symphony *Harold en Italie*. There is Brahms's earnest, historically burdened reaction: the opening of the First Symphony actually sounds as if it were dragging some great weight. The symphonic art of Dvořák is impossible to imagine without the Beethoven of the Pastoral and Eighth Symphonies. Mahler, Richard Strauss and Sibelius carry Beethoven's most sweeping manner into the 20th century; and even the more distinctly modernist composers of the 20th century do not shy from his influence, particularly with the ascendance of the late style. Schoenberg emulates Beethoven's motivic art, Bartók's string quartets breathe the air of the late quartets, and Stravinsky was impressed by the perpetual modernity of the fractiously grandiose Grosse Fuge. Even the iconoclastic Boulez owes much to Beethoven's Hammerklavier Sonata in his own Second Piano Sonata.

Beethoven was to exercise a more subtle and no less pervasive influence within mainstream music criticism

and theory. From the beginning, his music seemed to demand a more serious and attentive manner of listening. In several landmark reviews, E.T.A. Hoffmann lauded the deep coherence in Beethoven's music, noting that, as in the case of Shakespeare, the music's underlying unity could easily elude those critics attuned to conventional surfaces. Music critics could no longer hope to judge this music competently at a first hearing; according to A.B. Marx, whose editorship of the *Berliner allgemeine musikalische Zeitung* did so much to promote the music of Beethoven, critics needed to learn how to divine the Idea embodied in each of Beethoven's works. A hermeneutic imperative quickly gathered strength in the face of his music, one which has not abated. His works have been heard to be telling us something, as a kind of secular scripture in need of hermeneutic mediation. The 19th-century tendency to respond to much of his instrumental music with detailed extra-musical programmes has found renewed life throughout the 20th century, in the work of Arnold Schering, Harry Goldschmidt, Owen Jander and others. In 1994, Albrecht Riethmüller and others published two volumes containing variously authored interpretations of each of Beethoven's major works; here the hermeneutic impulse unites with the equally familiar compulsion to deal with every note of Beethoven's music.

Another pervasive, if less overt, influence on Beethoven's music lives on in the more mainstream methods of musical analysis, for it is not far-fetched to claim that they were formed largely in response to his music. For example, the codification of sonata form in the work of A.B. Marx – one of the imposing legacies of 19th-century music theory – was essentially a codification of Beethoven's sonata forms, as manifest in his piano sonatas. And inasmuch as one can speak of a theory of form in the work of Tovey, it will perforce refer to Beethoven, the mainspring of Tovey's analytical and critical élan. Form was a kind of temporal logic for Tovey, a logic most manifest (and most worth tracing) in Beethoven.

Beethoven's music was both proving ground and breeding ground for two of the most pervasive methods of demonstrating coherence in tonal music, motivic analysis and Schenkerian part-writing analysis. For proponents of motivic analysis, Beethoven's musical art was heard to live at the level of the motif rather than the theme; motivic ubiquity and transformation were shown to betoken underlying unity and compelling thematic process. From Schoenberg's *Grundgestalt* to Rudolph Reti's prime cell, the method that works so transparently with the music of Beethoven was eagerly and automatically transferred to other music, not always without strain.

Easily the most practised and most respected method of tonal analysis in Anglo-American academia continues to be Heinrich Schenker's part-writing analysis. Here the theoretical emphasis on deep structure finds resonance with prevailing attitudes towards coherence in Beethoven's music; moreover, the compelling sense of forward motion, of line, often heard in Beethoven's music is well served by Schenker's concept of *Urlinie*, or primal line, a coherent linear entity discernible beneath the surface phenomena of local themes and motifs. Schenker published many analyses of Beethoven's works throughout his career, including monographs on the Ninth Symphony, the Fifth Symphony and several of the late piano sonatas; these analyses tended to coincide with major turning points in the development of his thought.

The music of the late period came into its own in the 20th century, and enjoyed a special role in shaping the methods and aims of musical analysis. With the continued viability of psychoanalytical theory and Schenkerian depth analysis, the late works took on a special aura, beckoning analysts to discern a deeper seated – latent – coherence underlying the often shockingly dissociated musical surfaces of these works. As such coherence is not so much visceral as abstract, not directly felt but indirectly intuited, much ingenuity has gone into establishing it.

Despite such analytical efforts, the surface dissociations of the late works have continued to disturb; ultimately these works resist assimilation into some saving unity. This very sense of resistance lies at the heart of several influential strands of 20th-century critical thought about Beethoven and about music. Much of Theodor Adorno's musical philosophy hinges on establishing Beethoven's music as a quasi-Hegelian representative of the subject in the modern age. For Adorno, the middle-period music represented a unique and unrepeatable reconciliation of subject and object, individual and world; in the late style the subject proceeds to absent itself, in a critique of that former synthesis that leaves behind a kind of desubjectivized musical materiality. More recently, the dissociations of the late style have proved stimulating to a burgeoning poststructuralist critical sensibility that seeks to challenge more strictly formalist analytical suppositions. In particular, the A minor quartet, op.132, has become a favourite site for these newer efforts. Here, the idea of musical unity seems to share the fate of the unified self: both are disarticulated, opened up to the variegated forces of the postmodern condition. Recent feminist music criticism also finds itself vitally concerned with Beethoven and subjectivity. It has been argued that the compelling autonomous self heard in the heroic style is the sound of an exclusionary masculinist ideal whose coronation as a priviledged norm deters appreciation of other musical sensibilities. Beethoven's music has thus been heard to embrace and encompass the fate of the subject in the West, and to define and circumscribe the fate of the Other – what other music could be said to have such reach, to fit such overarching narratives of modernity?

Some scholars, such as William Kinderman and Maynard Solomon, are intent on developing a more specifically historicized view of Beethoven's place in Western culture, particularly the nature of his relation to Enlightenment thought. Here the work of Schiller has begun to figure heavily as a source of many of Beethoven's artistic aims and accomplishments. Like Schiller, Beethoven's music is said to explore problems of reason and sensibility, aesthetics and ethics, nature and freedom. As always, there continues to be much speculation on meaning in Beethoven's music, and from many different quarters; one semiotic theory of music (Hatten, J1994) is predicated on the music of Beethoven. A common theme runs through the work of all these recent critics: all argue strongly against the persistent notion of Beethoven's music as a timeless aesthetic force, agreeing instead that it performs specific cultural work. Just what that work is remains a source of fruitful and lively contention.

*(iii) Political reception.* Although it has been argued that the reception of art is always political and ideological at some level, the history of Beethoven reception offers case

after case of explicit political appropriation of his music and ideological monumentalization of his figure as a spiritual hero. Among the steady production of monuments erected to honour Beethoven throughout the 19th century, the most strikingly grandiose is the nude statue by Klinger (fig. 17), unveiled in Vienna in 1900. A more lasting and influential monument has been the continuing presence of Beethoven's music in Western political arenas, for such instances may well constitute the most overt and far-reaching effect of his music. Of course, Beethoven himself wrote occasional music for expressly political purposes: the 'Battle Symphony' and *Der glorreiche Augenblick* are only the best known of these ventures, both performed as part of the celebrations surrounding the Congress of Vienna in 1814. These pieces are routinely denigrated as hack-work, their politics all too obvious. Yet, Beethoven's symphonies — his most universally revered, public statements — have been readily and repeatedly appropriated for far more sweeping and insidious political ends.

The symphonies have consistently been heard to occupy a moral high ground. In particular, the Third, Fifth, Seventh and Ninth Symphonies came to represent the monumental and sublime as opposed to the 'merely' lyrical and beautiful, and consequently they were frequently conscripted in German denunciations of the music of France and Italy. In the 1820s, at a time when the Prussian nation sought to consolidate and maintain something like an aesthetic and civic character, Beethoven's symphonies formed an important bulwark in the burgeoning ideology of German spiritual nationhood. From then on, Beethoven and his music have never been far from the most momentous scenes of modern Germany's political history.

In 1870, German victory in the Franco-Prussian War coincided with the centenary of Beethoven's birth. The connection was seized upon by the organizers of numerous musical and political festivals, and by Wagner, whose 1870 monograph on Beethoven explicitly equated the sublimity of Beethoven's art with that of the German spirit, as a triumph of the ideal inner world over the French world of appearances. Bismarck himself was said to revere Beethoven; legend has it that he ordered a performance of the Fifth Symphony just before mobilizing his army.

The merger of Beethoven and German politics continued apace in the 20th century. During World War I, Beethoven's music was played relentlessly in German concert halls, and there are many accounts of soldiers invoking Beethoven as an inspirational model of German heroism. Later, the Third Reich aggressively exploited the power of his music in its propaganda and even turned to Beethoven during its demise: Hitler's death was announced on German radio to the strains of the Funeral March from the 'Eroica' Symphony. Ironically, the opening motif of the Fifth Symphony, due to its rhythmic similarity to the Morse Code letter V, became associated with Allied victory, and Beethoven's music in general was immensely popular in wartime Britain. Almost half a century later, the Ninth Symphony was heard at a concert commemorating the fall of the Berlin Wall. Leonard Bernstein conducted, famously substituting the word 'Freiheit' for 'Freude' in the choral finale.

Thus Beethoven's music has served throughout the last two centuries as a kind of potent and free floating moral force that can be harnessed for any number of political enterprises, from racial purity to human rights, fascistic subjugation to world brotherhood, without suffering the stigma of the collaborator. His music has survived these multifarious appropriations, just as Beethoven's status as a cultural hero has survived concerted attempts to dismantle the Beethoven myth. One cannot but accord to this music and this composer an unexampled cultural and historical force in the modern West. His music has fought wars and celebrated victories, consoled and scorned, empowered and overmastered. It is indeed difficult, if not impossible, to imagine a time when Beethoven's music will not continue to exercise its paradoxically confounding and foundational force. Perhaps when that happens, the Western world will truly have passed into another age.

*17. Ludwig van Beethoven: statue by Max Klinger, marble, red alabaster, bronze and various media, 1886–1902 (Museum der Bildenden Künste, Leipzig)*

WORKS

Editions: *Ludwig van Beethovens Werke: Vollständige kritisch durchgesehene überall berechtigte Ausgabe*, i–xxiv (Leipzig, 1862–5/*R*), xxv [suppl.] (Leipzig, 1888) [GA]

*Beethoven: Sämtliche Werke: Supplemente zur Gesamtausgabe*, ed. W. Hess (Wiesbaden, 1959–71) [HS]

*Beethoven: Werke: neue Ausgabe sämtlicher Werke*, ed. J. Schmidt-Görg and others (Munich and Duisburg, 1961–) [NA]

Works are identified in the left-hand column by opus and WoO (Werk ohne Opuszahl, 'work without opus number') numbers as listed in G. Kinsky and H. Halm: *Das Werk Beethovens* (Munich and Duisburg, 1955) and by Hess numbers as listed in W. Hess: *Verzeichnis der nicht in der Gesamtausgabe veröffentlichten Werke Ludwig van Beethovens* (Wiesbaden, 1957). Works published in GA are identified by the volume in which they appear (roman numeral) and the position in the publisher's continuous numeration (arabic number); works published in HS are listed in the GA column and identified by volume number. Works published in NA are identified by category (roman numeral) and volume within each category (arabic number).

WoO17 Eleven Dances, 2 fl, 2 cl, 2 hn, bn, 2 vn, b, see 'Collections of Dances'

WoO162 Ta ta ta … lieber Mälzel, 4vv, for Johann Nepomuk Maelzel; *Musikalisch-kritisches Repertorium aller neuen Erscheinungen im Gebiete der Tonkunst*, ed. H. Hirschbach, i/2 (Leipzig, 1844); GA xxiii/256/2; ?forgery by Schindler, see Howell (F(v)1979)

FOLKSONG ARRANGEMENTS

*with piano trio accompaniment unless otherwise stated*

Beethoven began arranging folksongs for the Scottish publisher George Thomson in late 1809. He continued to do so at intervals until 1820. It was his own idea to extend the scope of the project to include songs not of British origin; most of these were never published by Thomson. In the lists below, the songs are grouped as they appear in GA xxiv and many later publications. Composition dates are based on B. Cooper: *Beethoven Compendium* (1991) and *Beethoven's Folksong Settings* (1994); replacement and/or alternative settings are also noted.

no.

WoO152 Twenty-five Irish songs (London and Edinburgh, 1814); GA xxiv/261

1 The Return to Ulster, July 1810
2 Sweet power of song, duet, July 1810

**Beethoven Association.** New York society, organized under the presidency of Harold Bauer in 1919. It promoted concerts, arranged the first English-language edition of Thayer's *Life of Beethoven* (1921, ed. H.E. Krehbiel), and made grants to libraries and musical charities. It was dissolved in 1940. □

**Beethovenhalle.** Concert hall in BONN, completed in 1959. For illustration *see* ACOUSTICS, fig.31.

**Beethoven Quartet.** Russian string ensemble, founded in 1923 as the Moscow Conservatory Quartet by Dmitry Tsïganov, Vasily Shirinsky, Vadim Borisovsky and Sergey Shirinsky. In 1927 the group presented its first Beethoven cycle for the composer's centenary; and after another successful cycle in 1931 it took the name by which it became known throughout the world. It gave the first performance of Myaskovsky's quartets from no.4 onwards. Its members taught with distinction at the Moscow Conservatory and were all well known in their own right – Vasily Shirinsky was a noted musicologist. In 1940 the Beethoven Quartet began a collaboration with Shostakovich which resulted in its giving the premières of almost all his major chamber compositions; a number of his quartets were dedicated to the ensemble or its individual members. The 'Beethoveners' appeared in concert with many celebrated colleagues but in the West were known mainly by their recordings which, apart from Shostakovich's works, included quartets and quintets by Mozart, Beethoven, Schubert, Brahms. Glière, Taneyev, Myaskovsky and Prokofiev. Their style of playing, though underpinned by considerable virtuosity, was more direct and unvarnished than that of the contemporary Komitas

Quartet or the younger Borodin Quartet; and even on record they achieved interpretations of the utmost intensity and profundity. In 1964 Borisovsky gave way to his pupil Fedor Druzhinin and on Vassily Shirinsky's death in 1965, Nikolay Zabavnikov became second violinist. A complete Beethoven cycle was recorded by this formation of the ensemble. Sergey Shirinsky died in 1974 during the preparation of Shostakovich's 15th Quartet (which as a result was given its première by the Taneyev Quartet). Yevgeny Altman became the cellist in 1975 and on Tsïganov's retirement in 1977, Druzhinin reorganized the group with Oleh Krysa as leader. This second Beethoven Quartet, in which Druzhinin was eventually succeeded by Mikhail Kugel (and Atlman by Valentin Feigin), disbanded in 1987.

**Befa.** *See* B FA.

**Beffroy de Reigny, Louis-Abel** [Cousin Jacques] (*b* Laon, 6 Nov 1757; *d* Paris, 17 Dec 1811). French playwright, author and composer. In 1785 he founded the satirical periodical *Les lunes*. Under the pseudonym 'Cousin Jacques' he became the acknowledged playwright of the Revolution, writing the texts and occasionally the music to numerous farces and *pièces de circonstance* which enjoyed a great popular vogue. Among these works is *Nicodème dans la lune* (1790), which had a run of 363 nights at the Théâtre Français Comédique et Lyrique and was revived at the Théâtre-Français de la Cité in 1796 for another 200 performances. It was one of the first boulevard plays to succeed both as entertainment and as propaganda. A number of plays based on *Nicodème* followed, but none matched the success of the original. *Le retour du Champs-de-Mars* (1790), an instantaneous success, saved the Théâtre des Beaujolais from bankruptcy. He was equally famous for his literary works, among them a *Dictionaire néologique des hommes et des choses de la Révolution* (1795–1800) and a *Précis exact de la prise de la Bastille* (1789).

WORKS

*all printed works published in Paris*

STAGE

*all first performed in Paris, and all with texts by the composer unless otherwise stated*

Les ailes de l'amour (divertissement, 1), 1786, airs (*c*1786; enlarged 2/*c*1786); Coriolinet, ou Rome sauvée (folie héroï-comique, 3), 1786, ?unperf.; Les clefs du jardin, ou Les pots de fleurs (divertissement, 1), 1787 (1787); Compliment, 1787; La fin du bail, ou Le repas des fermiers (divertissement), 1788 (1788); Sans adieux (compliment, 1), 1789, see Pougin; Bordier aux enfers (comédie, 1), 1789 (1789), ?unperf., attrib. Beffroy; La couronne de fleurs (compliment, 1), 1789; Apollon directeur (1), 1790; Arlequin, général d'armée (opéra bouffon, 2), 1790 (1790), ?unperf., attrib. Beffroy; La fédération du Parnasse (divertissement, 1), 1790

**Begaliyev, Muratbek** (*b* Minkush, 21 June 1955). Kyrgyz composer. He attended a boarding music school until 1974 after which he studied at the Kyrgyz Art Institute (under M. Abdreyev) and the Moscow Conservatory (under M. Chulaki). In his work he has attempted to unify various sources of Kyrgyz folklore within a system of expression that owes as much to Shostakovich as it does to Bartók. In 1991 he was awarded a UNESCO prize and in 1993 helped establish and became director of the Kyrgyz Conservatory.

RAZIYA SULTANOVA

**Beglarian, Eve (Louise)** (*b* Ann Arbor, 22 July 1958). American composer. The daughter of the composer Grant Beglarian, she studied at Princeton University (BA 1980) and Columbia University (MA 1983), and was trained in intricate serial techniques by Wuorinen and Lerdahl. At Columbia, however, she came to view post-serialism as sterile and elitist and began to write pieces that incorporated rock elements and performance art. From 1991 on,

she has had a strong presence in the downtown Manhattan scene, especially with the pianist Kathleen Supové, with whom she formed the electronic duo Twisted Tutu.

Beglarian's output is extremely diverse, including contrapuntal variations on medieval songs, computer-altered disco collages, post-minimal and numerically-structured synthesizer pieces, songs of nonsense syllables and electric theatre pieces, notably *TypOpera*, based on Kurt Schwitters's *Ur Sonata*. Expert in sampling technology, she often uses noise samples in instrumental contexts; *FlamingO*, for example, combines chamber orchestra and samplers in such a way that the latter dominate, the orchestra emerging from an engulfing whirr of noise. In *Wonder-Counselor* for organ and tape, flurries of melody on the organ are laid over an ecstatic ebb and flow of a harmonic series and sampled accompaniment of ocean sounds, bird song and a couple having orgasms. Feminist and uninhibited, Belgarian is not afraid to tackle subjects of sex, politics and religion, though her music usually remains joyous and uplifting.

KYLE GANN

**Begleitung** (Ger.). *See* ACCOMPANIMENT.

**Begnis, Giuseppe de** (*b* Lugo, 1793; *d* New York, Aug 1849). Italian bass. He made his début at Modena in 1813 in Pavesi's *Ser Marcantonio*, and soon became a leading exponent of *buffo* roles in Italy. In 1816 he married the soprano Giuseppina Ronzi and the same year sang at La Scala, as the King of Scotland in Mayr's *Ginevra di Scozia*. He created the role of Dandini in Rossini's *La Cenerentola* at the Teatro Valle, Rome, in 1817. Two years later he and his wife appeared in Paris as Don Basilio and Rosina in *Il barbiere di Siviglia*, and as Geronio and Fiorilla in *Il turco in Italia*. They repeated the latter roles at their début in London at the King's Theatre in 1821. De Begnis took part in a concert performance of *Mosè in Egitto* at Covent Garden in 1822, three months before Rossini's opera was staged, as *Pietro l'eremita*, at the King's Theatre. In the following year he sang in the first London performance of Rossini's *Matilde di Shabran*, and in 1824 he took the part of Don Febeo in Mayr's *Che originali* (*Il fanatico per la musica*), staged for Catalani's return to London after a long absence. During his last season at the King's Theatre (1827), he appeared in Pacini's *La schiava in Bagdad*. Equally proficient as an actor and as a singer, he was an ideal interpreter of Rossini's comic operas.

ELIZABETH FORBES

**Bego-Šimunić, Anđelka** (*b* Sarajevo, 23 October 1941). Bosnian-Hercegovinan composer of Croatian descent. She studied composition with Brkanović and Miroslav Špiler at the Sarajevo Music Academy before taking a masters degree there in 1973. After teaching theory at the secondary music school in Sarajevo, in 1975 she joined the staff of the academy, where she was later made assistant (1985) and then full professor. She was president of the Bosnian composers' association (1986–92) and one of the principal organizers of the Bosnian festival 'Days of Musical Creation'. Her music is neo-classical in its Prokofiev-like extended tonality and treatment of form but it also contains neo-romantic elements (e.g. the Lisztian rhetoric of the melody) and early Expressionist features (e.g. the vertical dissonances of the chordal structure). Occasionally, her works make use of Bosnian folklore.

IVAN ČAVLOVIĆ

**Begrez, Pierre (Ignace)** (*b* Namur, 23 Dec 1787; *d* London, 19 Dec 1863). French tenor. He made his début at the Paris Opéra in 1815, but much of his career was spent in England. He was first heard in London at the King's Theatre on 13 January 1816 (billed as Signor Begri) in Paer's *Griselda*; that season he also sang Guglielmo in *Così fan tutte* (with Braham as Ferrando), and the following year appeared in Paisiello's *La molinara* and Mozart's *La clemenza di Tito* (as Annius). In 1819 he sang Ottavio in *Don Giovanni* and Monostatos in *Die Zauberflöte*; and in 1824 he appeared in two Rossini operas, as Roderigo in *Otello* and as Narciso in *Il turco in Italia*. His career is discussed in W.C. Smith: *The Italian Opera and Contemporary Ballet in London 1789–1820* (London, 1955). After giving up the stage, he continued to sing in concert for many years, and also taught singing in London. In an age famous for its fine tenors he had neither the remarkable voice nor the virtuoso technique of a Davide or a Garcia, but his musicality and his dependability made him a valuable member of the Italian opera company in London at a time when artistic, as opposed to purely vocal, standards were not high.

ELIZABETH FORBES

**Béhague, Gerard (Henri)** (*b* Montpellier, 2 Nov 1937). American musicologist of French birth. He studied the

piano and composition at the National School of Music of the University of Brazil and later at the Brazilian Conservatory of Music, Rio de Janeiro. He then worked under Jacques Chailley at the Institut de Musicologie of the University of Paris before settling in the USA, where he studied with Gilbert Chase at Tulane University, New Orleans, and received the PhD in 1966. He then worked on the music staff at the University of Illinois and later became professor of music at the University of Texas, Austin (1974). He has also worked as associate editor of the *Yearbook for Inter-American Musical Research* (1969–75), editor of the music section of the *Handbook of Latin American Studies* (from 1970) and as editor of *Ethnomusicology* (1974–8). Although he has been specially concerned with American music, theory and methods of musical research, Béhague's main interest has been Latin American music, in which he is recognized as a leading authority, and particularly that of Brazil, which he has studied as both music historian (in both classical and popular areas) and ethnomusicologist.

PAULA MORGAN

**Behaviourism.** *See* PSYCHOLOGY OF MUSIC, §I, 2.

**Beheim** [Behaim], **Michel** (*b* Sülzbach, nr Weinsberg, Württemberg, 29 Sept ?1420; *d* Sülzbach, 1472–9). German poet and Meistersinger. After training under his father, a weaver, he entered the service of the imperial chamberlain, Konrad von Weinsberg, as a singer ('fürtreter') in the 1440s. He named as his models Muskatblüt, whom he probably met in Konrad's household, and Heinrich von Mügeln. He performed his own songs mostly at royal and noble households in southern Germany in which he was employed: the Bavarian court in Munich (from at least 1447); the court of Albrecht Achilles, Margrave of Brandenburg, in Ansbach (1449–53, interrupted by a Scandinavian journey that took him to Copenhagen and Trondheim); the Bavarian court in Munich (1453–4); the court of King Ladislaus of Bohemia in Prague and Vienna (1455–7); in Austria, for Duke Albrecht VI (1454, 1458) and at the court of the Emperor Frederick III in Vienna (1459–65); and finally the court of the Elector Palatine Frederick I (1468–?1472).

Most of Beheim's extant works derive from sources close to the original, some of them autograph (*D-HEu* cpg 312 and 334, *Mbs* Cgm 291). This provides biographical and historical material and permits accurate study of the structure of his 12 *Töne*. An individual style could hardly be expected, and the great majority of the melodies are still formed from conventional figures, phrases and combinations of phrases. There is unmistakable interaction of text and *Ton* (*see* TON (i)), and there are several examples of correspondence; structural elements and sometimes whole *Töne* have a semantic function (the *Gekrönte Weise*, for example, which resembles a dance-song, expresses joy). The articulation of the melody usually follows the text rather than the rhyme scheme. Beheim tends to favour the return of the melody, less often a polished rounding off, at the end of a stanza. As with other examples, there are no instrumental parts, and no *ouvert* and *clos* endings. Like others before him, he held himself, as a poet, aloof from the instrumentalists who were his rivals for princely favour; he felt that only an art in which the music was inseparable from the words could serve the divine order.

The *Angstweise* with its chronicle texts breaks away from the traditional epic metre (*Bogenzeilen*) in the last part of the stanza. Otherwise Beheim's techniques were for the most part those of medieval monophony which was probably losing popularity in his lifetime at those courts that had their own chapels and choirs. In 1472 he returned to his birthplace, which lay within the territory of the palatinate where he had served; there he held the position of village mayor until his violent death. He was, if not the last, certainly one of the last of his kind.

**Behr, Joseph.** *See* BEER, JOSEPH.

**Behrend, (Gustav) Fritz** (*b* Berlin, 3 March 1889; *d* Berlin, 29 Dec 1972). German composer and pianist. He studied composition with Heinrich van Eycken, Philipp Rüfer and Engelbert Humperdinck (1907–11), before serving as répétiteur at the Brunswick Hoftheater (1911–12). In 1913 he enlisted in the German army. After World War I, he worked as a chamber musician and pedagogue at the Ochs-Eichelberg (1918–42) and Klindworth-Scharwenka (1942–9) conservatories in Berlin. Out of favour during the Third Reich, his reputation as a composer was not established until after World War II. His style, greatly influenced by the music of Richard Strauss, particularly with regard to orchestration, shows a sympathy for post-Romantic idioms.

JOHN MORGAN/ANDREW D. McCREDIE

**Behrend, Siegfried** (*b* Berlin, 19 Nov 1933; *d* Hausham, 20 Sept 1990). German guitarist. Although his father, a skilled guitarist, encouraged him, he was virtually self-taught. At 16 he entered the Klindworth-Scharwenka Conservatory to study the piano, composition and conducting, but gradually the guitar claimed his attention. He made his début in Leipzig in 1952 and then gave recitals throughout Germany. He toured Italy in 1954, Spain in 1956, the USSR in 1958, and in 1958–9 made the first of many world tours. He gave an annual masterclass at Rosenburg Castle, and also conducted in Germany. Behrend was specially distinguished in contemporary and avant-garde music: Becker, Bussotti, Castelnuovo-Tedesco, Haubenstock-Ramati, Logothetis, Penderecki and Yun composed works for him, many of which he recorded. He was the most renowned German guitarist of his generation.

PETER SENSIER/GRAHAM WADE

**Behrens, Hildegard** (*b* Varel, nr Oldenburg, 9 Feb 1937). German soprano. She studied in Freiburg, making her début there in 1971 as Mozart's Countess. She then sang at Düsseldorf and Frankfurt in roles including Fiordiligi, Agathe, Elsa, Eva, Kát'a, and Marie (*Wozzeck*). In 1976 she made her début at Covent Garden as Leonore (*Fidelio*) and at the Metropolitan as Giorgetta (*Il tabarro*). She sang Salome at Salzburg (1977) and Brünnhilde at Bayreuth (1983–6). Her repertory also includes Electra (*Idomeneo*), Tosca, Senta, Isolde, Donna Anna and Strauss's Electra, which she first sang at the Paris Opéra (1986). Behrens sang Emilia Marty (*The Makropulos Affair*) at Munich (1988) and Senta at Savonlinna (1989) and the Metropolitan (1992). At the Vienna Staatsoper (1992–3) she sang Brünnhilde in a *Ring* cycle and Katerina Izmaylova (*Lady Macbeth of the Mtsensk District*), a role she repeated at Munich in 1994. A highly intelligent singer with a rich, warm-toned voice, she excels in Wagner and Strauss. Her extensive discography includes an impassioned Isolde with Bernstein, Salome with Karajan, Strauss's Electra with Ozawa and Brünnhilde in the complete recording of the *Ring* under Levine.

ELIZABETH FORBES

**Behrens, Johan Diderik** (*b* Bergen, 26 Feb 1820; *d* Kristiania [now Oslo], 29 Jan 1890). Norwegian choral conductor and singing teacher. He was a theology student before

being appointed singing teacher at the Christiania Latinskole in 1846. He became a pioneer in men's choral singing in Norway. At Christiania in 1845, together with Hartvig Lassen and Johan Hals, he founded the Norwegian Student Choral Society, which he conducted from 1849 to 1889; in 1847, also at Christiania, he formed a similar society for merchants, the Mercantile Choral Society, which he conducted until 1887; and in 1848 he established the Artisans' Choral Society, of which he was conductor until 1854. In 1875 he founded still another society, Johaniterne, and conducted it until 1887. At Behrens's initiative the first Norwegian choral festival was held in Christiania in 1849; and he was also responsible for song festivals in Asker (1851), Horten (1853), Halden (1856), Arendal (1859) and Bergen (1863). Each summer from 1866 to 1873 he organized singing courses for teachers at state schools. From 1887 to 1890 he taught church singing and chanting at the University of Kristiania.

Behrens's editions of songs for men's choirs had great influence in Norway, especially the *Samling af flerstemmige mandssange* published between 1845 and 1882; it contains about 500 pieces by most of the Norwegian composers of the time, some written specially for the collection, as well as folktunes and music from other countries, both in original form and in arrangement. Behrens was himself responsible for some of the arrangements and texts. His other publications include *Skolesangbog* ('School songbook', 1850–73) and *Sanglaere for folkeskolen* ('Singing manual for elementary schools', 1869–73). *Melodibog til norske sangbøger* ('Tunes for Norwegian songbooks', 1876) contains the only eight tunes known to have been composed by Behrens. His thesis, *Om den lutherske salmesang og dens gjenindførelse i den norske kirke* ('Lutheran hymns and their revival in Norwegian churches', 1858), heralded the beginning of a protracted 'hymn war', mainly centring on which rhythmic principles should be used in the new editions of Reformation chorales.

KARI MICHELSEN

**Behrman, David** (*b* Salzburg, 16 Aug 1937). American composer. He studied at Harvard (BA 1959) and Columbia (MA 1963) universities. In 1966 he formed the Sonic Arts Union with Robert Ashley, Alvin Lucier and Gordon Mumma, a group that performed live electronic works throughout North America and Europe until 1976. During the late 1960s, he produced Music of Our Time for Columbia Masterworks, a series featuring music by John Cage, Pauline Oliveros, Steve Reich, Terry Riley, Henri Pousseur and others. He toured as a composer and performer with the Merce Cunningham Dance Company from 1970 to 1976. Works written for this collaboration include *For Nearly an Hour* (1968), *Voice with Melody-Driven Electronics* (1975) and *Interspecies Smalltalk* (1984). He has served as co-director of the Center for Contemporary Music, Mills College (1975–80), and taught at Ohio State University, Rutgers University and the California Institute of the Arts. In the 1980s he designed educational music software as a consultant for Children's Television Workshop. His awards include grants from the Japan-United States Friendship Commission (1987–8), the Foundation for Contemporary Arts Individuals (1995) and the New York Foundation for the Arts (1996).

From the mid-1970s Behrman's compositions have included live performers who interact with computer-controlled music systems. Works in this genre include *Refractive Light* (1991), *Unforeseen Events* (1991), *QSRL* (1994–7) and *My Dear Siegfried …* (1996). His sound installations, among them *Cloud Music* (1974–9), *Algorithme et kalimba* (1986), *A Map of the Known World* (1987) and *In Thin Air* (1995–7), have been exhibited at the Whitney Museum, New York, the Museum of Contemporary Art, Chicago, the Technology Museum, Paris and other institutions.

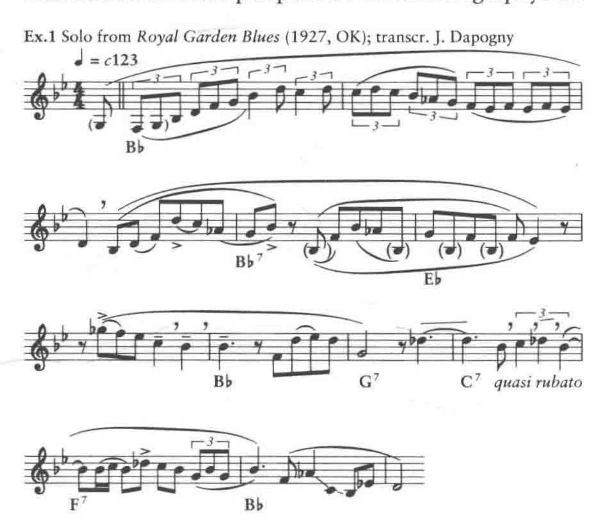
JOAN LA BARBARA

**Beiaard** (Dut.). *See* CARILLON.

**Beiderbecke, (Leon) Bix** (*b* Davenport, IA, 10 March 1903; *d* New York, 6 Aug 1931). American jazz cornettist. As a boy he had a few piano lessons, but he was self-taught on cornet and developed an unorthodox technique by playing along with recordings. His family disapproved of his interest in jazz, and sent him in 1921 to Lake Forest Academy, but the opportunity to play and hear jazz in nearby Chicago caused frequent truancy and eventually his expulsion. After several months working for his father in Davenport he turned to a career in music. Based in Chicago, he became known through his playing and recordings with the Wolverines in 1924. In the same year he began a long association with Frankie Trumbauer, recording with him in New York under the pseudonym of the Sioux City Six; after working with Jean Goldkette's dance band (1924), he played with Trumbauer's group in St Louis (1925–6). His association with Trumbauer broadened his musical experience and improved his music reading, in which, however, he was never to become adept. In late 1926 he and Trumbauer joined Goldkette, and were prominent members of his group in New York until it disbanded in September 1927. They then joined Paul Whiteman's band, with which, and with various groups under their own names, they made a series of influential recordings, notably *Singin' the Blues* and *Riverboat Shuffle* (both 1927, OK), issued under Trumbauer's leadership. Beiderbecke's alcoholism caused his health to deteriorate and he was frequently unable to perform. He left Whiteman in September 1929 and his hopes of rejoining the group after recuperation were not realized. Until his death he worked in New York, in a radio series, with the Dorsey Brothers a few times, with the Casa Loma Orchestra and with Benny Goodman.

From relatively undistinguished influences Beiderbecke developed a beautiful and original style. His distinctive, bell-like tone (his friend Hoagy Carmichael described it as resembling a chime struck by a mallet) achieved additional intensity through his unorthodox fingering, which often led him to play certain notes as higher partials in lower overtone series, imparting a slightly different timbre and intonation to successive pitches. With his basically unchanging tone as a foil, Beiderbecke relied for expressiveness on pitch choice, pacing and rhythmic placement (as opposed to Louis Armstrong, who systematically used variety of timbre). Beiderbecke played and composed at the piano throughout his working life; *In a Mist*, *Flashes*, *Candlelights* and *In the Dark* (his published piano compositions), in their use of pandiatonicism, whole-tone scales and parallel 7th and 9th chords, reflect his interest in impressionist harmonic language. However, his work on cornet, nearly always in settings over which he had no control, had to conform to the harmonic usages of contemporary jazz and popular music. His playing was largely diatonic and made sparing use of non-diatonic 9ths and 13ths as well as the lowered 3rds and 7ths common in jazz. By avoiding harmonically functional chromatic pitches his improvisations often seemed to transcend the ordinary harmonic progressions of their accompaniment without contradicting them, as his solo on *Royal Garden Blues* (1927, OK; ex.1) shows. This characteristic, together with his unique timbre, gave his work a restrained, introspective manner and often set his playing apart from its surroundings.



Beiderbecke's originality made him one of the first white jazz musicians to be admired by black performers;

*Bix Beiderbecke*

Louis Armstrong recognized in him a kindred spirit, and Rex Stewart exactly reproduced some of his solos on recordings. Beiderbecke's influence on such white players as Red Nichols and Bunny Berigan was decisive. Although he was largely unknown to the general public at the time of his death, he acquired an almost legendary aura among jazz musicians and enthusiasts; on account of such popularized accounts as Dorothy Baker's novel *Young Man with a Horn* (Boston, 1938), based very loosely on his life and career, he soon came to symbolize the 'Roaring Twenties' in the popular imagination. Only towards the end of the 20th century did legend and fact become clearly separated and Beiderbecke's career and achievement become seen in a true perspective. The film biography *Bix:*

JAMES DAPOGNY/J. BRADFORD ROBINSON

**Beijerman-Walraven, Jeanne** (*b* Semarang, Java, 14 June 1878; *d* Arnhem, 20 Sept 1969). Dutch composer. She studied harmony and composition privately with Frits Koeberg in The Hague. Her first compositions belong to the late Romantic tradition, showing the influence of Mahler, Bruckner and Franck. The Concert Overture is a robust, solidly constructed work, which opens with martial horn motifs and is rich in contrasting moods. The string quartet, with long, lyrical lines, is cyclic in that it closes with the opening motif of the first movement. Her love of Dutch and French poetry inspired a sizeable number of compositions. She gradually developed her own style, characterized by the alternation of bold, muscular gestures with more delicate effects, and later turned to a more contemporary Schoenbergian, atonal language. Her mature works are strongly Expressionist, often based on the development of a single motif with short violent drives towards a climax. In spite of the recognition it gained from influential Dutch musicians, her work was rarely played after the 1920s. Until her death she remained deeply interested in contemporary music by Stockhausen, Dallapiccola, Nono, Boulez, Messiaen and others.

HELEN METZELAAR

**Beijing** [Peking]. Capital city of China. With a recorded history of some three millennia, Beijing has been one of China's principal centres since its selection as imperial capital by the invading Mongols in the late 13th century. Capital for much of the intervening seven centuries, Beijing has been an important location for many genres of Chinese music, including court music, religious music, theatrical and ballad-singing forms and, more recently, Western and Western-influenced styles.

Perhaps foremost among the traditional musical forms closely associated with Beijing is Beijing opera, formed in the late 18th century as a combination of operatic styles from south and central China. Troupes from outside the capital visited Beijing to take part in imperial celebrations; the best of these troupes then stayed on, establishing schools for the training of young actors and adopting aspects of the music, repertory and performance style of other incoming ensembles. A second significant tradition form particularly identified with Beijing is the local style of narrative singing *jingyun dagu*, sometimes translated as Beijing drumsinging, which arose during the mid-19th century. The teashop-theatres at which these genres were performed were concentrated in the Qianmen district of Beijing, an area to the south of the Imperial Palace in central Beijing.

The modern city of Beijing has all the musical institutions of the capital of a major centrally planned nation. Many of the country's leading state ensembles are located in Beijing, and troupes and orchestras from other parts of China and further afield visit the city regularly. Beijing is also the home of important musical instrument factories, the principal centre for China's national radio and television broadcasting services (which employ many musicians), and the main site of studios for its emergent rock music industry. The head offices of China Records (Zhongguo Changpian) and China's main music publishing company, the People's Music Publisher (Renmin Yinyue Chubanshe), are based in Beijing.

Tertiary music education in Beijing dates from the 1920s, with the formation of a Music Training Institute attached to Beijing University in 1922. The curriculum included both Western art music and historical and contemporary Chinese genres, although the majority of students specialized in Western music theory or performance. The Institute closed in 1927 when its funding was cut, but similar courses were inaugurated at several teacher training universities, and some private music schools were also opened. Two music conservatories are presently of particular note, the Central Conservatory of Music (Zhongyang Yinyue Xueyuan) and the China Conservatory of Music (Zhongguo Yinyue Xueyuan). The Central Conservatory (founded in Tianjin in 1950) moved to Beijing in 1958. Its original set of four departments (composition, orchestra, piano, opera-voice) was gradually expanded to seven (the above plus conducting, musicology and national instruments). There is also a research institute and a scholarly journal. Most students follow four- or five-year degree programmes. In 1986 there were some 560 students (including approximately 100 postgraduates) at the Central Conservatory, and another 368 at the special primary and secondary schools attached to the conservatory. Staff numbered 668. The China Conservatory of Music (founded 1964) concentrates on Chinese music, and is again fed by a special secondary school for musically gifted students. Other than its five departments (composition, instrumental music, music education, musicology, opera-voice) the China Conservatory supports an experimental instrumental ensemble, a research institute and the journal *Zhongguo yinyue* ('Music in China'). There are also specialist schools or departments in Beijing for dance, traditional drama and military music, and recently music courses have been added to several of Beijing's universities. Music education is taught at several teacher-training universities.

A further centre for music scholarship in Beijing is the Music Research Institute of the Chinese Academy of Arts (Zhongguo Yishu Yanjiuyuan Yinyue Yanjiusuo),

founded in 1954 under the leadership of music historian Yang Yinliu. The Music Research Institute publishes various scholarly materials (including the journal *Zhongguo yinyuexue*) and maintains an extensive library of written materials and recordings, many of which are of historical importance. There is also a collection of new, old and reconstructed ancient instruments.

Scholarship also takes place under the auspices of various bodies, including the Chinese Musicians Association (Zhongguo Yinyuejia Xiehui). Other than staging conferences, this association publishes journals covering the fields of musicology (broadly defined), music education and composition. Of these, *Renmin yinyue* is well known abroad, particularly for its sensitivity to the political currents of the day.

The rise of Western-style performance ensembles in Beijing has paralleled the growth of the music conservatories and the broadcasting industry. Although there were student orchestras at some of the educational institutions of the 1920s and 30s, it was from the late 1930s onwards that large-scale professional ensembles began to develop. Important performance ensembles in contemporary Beijing include the Central Ballet (Zhongyang Baleiwutuan), Central Opera Theatre (Zhongyang Gejuyuan), Central Song and Dance Ensemble (Zhongyang Gewutuan), Central Minorities Song and Dance Ensemble (Zhongyang Minzu Gewutuan), Central Traditional Orchestra (Zhongyang Minzu Yeutuan), China Opera Theatre (Zhongguo Gejuyuan), China Broadcast Traditional Orchestra (Zhongguo Guangbo Yishutuan Minzu Yuetuan) and Central Philharmonic (Zhongyang Yuetuan). Many of these are large organizations, the Central Philharmonic, for instance, including a professional chorus, a team of instrumental and vocal soloists, staff composers as well as a large symphony orchestra. Since the mid-1980s direct government funding has not always kept pace with inflation, and salaries have fallen in real terms. This has led some musicians to seek work in hotel lobbies or bars, while others have taken posts abroad, moved into private teaching or given up music altogether.

Beijing is additionally one of China's centres for the production of popular music. Genres prominent there include state-promoted light music (*tongsu yinyue*) and karaoke. There is also a small rock community, among whom the musician Cui Jian achieved international prominence during the 1980s.

**Beijing opera.** Beijing opera, still referred to by many English-speakers as Peking opera, is one of the most highly developed and best known of Chinese opera forms both in China and abroad. Before the 20th century, Beijing opera was not commonly performed outside of Beijing and a few other centres. Its enormous popularity in the early 20th century, however, carried it to the status of 'national opera'.

1. History. 2. Music.

1. HISTORY. Following a long-observed custom of including opera in birthday celebrations, opera troupes from around China poured into the capital to take part in the celebrations for the Qianlong Emperor's 80th birthday in 1790. Among the theatrical participants were troupes from Anhui province in central-eastern China, who specialized in the performance of the *xipi* and *erhuang* music. *Xipi* and *erhuang* came to form the core of Beijing opera music, and it is believed that 1790 marks the first time that they were heard together in Beijing. Historians, therefore, take this year to represent the beginnings of Beijing opera. It was many years, however, before the opera evolved into an independent form with its own unique identity.

Despite an official ban in 1798, the new opera prospered in Beijing. By the 1820s four of the Anhui troupes dominated the stage: the Sanqing, Chuntai, Sixi and Hechun. Two of these, the Chuntai and Sixi, survived until the Boxer uprising in 1900.

Before 1860, the imperial court scorned Beijing opera as a vulgar entertainment, but in July of that year both the Sanqing and Sixi companies were invited to perform at the palace on the occasion of the Xianfeng Emperor's 30th birthday. This event indicates that in spite of its status as a lowly form of popular entertainment, some members of the imperial family were quite fond of Beijing opera. For various reasons, troupes from outside the palace did not appear at court again until the celebration of the dowager empress Cixi's 50th birthday in 1884. While her role in China's general history is typically viewed unfavourably, the dowager empress's contribution to the development of Beijing opera was enormous. Before her reign, most opera at court was performed by special companies that rarely performed outside the palaces. From 1884 to 1910, actors from the city frequently visited the palace, and some actors even took up residence at court, where they taught and performed. Imperial patronage raised the status of Beijing opera in society as a whole.

The early decades of the 20th century may be considered Beijing opera's golden age, with the art form being one of the most pervasive and popular types of entertainment in China. Until the outbreak of war with Japan in 1937, the tradition remained extremely vital, with its practitioners actively involved in artistic experimentation and creative activity. The work of actors, musicians and librettists of the early republican period remain unsurpassed in terms of volume, innovation and longevity. Many of the schools of performance (*liupai*) developed during this period continue to dominate contemporary practice, and a large portion of today's standard repertory is comprised of works created during these years.

The composition of a single opera involved not only a librettist but also (of equal importance) musicians, who set the text by adapting melodies from the *pihuang* musical system, and actors, who were involved in shaping melodic and textual construction in addition to designing

*1. Performance in a Beijing theatre, 1930s*

their individual choreographies. All of the major actors of the period were involved in the composition of new operas and the revision of old ones. The works that they created are still identified as belonging to their school of performance. For example, the operas of four male performers of young female roles, MEI LANFANG (1894–1961; fig.2), Cheng Yanqiu (1904–58), Xun Huisheng (1900–68) and Shang Xiaoyun (1900–76), known collectively as the four famous *dan* (*sida mingdan*), continue to be widely staged and their performance styles closely imitated.

That Beijing opera held a relevant and dynamic role in society is demonstrated by the hopes of social activists, who viewed it as a potentially powerful vehicle for social and political change. The Beijing Opera Reform Movement, at its height from approximately 1908 to 1917, was just one of many such campaigns aimed at social and political reform. Activists believed that the theatre served as a classroom for the largely illiterate masses and that the most expedient way to achieve broad social change was through opera. To this end, progressive performers staged new operas called *shizhuang jingju* (contemporary-costume Beijing opera), the texts of which often focussed on contemporary social problems. The staging of these dramas employed realistic scenery and stage properties, and actors wore costumes based on contemporary clothing styles. The enthusiasm for this use of Beijing opera began to wane by the onset of the May Fourth Movement in 1919 as activists turned their attention away from opera and towards spoken drama.

Following changes in attitudes towards women in society at large, females began to assume roles on the stage during the early republican period. Women had hitherto been virtually excluded from the theatre, both as performers and spectators. A number of all-female troupes were active in the early 1900s, but they performed mostly at private gatherings and not in public theatres. There were a number of mixed companies throughout the 1920s and 30s, but the practice of keeping single-sex companies did not die out until after the establishment of the People's Republic of China in 1949.

Foreign tours of Beijing opera represent another milestone of the republican era. Mei Lanfang's 1930 tour to the United States gained the greatest acclaim. Mei toured more than five major cities, where his performance received rave reviews. Other early tours include Mei's 1919 and 1924 visits to Japan and his 1935 visit to the Soviet Union, as well as Cheng Yanqiu's tour to the Soviet Union, Germany, France and Italy in 1932 and 1933.

The War of Resistance against Japan (1937–45) brought a significant disruption to the performance and creation of Beijing opera. A number of China's finest

*2. Mei Lanfang as Du Liniang and Yu Zhenfei as Liu Mengmei in a film version of the Mudan Ting story "Youyuan jingmeng", 1957*

artists refused to perform, and some training schools were closed. Creative teams such as that of Mei Lanfang and Qi Rushan (1877–1962), one of Mei's most prolific librettists and artistic advisors, were broken by the circumstances of war and never reunited.

After the establishment of the People's Republic of China, the communists reformed Beijing and other operas according to the ideology of Mao Zedong. Mao saw all art as representing the interests of a particular class and demanded that Beijing opera should serve the 'workers, peasants and soldiers', not the feudal aristocracy or bourgeoisie. Art should be explicit propaganda for the revolution and should help to convert the masses to socialism. To see that practice was brought in line with theory, the Ministry of Culture set up a Drama Reform Committee in July 1950. The reformers made certain changes to the texts and performance conventions to emphasize patriotism, democracy and equality between the sexes. At the same time, they developed a body of modern Beijing operas on contemporary themes.

The status of actors improved tremendously with the Communist party's efforts to eliminate institutionalized discrimination against actors, to raise their living standard and to promote the notion that theatre workers are due the same respect as other 'brain workers'. Training methods also changed, and actors were recruited by a modern school system that included normal education in addition to instruction in the arts of the theatre.

Until 1963 traditional opera flourished, although particular patriotic or anti-feudal items enjoyed special prestige. From 1964 traditional operas virtually disappeared; during the Cultural Revolution (1966–76) they were strictly banned and replaced by 'model operas' (*yangbanxi*), the themes of which were contemporary and revolutionary, with realistic staging and costumes. After the fall of the 'Gang of Four' in 1976 the performance of model operas was halted, and the traditional repertory slowly reclaimed its place on the stage; in 1978 Deng Xiaoping publicly condoned the revival of traditional opera.

During the 1980s and 90s many social, political and economic forces combined to threaten Beijing opera's prospects of continuing as a living tradition. With economic reform, the state has withdrawn substantial funding from both professional companies and training schools. Box office sales are now directly responsible for a much greater portion of a company's funding than in previous decades. This change has come precisely at a time when young people's interest in the traditional arts is declining and audiences for them are growing old and dying.

Beijing opera in Taiwan experienced a significantly different history from that in mainland China. Performers who fled to the island in the late 1940s formed the foundation of Taiwan's tradition. Beijing opera's primary patron from 1949 until the mid-1990s was the Republic of China's Ministry of Defence, which operated a number of full-time troupes and training schools. The art form became known officially as 'National Opera' (*guoju*) in Taiwan, and it was more or less maintained in the 'traditional' pre-1949 performance style throughout the mid-1980s. As the move towards 'Taiwanization' has gathered strength on the island, support for mainland-derived culture has come under attack, while official patronage for Taiwan-born forms, such as Gezai opera, has increased. In 1996 the Ministry of Defence disbanded

its remaining three troupes and relinquished control of its last training school. Currently there are two state-supported troupes, both under the administration of the Ministry of Education: the Guoguang Drama Troupe and the Fuxing National Opera School.

2. MUSIC. Most traditional Beijing opera music belongs to either the *xipi* or *erhuang* tune families. The combination of these two families was so integral to the opera's identity that in the past, before it was called Beijing opera (*jingxi* or *jingju*), the genre was known as *pihuang* opera (*pihuangxi*), combining the *pi* from *xipi* and the *huang* from *erhuang*. Music of other regional operas was also absorbed into Beijing opera, including melodies from *kunqu* and clapper opera, but *pihuang* music remained dominant.

*Xipi* and *erhuang* may be conceived of as modes, and together they are referred to as the *pihuang* musical system. While they share the same basic scale, their cadential pitches are different, as are other crucial melodic and rhythmic features. Their dramatic associations are also distinct; *erhuang* is typically used in serious or melancholy situations, while *xipi* is heard in livelier, more positive circumstances. These associations are extended to the timbre of the accompanying instruments: *jinghu* (bowed fiddle) with bright timbres accompany *xipi*, while players use a dark-sounding *jinghu* with a slightly larger body to accompany *erhuang* arias.

Both *xipi* and *erhuang* have a number of different aria types. Aria types belonging to the same family share tonal, modal and large structural features but vary in terms of metrical structure, tempo, melodic detail and specific dramatic or emotional association. One prominent theory holds that these distinct aria types were evolved from a single 'mother' tune. Across generations of performance, the original tunes underwent permanent and lasting changes and, over time, developed unique musical identities and were given individual names. Today, for example, the *erhuang* family is comprised of at least eight different aria types, including the unmetred *sanban* (dispersed metre) and *daoban* (lead-in metre), and the metred *yuanban* (primary metre) in a moderate 2/4 and *manban* (slow metre) in 4/4.

The number of *pihuang* aria types has been growing continually over the course of the history of Beijing opera. Since 1949 several new aria types have been created, such as the new *erhuang* aria types in 1/4 metre, including *liushuiban* ('flowing-water metre') and *kuaiban* (fast metre), and recent experiments in 3/4 metre. Since the Cultural Revolution the use of composed music that is not directly related to the *pihuang* musical system has become increasingly common. Often this music is purely instrumental and is used for overtures or as background music. The question of genre identity is brought into play when this music is sung and when it constitutes a large portion of an opera's music.

Purely percussive music constitutes another important kind of Beijing opera music. Percussion patterns punctuate the actors' speech and movement, provide sound effects and mark the structural divisions of an opera including its beginning, ending and scene changes.

The traditional orchestra is comprised of two main sections, the *wenchang* ('civil section') and the *wuchang* ('martial section'). The core *wenchang* instruments are *jinghu*, *jing erhu* and *yueqin*. The *jinghu* and the *jing erhu* are two-string bowed lutes and belong to a family of bowed lutes known as HUQIN. The *jinghu* has a bamboo body, whereas the *jing erhu* body is hexagonal and made of wood (*pterocarpus*); both are covered on one end in snakeskin. The timbre of the *jinghu* is sharp and piercing, in contrast to the more mellow and sonorous *jing erhu*, which is an octave lower. The *jing erhu* was added to the orchestra in the 1920s to complement Mei Lanfang's bright and clear voice and, in traditional performances, is only used to accompany female and young male roles. The *yueqin* is a plucked short-neck lute with a large round body and two to four strings. Other instruments include the *suona*, a conical double-reed shawm with a rosewood body and a metal bell, and the *sanxian*, a three-string long-necked plucked lute.

Four players form the core of the *wuchang*. The leader plays both the drum called *danpigu* and the clappers and is responsible for leading and signalling the entire ensemble. The *danpigu* is a small, single-headed drum that sits on a large three-legged stand and is played with bamboo sticks. A small gong, a large gong and a pair of cymbals comprise the rest of the *wuchang*, although other musical instruments may also be added when dramatically or musically appropriate.

The orchestra was gradually expanded after the establishment of the People's Republic. Up to the mid-1960s, the main source of these new inclusions was China's own folk and classical instruments. During the Cultural Revolution a wide variety of Western instruments were added, including strings, oboe, french horn, trumpet and timpani. Most of these were dropped from the ensemble after the Cultural Revolution, though the cello is still frequently heard. The double bass, timpani and electric piano are also commonly employed in works written during the 1980s and 90s.

NANCY GUY

**Beinum, Eduard (Alexander) van** (*b* Arnhem, 3 Sept 1900; *d* Amsterdam, 13 April 1959). Dutch conductor. Having studied composition (with Sem Dresden), the viola and the piano, he became conductor of the orchestra in Haarlem in 1927 and a keen advocate of contemporary Dutch music. He made his début as a pianist with the Concertgebouw Orchestra in 1920, and in 1931 was appointed its second conductor, later becoming associate conductor and, in 1945, Mengelberg's successor. He not only maintained the high standard of the orchestra but became internationally the best known of Dutch conductors. While in London to discuss the impending visit of the Concertgebouw, he made an unexpected first appearance (deputizing for the indisposed Albert Coates) as conductor of an LPO concert at the Stoll Theatre in 1946. After further guest engagements with the LPO he became its principal conductor (1949–51), while retaining the Concertgebouw post. He developed a warm relationship not only with the orchestra but also with his London public. He encouraged Malcolm Arnold, the LPO's first trumpet, as a composer, and conducted the first recording of a work by Arnold, the overture *Beckus the Dandipratt*. He championed Britten and with the Concertgebouw gave the first performance of the *Spring Symphony* (Amsterdam, 1949). Beinum had already been a guest conductor with the Leningrad PO (1937) and other orchestras, when in 1954 he made his first appearance in the USA conducting the Philadelphia Orchestra. Later that year he toured the USA with the Concertgebouw, and in 1956 became musical director of the Los Angeles PO, while maintaining his Amsterdam conductorship. Beinum was admired for his sincere interpretation of a considerable repertory. He was particularly committed to Dutch music, and the composers Hendrik Andriessen, Badings, Henkemans and Orthels, among others, benefited from his attention. An Eduard van Beinum Foundation was established after his death.

ARTHUR JACOBS/CHARLES BARBER

**Beissel** [Beisel], **(Georg) Conrad** [Konrad] (*b* Eberbach, 1 March 1691; *d* Ephrata, PA, 6 July 1768). American composer of German birth. He was baptized into the Calvinist faith as Georg (not Johann) Conrad on 4 August 1691. He found himself in conflict with the church authorities because of his religious views, and in 1720 he emigrated to America, where he established and administered a Protestant monastic society at Ephrata, Pennsylvania, in 1732, basing it on austere self-denial, celibacy and pious simplicity (*see* EPHRATA CLOISTER). Beissel was called Father Friedsam by the community, although his preaching was strict and his demeanour not always peaceful. He is recognized as one of America's earliest composers, and the *Turtel-Taube*, containing works of Beissel and his followers, was the first book of original hymns published in the colonies. His '*Verrede* über die Sing-Arbeit', published as a foreword to the *Turtel-Taube*, was the first on the subject written in America.

Beissel's hymns are chorales in which a melody is adapted to a metrical, rhyming poem and the harmony is organized without traditional use of a bass line; this results in many inversions and awkward progressions. His anthems are settings of portions of scripture with much use of antiphony. Rhythmic stress is organized according to the accent of the words; the chorales were set in four to seven parts, the tenor always being sung by women. In addition to the Ephrata hymnals, Beissel's compositions also appeared in hymnals published (in 1730, 1732 and 1736) by Benjamin Franklin in Philadelphia, and in 1739 Christopher Sauer issued his *Zionitischer Weyrauchs Hügel*, a large collection of hymns and other verse (including some by European authors), in Germantown, Pennsylvania.

WORKS

Das Gesäng der einsamen und verlassenen Turtel-Taube (Ephrata, PA, 1747)
Paradisisches Wunder-Spiel (Ephrata, PA, 1754)
Hymns in: Göttliche Liebes und Lobes gethöne (Philadelphia, 1730); Vorspiel der Neuen-Welt (Philadelphia, 1732); Jacobs Kampff- und Ritter-Platz (Philadelphia, 1736); Zionitischer Weyrauchs Hügel (Germantown, PA, 1739); Nachklang zum Gesäng der einsamen Turtel-Taube (Ephrata, PA, 1755); Neuvermehrtes Gesäng der einsamen Turtel-Taube (Ephrata, PA, 1762)

RUSSELL P. GETZ/R

**Bek, Josef** (*b* Úsov, Moravia, 5 Dec 1934). Czech musicologist. He studied musicology with Jan Racek and Bohumír Štědroň and aesthetics with Mirko Novák at Brno University (1952–7), where he graduated with a dissertation on Czech secular folksong in the 16th and 17th centuries (*Česká světská píseň lidová v XVI. a XVII. století*). After his studies he worked in Olomouc, Brno and Prague until 1964, when he joined the Musicology Institute of the Czechoslovak Academy of Sciences. Initially he was a research fellow and then scientific secretary; after the institute's reorganization (1972) he became head of the musicology section and then deputy director (1974–90). He took the doctorate at Prague in

1969 with a dissertation on international music of the 20th century and the CSc in 1972 with a study of Czech music's international relations in the years 1918–38. From 1972 he taught part-time at the Prague University musicology department and was made university *docent* in 1982. He was awarded the DSc in 1987.

During the period 1960–90 Bek was a prominent Czech writer on music of the first half of the 20th century. From a secure, party-based position at the Academy of Sciences and, as assistant (1971–4) and subsequently deputy chief editor (1974–90) of its journal *Hudební věda*, he helped ensure that modern trends and their Czech manifestations were a frequent preoccupation in its pages. The lavishly-produced history of Czech music 1918–45 (*Dějiny české hudební kultury*, 1981) was written as a team work during his tenure at the academy; he was a major contributor and adviser. After the fall of the communist government he left the academy. His subsequent writings have concentrated on the music of the German-Czech composer Ervín Schulhoff.

JOHN TYRRELL

**Békésy, Georg von** (*b* Budapest, 3 June 1899; *d* Cambridge, MA, 13 June 1972). Hungarian acoustician. He studied at the universities of Berne and Budapest, where he took the PhD (1923). He taught at the University of Budapest until 1947, and was engaged in research with the Hungarian telephone service concerning the mechanical behaviour of the ear, work which led to a revision of the theory of hearing. He later worked on physiological acoustics at Harvard University, and is the only acoustician to have obtained a Nobel Prize. Békésy studied the acoustics of the ear, sometimes by direct microscopic observation through tiny holes bored into the bony wall of the cochlea. He made fundamental discoveries about the operation of the inner ear and the way in which it responds to complex sounds; these discoveries are described with great lucidity in his book *Experiments in Hearing* (New York, 1960).

R.W.B. STEPHENS/CLIVE GREATED

**Bekker, Dietrich.** *See* BECKER, DIETRICH.

**Bekker, (Max) Paul (Eugen)** (*b* Berlin, 11 Sept 1882; *d* New York, 7 March 1937). German critic and writer on music. He studied the violin with Rehfeld, the piano with Sormann and theory with Horwitz. After working as a freelance violinist in Berlin and as a conductor at Aschaffenburg (1902–3) and Görlitz (1903–4), he became music critic of the *Berliner neueste Nachrichten* in 1906; in 1909 he moved to the *Berliner allgemeine Zeitung* and in 1911 became chief critic of the *Frankfurter Zeitung* (1911–23). Bekker's position was an influential one, and he took full advantage of it, helped by his brilliant style and his extensive theoretical and practical knowledge. He was a judicious advocate of Mahler, Schoenberg and Schreker, but less enthusiastic about Strauss and Berg. Pfitzner attacked Bekker in *Die neue Aesthetik der musikalischen Impotenz* (1920); in that same year Busoni formulated his aesthetic of 'Junge Klassizität' in his correspondence with Bekker, parts of which were published in the *Frankfurter Zeitung*.

In 1925 Bekker was able to realize a longstanding ambition to direct an opera house when he became Intendant at Kassel; he held a similar position at Wiesbaden from 1927 to 1932. Through his theatre activity, which included stage direction, Bekker undertook ambitious revivals including seldom-heard works by Berlioz, Boieldieu, Cimarosa, Dittersdorf, Grétry and Weber, as well as premières, world and local, of works by, among many others, Alfano, Busoni, Casella, Castelnuovo-Tedesco, Delius, Hindemith, Korngold, Krenek, Milhaud, Pfitzner, Schoenberg, Schreker, Strauss, Stravinsky, Stephan and Weill. In 1933 Bekker, whose father

was Jewish, left Germany and settled in Paris, where he wrote for the *Pariser Tageblatt*. At the end of 1934 he emigrated to New York and became chief music critic for the *New Yorker Staats-Zeitung*. Shortly before his death he completed his first book in English.

Over three decades of critical activity Bekker helped articulate some of the major currents of early 20th-century aesthetic philosophy. In its examination of the poetic idea in Beethoven's music, Bekker's 1911 biography of the composer is a provocative example of historical hermeneutics, while *Das deutsche Musikleben* (1916) is a pioneering work of music sociology that had a demonstrable influence on the work of Adorno and the Frankfurt School. Even while developing the idea of music as a societally formative force (*gesellschaftsbildende Kraft*) in such monographs as *Die Sinfonie von Beethoven bis Mahler* (1918), Bekker began to stake out the principles of a phenomenology of music that became the chief concern of his books and essays of the mid-1920s. This shift in critical focus anticipated certain precepts of neo-classicism and *Neue Sachlichkeit* and influenced the critic's interest in the music of such younger composers as Hindemith, Weill and Krenek (who served as Bekker's assistant in Kassel), although Bekker remained more interested in exploring fundamental principles of musical development and social interaction than in participating in aesthetic debates. Bekker's activities as a theatre administrator influenced the more practical bent of his last books, including his popular surveys *Wandlungen der Oper* (1934) and *The Story of the Orchestra* (1936).

CHRISTOPHER HAILEY

**Bekker, Yakov Davidovich.** *See under* BECKER (i).

**Bekku, Sadao** (*b* Tokyo, 24 May 1922). Japanese composer. He studied physics (graduating in 1946) and aesthetics (1946–50) at Tokyo University, taking private lessons in composition with Ikenouchi from 1944. In 1946, 1947 and 1948 he won prizes in the Mainichi Music Competition, and in 1949, the year he joined the Shinsei Kai, he was awarded the Mainichi Prize. From 1951–1954 he was in Paris, where he studied at the Conservatoire with Milhaud, Messiaen and Rivier. He won both the Mainichi and the Otaka Prizes in 1957 with his Two Prayers for orchestra. He taught composition at the Tōhō Gakuen School of Music (1955–73) and at Chūō University (1973–93), while serving as the chairman of the Japanese branch of the ISCM (1963–79). As a composer he represents a Japanese branch of French neo-classicism, influenced by Messiaen and Rivier. His music tends to be lyrical and melodious, his orchestration sensitive. Early in his career he wrote numerous songs; gradually his interests shifted towards orchestral and chamber music.

MASAKATA KANAZAWA

**Beklemmt** (Ger.: 'oppressed', 'anguished'). An indication of mood whose most famous use is near the end of the cavatina in Beethoven's String Quartet in B♭ op.130.

*See also* TEMPO AND EXPRESSION MARKS.

**Bel, Barthélemy le.** *See* LE BEL, BARTHÉLEMY.

**Bel, Mbilia** (*b* Democratic Republic of the Congo). Central African singer and performer. Formerly a singer with TABU LEY ROCHEREAU's band Afrisa International during the 1980s, Bel began her career as a dancer for Abeti Masekini, an important early singer in the Zaïrean popular tradition. While Bel's earlier performances and recordings, especially those made with Rochereau, are firmly rooted in the heavily guitar-driven Zaïrean SOUKOS and other popular dance traditions, her most recent efforts have embraced more popular African and Western cross-influences and have propelled her high on the international scene. Yet, Bel and her collaborators, such as guitarist Rigo Star and singer Vivick Matou, still draw on the roots, both rhythmic and melodic, of earlier Zaïrean popular musics.

GREGORY F. BARZ

**Belafonte, Harry** [Harold George] (*b* New York, 1 March 1927). American popular singer and actor. He lived in Kingston, Jamaica, for five years (1935–40), returning to New York in 1940. In 1945 he began a career as an actor, having studied in Erwin Piscator's drama workshop at the New School of Social Research. He experienced greater commercial success, however, as a popular singer, making his début at the Royal Roost, New York, in 1949. The following year he rejected his popular song repertory and began to sing traditional melodies from Africa, Asia, America and the Caribbean, which he collected in folk music archives.

Having secured an RCA recording contract in 1952, Belafonte went on to become the most popular 'folk' singer in the USA. His interpretations of Trinidadian calypso music between 1957 and 1959 won him his greatest success and marked the pinnacle of his career. His mass appeal through the 1950s, moreover, enabled him to resume his work as an actor, and he appeared in several films. During the 1960s and 70s his popularity waned, but he continued to record, and to perform in nightclubs and theatres for a predominantly white, middle-class audience. In 1976 and again in 1979 he made world tours, performing his folk-inspired songs for large crowds of dedicated followers.

RONALD M. RADANO

**Belaieff.** Music publishing firm. *See* BELYAYEV, MITROFAN PETROVICH.

**Belamarić, Miro** (*b* Šibenik, Dalmatia, 9 Feb 1935). Austrian composer and conductor of Croatian descent. He studied conducting with Milan Horvat and composition with Šulek at the Zagreb Academy of Music. He continued his studies in conducting with Matačić in Salzburg and Celibidache in Siena. In 1959 he began his career as a conductor, first with the symphony orchestra of Zagreb radio and television, later as chief conductor of the Komedija Theatre and as chief conductor of the Zagreb Opera (1978–90). He was also assistant to Karajan at the Salzburg Festival (1965–8) and to Karl Böhm (1975–7). He has appeared as guest conductor in many prominent opera houses and at many festivals.

As a composer Belamarić aims to combine modern stylistic features with an intelligibility and directness of musical expression, drawing on his considerable orchestral experience in his use of timbre. His first opera, the two-act *Ljubav don Perlimplina* ('The Love of Don Perlimplin'), is neo-expressionist in style, with instrumental preludes based on classical forms and highly refined in sound, in the manner of Alban Berg. Belamarić won first prize in the 1983 Vienna State Opera competition with his second, three-act opera, *Don Juan – ein Rebell für alle Zeiten*.

I. Art music. II. Traditional music.

## I. Art music

1. Byzantino-Gothic origins and the medieval period. 2. Renaissance and Baroque, 1569–1794. 3. From the Romantics to the folklore revival, 1795–1918. 4. Since 1918.

1. BYZANTINO-GOTHIC ORIGINS AND THE MEDIEVAL PERIOD. The cult-songs of the Krïvichï, Radzimichï and Drïhavichï tribes, together with the harp music of the Baltic *skalds* at the court of Rohvalad (Rognvald) of Polatsk, were the earliest forms of musical entertainment in the 10th-century Belarusian principalities. Illuminated manuscripts from the 11th century onwards depict the

trumpets and horns of military bands, as well as the harps and psalteries of the court musicians. Itinerant *skamarokhi* (entertainers) were condemned by St Cyril of Turaw for their pagan ways, but such teams of players, round-dancers and trained animals remained popular with the nobility and people alike. The court painters Andrey z Litvï (*c*1390) and Matsey Dzisyaty (1502) both depicted a standard *capella* as comprising lute, vielle (*skrypitsa*), harp, horn, two natural trumpets, clarinet and drum; no secular music from the Middle Ages, though, appears to have survived.

Following the introduction of Christianity in 989, the cathedrals and choir schools (usually with 3–12 singers) of Polatsk (992), Vitebsk (992), Turaw (1055), Minsk (1073) and Hrodna Smolensk (1101) provided the bulk of early musical notation, based on Byzantine neumatic models (12th-century *Stichiry* to St Euphrosyne, St Raman, St David and other local saints). Among important cantors at Smolensk were Manuil (*fl* 1137), one of three Greek singers in the city, and Senka (15th-century). Under folk influences, particularly after the Mongol invasions of 1245 and the formation of the Grand Duchy of Lithuania and Belarus in the early 14th century, the early znammenïy chant evolved into a variety of Kiev-Lithuanian, *demestvennïy* and local chants (Mir-Slutsk, Vilnia Belarusian and Kutseyna), as recorded in later manuscript compilations (the early 16th-century *Codex peremysliensis*, the Zhïrovitski heirmologion of 1649). The solemn *bolgar* chant has been attributed to the Bulgarian Tsamblak in Navahrudak (1415); later Greek chants were brought by a choir from Constantinople (1588) and recorded by Bohdan Anisimovich of Pinsk in his monumental Supraśl heirmologion (1598–1601).

Latin-rite missionaries (Torvald Vandrownik) also became active in the 10th century in the cities on the trade route from the Baltic to the Black Sea. Gregorian graduals and organs spread throughout Belarus particularly after the dynastic union with Poland in 1386. Professional organists are mentioned in the Lithuanian Statute (1529), and *scholae cantorum* were founded during the 14th century in Vilnius (1320), Ashmyanï, Minsk, Navahrudak and Lida, and during the 15th in Mahilyow (*c*1430), Hrodna, Slutsk, Kletsk, Slonim and Polatsk. Printed chantbooks with staff notation, first introduced at the Reformation by the Calvinists in their *Pieśni chwał Boskich* (Brest, 1558), together with polyphony and *kantïchki* (hymns), became popular with the Greek-rite monastic and confraternity schools. Anisimovich of Pinsk was the first to use this Western notation (1598).

2. Renaissance and Baroque, 1569–1794. In the wake of the Reformation and the presence of the Grand Duchess Bona Sforza (*d* 1558), Western Renaissance music came into vogue: a Lithuanian *Capella*, or chapel royal, of up to 15 players and singers was established in 1543 in Hrodna. In 1586 the English traveller Sir Jerome Horsey found the harpsichord popular at the court of Stephen Bathory in Hrodna and heard at the court of Mikola Radziwiłł, Vajavod of Vilnius, a female choir, which 'came in with sweet harmony and mournful pipes and songs of art; tymbrils and sweet sounding bells'. Elsewhere consorts of viols, woodwinds and clavichords or spinets flourished at the courts of the feudal princes (Drutski, Radziwiłł, Sapieha, Chodkiewicz, Astrozhski), playing madrigals and *kantïchki*, as well as dances, of the type later recorded in the *Polatski sshïtak* ('Polatsk Music-Book', 1680).

Despite the religious wars of the 17th century, Greek-rite cantors were able to compile heirmologia and *bahahlasniki* (hymnbooks) of local chants in Western staff notation: some 70 of these manuscript collections have survived, often richly decorated with miniatures, title pages and headpieces. An early 17th-century *Cherubicon* from Supraśl was composed as a four-part chorale with florid bass and alto runs. Among the compilers were Todar Semyanovich (Supraśl 1638), Tsimafey Kulikovich (Bely Kovel 1652), *inok* Feafil (Supraśl 1662), Parkhomy Patsienka (Slutsk 1669), Hawrïla Aryasanovich (Sava Starawsk 1673), Antoni Kishïts (Supraśl 1674), Kiryl Il'inski (Davïd Haradok 1713), hieromonk Tarasy (Minsk *c*1750), Anton Taranevich (Pinsk 1759), hieromonk Awramï (Holy Ghost Church, Vilnius 1764), Protoarchimandrite Tsimafey Shchurowski (Vilnius, Supraśl 1740–1811) and others.

During the Russian invasions of 1648–67 and 1702–20 half the population of Belarus was massacred or deported to Moscow, the deportees including fashionable singers such as Yan Koklia, Yan Kalenda, Dziak Tyzenhaus, the organist Kazimier Vasiliewski, as well as numerous nuns and choristers. After the Peace of Andrusava (1667), Jesuit academies and schools of music were founded or rebuilt in ravaged Polatsk, Vitebsk, Orsha and Mahilyow. Fine organs by Casparini and others were installed in Minsk (1698), Slutsk (1752) and Hrodna (*c*1770), and played by accomplished organists (Masyazhkowski, Sïmkevich, Fok). Lesser parish churches relied on instrumental groups, which were also available for private functions, and became the nuclei of municipal orchestras in Slonim (1731), Minsk (1739), Pinsk (1742) and elsewhere. Hymns in the Latin and Old Slavonic languages, as well as in Belarusian and Polish were in the 17th and 18th centuries sung in two- or three-part harmony by congregations of both rites during Low Mass. The first printed collection of simpler Belarusian *kantï* was published in 1774 by the Jesuits of Polatsk (*Kantyczka, albo nabożne pieśni w narzeczu Połockim*, 'Divine Songs in the Polatsk Dialect'). Manuscript *bahahlayniki* from this period often contain sophisticated and attractive settings of *kantï*, such as *Ne plach Rakhile* ('Do not weep, O Rachel').

With the return of prosperity in the 18th century, palaces and theatres flourished, church bells were rehung, and the *capellae* of the Belarusian nobility revived to play Paisiello, J.-C. Bach, Gluck, Holland, Jommelli, Haydn, Boccherini, Grétry and Stamitz. The court *capella* (1724–1809) at Nyasvizh (Pol. Nieśwież), which was ruled by Prince Maciej Radziwiłł, himself no mean composer of chamber music, boasted a theatre, a collegiate church choir, a music school and a ballet company of more than 18 dancers. At Slonim the Ogiński (Ahinski) *capella* included up to 53 players and singers, a ballet and a music school; their repertory included keyboard works by the Hetman Michał Kazimierz Ogiński and also three-part Latin masses with organ and instruments preserved at Nyasvizh and Slonim. Other distinguished court *capellae* of the Belarusian nobility flourished at Ruzhanï (Sapieha), Svislach (Tïshkevichï), Savichï (Vaynillovich) and later at Dukora (Ashtorp) and Shklow (Zorich). Court musicians, usually Italian or French (Viotti, Cipriani, Cormier, Durand), also included some Belarusians,

among them the conductors Yan Tsentsilovich and P. Pyotukh, and the violinist Matsey z Karelich. The *capellae* of Hrodna (Tyzenhaus) and Minsk (Zavisha) tended to favour indigenous musical themes; there was also a growing interest in Belarusian folk music.

3. FROM THE ROMANTICS TO THE FOLKLORE REVIVAL, 1795–1918. With the incorporation of Belarus into the Russian empire, a number of the great princely estates were expropriated, their *capellae* disbanded, the Roman Catholic orders and Greek-rite Basilians expelled and their colleges closed. In 1839 the religious union of 1596 was suppressed, and numerous Belarusian songbooks were destroyed. Thereafter vocational education became more readily available in St Petersburg and Moscow than in Warsaw, and professionals gravitated towards the municipal orchestras, musical societies, salons and private schools of Minsk, Vilnius, Brest, Vitebsk, Mahilyow, Babruysk and Hrodna.

Glinka received his basic musical education with his uncle's *capella* near Smolensk, and the originality of many of his orchestral works lies in his use of Belarusian folk motifs. His St Petersburg contemporary Anton Abramovich (1811–57), a pianist from Vitebsk, endeavoured to develop a national style by setting Belarusian poetry and incorporating folk melodies, even a hymn (*O moj Bozha*), into his keyboard suites (*Belaruskiya melodïi*, *Zacharavanaya dudka* and *Belaruskaye vyaselle*).

An important role in 19th-century Belarusian musical life was played by the music schools and salons of the present capital Minsk. Central to their activity was the Minsk City Orchestra (1803–1917), its directors the brothers Dominik (1797–1870) and Wikenty Stefanowicz (*b* 1804) and a number of brilliant local pupils. Born in Ubiel near Minsk to parents connected with the Ashtorp *capella* at Dukora, Moniuszko studied in Minsk with the elder Stefanowicz, and held musical soirées at his family mansion. Other Belarusian-born composers connected with the Minsk circle were Napoleon Orda (1807–83), Florian Miładowski (1819–89) and Michał Jelski, and among noteworthy provincial composers and conductors were I. Dabravolski, L. Skrabetski (Mahilyow) and Yu. Shadurski (Vitebsk), author of a setting of the folkdance *Lyavonikha* from the lost Belarusian operetta *Taras na Parnase*. Many of these became implicated in the 1863 uprising and were imprisoned or obliged to emigrate.

Musical and dramatic societies, as well as high schools, promoted the foundation of orchestras in provincial cities such as Vitebsk (1883), Brest (1885), Mahilyow (1886), Slutsk (1906) and Homel′ (1909), and even more importantly within the Belarusian circle of Vilnius (1910). Repertories reflected a growing sense of national identity. Many churches also had fine choirs, but after the imposition of the Italo-German synodal *obikhod* (1848, 1869) service books, local chants (such as the Minsk, Vilnius, Zhïrovitsï, Białystok and Palesse) and other national forms generally remained unpublished. But the rebirth of a national school of music was stimulated in the latter half of the 19th century by the publication of extensive collections of Belarusian folk music, which throughout the Renaissance, Baroque and Classical periods had never lost its popularity. Native and foreign ethnographers active in this field included Oskar Kolberg and Z. Radčanka. The latter was responsible for the first publication of Belarusian folksongs with piano accompaniment for concert performance (1881).

A new generation of ethnographers, involved in the literary *Nasha Niva* ('Our Cornfield') revival of 1905–16 and having had conservatory training in St Petersburg, Warsaw or Moscow, were instrumental in popularizing polyphonic Belarusian folksong as an art form: this group included K. Halkowski (1875–1963), A. Hrïnevich (1877–1937), N. Churkin (1869–1964), W. Terawsky (1871–1938) and M. Ravenski (1886–1953), and their choral settings formed part of the repertory of the popular First Belarusian Troupe of Ihnat Buynitsky (1907–17). A Holy Liturgy begun in 1898 by another noted folklorist, M. Antsaw (1865–1945) of Vitebsk, heralded the revival of Belarusian church music. A number of published works by A. Turankow, M. Ravenski and later Shchahlow Kulikovich (1893–1969), A. Valïnchïk (1899–1984), M. Butoma (1905–1983), A. Zalyotnew (*b* 1947) and S. Bel′tsyukow, the leading exponents in this field, have proved popular (*Biełaruski Tsarkowny Spewnik* London 1979; 1994). A first modern hymnal of Belarusian Latin-rite hymns, *Kashchelny piesni* (St Petersburg, 1917), was followed by an eponymous collection (Minsk, 1992), and M. Trapashka and other Catholic composers have achieved popularity through the Mahutny Bozha Festival of Church Music in Mahilyow, established in 1993. Comprehensive collections of evangelical hymns in Belarusian have also been published (*Bozhaya lira*, 1930; *Himnï Khrïstsïyan*, 1979).

4. SINCE 1918. The creation of the short-lived Belarusian Republic (1918–19), with a national capital in Minsk, led to the establishment of a ministry of culture, state orchestras, a national opera and ballet and a national conservatory, all staffed and trained initially by qualified teachers from Moscow and St Petersburg. Academies of music were established in Vitebsk (1918, by Antsaw), Minsk (1919), Homel′ (1919, by Turankow) and Babruysk (1921), with classes in composition and performance, generally based on Russian models. After the creation of a Belarusian Soviet Republic in 1919, Belarusian composers shared the experiences of their colleagues elsewhere in the Soviet domains. A celebration was held in Moscow in 1941 to mark the 'first decade' of Soviet music in Belarus, reunited with its western territories formerly under Poland. During the German occupation (1941–4) composers who had avoided evacuation to Siberia were now free from Soviet censorship and turned to patriotic themes; examples include Shchahlow Kulikovich's opera *Usyaslaw the Enchanter* and Turankow's songs. A gradual relaxation of official controls after the death of Stalin in 1953 led to the formation of numerous guild and workshop orchestras, ballet companies, brass bands and choirs throughout Belarus. International tours by some of these, as well as the activities of émigré composers and performers (Ravensky, Shchahlow Kulikovich, Karpovich, Barïsavets, Selakh-Kachansky), helped promote a knowledge of Belarusian music abroad.

20th-century composers of orchestral, chamber and piano music include N. Churkin (*Sinfonietta*, 1925), Ye. Tikotsky (six symphonies, 1927–63; Trombone Concerto, 1934), M. Aladau (Piano Quintet, 1925; ten symphonies, 1921–71), Shchahlow Kulikovich, A. Bahatïrow, L. Abeliyovich (four symphonies, Piano concerto, chamber music), Mdzivani and D. Smol′sky (four symphonies, 1961–86, three concertos for dulcimer and folk orchestra, Violin Concerto, Piano Concerto). Most operatic and choral music was officially sponsored, frequently didactic,

set to warped texts and speedily dated. Best remembered are Antsaw's *Requiem*, Ravensky's *Hapon*, Aladau's *Taras na Parnase*, Bahatïrow's *U pushchakh Palessya*, shchahlow Kulikovich's *Katerina*, Turankow's *Kvetka Shchastse* and more recently Smol'sky's *Sivaya Lyagenda* (1978) and *Frantsisk Skarina* (1980). A younger generation has turned increasingly to national pre-Soviet themes, and adventurous works have been produced by A. Bandarenka (*The Prince of Navahrudak* 1987), A. Litsvinowsky (*Francisco Misterioso* 1989), Ya. Paplawsky (Choral Symphony 'Lux aeterna'), S. Bel'tyukov (*Hravyurï*) and A. Khadoska (Holy Liturgy).

The present discipline and quality of Belarusian choral singing owes much to the work of R. Shïyrma, V. Rowda (State Radio and Television Choir), M. Drinewski (State Academic Folk Choir), I. Matsyukhow (State Chamber Choir) and K. Nasayew (Unia Choir). Outstanding soloists in the past have included the legendary diva Larïsa Alyaksandrowskaya (1904–80) and the tenor M. Zabeyda-Shumitski. From the 1960s, after years of official disfavour, jazz concerts by amateur groups have flourished. A jazz club was founded in Minsk in 1978, and since 1979 an international festival of rock and popular music, 'Slavyansky Bazar', has taken place each year in Vitebsk.

## *II. Traditional music*

1. Song: (i) Ritual song (ii) Non-ritual song. 2. Instruments and instrumental music. 3. Belarusian ethnomusicology.

1. SONG. Although the roots of Belarusian traditional music are ancient, they are maintained in living traditions. The art of singing occupies a central place within these traditions, embracing two historical styles which in turn correspond to different eras. The oldest style, the roots of which go back to old Slavonic times, consists of songs of the calendar and agrarian cycles and those celebrating family rites.

*(i) Ritual song.* Calendrical songs correspond to the four seasons. The winter cycle includes *kolyadki* (carols) and *shchedrovki* (New Year songs), sung during *kolyada* (the festivities of the winter solstice), which, owing to calendar changes, coincides with Christmas. The spring cycle consists of *maslenichnïye pesni* (Shrovetide songs), which are mostly performed on all kinds of swings; incantations and invocations of spring; *volochebnïye pesni* (trailing songs) from the verb *volochit'sya* (to trail about) during which the performers wander about in groups from village to village announcing the approach of spring and later the advent of Easter; *yur'yevskiye* (St George) and *troitskiye* (Whitsunday) songs, including *kustovïye* songs, performed as a *kust* or bush – that is a girl dressed up in greenery – is led through the streets, and *rusal'nïye* songs performed on Whitsunday and Whit Monday. The summer cycle includes *kupal'skiye* songs which are performed at the festivities of the summer solstice; *zhnivnïye* or reaping songs performed when winter crops are gathered in; and *dozhinochnïye* (songs sung for the end of reaping). The autumn cycle includes *yarnïye* songs performed when spring crops are gathered in; *l'novïye* songs sung during the gathering of flax and songs about the autumn season itself. Calendrical and agrarian songs also include spring and summer round-dances and winter game-songs. Themes concerning work, common to all calendrical songs, are interwoven with themes of everyday life and ancient rituals, including personified forms of both nature and the festivity itself, for example, Kolyada, Maslenitsa, Vesna, Kupala and Sporïsh (with a double ear of corn as a personified symbol of fertility).

Family ritual songs include *svadebnïye* (songs for weddings) and *rodinnïye* (songs for births), as well as funeral laments. *Kolïbel'nïye* (lullabies) are also associated with this cycle. *Svadebnïye*, central to family ritual songs, are sung during all stages of the marriage ritual. These songs embody three emotional states: a ritually uplifted and solemn state (the glorification of the young couple and of the ritual bread, a round loaf); a lyrical and dramatic state (including the *devishnik* – the 'Saturday gathering' and the bride's lamentations); and a humorous state associated with ritual laughter, which takes the form of a contest between the two families, the match-makers and the bride's and groom's parties. The *rodinnïye* (songs for births) include the ritual glorification of the parents of the new-born and of the midwife, and also humorous songs aimed at the midwife and particularly the godparents. The cycle of songs for births have been absorbed to a great extent into the so-called *besednïye* songs (from the word *beseda*, in the sense of a 'communal feast').

Laments are called *golosheniya* (from the verb *golosit* meaning to express grief vocally) and are performed in an improvised and dramatized sung recitative. In extreme circumstances such as great disasters, the lament has found new life in the form of a collective *golosheniye-oplakivaniye* (bewailing). Thus, after World War II, this genre found a new form as the collective lament of

partisans and the inhabitants of burned villages performed at the side of memorials to those who had perished. After the catastrophe of Chernobyl in 1986 a collective *prichetgolosheniye* (lament) for the forest polluted with radio nuclides emerged in the southern and eastern regions '*I nash les chyornïy, i nasha zemlya chyornaya!*' (And our black forest, and our black earth!).

A specific feature of songs from calendar and family ritual cycles is the strict observation of the appropriate time and circumstances for their performance. This same feature governs the formation of standard polytextual melodies which are highly condensed, invariable melodic formulae. Each such melody has symbolic significance within the limits of its prescribed area (e.g. a song is not just a spring song, rather it is a musical symbol of spring). Despite their seemingly slender expressive means, a limited range and unsophisticated stanza form, song melodies using this ancient style have great strength of expression owing to the semantic weight of each melodic part and the equal dramatic force given to all means of musical expression: melodic (modal and rhythmic), embellishment and timbre.

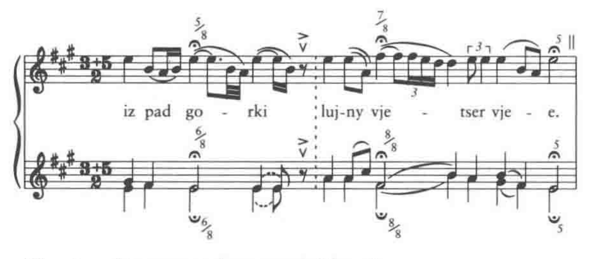
Calendrical and family ritual songs are generally performed by women, except for *volochebnïye* and *kolyadnïye* songs, the ritual greeting songs used to accompany the practice of going around the yards of people in the same village, in which men also play an important part. Antiphonal singing is characteristic of the northern region (the Poozer'ye), whereas in the southern region (the Poles'ye) communal singing of calendrical and family ritual songs is generally heterophonic. Two variants of heterophonic style are known in this region: a droning diaphony and a polyrhythmic monody (ex.1).

*(ii) Non-ritual song.* The second and more elaborate stylistic group of songs created by the Belarusian people consists of non-ritual songs, which ethnomusicologists believe date back to the 14th century. The culmination of their development was the era of the Cossack peasant uprisings between the 16th and 18th centuries. Besides non-ritual lyrical songs on the themes of love and everyday life, as well as songs with a ballad-like content, lyrical folk poetry of a social kind sung by men is widely found among this music, for example *chumatskiye* songs (the *chumaki* were peasants who drove ox-carts to the Crimea for salt), *burlatskiye* (barge haulers' songs), Cossack songs and songs about military events and about the leaders of peasant uprisings. As distinct from the older type of songs, they are not tied to calendar events and are encountered over a wide area. Marked by a vivid individualization of the musical and poetic idea, the melodies of these songs are marked by an internal contrast of intonation and by a well-developed sense of stanza structure.

The songs of this second stylistic type (for both male and female voices) are associated with an established polyphonic style, which has a supporting voice in the polyphonic manner, and are widespread in the southern, eastern and central regions of the country. The choral scoring of these songs consists of two obligatory parts (in the folk definition 'voices'), each one having a clear character of its own. The main melody, sung by the chorus, is always in the lower voice (it can often divide), while the upper solo voice sings in counterpoint (ex.2).

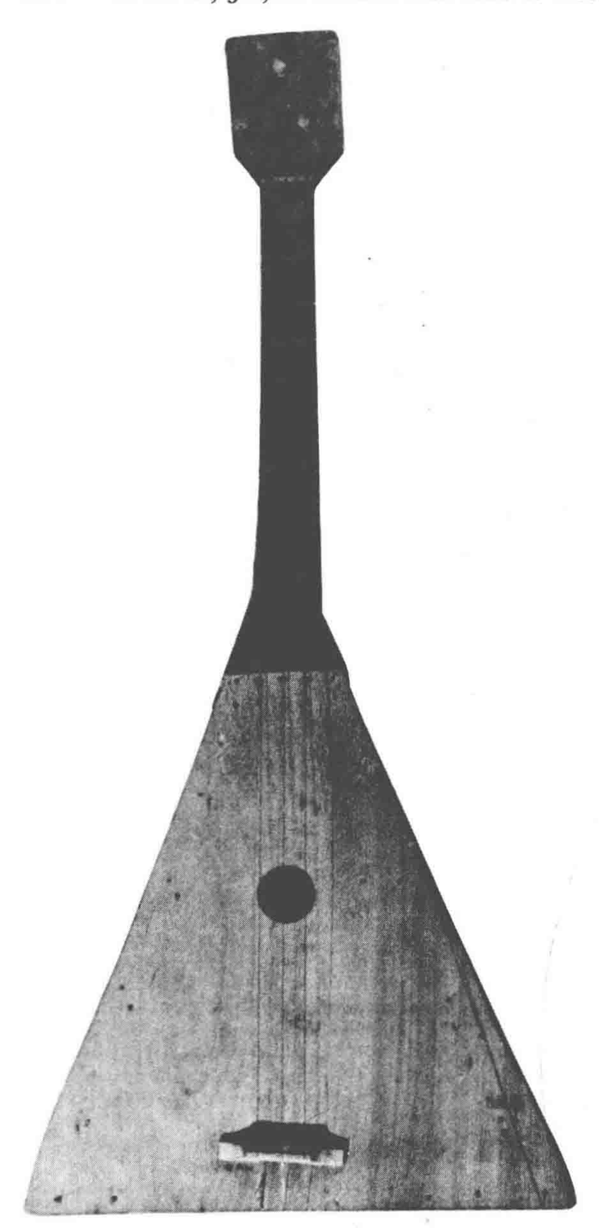
The Soviet period in the development of the art of folk singing can be seen as a kind of amalgamation of peasant oral traditions with urban traditions of literary origin.

**Ex.1** A reaping song, coll. and transcr. Z. Mozheyko



['You, gelder-rose tree, raspberry bush, do not stand above the water']

This showed itself especially clearly in the partisan songs which have occupied a prominent place in latter-day Belarusian song composition.



2. Instruments and instrumental music. The instrumental folklore of Belarus is distinguished by its rich traditions. Musical instruments include both ancient instruments (the earliest archaeological finds date to the 2nd century CE) and those of more recent origin. The Cimbalom (*tsimbalï*) and violin (*skrïpitsa*) have gained the most widespread currency and social significance among string instruments but the *basetlya* (a bass fiddle with three or four strings tuned in 5ths or 4ths) is also found, as are the Balalaika (fig.1) and mandolin. In earlier periods the 'wheel' lyre (*kolaveya lera*) was known. This was a wooden, stringed instrument played with a wheel, which was attached to the lower section. A handle moved the wheel which then rubbed the strings. There are various types of traditional flute including single and double pipes made from reeds and the ocarina (vessel flute). Instruments with an embouchure include the horn (*razhok*), trumpet (*truba*), reed instruments, among them various types of *zhaleyka* (fig.2) (made from rye stems and rushes) and the clarinet. Until recently the *duda* (bagpipes) and *dudka* (duct flute) were also to be found, as well as the *garmon'* or *garmonik* (a kind of accordion) and later the *bayan* or accordion. The most widely found membranophones are the tambourine (*buben*) and the drum with cymbals (*baraban z talerkami*). Of the idiophones the *zvon* (bell), *zvanochki* (handbells), *brazgotki* (rattles), *sharkhunï* (tinkling bells), *stal'ki* (a triangle made from a rod of bent steel) as well as spoons and

['From beyond the mountain the stormy wind blows,']

*1. Balalaika (lute) made in Jul, Minsk district, 1960*

*2. Zhaleyka (hornpipe)*

certain other everyday objects used in ensemble playing are known.

In village music-making instruments are used both for solo and ensemble playing (for instrumentals and vocal accompaniment). The most popular ensembles consist of different permutations of two or three instruments: the violin (or *garmon'*) and the tambourine; the violin and *garmon'* (or cimbalom); the violin (or fife) and cimbalom (or *garmon'*) and tambourine. Ensembles consisting of four instruments – the violin, cimbalom, *garmon'* and drum or two violins, cimbalom and tambourine – are also known. In the western region ensembles made up of even more instruments are found.

On the whole, Belarusian instrumental music is inseparably linked to the traditions of dancing and singing. In the performances of skilful musicians song melodies are distinguished by a fair degree of freedom in both intonation and embellishment (in terms of ornamentation and rhythm). The skill of the folk musicians as improvisers shows itself to its greatest extent, however, in instrumental melodies. These melodies have come to be called *sam pa sabe* ('on my own') because they are performed without any set plan or regulation in the improvisations (ex.3).

Besides existence in original forms musical folk art in Belarus at the end of the 20th century is also known through secondary forms (organized amateur collectives and amateur performances). Professional collectives have also been set up to perform folk music, including the G. Tsitovich State Folk Choir, the G. Shirma State Choral Academic Cappella and the I. Zhinovich State Folk Orchestra.

3. Belarusian ethnomusicology. The origins of Belarusian ethnomusicology are associated with folksong collecting, which became more intensive, particularly in the second half of the 19th century when a whole group of Belarusian ethnographers and folklorists came to the fore including P. Sheyn, M. Nikiforovsky, Ye. Romanov, N. Dovnar-Zapol'sky and others. The first publications of the material gathered by these folklorists were of a linguistic nature with short appendices of musical examples. The establishment of Belarusian ethnomusicology proper is associated with the work of Nikolay Yanchuk (1859–1921). Besides Belarusian musicians, folklorists and ethnomusicologists (including Yanchuk, A. Grinevich, M. Goretsky, G. Shirma and G. Tsitovich), an important role in consolidating Belarusian ethnomusicology has been played by Polish ethnographers and ethnomusicologists (including M. Moszinski, N. Federowski and O. Kol'berg), the Czech artist and scholar L. Kuba and the Ukrainian ethnomusicologist K. Kvitka. The St Petersburg school of intonation organized by academician B. Asaf'yev and his pupils (the ethnomusicologists Ye. Gippius, Z. Eval'd and

**Ex.3** A melody on the *zhaleyka*: coll. and transcr. I. Nazina

also F. Rubtsov) had a particular importance for Belarusian musicology.

At the present time Belarusian musicology is represented by two centres: the Institute of Art History and the Ethnography of Folklore at the Academy of Sciences of Belarus (by Z. Mozheyko and T. Varfolomeyeva, and earlier by V. Yelatov and I. Blagoveshchensky); and by the Belarusian Academy of Music (by the scholars T. Yakimenko, I. Nazina and L. Kostyukovets, and earlier by L. Mukharinskaya).

**Bel canto** (It.: 'beautiful singing'). The phrase 'bel canto', along with a number of similar constructions ('bellezze del canto', 'bell'arte del canto'), has been used without specific meaning and with widely varying subjective interpretations. It did not take on special meaning as a term until the mid-19th century: 'neither musical nor general dictionaries saw fit to attempt definition until after 1900' (Duey). Even so, the term remains ambiguous and is often used nostalgically in its application to a lost tradition.

Generally understood, the term 'bel canto' refers to the Italian vocal style of the 18th and early 19th centuries, the qualities of which include perfect legato production throughout the range, the use of a light tone in the higher registers and agile and flexible delivery. More narrowly, it is sometimes applied exclusively to Italian opera of the time of Rossini, Bellini and Donizetti. In either case, 'bel canto' is usually set in opposition to the development of a weightier, more powerful and speech-inflected style associated with German opera and Wagner in particular. Wagner himself decried the Italian singing model that was concerned merely with 'whether that G or A♭ will come out roundly' and proposed a German school of singing that would draw 'the spiritually energetic and profoundly passionate into the orbit of its matchless Expression' (*Prose Works*; Eng. trans., London 1894, iii, 202; iv, 238).

While to some, therefore, *bel canto* became the lost art of beautiful singing – so that in a conversation that took place in Paris in 1858, Rossini is reported to have inveighed against the decline of the traditional Italian singing with the words, 'Alas for us, we have lost our bel canto' – to others (e.g. J. Hey, *Deutscher Gesangunterricht*, Mainz, 1885) it took on the pejorative meaning of vocalization devoid of content. Similarly, the so-called German style was both heralded and derided. In a collection of songs by Italian masters published under the title *Il bel canto* (Berlin, 1887), F. Sieber wrote: 'In our time, when the most offensive shrieking under the extenuating device of 'dramatic singing' has spread everywhere, when the ignorant masses appear much more interested in how loud rather than how beautiful the singing is, a collection of songs will perhaps be welcome which – as the title purports – may assist in restoring *bel canto* to its rightful place'.

The term 'bel canto' rapidly became a battle cry in the vocabulary of Italian singing teachers (e.g. Ricci), and the concept became clouded by mystique and confused by a plethora of individual interpretations. To complicate the matter further, German musicology in the early 20th century devised its own historical application for 'bel canto', using the term to refer to the simple lyricism that came to the fore in Venetian opera and the Roman cantata during the 1630s and 40s (the era of Cesti, Carissimi and Luigi Rossi) as a reaction against the earlier, text-dominated *stilo rappresentativo*. This anachronistic use of the term was given wide circulation in Robert Haas's *Die Musik des Barocks* (Potsdam, 1928) and, later, in Manfred Bukofzer's *Music in the Baroque Era* (New York, 1947, pp. 118ff). Since the singing style of 17th-century Italy did not differ in any marked way from that of the 18th and early 19th centuries, a connection can be drawn; but the term is best limited to its 19th-century use as a style of singing that emphasized beauty of tone in the delivery of highly florid music.

OWEN JANDER/ELLEN T. HARRIS

**Belcher, Supply** (*b* Stoughton [now Sharon], MA, 29 March 1751; *d* Farmington, ME, 9 June 1836). American composer and tune book compiler. He began a career as a merchant in Boston in the early 1770s, but was back in his home town a few years later (he was a private in the company of Stoughton Minutemen that marched to Cambridge on 19 April 1775). Later in that decade he purchased a farm, where he operated a tavern. In 1785 he and his family moved to Maine and spent six years in Hallowell (now Augusta), before settling in Sandy River township (now Farmington), where he spent the rest of his life. He played a leading role in the community, as town clerk, magistrate, representative to the Massachusetts General Court, selectman, tax assessor and schoolmaster, and was also known as a violinist and singer; he is said to have led the town's first choir. When his *Ordination Anthem* (with a concluding series of Hallelujahs strongly reminiscent of the famous *Messiah* chorus) was sung at the Hallowell Academy in 1796, a local newspaper dubbed the composer 'the *Handell* of Maine'.

Most of Belcher's 75 known compositions appear in his tune book *The Harmony of Maine* (Boston, 1794/*R*). His music is rooted in New England psalmody, yet shows other stylistic influences. Several of his pieces are in three rather than four voices; several more set secular texts, often with copious melodic ornamentation, appoggiaturas, and precise performance directions (for example, 'Invitation'). Belcher was a talented, communicative composer, though his music was never widely reprinted.

RICHARD CRAWFORD/NYM COOKE

**Belcke, Friedrich (August)** (*b* Lucka bei Altenburg, 27 May 1795; *d* Lucka, 10 Dec 1874). German trombone player. He was the son of the town musician of Lucka, and at an early age showed a fondness for brass instruments; before he studied the trombone he was a proficient horn player. He joined the Leipzig Gewandhaus Orchestra in 1815 and then obtained a permanent post in the royal orchestra in Berlin, where, apart from numerous concert tours, he remained from 1816 to 1858. In 1817 Weber brought him to Dresden, and in 1821 he played solos on H.D. Stölzel's newly invented tenor horn in Berlin and later at Leipzig. He became widely known as one of the first trombone virtuosos. A contemporary noted his 'astonishing skill in that which is not idiomatic to the instrument – for example, rapid passages, cantabile, trills etc.'. He left many solo compositions for the instrument. (M. Rasmussen: 'Two Early Nineteenth-Century Trombone Virtuosi: Carl Traugolt Queisser and Friedrich August Belcke', *Brass Quarterly*, v (1961–2), 3–17)

A. MACZEWSKY/TREVOR HERBERT

**Belém, António de** (*b* Évora, *c*1624; *d* Lisbon, 3 March 1700). Portuguese composer. He studied at Évora Cathedral choir school, while Manuel Rebelo was *mestre de capela*, and on 29 January 1641 he became a Hieronymite monk at Espinheiro Monastery, near Évora, where he was elected prior in 1667. He was for most of his career *mestre de capela* or vicar-choral at Belém Monastery, Lisbon. His numerous compositions, including masses for four to eight voices, festival psalms for multiple choirs, Holy Week Lamentations for four to six voices, polychoral *Miserere* settings, a four-part Prayer of Jeremiah 'of exceptional sweetness', Lessons for the Dead for four to eight voices and vilhancicos for the chief feasts, were all lost during the sacking of Belém Monastery in 1835.

ROBERT STEVENSON

**Belfast.** Capital city of Northern Ireland. Belfast was only a settled river-crossing in earlier times. St Comgall (*d c*602) founded an important monastic centre at Bangor (20 km away) in 555, whose monks brought its rule and learning to Britain and continental Europe: the 7th-century Bangor Antiphonary originated here.

Belfast's prosperity followed its incorporation as a town in 1613. By the 1780s Belfast was a lively music cultural outpost of Dublin. A number of shops sold sheet music and musical instruments. Church organists, theatre musicians, tavern players and military instrumentalists were in demand as music teachers. A Belfast Musical Society, including singers and instrumentalists, flourished between 1768 and 1794. Comic operas performed by visiting groups were popular, and performers from Dublin gave concerts in the Assembly Rooms (erected 1777, cap. 400) from 1784. Subscription concert series in 1787 and 1789 enabled 'Gentlemen Amateurs' to supplement visiting soloists and local professionals in performances of music by Haydn, Pleyel, Vanhal and others.

Concern for the preservation of the 'ancient music' of Ireland culminated in the Belfast Harp Festival of July 1792. Edward Bunting (1773–1843) transcribed the pieces performed and was inspired to publish pioneering collections of Irish folksongs. A short-lived Harp Society was established to teach the harpers' skills to poor and blind children. Interest in traditional music waned thereafter despite the formation of Gaelic choirs towards the end of the 19th century, the presence of the folksong collector Carl Hardebeck (1869–1945) in the city between 1893 and 1932 (apart from four years spent in Cork from 1919), and a Gaelic Choir which flourished for many

years after its formation in 1943. Traditional music has re-emerged in recent years as entertainment, in community arts programmes and in grant-aided initiatives of the Arts Council of Northern Ireland, supplemented by a researcher and a folksong archive at the Ulster Folk and Transport Museum at Cultra.

As Belfast developed into a major industrial centre (it was incorporated as a city in 1888), musical institutions similar to those flourishing elsewhere were established. Touring companies occasionally presented operas in the Theatre Royal during the mid-19th century, but annual opera seasons only became possible when the Grand Opera House opened in 1895. Except for a period during World War II, opera seasons continued there and, after the Grand Opera House became a cinema in 1953, in the Grove Theatre. English ballet companies performed here during the 1950s and 60s. The Grand Opera House had become badly dilapidated by 1972 but resumed its original cultural role after restoration in 1980. The existing operatic society was renamed the Northern Ireland Opera Trust in 1969 and presented an annual season with local chorus and orchestra and visiting soloists; it was re-established as Opera Northern Ireland in 1985 under the directorship of Kenneth Montgomery and presented two seasons annually until its demise in September 1998. The Studio Opera Group, founded by Havelock Nelson (*b* 1917) in 1950, provided operatic opportunities for local professionals; a Glyndebourne-style opera season has become an annual summer attraction at Castleward House, 41 km away, with a further season at the Grand Opera House.

The Anacreontic Society was founded in 1814 to foster orchestral music. In 1840 public subscription enabled the society to build a New Music Hall (cap. 600) where it gave two or three concerts a year, sometimes with eminent soloists, including Liszt, Piatti and Clara Novello; Jullien brought his orchestra on a number of occasions and also performed in the Botanic Gardens. The New Music Hall was superseded in 1862 by the Ulster Hall (cap. 2000). Weekly organ concerts were a feature and led to the creation of the post of City Organist in 1902. Weekly organ recitals continued until 1936; the tradition was partially revived in 1982.

The demise of the Anacreontic Society in 1866 resulted in sporadic orchestral activity until the BBC Northern Ireland Orchestra was established in 1924. It gave public concerts during the 1930s. Orchestral concerts were also presented by visiting English orchestras under famous conductors, including Hallé, Harty, Beecham, Boult and Barbirolli. The City of Belfast Orchestra was established in 1950 and was replaced in 1966 by the chamber-sized Ulster Orchestra, which performed regular concerts in Belfast and provincial towns and accompanied oratorio and opera. In 1981 the BBC Northern Ireland Orchestra and the Ulster Orchestra were amalgamated into an enlarged Ulster Orchestra to perform a wider standard repertory, including contemporary works and regular commissions from Irish-based composers. Under conductors including Bryden Thomson, Vernon Handley, Yan Pascal Tortelier and En Shao, concert and opera performances and an enhanced broadcasting schedule have been supplemented with tours, commercial recordings, school-based music education projects and recitals by orchestra-based chamber ensembles. A new development on Belfast's Laganside in 1997 added a concert hall, the Waterfront Hall (cap. 2500), and a smaller hall, the BT Studio (cap. 600), to the existing provision.

The Classical Harmonists, the first successful choral society, flourished between 1851 and 1874 and had a profound effect on Belfast's musical life. It collapsed due to the severe financial burdens in importing orchestral musicians after the demise of the Anacreontic Society, which had formerly supplied the orchestra. The Belfast Philharmonic Society, formed in 1874, attained a high position under such conductors as Francis Koeller (1887–1912) and Edward Godfrey Brown (1912–50); it performed four or five choral concerts annually and attracted excellent musicians to Belfast. Smaller amateur vocal and choral groups, together with operatic and musical societies, have continued to appear, exploring a wide range of musical genres.

A municipal school of music for schoolchildren was established in 1965; this has been replicated throughout Northern Ireland. Instrumental playing has blossomed and a number of youth choirs, bands and orchestras present regular concerts. The Arts Council supports youth musical initiatives including the Ulster Community Youth Jazz Orchestra, the Ulster Youth Theatre and, since 1994, the Ulster Youth Orchestra. Adult amateur instrumentalists perform in the Studio SO (founded by Havelock Nelson in 1950) and Queen's University Orchestra. Brass bands, flute bands and symphonic wind bands thrive; most of these originated in church organizations during the late 19th and early 20th centuries.

The Hamilton Harty Chair of Music was founded at Queen's University in 1947; professors have included Ivor Keys, Philip Cranmer, Raymond Warren, David Greer, Adrian Thomas and Jan Smaczny. Recitals and concerts are given by students, professionals and resident ensembles in the Whitla Hall, Harty Room and Elmwood Hall. The appointment of composers-in-residence since the mid-1970s has encouraged the development of Belfast as a centre of contemporary composition. The School of Music of the University of Ulster at Jordanstown (founded as the Northern Ireland Polytechnic in 1968) has also contributed to this development; directors there have included Donald Cullington, Layton Ring and Hilary Bracefield. Professional and amateur concerts and recitals are regularly given at Jordanstown and at its sister campus in Coleraine.

Queen's University Festival, a three-week event held annually in November since 1964, includes orchestral concerts, chamber recitals, ballet and opera, and jazz, popular, traditional and world music events. Other events include annual festivals of early music and of contemporary music at Queen's University, summer promenade concerts promoted by Belfast City Council (which replaced Belfast Corporation in 1973), chamber music recitals promoted by the Belfast Music Society (formed in 1920) and weekly lunchtime recitals promoted by BBC Northern Ireland. The Belfast Musical Festival, an annual competitive event, was established in 1908.

PETER DOWNEY

**Bel Geddes, Norman** [Geddes, Norman] (*b* Adrian, MI, 27 April 1893; *d* New York, 8 May 1958). American stage designer. He studied briefly at the Cleveland School of Art, but had no formal education after the age of 16. His first wife, Helen Belle Sneider, became his collaborator, and 'Norman-Bel-Geddes' was their *nom de plume* for articles on art and the theatre, until their divorce in 1932. Notable designs for Montemezzi's *La nave* for Chicago Opera (1919) and Henry Hadley's *Cleopatra's Night* for the Metropolitan (1920) attracted Broadway attention, and his innovative approach was soon recognized. At an early stage of his career he discarded the proscenium arch and planned open-stage projects. For a commission in 1924 to design Vollmöller's morality play *The Miracle* with Humperdinck's music for Max Reinhardt, he converted the theatre into a Gothic cathedral. His work for Broadway included Kurt Weill's *The Eternal Road* (1937), Gershwin's *Strike up the Band* (1927), Porter's *Fifty Million Frenchmen* (1929) and *The Seven Lively Arts* (1944, his last for Broadway): in all, he designed more than 200 theatrical productions. He later turned primarily to industrial design, but he also had a pivotal influence on the development of American theatre. His archives, designs and drawings were given to the University of Texas, Austin, in 1959.

**Belgrade** (Serb. Beograd). Capital city of Yugoslavia. As the capital of the Kingdom of Serbia, which won its independence from the Turks in the early 19th century, Belgrade became open to Western cultural influence in the 1830s. Political and cultural life were strongly influenced by Romantic nationalism which gave rise to the development of choral music with a pronounced patriotic flavour. This was reflected in the number and stature of various choral societies which were founded during the second half of the century. At that time opera advanced very slowly and its main form was a type of Singspiel which owed its popularity largely to Davorin Jenko (1835–1914). In 1894 Vilém Blodek's *V studni* ('In the well') was the first opera to be performed in Belgrade, and Stanislav Binički's *Na uranku* ('At dawn', 1903) was the first Serbian opera. The first known orchestral concert took place in 1842; two years later Johann Strauss (i) and his orchestra performed in the city.

Musical life in the early 20th century was much influenced by the personalities of the composers and conductors Stevan Mokranjac and Stanislav Binički: the former continued to develop the established tradition of choral singing, the latter conducted orchestral concerts. Musical life intensified after 1918, when a general rise in standards became apparent. Three eminent composers active in Belgrade during the first half of the century were Petar Konjović (1883–1970), Miloje Milojević (1884–1946) and Stevan Hristić (1885–1958). After World War II musical life received another strong impetus, new professional bodies were formed and musical education was accorded particular importance. This resulted in the emergence of a generation of younger performers who contributed a great deal to the rich concert life in the city. A number of composers born or based in Belgrade also achieved prominence, including Stanojlo Rajičić (*b* 1910), Dušan Radić (*b* 1929) and Petar Ozgijan (1932–79).

Until 1920, when the permanent Belgrade Opera was founded, operas were performed within the repertory of the National Theatre. The Belgrade Opera owed its quick development and success partly to the first director, Stevan Hristić, and partly to the influx in the early 1920s of many prominent Russian singers and ballet dancers who emigrated after the Russian October Revolution. The repertory at that time included standard Italian and French 19th-century operas, and also, with increasing frequency, operas by Russian and other Slavonic composers. The company became well known in Europe under Oskar Danon's directorship (1944–63). The orientation towards the Slavonic repertory has remained a characteristic policy of the opera. The National Theatre which houses the opera was rebuilt in 1980, with a capacity of 660, as a replacement for the original theatre of 1869. The season lasts from September to June. The two other halls used for musical performances are the Kolarčev Narodni Univerzitet (Kolarac's Popular University), with a capacity of 883, and the Dvorana Doma Sindikata (Trade Union House Hall), with a capacity of 1600.

The Beogradska Filharmonija (Belgrade PO), founded in 1923, was reconstituted in 1951 as the State Philharmonic and reverted to its original name in 1952. It achieved a national reputation under Živojin Zdravković, its director from 1951 to 1978, and has often toured abroad. Radio-Television Belgrade maintains a symphony orchestra and a choir. The Beogradsko Pevačko Društvo (Belgrade Choral Society), founded in 1853, developed into an accomplished body under the successive direction of Kornelije Stanković, Davorin Jenko, Josif Marinković and Stevan Mokranjac. Its activity was interrupted by the outbreak of World War II and attempts to revive it after the war failed. Its place in the musical life of Belgrade was filled admirably by the Branko Krsmanović Choral Society of the University of Belgrade (founded 1945). Bemus, an annual festival founded in 1970, presents distinguished orchestras and soloists and has no particular programmatic scope. The first music school, founded under the auspices of the Belgrade Choral Society in 1899, is now called the Mokranjac Music School, and there are two other music schools, the Stanković and the Slavenski. The Academy of Music was founded in 1937 and the Musicological Institute of the Serbian Academy of Arts and Sciences was founded in 1948.

**Beliczay, Gyula** [Julius von] (*b* Komárom, Hungary, 10 Aug 1835; *d* Budapest, 30 April 1893). Hungarian composer and teacher. He studied music and music theory with Joseph Kumlik in Pozsony (Bratislava). From 1851 to 1857 he was a student at the Technische Hochschule in Vienna, at the same time studying composition with Joachim Hoffmann, Franz Krenn and Nottebohm and the piano with August Halm. From 1857 to 1871 he lived in Vienna, where he worked as an engineer, composed and taught music. In the 1850s his piano pieces and sacred compositions began to be published in Vienna, Leipzig and Paris; their dedications bear witness to Beliczay's extensive connections with important figures in the contemporary musical world, including Anton Rubinstein, Liszt, Wagner and A.-F. Marmontel. For the dedication of his *Ave Maria* to Franz Joseph I (1867) he was awarded the gold decoration 'Viribus unitis'. From 1862 to 1888 he was a correspondent for the magazines *Zenészeti lapok* (Pest), *Wanderer* (Vienna), *Blätter für Theater und Kunst* (Vienna), *Neue Zeitschrift für Musik* (Leipzig), and *Neues politisches Volksblatt* (Budapest). From 1888 until his death he taught theory at the Academy of Music in Budapest.

Among the minor Hungarian composers of the second half of the 19th century, Beliczay was one of the best known at home and abroad. A cultured and cultivated composer, if not particularly original, he acted as a mediator between different cultures: his sacred works, influenced by Schubert, and his chamber and piano music influenced by Schumann, spread the spirit of German Romanticism in France and Hungary; his piano works, which owed their inspiration to Liszt's and Mihály Mosonyi's Hungarian style, contributed to the popularity of this eastern European art in western Europe.

FERENC BÓNIS

**Bélime, Jean.** *See* COEUROY, ANDRÉ.

**Belimov, Sergey Aleksandrovich** (*b* Leningrad, 27 May 1950). Russian composer. He studied at the Leningrad Conservatory with Chistyakov and Yevlakhov (1969–75), after which he took a postgraduate course with Arapov (1979–81) and then enrolled as a student of art history at the Sorbonne in 1995. He joined the Composers' Union in 1977 and served on the board of its St Petersburg section in 1989. He taught composition at the Choral Academy of the Leningrad Academic Cappella (1972–81) and at the Music School attached to the conservatory (1981–92). Belimov's work is emblematic of his quest to synthesize Eastern and Western thought in the structure of both sound and form of a composition, and is evident not only in the totality but also in the rich, inner content of a single, isolated sound. Another facet of his experimentation resides in the invention of what he calls a supermodal technique which is applied in a unique form to each work; pieces written or, as the composer would have it, 'cultivated' in this manner include the Third Symphony and *Sad raskhodyashchikhsya tropok* ('The Garden of Divergent Paths') of 1990 and 1991 respectively. He further developed the technique in *Za zerkalom tishinï* ('Beyond the Mirror of Silence'), written in 1992 and performed a year later in the In Tune II festival of microtonal music held in Britain in 1993. Since that time his interests have focussed on the broadening of instrumental timbral capablities; the 'cordepiano' technique he developed in 1996 allows for the production on a piano of microtonal intervals, harmonics and multiphonics. In 1997 he attempted to create a virtual interactive musical text with the composition *I svet neprekhodyashchiy za oprokinutïmi nebesami* ('And the Light Inextinguishable beyond the Clouds Cast Asunder').

IOSIF RAYSKIN

**Belin** [Bellin], **Guillaume** (*b c*1500; *d* 3 Dec 1568). French singer and composer. He was a tenor in the royal chapels of François I and Henri II between 1546 and 1560, much of the time drawing additional wages as a *chantre ordinaire* of the *Maison du roy*, the king's personal household. From 1547 to 1553 he also served (with Claudin de Sermisy and Hilaire Rousseau) as one of three *sous-maîtres* of the royal chapel, a position he still held in 1559. In 1550 he obtained a canonicate at the Ste Chapelle in Paris that passed at his death to another *chantre du roy*, Estienne Le Roy. Belin became the cantor of the Ste Chapelle in 1565, although he had begun exercising some of the functions of the office two years earlier. In 1560 Le Roy & Ballard published nine four-voice works by Belin (two chansons and seven settings of biblical canticles and psalms in the French translations of Lancelot de Carle, Bishop of Riez), none of which is now extant. The 14 chansons ascribed to him in collections of all the major French printers (RISM 1538[14], 1539[16], 1539[20], 1540[12], 1540[14], 1543[12], 1544[8], 1548[34], 1549[20], 1550[5]) lie well within the tradition of the homophonic Parisian chanson, and are mainly chordal and syllabic in their text-setting.

JANE ILLINGWORTH PIERCE/JOHN T. BROBECK

**Belin, Julien** (*b* in or near Le Mans, *c*1525–30; *d* after 1584). French lutenist and composer. According to La Croix du Maine (*Les bibliothèques françoises de La Croix du Maine et de Du Verdier*, Paris, 1772–3/*R*, ii, 11) he was working in Maine in 1584. His only known work was published in Paris in 1556 by Nicolas Du Chemin: the *Premier livre contenant plusieurs motetz, chansons & fantasies reduictz en tabulature de leut* (ed. M. Renault, Paris, 1976) which contains eight vocal transcriptions and seven fantasias. Six of the songs (by Arcadelt, Gentian, Certon, Pathie and Sandrin) are highly ornate, and show Belin to have been an accomplished virtuoso and a skilful elaborator of vocal polyphony. The other two transcriptions (a motet, *Cantate Domino*, and a song, *Les bourguignons*) are intabulated without ornamentation, and since they bear no indication of authorship it is possible that they are by Belin himself.

The seven fantasias are small-scale works, of between 54 and 91 bars each. Two, economically written for three voices, are designated 'trio'. The second, third, fourth and fifth fantasias and the first trio were included by Phalèse in his *Thesaurus musicus* (1574[12]). Their style is much more severe than that of the ornate songs, lucidly polyphonic with a clearly articulated form: the fourth fantasia, for example, has three equal sections based on the same theme. The *Premier livre* shows him to have been a musician who, although clearly influenced by such composers as Francesco da Milano and Alberto da Ripa, developed his own distinctive melodic and harmonic style.

MICHEL RENAULT

**Belissen** [Bellissen], **Laurent** (*b* Aix-en-Provence, 8 Aug 1693; *d* Marseilles, 12 Feb 1762). French composer. His home was near the Cathedral of St Sauveur in Aix; although there is no evidence that he was admitted to the choir school, he was probably one of the last composers to study with Guillaume Poitevin, *maître de musique* there. By 1722 Belissen was in Marseilles, where he made his career. He followed Blanchard as *maître de musique* at the Abbey of St Victor, and held this position for the rest of his life, also directing the Académie de Concerts in Marseilles.

Many of Belissen's works are lost or in uncatalogued collections. The extant works, principally *grands motets*, reveal a style markedly different from the Versailles motets of Lalande, Campra and Mondonville. Belissen preferred a four-voice texture to the five-voice one popular with the Versailles composers. His choral style combines French and Italian characteristics: his choral fugues are highly developed and repeat the text continuously in the Italian manner. His orchestral treatment in the motets also reflects Italian practices, with the use of ritornello passages as an important articulatory device.

JOHN HAJDU HEYER

**Belitz, Joachim** (*b* Brandenburg an der Havel, *c*1550; *d* Stargard, Pomerania [now in Poland], 26 Dec 1592). German composer. He matriculated at the University of Frankfurt an der Oder in 1570. Since he published a wedding motet at Frankfurt in 1581, together with one by the town's Kantor, Gregor Lange, he may well have continued to live there, or nearby, at least until then. From 1584, at the latest, until his death he was Kantor at Stargard. His successor, Peter Eichmann, acknowledged in his *Oratio de divina origine* (1600) the extent to which the cultivation and study of music developed during Belitz's tenure of the post: for example, he taught the basic elements of *musica poetica* and *musica practica*. Seven years after his death the guardian of his children, who was not named but may have been Eichmann, brought out a volume of 31 four-part lieder by him in villanella style; 22 are secular and nine sacred, and the collection ends with an eight-part piece. Eichmann included five other works by Belitz in his *Praecepta musicae practicae* (1604). The chapter 'De clavibus' includes the four-part homophonic *Da pacem, Domine*, which is in Gothic notation. There are two pieces in the chapter on mutation, one in cantional style in four parts, with sharply differentiated rhythms, and a bicinium, in which a hymn melody is treated freely. Here Belitz differed from Michael Praetorius in renouncing varied repetitions, but the two choral responsories for the Preface of the Mass included as examples in the final chapter, 'De tactu', are very similar to the settings of the same words in Praetorius's eighth book of *Musae Sioniae* (1610). The melody and general style of the six-part setting to German words are alike throughout; in the four-part setting to Latin words the embellished cantus firmus appears alternately in the tenor and cantus.

WORKS

Epithalamia in honorem … Lazari Opilionis (Frankfurt an der Oder, 1581) [incl. one motet each by Belitz and G. Lange]

MARTIN RUHNKE

**Beliy, Viktor Arkad'yevich** (*b* Berdichev, Ukraine, 14 Jan 1904; *d* Moscow, 6 March 1983). Russian composer. He studied the violin and composition at the Kharkiv Conservatory (1919–21) and composition with Konyus and Myaskovsky at the Moscow Conservatory (1922–9), and then returned to teach composition (1935–48), from 1941 as professor. After a further period of composition teaching at the Minsk Conservatory (1949–52) he went back to Moscow and became principal editor of *Muzïkal'naya zhizn'*. He held the titles Honoured Art Worker of the RSFSR and Honoured Artist of the Belorussian SSR. Early in his career he showed expressionist tendencies. In the 1920s he was a member of Prokoll, a 'production collective' of composers whose aim was to write music in the spirit of the new revolutionary era, and later works demonstrate an involvement with public concerns, expressed in his melody with a garish, poster-like immediacy. Several of his choral songs have enjoyed great popularity.

WORKS
(*selective list*)

Choral: Voyna [War], 1929; Golodnïy pokhod [The Hunger Campaign] (Pascal), chorus, pf, 1931; Syuita na chuvashskiye temï, 1936; 2 fragmenta iz poemï 'Vladimir Il'ich Lenin' (V. Mayakovsky), 1938; Step', 1954; Baykal, 1973; Russkiye lesa [Russian Woods], 1974; many other works, incl. folksong arrs.
Popular choral songs: Oktyabr'skaya pesnya [October Song]; Orlyonok [Eaglet]; Pesnya 30 divizii [Song of the 30th Division]; Pesnya smelïkh [Song of the Bold]; Proletarii vsekh stran, soyedinyaytes' [Proletarians of All Countries, Unite]; Smeley, krasnoflottsï [Bolder, Red Navy Men]; V zashchitu mira [In Defence of Peace]
Pf: 4 Preludes, 1922; Sonata no.1, 1923; 2 Fugues, 1925; Sonata no.2, 1926; Lyric Sonatina, 1928; Sonatas: no.3, 1942, no.4, 1946; many folksong arrs.
Solo songs, chbr pieces, theatre music

GALINA GRIGOR'YEVA

**Belknap, Daniel** (*b* Framingham, MA, 9 Feb 1771; *d* Pawtucket, RI, 31 Oct 1815). American composer and tune book compiler. He worked in his native town as a farmer and a mechanic, also teaching singing schools from the time he was 18. He married around 1800, and in 1812 moved to Pawtucket.

Almost all his 85 known compositions were first printed in his own tune books, an exception being his most widely published piece, 'Lena', which was introduced in *The Worcester Collection* (Boston, 5/1794). Belknap's *The Harmonist's Companion* (Boston, 1797), a 32-page collection, contains only his own compositions, which are written in an American idiom untouched by European-inspired reform. His later compilations, *The Evangelical Harmony* (Boston, 1800), *The Middlesex Collection* (Boston, 1802) and *The Village Compilation* (Boston, 1806), are devoted almost entirely to American music; they introduced pieces by 17 Massachusetts and Connecticut composers as well as many of Belknap's own compositions. Unlike many of his fellow psalmodists, Belknap also wrote secular music. His compilation *The Middlesex Songster* (Dedham, MA, 1809) contains *Belknap's March*, his only known instrumental composition. The American Antiquarian Society owns two letters by Belknap, including one from April 1810 asking the composer Timothy Swan to sell him the copyright to his tunes 'China' and 'London'; Belknap published Justin Morgan's *Judgment Anthem* that year as a separate issue.

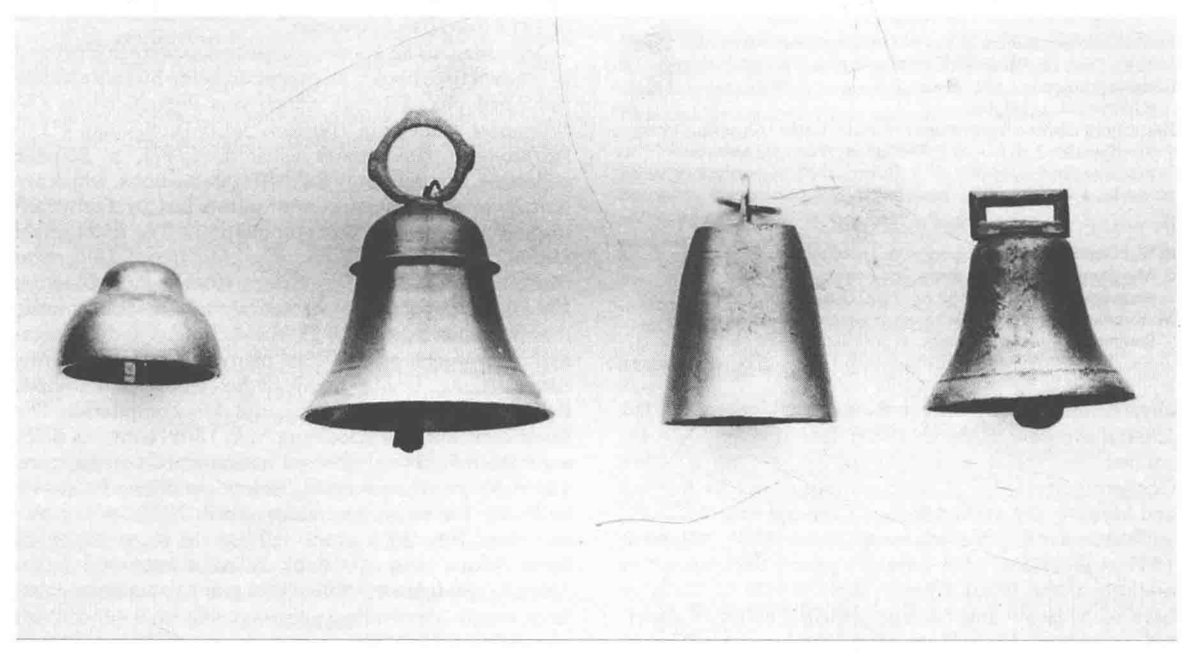
RICHARD CRAWFORD/NYM COOKE

**Bell** (i) (Fr. *cloche*; Ger. *Glocke*; It., Sp. *campana*). An idiophone consisting of a hollow object, usually of metal but in some cultures of hard clay or even glass, which when struck emits a sound by the vibration of most of its mass. Bells differ from gongs in that their zone of maximum vibration is towards the rim, while that of gongs is towards the centre; bells are held at their vertex, or point farthest from their rim. While the word 'bell' is often loosely applied to any device that produces a metallic sound of gradual decay, a true bell is not so long in relation to its diameter as to be considered a tube closed at one end (*see* TUBULAR BELLS), nor so short as to form a shallow pan (*see* CYMBALS, GONG, METALLOPHONE). The term 'bells' often refers to the (*See* GLOCKENSPIEL (i)) because of its bell-like timbre; this usage originated in the USA and has become universally recognized though it has led to confusion with orchestral bells.



The bell is classified as a percussion vessel; certain types (for instance, pellet bells), however, are vessel rattles.

1. Forms and methods of sounding. 2. Timbre and tuning. 3. Sizes. 4. History: (i) East and South Asia (ii) Central Asia to the Mediterranean (iii) Africa (iv) Pre-Columbian America (v) Europe. 5. Bellfounding. 6. European techniques and traditions. 7. The use and representation of bells in art music: (i) The western European tradition (ii) The Russian tradition (iii) The English tradition.

1. FORMS AND METHODS OF SOUNDING. True bells are derived in shape from two basic forms: the cup and the hollow sphere. The cup form, also called the 'open' bell, is the more common. It appears in a great variety of profiles, of which the modern European tower bell with sides flared towards the rim is a representative example (figs.1 and 2). It is also found in more squat forms (as exemplified by many bicycle and clock bells, and some similarly shaped bells used in music) and in more elongated forms such as cylindrical and 'barrel-shaped' Buddhist bells, certain African tribal bells, and some of the earlier European 'beehive' and 'sugar-loaf' tower bells. In addition to the above forms, which all have circular rims, bells are found in many parts of the world with rims and cross-sections of oval, rectangular and other shapes – for example COWBELLS, which have been used in the modern orchestra for tonal effects.

When the word 'bell' is used without further description the open bell or cup form is usually meant. The hollow-sphere form, or crotal (Fr. *grelot*; Ger. *Schlittenglocke*), however, is equally universal and of equally ancient origin; a representative example is the sleighbell. Called the 'closed' bell in contradistinction to the 'open' bell, the crotal's basic form is the sphere, but it has as many varieties of shape as the open bell, resembling such diverse objects as clam-shells, pears or teardrops. It does not have a wide rim; instead, most examples have a long slot or crossed slots in the lower half, or holes in either the lower or upper halves. A few examples have holes in both halves; and a few large crotals, such as those at Shinto shrines, have neither holes nor slots (fig.3) and are therefore distinct acoustically from bells in the normal sense. Both open bells and crotals have a device at the vertex for attachment. This may be a lug, a loop or crossed loops ('canons': Fr. *anses*; Ger. *Krone*) or in many modern open bells simply a bolt hole.

An integral part of many open bells is a clapper. This is either a rod with a knob on it or, in many non-European examples, a pellet or ball suspended by a string or thong; it is attached to the bell on the inside directly under the vertex. Its purpose is to sound the bell by striking it: either the bell is oscillated to cause the clapper to hit it at opposite points on the inside, the prevalent method in Western church usage, or the clapper is pulled by means of a rope or wire to make it strike the bell on one side only, as in most Eastern church usages and in manual

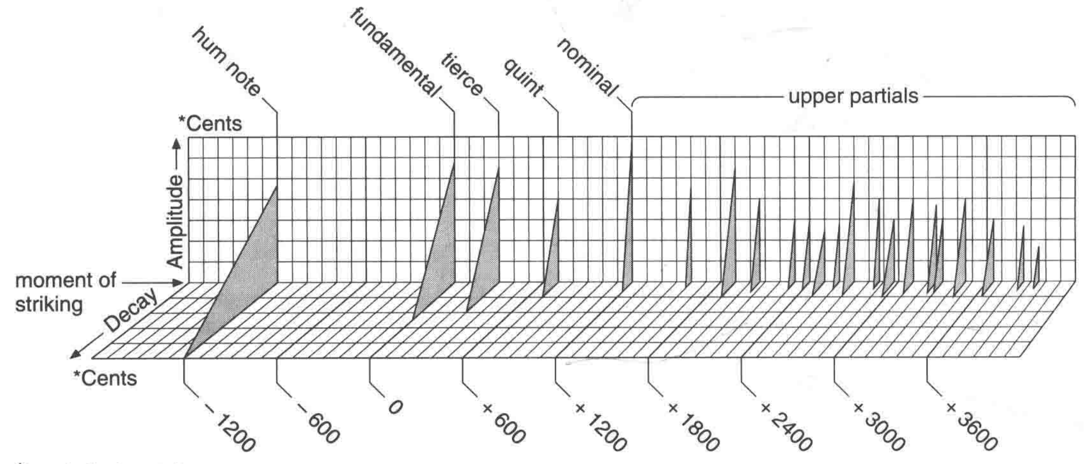
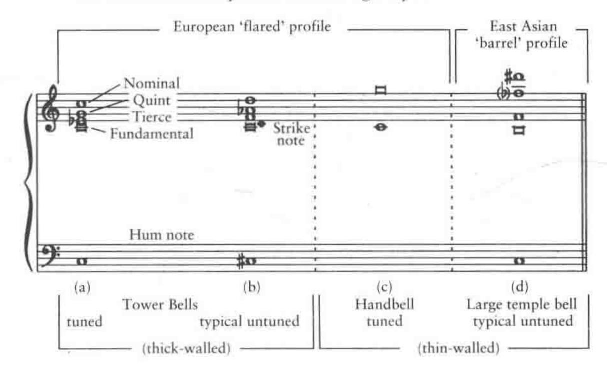
chiming and carillon playing. An open bell may also be sounded by striking it with a hammer on either the inside or the outside, as in automatic clock-chiming, or by striking at a fixed point on the outside with a ramrod, which is the customary Buddhist method for ringing very large bells (see fig.9 below). Where the hammer is used it is usually affixed permanently close to the bell and moved by remote control; however, a series of bells within reach of one or two performers may be played with hammers held in the hands, as with the Chinese *bianzhong*, the medieval *cymbala*, and some modern performances on handbells (*see* CHIMES, §1, CYMBALA (ii) and HANDBELL).

For crotals the device corresponding to the clapper or hammer of the open bell is a loose pellet permanently enclosed inside. The crotal is sounded by agitating it so as to cause the pellet to bounce freely and strike the inner surface. There are crotals which have several pellets inside them, just as there are portable open bells with several clappers.



2. TIMBRE AND TUNING. When a bell is struck it gives off a complex sound containing a considerable number of partials that may or may not be in concordant relationship, rather than a fundamental pitch with a series of concordant harmonics above it (as found in most wind and string instruments). Moreover, after each stroke the sound does not cease abruptly, as with the drum or the xylophone, but continues for an indefinite period depending on the bell's form and size, and the elasticity and homogeneity of the material of which it is made. The highest partials cease very soon after striking, and the lowest partial – which is not the loudest during most of the total decay – lasts longest (fig.4 and ex.1).

In European tower bells the hum-like quality of this lowest partial led English bellfounders to call it the 'hum note' (Fr. *bourdon*; Ger. *Unteroktave*). The next frequency, approximately an octave above but greatly varying in untuned bells, gives the impression of being the principal pitch of the bell during most of its decay, and is therefore called the fundamental (Fr. *principal*; Ger. *Prime*). The next two partials are called the tierce (Fr. *tierce*; Ger. *Terz*) and quint (Fr. *quinte*; Ger. *Quinte*): they lie approximately a 3rd and a 5th above the fundamental. This 3rd tends to be minor, not major, which indicates that these frequencies are independent partials, not overtones generated from a common root. Approximately one octave above the fundamental is the nominal (Fr. *nominal*; Ger. *Oberoktave*), so called because although it is short-lived its intensity at the moment of striking has great influence in defining the pitch of the bell. Above the nominal there are more partials: in the sound of a large bell there may be from ten to perhaps 100 extending over several octaves. They are in more or less dissonant relationship to each other and to the lower partials, but their decay is so rapid that they scarcely affect the pitch of the bell. However, they give its sound the rich, vibrant attack that is an essential characteristic of a bell's timbre and makes it uniquely useful for arresting attention.



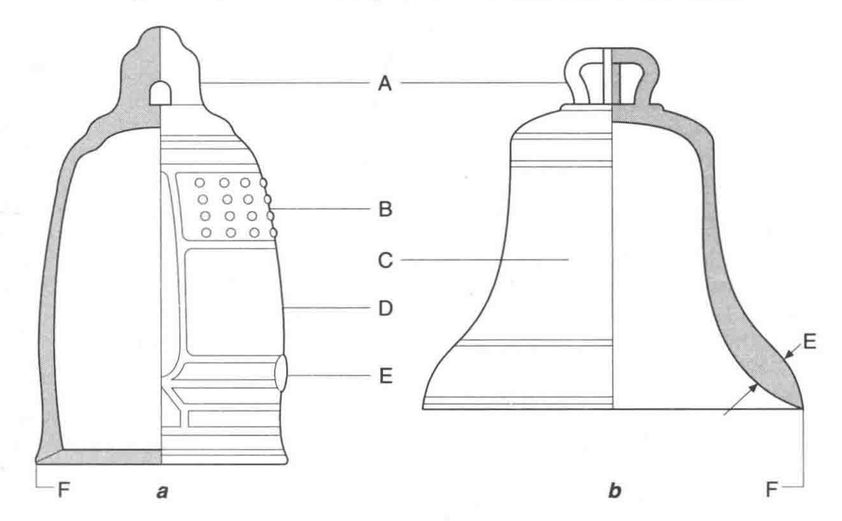
In bells where the fundamental and the nominal are not a true octave apart, a keen ear can recognize another frequency at the instant of striking which lies a true octave below the nominal. This is called the 'strike note' (Fr.

*3. Bells of 'closed' or crotal form: (a) talismanic, for an animal, Mongolia; (b) a talismanic suzu, for a person or his goods, Japan; (c) musical, tuned for orchestral use; (d) musical, attached to a dancer's ankles (ghuṅgrū), India; (e) a giant Shinto suzu, to alert a deity, Japan (private collection)*

*note de coup*; Ger. *Schlagton*). It is of very short duration, and has caused controversy among acousticians because it is not of the same nature as the other partials but is a resultant tone. In bells with the fundamental an octave below the nominal it becomes part of the fundamental. Its presence has been a debatable asset, for while it is considered objectionable in music on chimes and carillons where precise pitch relationships are demanded, it may actually enhance the effect of bells swung as a peal, where the aural interest is that of kaleidoscopic patterns of sound melting one into the other, or of Russian-style chiming, where the interest derives chiefly from the sounding of rhythms and timbres at high and low pitches. From the 13th century, when a few founders – after a careful study of profile design – succeeded in casting bells with octaves between the nominal and the fundamental (thus eliminating an obvious strike note), European opinion has altered over the necessity of this interval in

*4. Partials of a tuned carillon bell showing relative pitches, amplitude and decay (after Erich Thienhaus)*

Ex.1 The most prominent partials in four varieties of the common open bell, with the fundamental partials determining the pitch shown as breves.



bells sounded by swinging. A controversy raged in the English press in 1933, for example, when the historic 'Bow Bells' of Bow Church, Cheapside, London, were replaced by bells with true octaves. Those bells, destroyed in World War II, were in turn replaced by the present ones, in which the interval is a few cents under the octave (*see* WHITECHAPEL BELL FOUNDRY).

Such fine control of individual partials in a bell is achieved by tuning the bell after it is cast. Tuning involves removing a small amount of metal from the bell's inner surface at certain concentric zones that determine the pitches of specific partials. This is a very delicate and highly skilled operation, for very slight alterations in the profile of the bell may alter the pitch frequency not only of the partial in question but of others as well. It is usually done in the foundry immediately after the casting, and remains permanent for the life of the bell unless it is affected by corrosion. In bells used for chimes and carillons the five most important partials (named above) must be tuned. The pitch to which they are made to relate is the fundamental: the nominal is tuned an octave above and the hum note an octave below; the tierce a minor 3rd above; and the quint a perfect 5th above (ex.1). As the removal of metal in most zones tends to lower – rather than raise – the pitch of the particular partial, bells intended to be tuned are usually cast sharp, and then 'tuned down'. The above process is the internal tuning of a bell. For a bell to be used in musical performance with other bells there must also be external tuning: that is, the fundamental of each bell must be at the proper scale interval, not only from its other partials but also from the fundamental of every other bell.

This tuning of the five principal partials applies to bells of the form and thickness of the conventional Western tower bell, that is a conoid 'cup' form with its bottom or rim diameter twice that of the top diameter and equal to the distance between the edges of the two diameters. The sides of this type of bell are in fact not straight, but from the top flare out slightly for two-thirds of their length and then flare more rapidly until turning down at the rim. With the increase in flare at the outside there is also an increase in the thickness of the bell wall, the maximum thickness occurring near the rim at the zone where the clapper strikes, called the 'sound-bow' (fig5*b*).

After European bellfounders determined that these proportions yielded both the best bell sound and the necessary durability to withstand years of severe pounding from the clapper, they discovered that with slight deviations in profile and in the ratio of height to diameter they could cast a bell which, under proper foundry conditions, would have from a 7th to a 9th as the interval between fundamental and nominal. Some founders developed sufficient skill, in filing or chiselling at a few places on the inner surface, to bring this interval to an octave. This fine adjustment was not considered necessary for great outdoor bells, which were to inspire with awe as they summoned to church, or to drive demons out of occasional storms: but it was required for the more musical uses of bells on the *cymbala* and other chimes, and for the regular iteration of musical figures as clock signals. The relation of thickness to pitch (the thicker the bell the higher the pitch) had been determined in making *cymbala* bells in monasteries in the 12th century, just as it had been determined some 17 centuries earlier in making sets of oval *bianzhong* bells in China (*see* ZHONG). By 1200 CE there were founders who could make tower bells with pure octaves between the fundamental and the nominal.

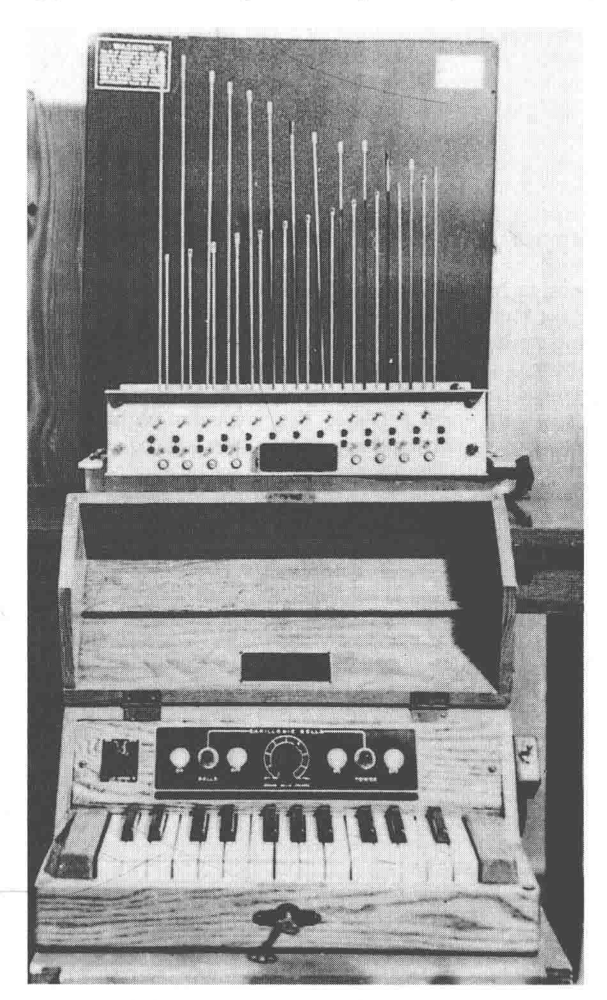
The first known written work on bell acoustics appeared in China in the 3rd century, and dealt with the sounding of bells by sympathetic vibration. The earliest dated treatises on bells in Europe are from the 13th century. One, by the French monk Vincent de Beauvais, noted three pitches in a bell and is the earliest record of

*5. Structural comparison of Eastern and Western bells*

*(a) Japanese bonshō*
*A Ryūzu ('dragon head') – single loop*
*B Chichi-no-ma ('nipple area')*
*D Ike-no-ma ('pond area') – may hold inscriptions or iconography*
*E Tsukiza ('striking-point')*
*F Koma-no-tsume ('hoof') – the thickest part of the bell*

*(b) Western*
*A Cannons – crossed loops*
*C Waist – lines at top and bottom are optional (inscriptions are usually placed near the lines, inconography in the middle)*
*E Sound-bow – striking-point at angle indicated, usually on inside*
*F Rim or lip – comes to a point, may be variously shaped*

recognizing partials. There is material on bells and their proportions of weight and size in Walter Odington's *Summa de speculatione musice* (pt.3, *c*1300). Another treatise is credited to Theophilus Presbyter, a monk attached to a Benedictine monastery near Essen, who may have been of Byzantine birth and who has been dated as early as the 10th century; his *Diversarum artium schedula* (bk 3, §§lxxxv–vi) discusses the bellfounder's craft in great detail, and had a strong influence on bellfounding throughout Europe. In the 13th century bellfounding passed into lay hands; bellfounders experimented with broadening the rim to withstand clapper thrust and with other new profiles, trying to find the best design of bell for church towers, which were then increasing in number. The founders next developed the outward curve of the sides into the tower-bell form presently most common, which in some countries is referred to as the 'Gothic profile'.



Modern investigations into bell acoustics sprang from the conflict between theological dogma and scientific curiosity among some men in religious orders. In the 17th century Mersenne wrote that the ringing of churchbells could disperse storms and thunder, but he was not sure whether this was due to the bells' baptism or to their vibrations tearing through clouds and releasing the thunder in them. He published a table of weights, diameters and thicknesses of sound-bows for bells sounding the C major scale in sizes up to 90 cm in diameter and weighing 450 kg. Mersenne's investigations, along with those of Descartes and of Christiaan Huygens, who also perfected a tower-clock mechanism, opened the way for the development of a wide range of well-tuned bells such as those made by the Hemonys and other 17th-century founders.

The investigations into bell acoustics by Mersenne and Huygens were continued in the 18th century by Leonhard Euler in Switzerland and Ernst Chladni in Germany, and in the 19th century by Baron Grimthorpe, Lord Rayleigh and Canon A.B. Simpson in England. In the 1890s Simpson made studies of sets of English and nearby continental bells, and reported that in most of them the founders had tuned only one partial, either the nominal or the fundamental, but in the bells of the best 17th- and 18th-century carillons on the Continent the founders had tuned the five most prominent partials. He therefore advocated that founders of his day should also tune all five, and he indicated the zones on the inside of the bell where metal should be removed in respect to each partial. Few founders followed his advice; but John Taylor & Co. and then Gillett & Johnston developed sufficient skill to tune a chromatic series of carillon bells properly. Although Simpson's desire was simply to improve the sound of English churchbells, he can be said to be the father of the modern CARILLON.

At the same time Aristarkh Izrailev, a Russian priest, conducted research on Russian stationary bells (Russ. *zvonï*) and P.J. Blessing investigated swinging bells in Germany. The reawakening of Dutch interest in the carillon included research by Abraham vas Nunes in 1909 on the bells of François Hemony. During World War I Johann Biehle conducted research in Germany on the tonal qualities of steel bells as possible replacements for bronze ones that had been sequestered to supply bronze for war purposes.

In the 20th century a few Japanese physicists, including Ichiro Aoki (who published from 1934 to 1957), did research on the sounds of large and medium-sized Japanese bells. In the USA research was done by the Meneely bellfounders (Watervliet, NY) in the 1890s and A.T. Jones in the 1920s. Jones's research was followed in 1930 by that of Franklin Tyzzer, who introduced a new procedure into bell-tone analysis: while 17th-century Dutch founders used bronze bars similar to those of the East Indian gamelan as tone standards, and 19th-century founders and physicists used both resonators and plain and adjustable tuning-forks, Tyzzer used an electric oscillator that could be set to various frequencies and touched to the bell to cause each partial to sound individually as a sustained tone. The same procedure was used by Erich Thienhaus in Germany during and after World War II, and by E.W. van Heuven in the Netherlands just after the war. They worked under unique conditions in that the wartime removal of bells from towers in both countries made it possible to bring selected bells to the laboratory for testing. Since then a great variety of research on old and new Dutch bells has been conducted in the Netherlands by André Lehr.

Shortly before and after World War II other electrical apparatus was developed not only to analyse bell tones

*6. Imitation bell instrument, with rods substituting for bells, possibly by Schulmerich, c1950*

cyl cylindrical, mean height greater than diameter; hangs stationary

but also to imitate them. The reproduction of swinging bells, tried in Germany, proved impractical because of the changes in timbre and surge as a bell swings in opposite directions; but the sound of stationary bells was approximated closely enough for the 'electronic carillon' to be promoted in areas where real tower bells were little known. Two American physicists who were also carillonneurs – Robert Kleinschmidt and Arthur Bigelow – were prominent in pioneering this instrument. One principle of its operation involved activating metal rods (one for each note) and amplifying their vibrations (fig.6). The difficulty was that although the timbre might approximate to that of a bell for an instant, it was not the same throughout the decay, and in low notes the rich effect of the many high partials of large bells was lacking. The instrument was played automatically or from a digitial keyboard without transmission of the touch, and all dynamic variation was by electric control affecting the whole range at once.

It has been demonstrated that concordant tuning in a bell is not always preferable. In the early 1950s the Dutch found that, after a government commission for the inspection of tower bells permitted only those bells with partials reasonably in tune to be rung, every bell in a city sounded alike and could be distinguished only by its direction and pitch. The Russians learnt to value an element of discord in tower bells somewhat earlier: after the work of Izrailev and others, some careful tuning was done to Russian *zvonï* (e.g. those in the Russian Orthodox church in the Garden of Gethsemane, Jerusalem), but it was found that the magnificent timbre of the old Russian bells was sacrificed. (Tchaikovsky planned to use the glorious Russian bell timbres in the first performance of his *1812 Overture* by having all the churchbells of Moscow rung on a signal from cannon in the Kremlin, but he had to be content with the massive bells at Uspensky Cathedral where it was first performed.)

The large Buddhist bells of East Asia, although not so dissonant as corresponding Western bells because of their fewer partials, are favoured with enough dissonance to have one to three beats per second; one reason they are hung low is so that the listener can come near enough to feel this pulsation bodily. For a discussion of the vibrational properties of bells, *see* ACOUSTICS, §V, 5.

3. SIZES. No instrument has been made in such a wide range of sizes as the bell. The smallest is no bigger than a pea; the largest could be used as a room. The smallest open bells have a diameter of less than 5 mm, and the largest just under 6 metres. Between these extremes bells have been made of almost every size, depending upon use, cost, attractiveness and the development of the bellmaking craft. But use and cost have determined that most open bells are much closer to the smaller size given than the larger, while all crotals are relatively small. The largest crotals (worn by Indian elephants) are about 18 cm in diameter, and the smallest (on pre-Columbian American jewellery) about 5 mm.

For such a universal instrument as the bell it is meaningless to speak of standard sizes. The size of a bell can sometimes be suggested by stating its use, as with a tower bell or animal bell, but this is in no way precise. Weight is in some ways a more useful standard than dimension for differentiating bells, especially large ones, because bells of very little difference in linear measurement may differ greatly in weight. In standard usage the figure given for the weight of a bell includes any inseparable protuberances for attaching it to a fixture (although this is not included in the height) and for holding its clapper, but does not include the weight of the clapper. The range of weights of bells is much greater even than that of their dimensions. Bells have been reported weighing as little as 1·5 grams and as much as 200,000 kg. Most bells are closer to the smaller limit than to the larger, and relatively few weigh more than 20,000 kg (Table 1).

There is no direct relationship between weight and size, even for bells with homologous outside dimensions, because of variables such as thickness (small bells varying up to ten times in weight; large bells having less variation in proportional thickness with more variation in actual weight), material (e.g. bronze or clay), or porousness due to slight differences in the manufacturing process.

It is difficult to obtain reliable statistics on the size of a bell, although the dimensions of existing bells can be measured. But often the investigator must rely on records of weight that may vary according to whether they represent the intended weight before casting, the weight of the total material used less that of what remains over, or the weight of the bell when it is removed from the mould. However, the true weight of the bell is its weight after cleaning and tuning (if done), when ready for delivery. There is a method for estimating the weight of a bell that is already in place, provided it is of circular plan,

but the exactness of this method depends on the accuracy of measurement of the profile, which can be guaranteed only if the profile is in exact homologous relationship to a known one.

4. History. The bell is found in many cultures both ancient and modern, and probably originated as a copy and development of two natural noisemakers: the pod filled with dried seeds (a natural rattle) and hard sticks arranged in a loose cluster. The bell's earliest use appears to have been as an amulet worn by people to impress both gods and men; this was the case with the golden bells on the high priest's robe (*Exodus* xxviii.33–5). They were also attached to animals to guard against evil spirits, frighten away predators, and hold a flock together by its distinctive sound. Although the magic or sacred efficacy of bells is almost nowhere maintained, it was an important part of their historical use in both Christian and non-Christian cultures.

The bell's cultivation as a musical instrument developed from its having been worn by people and shaken as a rhythm instrument to emphasize body movements in temple dances. Later it was hung on a frame singly or in small groups and used as a tone-colour instrument in court orchestras and was played by striking; from this it developed into an instrument of fixed scale comprising bells tuned in series. Bells were used thus in China from the Zhou to Ming dynasties (1122 BCE to 1644 CE) and also provided a means of fixing interval relationships in the Chinese system of music theory. Such an instrument did not appear in Europe until about the 13th century, when it was used both for musical performances and to give the pitches for plainsong incipits. The Chinese development has been kept alive in Korea; the European one, after receiving further expansion in the Low Countries in the 17th century, has spread to all areas of Western culture (*see* Chimes, §1, Carillon, Handbell).

Paralleling the bell's musical uses, and sometimes borrowing from them, was its cultivation as a signalling device. This development can be traced back to the hanging of small bells on draught and riding animals to indicate their approach; to the placing of somewhat larger bells on posts and gates to warn of danger or designate an area of military control; and then to the hanging of still larger bells in specially built permanent structures to call people to religious and secular assemblies, mark the hours, enhance public rejoicing and solemnize public mourning. Meanwhile, the use of small bells was developed in various ways for such local signals as summoning a person.

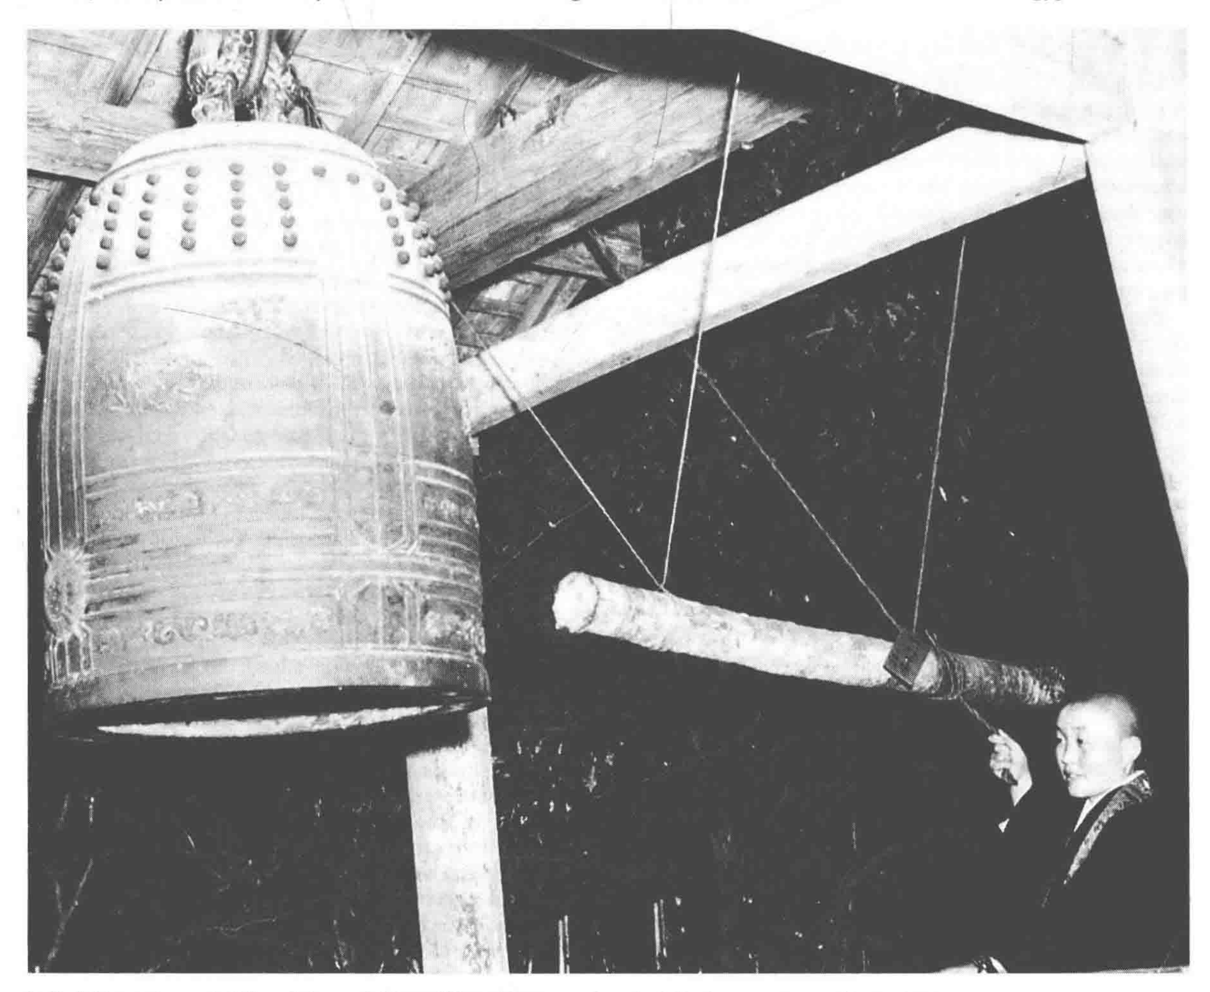
*(i) East and South Asia.* Excavations suggest that small bronze bells of both open and crotal types, circular in cross-section, came into use first in South-eastern Asia before 3000 BCE, and from there spread to India, China and the Near East. They were worn on the dress, presumably to ward off evil, signal a person's approach or emphasize body movements. Between 1500 and 1000 BCE open bells of oval circumference with pointed or 'fishmouth' rims came into use in China. They were made in increasingly large sizes until about 1000 BCE, when bells too large to be carried were made, necessitating a distinction between portable and non-portable bells. The non-portable ones were hung on a frame and struck with mallets. Terms describing the timbres of bells came into use, and eventually the tuning of bells to standard pitches was developed. By the 5th century BCE bells held an

*7. Small crotal bells tied to leather pads and used to accentuate rhythm in a ritual dance, Ambalangoda, Sri Lanka*

*8. Windbells under the eaves of the Outer Gate, Azula Temple, Western Hills, near Beijing*

important place in Chinese state orchestras playing for Confucian rituals (*see* Chimes, §1). For a detailed discussion of early Chinese bells *see* Zhong.

With the spread of bronze casting in the last centuries BCE, another form of open bell, the windbell (with clappers moved by the wind; fig.8), came into being; these were hung in groups from the eaves of sacred structures from Bali to Tibet, replacing clusters of sticks and other natural materials. In regions where the horse was widely used, crotals were favoured over open bells on harnesses because they could be sounded by vertical (as well as sideways) shaking and so were better adapted to trotting motion.



In India both crotals and open bells started to be used in Vedic ritual in about the 6th century BCE. Iconologically the open bell with flared sides represented the lotus flower. Handbells continue to be used in rituals and crotals are affixed to dancers' ankles. Open bells are hung in temple porches for devotees to invoke the deity they are about to worship by moving the clapper (*see* Ghaṇṭā).

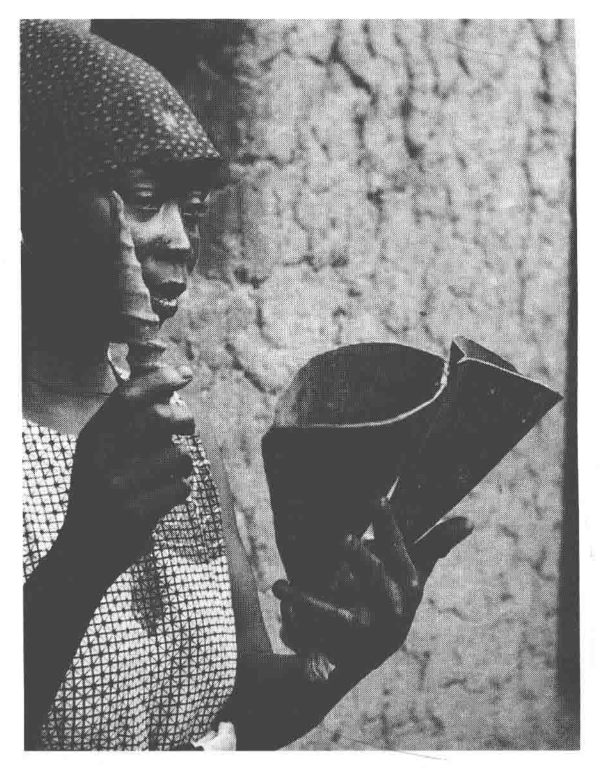
Buddhism adopted the handbell and the temple bell, and spread their use. It also made greater use of windbells, placing them in profusion along the eaves of temples and pagodas, so that at shrines where hundreds and even

thousands of them hung each gust of wind caused aeolian effects as if from a great orchestra. Buddhism related bellfounding to astrology, and cast larger bells than ever before as darbār ('court') bells. With its eastward spread Buddhism carried the bell of circular cross-section to China, where its much longer sound decay eventually caused it to replace bells of rectangular or oval cross-section. In Japan the Buddhist-type bell (see fig.9 and fig.5*a* above) was the successor to a flat bell with wide flanges. The belief that bell sounds transmitted a spiritual essence stimulated the casting of colossal bells by Korean, then Chinese and Japanese founders (see Table 1 above). This led to the use of large bells at gates for defence signals.

*(ii) Central Asia to the Mediterranean.* From prehistoric times in the area north of the Himalayas and west as far as the Caucasus, bells were light enough to be held in the hand or worn on pack animals because of the nomadic habits of the population. Any increase in volume of sound was effected by using bells in clusters. In about the 10th century BCE Iranian open bells were formed as representations of the flower, and crotals as the fruit of the pomegranate, thus adding bell timbres to potent visual symbols of regenerating life forces. In the 9th century BCE small rugged open bells were worn on Assyrian royal horses, and by the 5th century BCE such bells were hung singly on horses and camels from India to Libya and the Balkans. The Turks and Mongols made two-note crotals by joining two hemispheres sounding different notes to enclose the pellet. In Afghanistan the characteristic rhythmic patterns set up by bells on pack animals moving at an even pace were transferred to drum music and given descriptive names such as *zang-i-shotor* ('camel-bell rhythm') etc. The development of a clapper with an extension or 'flight' led to clusters of bells, one inside the other, used on camels in Persia and Egypt.

Although crotals (first of clay, then of bronze) were in use in Egypt as early as 2000 BCE, open bells did not appear until about 1000 BCE. They were probably first used as cult bells, often being decorated with the heads of such sacred animals as the ram, jackal or lioness, and sometimes shaped so that the body of the instrument represents the face of the god Bes. Magical purpose is clear in the case of a bell found at Meroe in the northern Sudan (late 1st millennium BCE), on which are incised figures of captives transfixed with arrows or the sword. The developing use of animal bells is illustrated by the splendid sets found with horses in the burials of X-group chiefs at Ballana and Qustul, reminiscent of the bells shown on horses in Assyrian hunting scenes. The wearing of bells for certain dances is a very ancient custom, traceable from the Middle East across Egypt to western

*9. Buddhist stationary bell (bonshō) sounded by striking with a ramrod, at the Jakkoin convent, near Kyoto, Japan*



Africa (and eventually found in England in morris dancing). Just as the role of cult bells evolved from one of protecting against a wrathful god, to marking the order of worship of a beneficient one, so their iconology developed from representations of reptile and animal deities to representations of flowers, abstract designs and the Coptic cross (*see* HANDBELL, fig.2).

In Greece, clay bells were in use from about the 8th century BCE and bronze bells from the 6th. They were all small and seem to have had slight musical or terpsichorean use, being employed rather as windbells to attract beneficient spirits or as votive offerings to a god. They also had military uses, such as dismaying people who were unfamiliar with the sound of metal. The Etruscans made use of large decorated bronze bells in funeral rites, presumably for apotropaic purposes. The cymbala and the crotala were the preferred instruments for dancing until Roman times, when both open bells and crotals, alone as well as with other instruments, were used to mark the rhythms of dances at festivals, especially in the orgiastic rites associated with Dionysus. With the gradual admission of the public to view rites formerly witnessed only by priests and initiates, a small bell was rung in front of some temples. The transfer of this custom to Christian rites in Alexandria and Carthage in the 3rd to 5th centuries may be seen to have prefigured the church tower bell. The largest pre-Christian Roman bell, found near Basle, Switzerland, and dated from about the 2nd century CE, is 17 cm in diameter and 10·5 cm high.

*(iii) Africa.* From ancient times a great variety of bells has been used in all parts of sub-Saharan Africa. They are in both crotal and open forms, and mostly are made of hammered iron, although some are of wood and a few of cast bronze. All the indigenous types are portable, the largest being about 50 cm high (without the handle). There are also instruments that are simply pieces of folded iron and are not strictly bells.

The main uses of African bells are for ritual, music and the protection and location of cattle. They are used musically in processions, dances and especially songs introducing dances. The crotal is employed for tone colour, either separately or attached to another instrument as in the harp-lute of Sudan, West Africa. However, it is used more sparingly than the open bell because it usually is deemed to have a greater ritual potency. Most crotals retain the shape of the natural pod rattle from which they are derived. The custom of wearing small crotals to give tonal emphasis to body movements is not so great as on other continents, JINGLES being used instead.

In some parts of Africa there are metal open bells with a suspended crotal for a clapper. However, the most typical open bell from Liberia to Mozambique has no clapper. It is made of forged iron shaped like a pyramid or a flattened hood, and is held in the left hand and struck with a hammer held in the right (fig.10); these struck bells may be manipulated against the players' bodies to produce changes of sound, usually in rapid succession. Sometimes two or three are joined to form a two- or three-note instrument. There are also wooden bells, usually with clappers and sometimes with multiple clappers hung to strike each other as well as the bell so that the instrument (resembling certain buffalo bells in South-east Asia) serves as both jingle and bell. In some parts of Africa a progenitor of the bell is used: the shell of a nut with a stick suspended inside as a clapper. Unusually, the *erero*, an open cast-bronze bell 10 to 30 cm high found in Benin, southern Nigeria and in variants along the western coast to the Congo, is regarded, however, more as an object to revere than as an instrument to sound.

*10. Double iron handbell (kuge) of the Hausa people, Nigeria, 1973*

*(iv) Pre-Columbian America.* Small bells were used in most areas of North and South America before the European invasions of the 16th century. A multiple-clapper wooden bell, resembling those in parts of Africa and South-east Asia, was known from Bolivia to Argentina. Clay crotals in imitation of natural pod rattles were made in Central America between 2000 and 1000 BCE. About the 1st century CE small clay crotals were atached as tripod legs to clay bowls, a device which had been applied to metal bowls in China in the 5th century BCE. In the 5th century CE remarkably clear-sounding clay crotals up to 10 cm high were made in Mexico, as well as cone-shaped open bells; both kinds are still in use.

Metal bells first appeared between the 8th and 10th centuries in Colombia and Peru. They evolved from a tine conic jingle of copper, first taking the form of an open bell with a pellet suspended inside, and then of a crotal with the pellet enclosed loose. These were cast in bronze in sizes from 4 to 16 cm high, first in teardrop shape, then in fruit and animal forms. By the 11th century they were also made of gold and silver alloys in smaller sizes. Generally in South America the crotal was both a ritual object and an article of dress. In Peru it was attached to the leg to mark rhythms in dances. Metal crotals were circulated widely along trade routes from Argentina to what is now the central USA, being particularly attractive to peoples without indigenous metal. For their ceremonies the Aztecs imported great numbers of crotals from subject peoples. Metal open bells were also made in South

America, but were less widely used than the crotal. They were made in several shapes, in heights up to about 30 cm. Some had single or multiple clappers of bone or stone, but metal clappers were unknown. One of their uses was as animal bells on llamas in caravans.

*(v) Europe.* The primary development of the bell in Europe was as a signalling device first for the Christian church and later for secular uses. Crotals on censers and other altar furnishings were derived from the rituals of earlier faiths. The open bell was first spread by Celtic missionaries who from the 5th century to the 9th placed handbells, mostly of forged iron, in religious houses across central and northern Europe from Germany to Iceland. Cast bells began to be manufactured by Benedictines in Italy at the end of the 6th century, and their use, first in handbell size but then larger, spread north and west across Roman Catholic Europe; gradually they replaced forged bells because of their louder volume and longer decay. This led to the use of large bells permanently attached to religious buildings for regulating religious life. Eventually the upper part of the church tower, originally a structure for defence, became the usual place for housing such bells, which increased in size and number as religious institutions grew in size and wealth over the centuries. These tower bells were sounded in the same manner as handbells by swinging, regardless of their size. This added a surge to their volume which has been a characteristic of Western churchbell sounds ever since, while limiting their rhythmic and melodic use.

In eastern European churches the original signal for calling to worship was the sound of 'knocking', made by striking on a thick wooden board called (from the Greek) a SĒMANTRON. Tower bells appeared much later than in Western churches. As they were gradually adopted, however, the custom of 'knocking' was transferred to them by fastening the bell stationary and pulling the clapper to strike it. This method of sounding does not put such a sideward thrust on a structure as do swinging bells; therefore when the Eastern churches became increasingly wealthy they tended to acquire more bells, and much heavier ones, then were found in Western church towers.

At first the accumulation of bells in both Eastern and Western towers resulted from their function of giving distinct signals for mass, obit, alarm etc; hence a distinct, recognizable timbre for each bell was desired. Indeed for some uses a disagreeable timbre was the most effective (e.g. the alarm bell 'tocsin', originally a manner of striking the bell rapidly high on the waist to bring out the upper partials). But as it became more common to ring several bells together for festive occasions, attention was given to improving their tone. This led to changes in the bell profile in order to bring the most prominent partials into octave relationship (see §2); the earliest extant example of this, a bell in the parish church at St Martin am Ybbsfeld, Lower Austria, is dated 1200. The next step was to relate tower bells tonally. This had already been accomplished on much smaller bells in monasteries (*see* CHIMES, §1). In the 14th and 15th centuries the impetus to relate the pitches of tower bells to short scale segments came from a desire to use fragments of liturgical melodies on tower clocks in abbeys, or to suggest such fragments in the interplay of notes in swinging peals.

In most of western Europe bells were swung at the natural pendular tempo of each bell, causing the smaller, higher-pitched bells to sound in faster succession than the larger, lower-pitched ones. In England a method of checking the bell's movement after each stroke was devised, so that each bell sounded the same number of times; variety was achieved by changing their sequences (*see* CHANGE RINGING). The arrest of the natural pendular swing of bells in order to control their succession in a series was also practised in parts of southern France. In the Iberian peninsula a type of tower-bell ringing using both stationary and swinging bells was developed. One large bell (*signum*) and sometimes several others were suspended stationary from the bell chamber ceiling and sounded, while smaller bells, which had great counter-balances and were hung pivoted in the bellchamber openings, were continually rotated – the player pushing alternately on the bell and the counter-balance.

Swinging bells were mostly rung by pulling a rope attached to an arm or a wheel, and required a person for each bell or even several people for a heavy bell. With stationary bells rung by pulling ropes attached to their clappers one man could sound several, except for the heaviest bells, which were often rung by one or two men directly pushing the clapper. This type of ringing was general in eastern Europe and was also practised in western Europe (*see* CHIMES, §1).

The rise of cities introduced secular ownership and control of some large bells without greatly affecting their usage. The development of clock chimes, which before general literacy were more useful than dials, led to widespread automatic playing and the evolution of the carillon. New combinations of notes in swung tower bells came into use over the centuries, with departures from old church modes. Eventually even the bells used on herd animals were musically related: Balkan herd bells, following Turkish tradition, conformed to a melodic scale, whereas Alpine herd bells, following western European tradition, were usually based on a harmonic grouping. The military bells of Turkish troops in Europe contributed two bell stops to the Baroque organ: the Glockenspiel and the Zimbelstern.

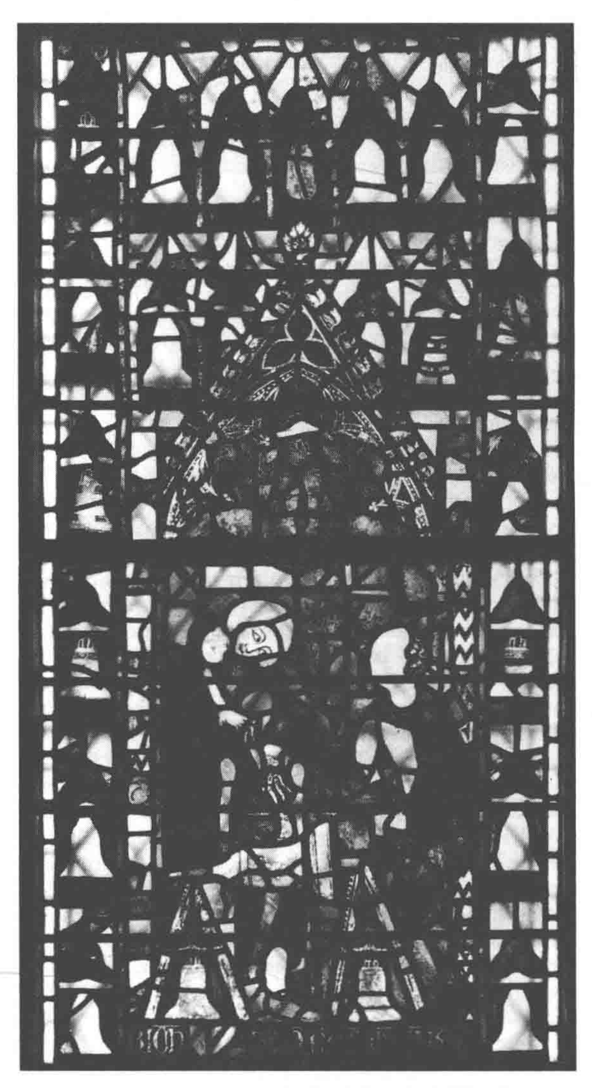
Both European bell customs and the actual products of European foundries have spread to all continents with the growth of world trade. Electricity is used to sound bells ranging from the largest swinging churchbell to the most remote telephone bell. By means of an electrical hook-up a carillon in western Belgium, an orchestra in Switzerland and a chorus and conductor in Brussels were combined in a broadcast concert. The daily ringing of the angelus, once a sign that the sexton was in the church, is now done automatically according to a time-clock. Except for English change ringing, much of the church ringing in western Europe is similarly performed. At the same time the tonal accomplishments of bellfounders and the development and spread of the musical use of bells have never been greater.

5. BELLFOUNDING. The casting of bells is an ancient and complex art that requires skill in the making of suitable moulds and the heating and fusing of metals into an alloy with specific acoustical properties. The Egyptians made bronze crotals using plaster moulds about 2000 BCE. Some time between 2000 and 900 BCE small open bells were cast in northern Iran, and by 850 BCE Assyrian bronze founders had found it better to use a higher ratio of tin to copper for harness bells than for their non-acoustical castings. The Hittite movements spread this knowledge to the Black Sea and eastern Mediterranean

areas. By the 4th or 3rd century BCE the casting of small bells was established at Nola, near Naples. In the meantime the Egyptians were putting ornamentation on their bells by the 'cire-perdue' (lost-wax) method.

Bronze casting was known in India by about 2000 BCE, but there is no proof of its use at that date to make bells. The ancient Indian bell-casting process (still used in Nepal) was conducted in the temple compound under strict astrological as well as metallurgical rules. From the Himalayas this knowledge spread over parts of south-eastern Asia, and after the advent of Buddhism it was applied to the casting of some very large bells, necessitating the use of furnaces instead of open fires.

Bellfounding in China began about the 11th century BCE, and by the 5th century BCE an alloy of about four parts copper to one of tin (the most common ratio of bell alloy today) was established. The metal was heated in crucibles and poured into clay moulds comprised of fitted sections. *Bianzhong* bells were at first made in different sizes for different notes, and later in different thicknesses; they were tuned by filing the rims.



The spread of Buddhism in eastern Asia between 200 CE and 600 gave a new impetus to bellfounding in Korea, China and Japan, and introduced cire-perdue for modelling small bells and for reliefs on large ones. Enormous bells were desired in order to produce a deep, prolonged and far-carrying note simulating the sacred sound 'Om'. Korean craftsmen took the lead in supplying the enormous bells called for in China and Japan. From about 1000 CE some large bells were cast in iron.

Iron bells have been made in different parts of sub-Saharan Africa from times unknown; in Benin (West Africa) bronze bells were cast well before 1600 CE. In the north Andean regions of South America small copper bells – both crotal and open – were made from about the 8th century. The craft gradually moved northwards, flourishing in Mexico in the 14th and 15th centuries, and extending as far as Arizona. A wax model was used and native copper, sometimes mixed with gold, was melted over a small charcoal fire with the aid of a blowpipe. (The clapper of the open bell was not a solid rod enlarged at one end, as on European bells, but a pellet on a string. In post-Columbian times this type was adapted to large tower bells by Latin American founders.)

In Europe and Christian Near East, evidence indicates that the small bells used by Christian cults in the first four centuries were cast according to pre-Christian Mediterranean traditions. The first recorded Christian bell makers are the smiths Tasag, Cuana and Mackecht, whom St Partick took to Ireland in the 5th century; but they seem to have made forged bells (like the 'cowbells' in some jazz orchestras) rather than cast bells. The development of cast churchbells started about the year 530 when the mother house of the Benedictine Order was established at Monte Cassino, providing easy contact with the pre-Christian bronze-casting centre of Nola. Drawing on this, the Benedictine order developed the casting of larger bells, making sketches of their profiles and writing specifications for their materials and weights. As the order spread, it established foundries in its monasteries elsewhere, and became the first widespread supplier of bells to Christian institutions throughout western Europe. As for such small bells as the Eastern churches then used, evidence suggests that those in the Balkans were supplied from Constantinople and those in Russia from Cherson in the Crimea.

Bellfounding in western Europe was aided in the 11th century by several treatises on metallurgy. The most detailed one was by the monk Theophilus (see §2); it tells how to make a wax model over a clay core on a horizontal spindle (as may be seen in the Bellfounder's Window of York Minster; see fig.11), and how to cast in a bronze alloy only slightly different from the ancient Chinese formula.

In the 12th century the horizontal spindle began to be replaced by a vertical one, except for the casting of small bells such as handbells. The common form of the bell changed form the more or less cylindrical 'beehive' shape to a slightly conical 'sugar-loaf', and eventually the present European bell form, a compromise between the two, was adopted by the end of the 14th century. Instead of the preliminary modelling in wax, clay was used to model a discardable 'false bell' on which to form the outer mould; and in place of line designs and lettering on the bell derived from stylus marks in the outer mould, reliefs and block lettering were obtained from wax forms applied to the false bell.

*11. Medieval bellfounders at work: detail from the Bellfounder's Window, c1325 (York Minster)*

These changes in technique and design occurred as bellfounding slowly passed from clerical into lay hands. With this came the casting of the founder's name on the bell, rarely done by clerics but common among lay founders. The latter included widows who knew their late husbands' casting secrets, for the bellfounding craft was held within families, and a foundry worker would not learn its fine points until he had proved himself a worthy member of the family and made himself a legal part of it by marriage.

Most of the work of medieval founders was itinerant. The founder carried boards (sweeps) which were cut to the profiles of his bells and used for shaping them, and the parish or municipality supplied the metal and hired local labour. Heavy tower bells were cast beside or near the tower; part of the founder's work was to recast bells that had become cracked or needed larger replacements.

The advent of cannon in the 14th century enlarged the scope of the bellfounder's activities because cannon used almost the same alloy as bells and were made by similar methods. In order to have the security of a local arsenal, cities offered foundry sites and special privileges to founders who would settle within their walls. The supply of metal might come from the city's churchbells, which would be made into cannon in wartime and back to bells after hostilities – if they did not have to be yielded as bronze to a conqueror. Foundry locations also depended on the proximity of good moulding clays. In a treatise published in 1540, the Italian bronze founder, Biringuccio, gave formulae (which have been followed to modern times) for improving clays and building moulds to withstand the intense heat and pressures of the founding process.

The career of a bellfounder was not always profitable restricted to one place, and by the 16th and 17th centuries most founders were either itinerant or migrant. Itinerant founders would cover a smaller area, returning annually to their homes; migrant founders might never return. Migrant Italian founders of this period wandered into central Europe and the Balkans, central European migrants went to Italy, and western European migrants worked across central and eastern Europe; the bellfounding craft which flourished in Russia in the 17th and 18th centuries was derived from German Baltic sources. Almost no English founders went to the Continent though they shipped bells there, an export that Elizabeth I banned lest the bells be converted into enemy artillery.

On the Continent in the 17th century the perfection of the clock increased the usefulness of tower-clock chimes and led to interest in their musical possibilities. This gave a favoured market to founders who could tune bells in an extended musical scale. Two migrant brothers, François and Pieter Hemony from the Bassigny region of Lorraine, were to become prominent in this. After casting several bells in Germany the Hemonys met a Dutch clockmaker, Juríaan Sprakel, who in 1642 had them cast 19 bells (later increased to 26) for the chimes of a civic tower clock he was installing at Zutphen, near Arnhem. Further orders combined the Hemonys' skill in casting with guidance in tuning from Van Eyck, the carillonneur of Utrecht, producing a wide gamut of bells (i.e. a carillon) so finely tuned that chords and extended figures sounded pleasing on them. Sprakel's installation of such bells on his numerous tower clocks, where they not only sounded the hours but were hand-played in musical performance, introduced the carillon as a more sophisticated instrument then the more limited chimes.

The Hemony brothers settled in Zutphen and cast carillons there until 1657, when François Hemony moved to Amsterdam as bellfounder and 'cannon maker by royal command'. His brother joined him in 1664 and soon took over the foundry. Later Pieter moved to Ghent, where he cast until about 1680. The two brothers cast over 50 carillons, with ranges of 26 to 37 bells (*see* HEMONY). They had no qualified successors, but this did not prevent other clockmakers from selling tower clocks with two to three chromatic octaves of poorly tuned bells in regions where better bells were unknown. Usually the clockmaker arranged the contract for a civic tower clock with carillon and obtained the bells where he chose. The few musically valuable carillons between the death of the Hemonys and the 20th century were almost all made by Flemish founders.

During the 17th and 18th centuries bellfounding was also influenced by the more opulent Russian monasteries, which both increased the number of small bells in their *trezvonï* (*see* CHIMES, §1) and added larger ones. Since ringing them put no lateral thrust on the tower (unlike swinging bells), Russian bellfounders were called upon to make larger bells than any in western Europe; in fact, before the founding of modern ship propellers no castings of any kind were as large as these bronze idiophones, many of which were melted down during the Russian Revolution. The very largest were cast at their site, using multiple furnaces; Russian founders also made large bells to be sold in open trade at annual bell markets in several cities.

In western Europe during and just after the French Revolution, there was a great melting of bells for armaments and coinage; but this (as with the destruction of bells in World War I and the much greater confiscations of World War II) meant an expansion of foundries after peace came, in order to make replacements. By the mid-19th century the railways made the itinerant founder unnecessary. By this time too the dominance of Europe in world politics and trade helped to place European bells where before they were unknown or forbidden.

European bellfounding had, however, already been long established in certain non-European areas. The crusaders introduced it to Lebanon where it has continued on a small scale (from the 16th century in the Naffah family). The Spanish and Portuguese brought bellfounders to their American colonies, and their descendants have carried on the craft. One of the largest bells in Mexico City Cathedral was cast in 1528 by Simon and Juan Buonaventura. In the American colonies further north, bells were imported from Europe as long as there were close political connections. The first native bellfounders in the USA were in New England: Aaron Hobart, who advertised in the *Boston Gazette* in 1770, the celebrated Paul Revere, who cast his first tower bell in 1792, and George Holbrook, who after ten years as apprentice to Revere set up a foundry in Brookfield, Massachusetts, moving in 1816 to Medway. In the 19th century foundries were established outside New England: McShane in Baltimore, Meneely in Watervliet, near Albany, New York, and others.

The 20th century, and particularly the post-World War II period, brought still greater changes in bell-founding practice. Foundries began to use commercial moulding

materials and bell metal in ready-made alloy form. The drying of moulds could be done by forced air in controlled temperature chambers. There were sophisticated instruments for indicating the temperature of the metal before the bell was poured, and for measuring the frequencies of the partial tones both after it was removed from the mould and during the tuning process. Power equipment moved ladles from furnaces to moulds and hoisted the bells from their pits after casting. All this required a capital investment and made the head of a foundry more akin to the modern businessman than to the craftsman of earlier times. Modern founders include Gillett & Johnston, John Taylor & Co. and the Whitechapel Bell Foundry in England; Eijsbouts and Petit & Fritsen in the Netherlands; Paccard and Bollée in France; Cavadini and Colbacchini in Italy; Grassmayr in Austria; Rincker and Friedrich Schilling, and the VEB Glockengiesserei (formerly Franz Schilling Söhne) in Germany; and Sørensen in Denmark.

6. EUROPEAN TECHNIQUES AND TRADITIONS. Most European languages use a word which is clearly related to the English 'clock' (as in 'clocking', striking or chiming a bell): *cloche* (Fr.); *Glocke* (Ger.); *klokke* (Dutch); *kolokola* (Russ.). Only in the English tradition do bells 'ring' fully, in the sense of rotating (on a wheel) through 360°. Most continental European bells 'swing', in that they rotate (sometimes on a full wheel, but often on a half wheel) through a maximum of 180°. Russian bells neither ring nor swing; they are hung 'dead' and are sounded not by the movement of the bell but by the movement of the clapper (operated by a rope or ropes). This means that they are 'chimed', albeit on the inside rather than on the outside rim, which is normally associated with controlled chiming. These contrasting installation methods not only determine the behaviour of individual bells, as ringing, swinging or chiming, but they determine the nature and effect of the ensemble when whole collections of bells are in play. The method of installation especially determines the range of rhythmic outcomes, and it is this rhythmic aspect which has determined the contrasting approaches to pitch in the English and central European traditions.

Because English bells rotate through 360° they can be balanced upside-down, using the point of inertia to delay the moment when the bell is rung. It is this capacity for controlled delay that enables the bells to be rung through all the rhythmic permutations known as 'changes' (*see* CHANGE RINGING). Central European bells, however, once in motion, tend to swing through an arc at a speed determined by their size and weight. While English bells are not normally intended to strike simultaneously, in the European tradition it is considered inevitable and desirable that two or more bells will strike simultaneously. Thus the English conception of bellringing is essentially melodic whereas the central European approach favours a clangorous euphony.

The disposition of pitches within a peal reflects these different melodic and harmonic priorities. English peals are almost invariably designed in tetrachords, according to the diatonic major scale, while continental peals tend to produce a chord or chords. In the great majority of cases these chordal effects are based on the pentatonic scale, or subsets of it. Some great peals (such as the 'Plenum' peals of the cathedrals of Frankfurt and Strasbourg) are designed on a hexachord which is configured like a major scale without the fourth degree; this allows for two pentatonic patterns (each produced by deleting either the top or the bottom pitch) and their respective subsets. Many European composers have incorporated such pentatonic patterns into their music as part of either a literal or a disguised representation of bells (e.g. Liszt, Wagner, Mahler, Janáček, Debussy and Ravel). Such effects are entirely different in concept from the principles of English change ringing and these different traditions and techniques should not be confused.

While such pentatonic configurations are typical of bell peals throughout northern and central Europe, including Germany, northern France, Switzerland, Austria and Bohemia, they do not apply in Russia, where bells are rarely cast as complete collections and so are not required to conform to any overall pitch design. Religious foundations have tended to acquire individual bells at different times, often as gifts from local rulers or from the tsar. There were also periodic 'bell fairs' at which bells could be purchased 'off the peg', an approach quite different to the Western European preference for custom-made or commissioned peals. The dissonant properties – in particular, the strong tritone overtones – of individual Russian bells were regarded as part of their particular character, and it was not thought necessary or desirable to suppress such dissonant overtones by 'tuning' them, as was usual in western Europe. The gradual, unplanned acquisition of bells by Russian foundations also made it possible (or even probable) that there would be harsh dissonances between bells hung in close proximity to each other.

7. THE USE AND REPRESENTATION OF BELLS IN ART MUSIC. Bells were first used in orchestral music in the cantata *Schlage doch, gewünschte Stunde* (formerly attributed to Bach, now tentatively attributed to Melchior Hoffmann) they were probably small and operated from the organ manual. Bells are called for in various late 18th-century scores, e.g. Dalayrac's opera *Camille* (1791) and Cherubini's *Elisa* (1794). Rossini called for a bell to sound *g′* in the second act of *Guillaume Tell* (1829), and Meyerbeer for low bells sounding *c* and *f* in *Les Huguenots* (1836). Possibly real church bells were used on these occasions, and also by Berlioz for the finale of his *Symphonie fantastique* (1830). In the original score of *Boris Godunov* (1868–9) Musorgsky called for *trezvonï* (*see* CHIMES, §1; for details of the bells used at the first performance of Tchaikovksy's *1812 Overture* (1882), see §2 above). The use of real church bells, or their near equivalent, is connected more with the theatre than the concert hall: the stage equipment of many opera houses includes real church bells. Some composers have aimed to imitate their effect with orchestral colour; others have used substitutes, including tubular bells, bell plates, mushroom bells and electrically amplified metal bars, piano wires and clock gongs. Mushroom bells and large bronze plates, such as those used in La Scala and the Covent Garden mushroom bells, have proved effective substitutes for church bells. The instruments used for the notorious ostinato tolling which accompanies the processions of the Grail Knights in Wagner's *Parsifal* (1882) have ranged from church bells and a piano frame with four strings (occasionally supplemented with the 16′ stop of an electric organ) to hammered bell machines, amplified metal rods and gongs; since the 1970s synthesizers and electronic instruments have increasingly been used. Wagner apparently based the ostinato, a pattern of interlocking perfect fourths

*c–G–A–E*, on chimes which he had heard at Kloster Beuron; the motif was soon to become as ubiquitous in German timepieces as William Crotch's 'Westminster' chimes had long been in England (*see* CHIMES, §2). The bells generally used in the concert hall are TUBULAR BELLS (termed 'chimes' in the USA, 'orchestra bells' being the term for the glockenspiel). These were introduced by John Hampton of Coventry in 1886, for the peal of four bells in Sullivan's *Golden Legend*. In 1890, tubular bells appeared with a keyboard (the codophone) at the Paris Opéra. In the symphonies of Mahler, bells are used for literal effects (the sleigh bells in the outer movements of the Fourth Symphony) and metaphoric reasons (in the Sixth Symphony real alpine COWBELLS allude to the ascension of a human soul). In the fifth movement of the Third Symphony Mahler employed bells in pentatonic patterns.

Outstanding bell writing in the modern orchestra can be found in John Ireland's *These Things Shall Be* (1937), Britten's chamber opera *The Turn of the Screw* (1954), Messiaen's *Turangalîla-symphonie* (1946–8) and *Chronochromie* (1960), Boulez's *Pli selon pli* (1959–62), William Alwyn's *Fifth Symphony 'Hydriotaphia'* (1972–3) and Tippett's *The Rose Lake* (1991–3); Stockhausen wrote for a specially constructed set of bell plates in *Musik im Bauch* (1975).

Composers also use orchestral colour to imitate the motivic and timbral effects of bell ringing and chiming for metaphoric or allusive reasons:

*(i) The western European tradition.* The music of Liszt abounds in bell effects, mostly drawing upon central European pentatonic turnings. The opening bell-like motif of 'Spozalizio', from the second year of *Années de Pèlerinage*, permeates the texture and so determines the harmonic language of the piece. The ninth piece of the *Weihnachtsbaum* set (1874), 'Abendglocken', evokes evening bells by means of rhythmic layers of pentatonic harmony.

The bell textures which are so common in the piano works of Debussy and Ravel tend towards the pentatonic formations of the central European tradition. The last song in Debussy's collection *Trois Mélodies* (1891), 'L'échelonnement des haies', is a setting of the poem by Verlaine which depicts the flat Lincolnshire fenscape, closing with a reference to bells. Although Verlaine would have heard change ringing in Lincolnshire, Debussy's setting evokes the sound of pentatonic bells familiar to him from the churches of northern France. By contrast, allusions to bells in the music of Messiaen display his sensitivity to the principle of 'added resonance' and have a higher level of dissonance (e.g. in 'Noel' from the *Vingt Regards sur l'Enfant Jesus*, 1944), suggesting a greater affinity with the Russian approach of Stravinsky.

*(ii) The Russian tradition.* Within the Russian tradition the most outstanding musical treatments of Orthodox *zvonï* (chimes or peals) occur in works by Musorgsky, Stravinsky and Rachmaninoff. (The relative lack of bell effects in the music of later Russian composers can be attributed to the after-effects of the revolutions of 1917, including the destruction of numerous bells and the prohibition of sounding those which remained.) The 'Coronation Scene' in Musorgsky's *Boris Godunov* is not only a spectacular example of the musical simulation of Russian *zvonï* (specifically, the layering of rhythmic activity, representing the different sizes of bells); it also accurately reflects the tritonal dissonances so characteristic of Russian bell tunings. If this piece may be regarded as a touchstone for the tritonal harmony developed by Debussy, Stravinsky and others, then it must be acknowledged that the Russian bell tradition has had a remarkably potent effect on music of the 20th century, for example in the minimalist compositions of Steve Reich.

Apart from Stravinsky's liking for tritonal oppositions (exemplified by *Petrushka*), the most significant bell-derived element of his compositional technique is his use of layerd ostinato patterns. These permeate his music: in *Petrushka* the opening scene depicts the Shrovetide Fair in St Petersburg, a festival strongly associated with joyful bell chiming.

The rhythmic layering can also be found in an early work by Rachmaninoff, the 'Russian Easter Festival' from the *Fantasie-tableaux* (1893) for two pianos. His output contains numerous other examples of bell-derived harmonies and rhythms of which perhaps the most interesting case is the choral symphony *Kolokola* (1913), his treatment of Edgar Allen Poe's *The Bells*, in which he takes care not to overplay the opportunities for literal representation at the expense of the metaphoric meanings conveyed by the poetry.

*(iii) The English tradition.* Numerous instances may be found of literal representations of change ringing in the music of English composers. An outstanding example of literal (yet highly imaginative) depiction is the 'Sunday Morning' interlude in Benjamin Britten's opera *Peter Grimes*. Here Britten fondly reproduces not only the melodic and rhythmic permutations of the changes, but also composes some realistic inaccuracies into them. Although bells (either individually or collectively) appear frequently in Birtwistle's music, they often occur in a disguised manner, as part of the musical fabric, for example in passages where the music proceeds in different layers of rhythmic pulsation. Two early works by Maxwell Davies have titles which are explicitly derived from change ringing: *Stedman Doubles* for clarinet and percussion (1955, rev. 1968) and *Stedman Caters* for sextet (1958, rev. 1968), although the musical content is in fact more strongly influenced by elements of Indian classical music. Several works by Gilbert have used change ringing principles as a means of generating rhythmic and motivic permutations of material; these are often used as part of the background texture of a work, although they can also operate at a developmental level. Such ideas have featured strongly throughout Gilbert's teaching career and have thus had a significant influence on the following generation of British composers.

Not all 'bell' pieces by English composers, however, have been influenced by the native change ringing tradition. John Tavener makes extensive use of bell patterns, but these tend to reflect his religious and musical interests in the Greek and Russian Orthodox traditions. One of the most significant bell-inspired pieces is Jonathan Harvey's tape piece *Vivos Voco! Mortuos Plango!* (1980) which samples and transforms electronically the sounds of the great bell of Winchester Cathedral and a boy treble (the title derives from two of the Latin inscriptions on the bell).

PERCIVAL PRICE (1–5), CHARLES BODMAN RAE (6), JAMES BLADES, CHARLES BODMAN RAE (7)

**Bell (ii)** (Fr. *pavillon*; Ger. *Schallstück*, *Kopfstück*; It. *campana*, *padiglione*). The terminal part of an open-ended wind instrument tube, opposite the mouthpiece. Although the English word and the Italian 'campana', meaning 'bell', as well as the French equivalent and Italian 'padiglione' meaning 'tent', relate descriptively to the flared tubes of ancestral trumpet and shawm types, in modern usage the terms cover a wide range of shapes, some of them far from bell-like.

Among modern brass instruments the bell varies from a slight expansion of the open end, as in the bugle of the British Army type, to the abrupt and widely skirted flare found mainly in American-designed bass instruments. Intermediate forms include the wide and gradual flare typical of the orchestral horn and the smaller and more abrupt eversion associated with trumpet types.

Among modern woodwind instruments the bell embraces even more diverse forms. In clarinets and most smaller oboes it varies, internally, between a strict cone and a smoothly expanding curved flare, and may show elements of both combined in different ways according to formulae devised by individual makers for their own instruments. A bell with a thickened and in-turned rim is still characteristic of oboes made in the Viennese tradition, and may be regarded as the survival of a feature that was nearly universal in the 18th and early 19th centuries though rare today. The bell of the larger oboes is usually pear-shaped externally and spheroidal inside, a form termed 'liebesfüss' by German-speaking organologists; larger oboes are also known with a simple open bell. In the modern bassoon the bell is fusiform with a bore that may be conical, cylindrical or sometimes 'choked' (i.e. with a reverse taper relative to the main bore of the instrument; *see* BASSOON, fig.2*a*).

The form and dimensions of the bell are important factors in the acoustic behaviour of a musical wind instrument. In general terms the effect is as follows: when a wind instrument is sounded an array of related vibration frequencies is generated in the air column and passes along it towards the open end. Of these vibrations, those below a certain 'cut-off' frequency (which is specific for a given instrument) are almost completely reflected back at the open end, and very little of their energy is passed on to the surrounding air (i.e. they are poorly radiated). Above the cut-off progressively higher components of the spectrum are radiated with increasing freedom. In instruments in which the active air column occupies the whole length of the tube (horns, trumpets, etc.) the conformation of the bell determines which components are freely and which poorly radiated, and to what degree. The bell thus acts as a varying high-pass filter with respect to the internally generated spectrum, and it has a profound influence on the tone quality of the instrument. The rate of flare of the bell section of a brass instrument also

affects the relative frequencies of the air column modes of vibration, and thus the tuning of its natural notes. Near the cut-off frequency (typically around 1000 Hz for a tenor trombone), sound waves from the mouthpiece travel practically all the way to the open end of the bell before being reflected. For waves with frequencies well below cut-off, on the other hand, the reflection occurs some distance inside the bell. Since this has the effect of making the effective acoustical length of the air column shorter than the actual tube length, it raises the pitches of the lower modes relative to those near the cut-off. The pitch change depends on the degree of flare of the bell section, which is thus an important factor in the design of a well-tuned brass instrument.

With woodwind instruments, in which the effective length of the air column is regulated by side holes, a more complex situation exists. The cut-off frequency of the instrument depends not only on the bell but also on the pattern of open and closed holes; it therefore varies from note to note. Components of the internal spectrum above cut-off frequency are freely radiated from all holes standing open, while below the cut-off frequency radiation takes place mainly from the highest one or two open holes. Playing down the scale, however, requires the successive closing of holes down to the lowest, so radiation from them must finally stop. As successive holes are closed, more radiation from the open end of the tube comes into play, provided that the open end has an appropriate flare. The bell becomes a substitute for side holes that are no longer open, and thus has a marked influence on the 'heard' spectrum in various parts of the scale.

With the spheroidal *liebesfüss* or *d'amore* bell, an additional property, cavity resonance, becomes evident. Though this form of bell has for many years been credited with imparting a nasal or melancholy quality to the associated instrument, it is now known that its effect – that of emphasizing certain frequencies – extends only to the first three or four notes of the scale. Above this, the heard spectrum is very much what might be predicted for a normal oboe proportionately enlarged.

PHILIP BATE/MURRAY CAMPBELL

**Bell, John L(amberton)** (*b* Kilmarnock, 20 Nov 1949). Scottish composer. He received degrees in arts and divinity from Glasgow University, and was ordained by the Church of Scotland in 1978. He has since been employed as a resource worker in areas of Christian liturgy and spirituality by the Iona Community, based in Glasgow; the community's Wild Goose Worship Group has provided the testing ground for much of his congregational music. Both individually and in association with Graham Maule (*b* 1950) he has produced ten collections of songs and hymns, including *Heaven Shall Not Wait* (Glasgow, 1987) and *Love from Below* (Glasgow, 1989), as well as anthems and a song cycle, *Seven Songs of Mary* (1989). He has also edited and arranged two volumes of international Christian music entitled *Songs of the World Church* (Glasgow, 1990 and 1991).

Bell follows a clear ecumenical path, his liturgical music appearing with increasing frequency in hymnbooks across the denominations. He works sensitively on both text and music, matching his own texts either to fine but neglected folktunes or to his own fluent and shapely melodies. In keeping with the breadth of his churchmanship, his liturgical music embraces a variety of forms and styles: responsorial, metrical or strophic, presented in homophony, imitative polyphony or even monody. In the conservative sphere of music for Christian worship, Bell seeks to broaden both subject matter and emotional range, as exemplified by his *Psalms of Patience, Protest and Praise* (Glasgow, 1993), in which Psalm lxxxiii is set responsorially to music of relatively high harmonic tension.

ANDREW WILSON-DICKSON

**Bell, Joshua** (*b* Bloomington, IN, 9 Dec 1967). American violinist. He studied with Mimi Zweig, 1975–80, and with Josef Gingold at the University of Indiana, Bloomington, 1980–89. He made his solo début with the Philadelphia Orchestra under Riccardo Muti in 1981, and has subsequently followed an international career as a soloist, appearing with many leading orchestras including the New York PO, the Boston SO and the Los Angeles PO, as well as the LPO and the CBSO. In October 1993 he gave the first performance of Nicholas Maw's Violin Concerto, of which he is the dedicatee, with the Philharmonia conducted by Leonard Slatkin. Bell has made many recordings of the concerto repertory, and has also recorded chamber music with the pianists Jean-Yves Thibaudet and Olli Mustonen, and with the Takacs Quartet. In 1991 he formed a trio with Olli Mustonen and the cellist Steven Isserlis, and in 1997 established an annual chamber music festival at the Wigmore Hall, London. Bell is a player of solid technique, and produces a sweetness of tone with phrasing that is suave and musical. He plays a 1732 Stradivari, the 'Tom Taylor'.

MARGARET CAMPBELL

**Bell, W(illiam) H(enry)** (*b* St Albans, 20 Aug 1873; *d* Gordon's Bay, Cape Province, 13 April 1946). English composer. He was a chorister at St Albans Cathedral and gained a scholarship to the RAM, studying the organ, violin and piano (1889–93). Corder was his composition teacher, and he also studied counterpoint privately with Stanford. From 1909 to 1912 he was a professor of harmony at the RAM and he was director of the Pageant of London for the 1911 Festival of Empire. August Manns presented a work by Bell in every season of the Crystal Palace concerts from 1899 to 1912, and performances were also given by Dan Godfrey at Bournemouth, Henry Wood at the Proms, Nikisch and Henry Balfour Gardiner. Beecham took some interest in Bell, conducting the *Arcadian Suite* and *Love among the Ruins*.

Despite a steady flow of performances, Bell left England in 1912 to become director of the South African College

of Music (later absorbed into the University of Cape Town), where he contributed decisively to the musical life of South Africa, numbering John Joubert and Hubert du Plessis among his students. He was greatly assisted by his wife, Helen, sister of John McEwen. He founded and directed the Cape Town Little Theatre, nurturing an interest in opera and ballet. During a trip to England in 1921 he conducted his Symphonic Variations. The first conductor of the Cape Town Municipal Orchestra, Theo Wendt, presented most of Bell's music from the South African years until his own retirement in 1924. Bell retired from the university in 1935 and moved to England but, isolated from South African friends, he returned to the Cape in 1937. Bell's reticence contributed to the near disappearance of his music, until a commercial recording of the *South African Symphony* on the Marco Polo label and political change in South Africa opened the way for revival. His music is tonal, favouring an Impressionistic style leaning towards the idiom of Granville Bantock rather than Vaughan Williams.

WORKS
(*selective list*)

STAGE

Hippolytus (music drama, 3, after Euripides), *c*1914, unperf.; Isabeau (fantasia, 1), 1922–4, unperf.; The Mouse Trap (op, 1, after R.L. Stevenson: *The Sire de Maletroit's Door*), 1928, unperf.; Doctor Love (op, 1, after Molière), 1930; The Wandering Scholar (musical comedy, 1, C. Bax), 1933, Cape Town, Little, 28 Oct 1933; The Duenna (musical comedy, 3, after R.B. Sheridan), 1939, unperf.; Romeo and Juliet (op), 1939, inc.

Japanese nō plays (all texts trans. A. Waley): Komachi (Kwanam), 1925, unperf.; Tsuneyo of the Three Trees (Hachi No Ki), 1926, unperf.; Hatsuyuki (Komparu Zembo Motoyasu), 1934, Cape Town, Little, 19 Nov 1934; The Pillow of Kantan, 1935, Cape Town, Little, 28 Oct 1935; Kageyiko (Seami), 1936, unperf.

Incid music: Life's Measure (N. Monk), ?1905–8; A Vision of Delight (B. Jonson), small orch, 1906

INSTRUMENTAL

Orch: The Canterbury Pilgrims, sym. prelude, 1896; The Pardoner's Tale, sym. poem, 1898; Sym. no.1 'Walt Whitman', c, 1899; A Song of the Morning, sym. prelude, 1901; Mother Carey, sym. poem, 1902; Epithalamium, serenade, 1904; St Alban's Pageant, 1907; Agamemnon, sym. prelude, 1908; Love among the Ruins, sym. poem, 1908; Arcadian Suite, *c*1908; Danse du tambour, 1909; The Shepherd, sym. poem, 1910; La fée des sources, sym. poem, 1912; Prelude, 1912 [based on 2 Eng. folksongs]; Staines Morrice Dance, 1912; Sym. ROBERT BARNETT

**Bella, Ján Levoslav** [Ján Ignác; Johann Leopold; János Leopold] (*b* Liptovský Mikuláš, 4 Sept 1843; *d* Bratislava, 25 May 1936). Slovak composer and conductor. While at school in Levoča (1853–9), he studied the piano, the organ, several string and wind instruments, conducting, figured bass and composition. He completed his secondary education (1859–63) in Banská Bystrica, where he also read theology and began his musical career. In Vienna he read theology at the university (1863–5), studied music with Simon Sechter and the court Kapellmeister, Gottfried Preyer, and, as a student at the local Pázemáneum Collegium, he became choirmaster of the Pázemaneum choir and an adherent of the Cecilian movement. In 1865 he moved to Banská Bystrica, where he was ordained priest (1866) and taught singing and music theory at the theological seminary. His attempts to found a distinctive Slovak music were encouraged by the violinist Ede Reményi (1869) and the Czech critic Ludevít Procházka. In 1869 he was appointed town music director in Kremnica. During visits to Bohemia (1871) and Germany (1873) he met Smetana and Dvořák and was introduced to new trends in composition. In 1881 he became a teacher in Hermannstadt, Transylvania (now Sibiu, Romania), but converted to Protestantism, married and became choirmaster at the local Protestant church. He continued as choirmaster until 1921, and at the same time taught music at the Realschule and conducted the local choral society and the Hermania chorus. He lived in retirement in Vienna until 1928, when he was able to move to Bratislava and the Slovak cultural environment in Czechoslovakia.

Bella's compositions span nearly 70 years. His musical language was formed during the Czech National Revival of the 1860s and the Cecilian reform of church music. His technique, reinforced by Sechter's teaching, was governed by his efforts to lay the foundations of Slovak national music (for instance the Slovak songs for four male voices and the Variations for piano). At the same time he wrote the first modern Slovak chamber pieces: the Dumky for violin and piano, the String Quartet no.1 in G

minor and the String Quintet in D minor. His contacts with musicians in Prague further stimulated his interest in the composition of chamber music (his string quartets nos.2–3), initiated the first Slovak orchestral pieces (the symphonic poem *Osud a ideál*, 'Destiny and Ideal'), led him towards lyrical songs on German and Czech texts and inspired large sacred pieces (Mass in B♭ minor for soloists, chorus and orchestra). This was also the period of his first attempts at opera: *Jaroslav a Laura* ('Jaroslav and Laura', 1873). Bella's achievement in the period 1862–81 was inspired first by his nationalist aspirations and second by his desire to adapt recent developments in compositional techniques. The sharp contrast between his aims and those of the local musicians resulted in disputes and crises which, however, led to further developments in his style. The years spent in Hermannstadt (1881–1921) represent a decline from the earlier ideal and a tendency towards neo-romanticism, as in the Piano Sonata in B♭ minor, the String Quartet in B♭, the String Quartet in C minor and the (unfinished) Symphony in C minor. A decade was devoted to his masterpiece, the opera *Wieland der Schmied*, and to numerous sacred works and pieces for organ that demonstrate his ideals relating to church music.

Bella's return to Slovakia was prefaced by the première of *Wieland the Smith* (as *Kováč Wieland*) in the Slovak National Theatre, Bratislava, on 28 April 1926. His return reawakened his early desire to create a Slovak national style, as can be seen in the cantatas *Svadba Jánošíka* ('Jánošík's Wedding', 1927) and *Divný zbojník* ('Strange Brigand', 1933), and other choral works and songs. His long life inevitably resulted in a variety of styles and changes. His output, which covers all genres of the time, laid the foundations for modern Slovak music.

WORKS

*MSS in SQ-BRnm*

OPERAS

Jaroslav a Laura [Jaroslav and Laura] (V. Pok Poděbradský), T, orch, 1873, inc.

Wieland der Schmied (3, O. Schlemm, after R. Wagner), 1880–90, perf. as Kováč Wieland, Bratislava, National, 28 April 1926

SACRED

*Catholic*

10 masses (composed 1860–69 unless otherwise stated): Missa, B♭, TTBB, before 1864; Missa, E♭, TTBB, op.6, before 1865; Missa S Mariae, A major, SATB, orch; Missa pro die Dominica, E♭, SATB, orch; Omša [Mass], SATB; Missa brevis, G, TTBB; Requiem, S, A, T, orch; Missa brevis, E♭, 1v, org; Sonntags-Messe no.6, C major, SATB, orch, 1870s; Messe, b♭, solo vv, SATB, orch, org, 1875–80

*c*50 other works, incl. Staroslovenský Otče náš [Early Slovak Lord's Prayer], SATB, op.3, 1863; Pange lingua, 1v, org, 1863–5; Haec dies, offertorium solemne pro Paschate, TTBB, op.8, 1866; Tu es Petrus, cantus solemnis, TTBB, TTBB, op.20, 1869; Ave rex noster, S, vn, hmn, 1860s; Benedicta et venerabilis, 1v, 2 fl, ob, 2 cl, 2 hn, bn, 1860s; Te Deum, TTBB, 1860s; Alleluia, Emitte Spiritum, SATB, SATB, 1873; Christus factus est, SATTB, 1879; Cum audisse populus, SAB, 1870s; Ave Maria, S, T, org, 1930

*Protestant*

*all after 1881*

Ach bis zum Tod (Passionkantate), B, SATB, orch; Christus hat geliebt die Gemeine (Osterkantate), B, SATB, orch; Ehre sei Gott!, S, SATB, orch; Es täumelten (Reformationskantate), solo vv, SATB, orch; Gott, sei mir gnädig (Reformationskantate), solo vv, SATB, orch; Lobe den Herrn! (Geistlicher Festgesang), SATB, str orch; Lobet den Herrn, alle Heiden, S, B, SATB, orch, org; O komm, mein Heiland, SATB, brass insts; Wende dich zu uns! (Kirchenkantate), solo vv, SATB, orch; Wie lieblich ist deine Wohnung, motet, solo vv, SATB, orch; Verzage nicht, du Häuflein klein, SATB, 2 tpt, 2 hn, 3 trbn, tuba

*c*15 other works

SECULAR CHORAL

Mixed vv (SATB unacc. unless otherwise stated): Trauerlied, 1873; Zum Jubiläum, after 1881; Apotheose (M. Guist), solo vv, TTBB, SATB, orch, 1883–90; Hymne an die Musik, SATB, orch, 1886; An den Frühling (F. von Schiller), SATB, orch, 1905; 4 slovenské národné piesne [Slovak Folksongs], solo vv, SATB, *c*1918; 9 slovenských národných piesní, *c*1918; Prvé Vianoce [1st Christmas], SSAATTBB, 1924; Vianoce [Christmas] (P. Bella-Horal), 1924; Zbor k inštalácii rektora [Chorus for the Inauguration of the Rector], 1925; Svadba Jánošíka [Jánošík's Wedding] (cant., J. Botto), solo vv, SATB, orch, 1927; Divný zbojník [Strange Brigand] (O. Bella), solo vv, SSAA, TTBB, SATB, orch, 1933; Československa štátna hymna [Czechoslovak national anthem], arr., 1934; Orol vták [The Eagle] (J. Kráľ), SSTTBB; 3 other works, Ger. text

Male vv (TTBB unacc. unless otherwise stated): Búcsúhangok, 1863; Slovenské štvorspevy [4-part Slovak songs], bks 1–2, 1863–5; Ohlas [Echo] (A. Sládkovič), 1864, rev. 1928; Frühlingsmotette, 1882; Schönes Waldland, march, TTBB, 2 tpt, 3 hn, euphonium, 3 trbn, tuba, 1884; Die Ergebung der Witwe (Crassus), *c*1900; Hausbrauch (Crassus), *c*1900; Kuno's Ritt (Crassus), *c*1900; Parallele, *c*1900; Trost im Leid (Crassus), *c*1900; Wunsch und Erfüllung (Crassus), *c*1900; 3 ernste Gesänge (E. Grün, O. Schlemm, F.S. Höchsmann), before 1901; 4 heitere Gesänge (Offenbarung) (Crassus), before 1901; Gelübde (R. Lederhilger), 1917; Ako je to? [What is this about?] (P. Bella–Horal), 1924; Matke Sláve [To Mother Glory] (I. Žiak [Somolický]), 1924; Vianočná [Christmas Song] (S. Krčmery), 1924; Moyses-Kuzmány, 1927; Heslo Západoslovenskej speváckej župy [Motto of the West Slovakian Choral Province], 1928; 9 other works, Ger. text, after 1881; 4 other works, Slav text, 1920s

Female vv: Z 'Cigánskych melódií' [From 'Gypsy Melodies'], SSSS

OTHER SECULAR VOCAL

Ballade (aus den Lustigen Weibern) (H. Herne), A, orch, 1905

Credo (J. Martinec), B, orch, 1927

*c*40 songs (1v, pf), incl. 2 písně: Dobrou noc [Good Night], Pěvcům [To Singers] (E. Krásnohorská), 1874, rev. 1923; 3 Lieder: Siehst du am Weg (A. Träger), Der Herzallerliebsten (H. Heine), Was du mir bist (J. Grasberger), op.2, 1874; Mag da draussen Schnee sich türmen (Heine), 1874; Ich habe, dich geliebet (Heine), 1877; Was du mir bist (Du bist die Sonne) (Hoffmann von Fallersleben), 1877; Frauen liebe (L. von Ploennies), 1880; 4 Lieder: Erste Liebe (J. Grosse), Allein mit dir (H. Krebs), Ich liebe was fein ist (J.N. Enders), Sehnsucht (Enders), op.5, 1880; Juhász legény (S. Petőfi), S, pf, 1905; Románc (G. Lauka), S, pf, 1905; Boli by sme popadali [We would have fallen] (P. Bella-Horal), 1924; Matka nad kolískou [Mother over the Cradle] (Bella-Horal), 3 songs, S, pf, 1924; Sedem dní [Seven Days] (J. Jesenský), 1924; Gajdoš Filúš [Filúš the Fiddler] (Ľudmila Podjavorinská), T, pf, 1927; Iskierky [Sparks], 1927; Naše vrátka [Our Garden Gate] (Bella-Horal), S, pf, 1927; V našom sade [In our Orchard] (Bella-Horal), S, pf, 1927

INSTRUMENTAL

Orch: Fantasy on the Rákóczi March, 1871; Concert ov., E♭, 1872–3; Osud a ideál (Sort et ideál) [Destiny and Ideal], sym. poem, 1874, rev. 1880; Sym., c, after 1881, frag.; Ov. to operetta Hermina im Venusberg, 1886; Konzertstück im ungarischen Stile, 1893; Siebenbürgen Land des Segens!, concert ov. on folksongs of Transylvania and Saxony, 1904; Posviacka zástavy [Consecration of the Flag], march, ? after 1900

Chbr: Str Qt no.1, g, 1866; Vianočná sonáta [Christmas Sonata], F, str qt, 1866, lost; Qnt, d, 2 vn, 2 va, vc, 1867; Dumky, vn, pf, ?1860s; Elegy, vn, bn, vc/hmn, pf, 1870; Pf Trio, 1870, frag.; Str Qt no.2 ('Hungarian'), e, 1871; Pieseň bez slov [Song without Words], vn, pf, 1874; Rêveries, vn, pf, 1875 [rev. version of Dumky]; Serenade, vc, pf, 1879; Str Qt no.3, c, op.25, 1880, rev. 1918; Rondo, (4 vn, va, vc, db)/(str orch), after 1881; Str Qt no.4, B♭, 1887; 2 sonatas, 3 vn (1st position), 1890, 1909; V cudzine [Abroad], vn, pf, 1923 [3rd version of Dumky]; Nocturne, str qt, 1930

Org: Fantázia–Sonáta, d, *c* 1881–90; Gottvertrauen, chorale trilogy, 1916; Fantasy on the chorale Christus, der ist mein Leben, 1918; 3 other pieces, after 1881

Pf: Svätomartinská kadrila [Quadrille of St Martin], 1862; Kleine Stücke, 1866–9; Variations on Slovak folksongs: Pri Prešporku [In

Pressburg], 1866, Letí, letí roj [The Swarm is Flying], 1869; Sonatina, e, before 1875; Sonata, B♭, 1885; Puppenfest, waltzes, 4 hands, 1927

VLADIMÍR GODÁR

**Bellabene, Gregorio.** *See* BALLABENE, GREGORIO.

**Bellaigue, Camille** (*b* Paris, 24 May 1858; *d* Paris, 4 Oct 1930). French critic. While studying law, he took music and piano lessons from Paladilhe and entered the Paris Conservatoire to study with Marmontel; in 1878 he won a *premier prix* for piano playing. A few years later he turned to music criticism, to which he devoted the rest of his life; he began in 1884, writing for the *Correspondant*, and in 1885 succeeded Blaze de Bury as music critic for the influential *Revue des deux mondes*, for which he wrote until a few months before his death. From 1886 to 1893 he was the editor for *Année musicale* (from 1892 *Année musicale et dramatique*). He also contributed numerous articles to all the foremost journals of the time, including *Le temps*, *Le Figaro*, *Le gaulois* and *Echo de Paris*.

Bellaigue exercised enormous influence through his writings. Thanks to his training as a pianist he was able to pronounce authoritatively on the deficiencies of others; his critical judgments were delivered magisterially, received deferentially. His biggest campaigns were fought in the field of opera, where he condemned the influence of Wagner and championed Italian music (especially Verdi) and French music (though he made a bitter attack on Debussy's *Pelléas et Mélisande*, partially retracted in later life).

GUSTAVE FERRARI/MALCOLM TURNER

**Bellamy, Peter** (*b* Norfolk, 8 Sept 1944; *d* Keighley, Yorks., 24 Sept 1991). English singer. Influenced in his youth by American traditional songs and the blues, he arrived in London during the 1960s, where he gave up art studies to form the *a cappella* group the Young Tradition with Royston and Heather Wood. Although their repertory comprised English traditional songs, their exotic clothes, magnetic stage presence, multi-layered harmonies and powerful vocal delivery captured the imaginations of many young people in Britain and America. The group disbanded in 1969 having recorded three albums: *The Young Tradition* (1966), *So Cheerfully Round* (1967) and *Galleries* (1968). Throughout the 1970s and 80s, Bellamy pursued a solo career becoming increasingly influenced by English traditional singers such as Harry Fred Cox and Sam Larner. In the 1970s he began to set many of Rudyard Kipling's poems to traditional-style melodies; he was later elected President of the Kipling Society. In 1977, he composed a ballad opera on the subject of transportation. An uncompromising outspoken advocate of traditional musics, Bellamy remains an icon for many folk revivalists despite his premature death.

DAVE ARTHUR

**Bellamy, Richard** (*d* Aug/Sept 1813). English bass and composer. On 28 March 1771 he was appointed a Gentleman of the Chapel Royal, and on 1 January 1773 a lay vicar of Westminster Abbey. He was vicar-choral of St Paul's Cathedral in 1777, and from 1793 to 1800 was almoner and Master of the Choristers. He gave up his other appointments in 1801. He sang in the Handel Commemoration at Westminster Abbey in 1784, in oratorios at Drury Lane in 1786, and in Salomon's concerts at the Hanover Square Rooms in 1790. In 1788 he published a volume containing a *Te Deum* for a full orchestra (performed at the installation of the Knights of

the Bath in May that year) and a set of anthems; he also published two keyboard sonatas and a collection of glees (1789).

W.H. HUSK/WATKINS SHAW/R

**Bellamy, Thomas (Ludford)** (*b* Westminster, London, 1770; *d* London, 3 Jan 1843). English bass, son of RICHARD BELLAMY. He was educated in the choir of Westminster Abbey under Benjamin Cooke, and sang in the Handel Commemoration of 1784. He studied with Tasca, and sang in London in cathedral choirs and at concerts until 1794, when he went to Ireland. He became stage manager at the Dublin Theatre Royal in 1797 and made his début there on 9 February 1798. In 1800 he became part proprietor of the Manchester, Chester, Shrewsbury and Lichfield theatres. In 1803 he sold his share and became sole proprietor of the Belfast, Londonderry and Newry theatres. This speculation proving unsuccessful, he returned to London and sang at the Covent Garden theatre for five years; in 1812 he was engaged for five years at Drury Lane theatre. From 1819 to 1838 he was choirmaster at the chapel of the Spanish Embassy; in 1821, on the death of James Bartleman, he was engaged as principal bass singer at the Concert of Ancient Music. (*DNB*; W.B. Squire)

W.H. HUSK/R

**Bellanda, Lodovico** (*b* ?Verona, *c*1575; *fl* Verona, 1593–1613). Italian composer and organist. He was organist at S Marco, Rovereto from 1600 to 1602. The title-pages of his printed works describe him as Veronese, and the dedications are addressed to a few noble patrons. The copy of his *Primo libro de madrigali* (1602) in the Accademia Filarmonica, Verona, has been there since his lifetime. His earliest known volume, the three-part *Canzonette* of 1593, contains 19 brief pieces in two repeated sections to strophic texts of three or four lines per stanza; although the partbooks are labelled 'cantus', 'tenor' and 'bass', the pieces are in fact for two sopranos and tenor. The *Canzonette spirituali* (1599) includes eight duets for soprano and tenor and two instrumental compositions in four parts; according to the preface, the instrumental works are for organ. The parts in all the pieces are of equal importance and imitative throughout. The volume also includes a duet by Paolo Fonghetto and two three-part instrumental pieces by Ambrogio Bresciano. The 1602 volume contains 14 madrigals for five voices and one for eight. The *Sacrae cantiones*, of which only two partbooks survive, contains 19 motets by Bellanda and one by Giuliano Corsini of different lengths and textures; many have refrains in triple metre. *O gloriosa domina* is of special interest since it includes dynamic markings for echo effects. Bellanda's last three known publications are primarily for solo voice and continuo and show that he kept abreast of the newest developments in Italian music. The two volumes of *Musiche* comprise 30 madrigals, five strophic arias and four dialogues; six are for two voices. The madrigals are in various monodic styles and include some striking harmonic and melodic progressions in response to emotive texts (examples in *AmbrosGM*); two are formulae for sonnets and ottavas. The strophic pieces, two of them ballettos, are based on simple rhythmic patterns; the dialogues include *Anima mia che pensi*, which uses a segment of text from the *Rappresentatione di Anima et di Corpo* (Act 1 scene iv) earlier set by Cavalieri. The *Sacre laudi* (1613) contains 23 monodies with Latin texts.

WILLIAM V. PORTER

**Bellante, Dionisio** (*b* Verona, *c*1610, *d* Verona, *c*1685). Italian composer and violinist. He was a priest and probably spent his whole life in Verona. In 1630–34 he was a *musico straordinario* at the cathedral and from 4 November 1658 until his death he was *maestro di cappella* there. In addition to four duets in Geronimo Bettino's *Concerti accademici* (Venice, 1643), his published music consists of *Concerti accademici* (Venice, 1629), whose title-page states that it is for one to six voices. However, two of the 'voices' in the only six-part piece are in fact violin parts, there are parts for two violins and also for bassoon in other works besides, and all the music is accompanied by continuo. Nearly all the contents are in the concertato style, homophonic and imitative writing alternating in a basically diatonic idiom reminiscent of music written in Venice at that time. Some of it is attractive, but the most interesting pieces in the volume are two long recitatives, a morning song (*Matinata in genere rappresentativo*) and a lament of Orpheus, *Che veggio, ohime*, which is a setting of a text by Sigismondo d'India, whose own music for it was published in his *Musiche* of 1621. Bellante would almost certainly have had to know that publication in order to have access to the words, and there are one or two similarities between the two settings. On the whole, however, Bellante went his own way, though at a lower level of inspiration than d'India; yet his setting is among the more rewarding chamber recitatives of the period and, like the morning song, is notable for striking use of dissonance. A volume of *Propria missarum* by him for four voices survives in a manuscript, possibly prepared for publication (*I-VEcap*), and six other sacred pieces also survive (in *D-MÜs*).

NIGEL FORTUNE

**Bellasio** [Belasio], **Paolo** (*b* Verona, 20 May 1554; *d* Rome, 10 July 1594). Italian composer and organist. In 1582 he lived for a short time in Rome where he served first Cardinal Filippo Boncompagni, to whom he dedicated his second book of madrigals, and then Cardinal Guglielmo Sirleto. His correspondence with Sirleto indicates that in 1583 Bellasio was travelling in Calabria, probably in search of a post as an organist. In a letter written from Paola on 16 February 1583 he mentioned his penurious state and requested permission to return to Sirleto's or to Boncompagni's service; it is not known whether he did so, but in 1584 Sirleto recommended him to Cardinal Carlo Borromeo for the position of organist at Milan Cathedral. This application was unsuccessful and he spent the next two years in part-time and occasional employment as an organist in many Roman churches and seminaries; for example, in May and June of 1585 he served as second organist at S Luigi dei Francesi. On 20 November 1587 he was appointed organist at Orvieto Cathedral for two years at an annual salary of 100 scudi. At the end of the period the chapter offered to extend the contract for another two years, but he declined the post and returned to Verona. He dedicated his first book of six-voice madrigals to the members of the Accademia Filarmonica and the title-pages of his 1591 and 1592 publications referred to him as 'maestro di musica nell'Accademia'. Some time between 1592 and 1594 he returned to Rome where he remained until his death. He was well educated and had some influential friends, as can be determined from his epitaph which states that Pope Clement VIII made him a Knight of the Golden Spur.

Bellasio's output appears to have consisted entirely of secular vocal music. Both his style and the anthologies in which his madrigals appeared place him in the circle of Roman composers of the later 16th century. In particular, *Le Gioie* (RISM $1589^{7}$) was a collection of madrigals by members of the Roman Congregazione dei Musici. His literary tastes reflect the somewhat anachronistic interests of the Veronese academies during the last quarter of the 16th century; he preferred the lyrics of Bembo and Petrarch to the verses of Tasso and Guarini, which were admired in more progressive circles. His madrigals are characterized by graceful motifs, diatonic harmony and smoothly flowing counterpoint.

PATRICIA ANN MYERS

**Bellavere** [Belaver, Bell'aver, Bell'haver], **Vincenzo** (*b* *c*1540–41; *d* Venice, 29 Aug 1587). Italian composer and organist. He is first heard of as organist of the church of the Crosieri at Padua in 1567; in the same year he applied unsuccessfully for the post of organist of Padua Cathedral. The following year he was elected organist of the Scuola Grande di S Rocco, Venice. He remained there until June 1584, when he returned to Padua, having now attained the position of organist at the cathedral. His initial engagement was to have lasted three years but, perhaps due to an unexcused absence from Padua, a disagreement arose with the canons who, in December 1585, appointed Sperandio Saloni in place of Bellavere. In December 1586 he replaced Andrea Gabrieli as organist at S Marco, Venice; he died eight months later at the age of 46.

Bellavere's reputation as a composer of madrigals is attested by the presence of his compositions in numerous contemporary anthologies. His style is indebted to that of Andrea Gabrieli: it shows the same penchant for bright sonorities (especially in the upper voices) and a similar attitude to word-setting, verbal images being taken up in the music in a modest rather than extravagant way (as in the Marenzian school). He was a leading composer of *giustiniani* and *veneziane*. Ten of these appeared in the *Primo libro delle justiniane* (RISM $1570^{17}$), an anthology edited by Bellavere himself. The works are strophic, as in the popular tradition; the comic texts are rich in *doubles entendres*, imprecations and stammering effects. Of the little church music by Bellavere that survives, the double-choir motet *Vidi speciosam* (in $1615^{2}$) is an excellent example of the Venetian polychoral tradition.

**Bellay, Joachim du.** *See* DU BELLAY, JOACHIM.

**Bellazzi** [Bellazzo, Bellatius], **Francesco** (*b* Vigevano, nr Milan; *fl* 1618–28). Italian composer. He entered the Franciscan order. The only musical appointment he is known to have held was as *maestro di cappella* of S Francesco, Milan, from 1623 to 1628. He was one of many north Italian church composers publishing liturgical music for parochial rather than metropolitan establishments, though he did not wholeheartedly adopt the concertato style of the day. His music for the Offices

reflects this: the eight-part vesper psalms (1618) are for two block choirs throughout, without solo writing, thus recalling the double-choir style of decades earlier; and the volume of 1628 contains *falsobordone* chants – another old-fashioned feature. In contrast, the psalms of 1624 are marked 'all'uso moderno' and are in a more up-to-date idiom, with writing for ATTB (which could be SATB if the second tenor were transposed up an octave) even though there are no developed solos or duets. The psalms are unusual in being for Compline or Terce: the latter Office was normally sung, if at all, to plainsong. The motets of 1620 are more original in their textures and, as often in such music, the word-setting is expressive.

WORKS

*published in Venice unless otherwise stated*

**Bell Diapason.** *See under* ORGAN STOP.

**Belle, Jan** (*fl* 1546–?1566). Flemish composer. In 1546–7 he was *magister duodenorum* (master of the choirboys) at Ste Croix in Liège and was called 'de Lovanio'. He was possibly a succentor at the Church of Our Lady, St Truiden, from 1563 to 1566. He was the author of a *Musices encomion* (Maastricht, 1552; lost) and composed six four-part songs on Flemish texts which were published in Phalèse's *Duytsch musyck boeck* (RISM 1572[11]; all ed. in UVNM, xxvi, 1903; one ed. in Cw, xcii, 1962, no.13). The first of these songs had already been published, attributed to 'Joan Zacheus', in 1554[31]; two of them were reprinted by Phalèse in later editions of the *Septiesme livre des chansons à quatre parties* (see H. Vanhulst, *RBM*, xxxii–xxxiii, 1978–9, pp.97–120).

GODELIEVE SPIESSENS

**Bellère, Jean** (*b* Liège, 1526; *d* Antwerp, 15 Oct 1595). Flemish publisher, printer and editor. In 1553, the year of his marriage, he became a citizen of Antwerp and received a licence to print; he was elected a member of the Guild of St Luke in 1559. His first book was published there in 1555. One of the most important figures of his time, he published a wide variety of books, including classics, literature, history, science, Spanish books and French translations from Latin, Italian and Portuguese. He journeyed regularly to Frankfurt and had business dealings with a wide circle of printers and humanists, including Plantin.

From 1570 he collaborated with Pierre PHALÈSE (i) and together they issued some 50 volumes, both vocal and instrumental. During this association, Phalèse also issued some music alone, although Bellère is not known to have done so, nor to have owned music type. When Pierre Phalèse (i) died, Bellère worked extensively with his son, Pierre Phalèse (ii) for over 20 years. After Bellère's death, his widow Elisabeth published two volumes jointly with Pierre Phalèse (ii), in 1597 and 1598. His eldest son. Balthazar, married Jean Bogard's daughter and established his own business in Douai.

SUSAN BAIN

**Bellermann.** German family of musicians.

**(1) Konstantin Bellermann** (*b* Erfurt, 1696; *d* Minden, 1 April 1758). Composer. He studied philosophy, history and finally law in Erfurt and also had some theoretical and practical training in music. In 1719 he left Erfurt to take up the post of Kantor in Minden, where he had a successful career as a composer and teacher. In 1739 he was made assistant rector of the school in Minden, and three years later was appointed rector. He wrote several oratorios and cantatas, an opera, (?) *Issipile*, as well as instrumental concertos and 24 lute suites; none of his music, which was mentioned by Fétis, has survived.

**(2) Johann Joachim Bellermann** (*b* Erfurt, 23 Sept 1754; *d* Berlin, 25 Oct 1842). Theologian and music educationist, a close relative of (1) Konstantin Bellermann. He studied theology at the universities of Erfurt and Göttingen. From 1778 to 1781 he visited Estonia and Russia, gathering information for his two-volume *Bemerkungen über Russland* (Erfurt, 1788), which includes a description of contemporary musical life in Russia. He was a professor of theology at the University of Erfurt until 1804, when he moved to Berlin to become the director of the Gymnasium zum Grauen Kloster (1804–28) and (from 1816) professor of theology at the university. Together with Carl Friedrich Zelter, he reformed music education in the schools; he introduced singing as an elective course at the Gymnasium zum Grauen Kloster as early as 1808.

**(3) Johann Friedrich Bellermann** (*b* Erfurt, 8 March 1795; *d* Berlin, 5 Feb 1874). Music scholar, son of (2) Johann Joachim Bellermann. He studied theology and philosophy at the universities of Berlin and Jena and taught from 1819 to 1867 at the Gymnasium zum Grauen Kloster, of which he became director in 1847. He is known especially for his research on ancient Greek music and won the Gold Medal of Arts and Letters for his

monumental work on ancient Greek scales and musical notation (1847).

**(4) (Johann Gottfried) Heinrich Bellermann** (*b* Berlin, 10 March 1832; *d* Potsdam, 10 April 1903). Music scholar and composer, son of (3) Johann Friedrich Bellermann. He studied at what became the Königliches Akademisches Institut für Kirchenmusik and for a long time was a private pupil of A.E. Grell. In 1853 he was appointed singing teacher at the Gymnasium zum Grauen Kloster and in 1866 succeeded A.B. Marx as professor of music at the University of Berlin. He became a member of the Akademie der Künste in 1875. A lifelong student of Renaissance music, he is known chiefly as the author of the first modern treatise explaining the mensural system (1858) and for his counterpoint treatise (1862), which he based on Fux's *Gradus ad Parnassum* (1725), and which contains in its introduction an important history of contrapuntal theory. His compositions, predominantly *a cappella* choral music, betray the influence of Grell in their strict adherence to the 'new Palestrina style' in vogue in Berlin in the middle of the 19th century. He also wrote melodramas that show the influence of Mendelssohn.

WILLIAM DRABKIN/R

**Belletti, Giovanni Battista** (*b* Sarzana, 17 Feb 1813; *d* Sarzana, 27 Dec 1890). Italian baritone. He studied with Pilotti in Bologna and made his début in Stockholm in 1838 as Figaro (*Il barbiere di Siviglia*); he then appeared there with Jenny Lind in *Robert le diable* (1839) and *Lucia di Lammermoor* (1840), both sung in Swedish. In 1848 he was engaged at Her Majesty's Theatre, singing Ezio in the first London performance of *Attila*, Belcore, Malatesta and Mozart's and Rossini's Figaro. He sang in Paris at the Théâtre Italien in *Semiramide*, *Fidelio* and Mercadante's *Il bravo*. In 1853 he appeared at Covent Garden, singing Silva (*Ernani*), Saint-Bris (*Les Huguenots*), Alphonse (*La favorite*), Don Giovanni and Tristan d'Acunha (Spohr's *Jessonda*). His beautiful voice and fine musicianship were much admired by his contemporaries.

ELIZABETH FORBES

**Belle van Zuylen** [née Tuyll van Serooskerken, Isabella Agneta Elisabeth van] (*b* Zuylen castle, nr Utrecht, 20 Oct 1740; *d* Colombier, Switzerland, 26 Dec 1805). Dutch writer and composer. From 1771 she lived in Switzerland with her husband Charles-Emmanuel de Charrière de Penthaz. She is remembered especially for her extensive, witty and often caustic correspondence with James Boswell, Benjamin Constant, Germaine de Staël and others (see M. Flothuis: 'An Unexpected Source of Musical Information: the Correspondence of Belle van Zuylen (1740–1805)', *FAM*, xxvii (1980), 33–6; xxviii (1981), 145 only) and also for her novels, plays and pamphlets, all (including the letters) written in French. She was educated by a Swiss governess, Jeanne Prévost, with whom she continued to correspond for several years; only the letters of Mme Prévost have survived. Music played an important role in her career, as was usual in noble families of the time. As early as 1764 she expressed a desire to study composition with Rameau, but he died the same year. In 1785 she started studying with Niccolò Zingarelli, who had just earned his first great success with his opera *Alsinda*. On 28 May 1785 she wrote, 'Since this first essay I have dreamt only of music'. Her letters frequently mention composers whose works she knew or wanted to get to know.

Belle van Zuylen embarked on several dramatic musical works, for which she wrote her own librettos, but none of these has come down to us except for some text fragments (in *CH-N*). In 1788 she sent the libretto of *Les Phéniciennes* to Mozart in the hope that he would set it to music, but neither her accompanying letter nor any reply from Mozart has been found. Her surviving compositions comprise six minuets for string quartet (The Hague and Amsterdam, n.d.), nine piano sonatas and ten *airs* and *romances* (Paris, n.d.); all have been published in volume x of her *Oeuvres complètes [de] Isabelle de Charrière, Belle de Zuylen* (Amsterdam, 1979–84). They do not surpass the average standard of the time, but the piano sonatas (originally published anonymously) show a gradual increase in the level of invention and skill.

MARIUS FLOTHUIS

**Belleville, Anna Caroline de.** *See* OURY, ANNA CAROLINE.

**Belleville, Jacques de** (*fl* early 17th century). French dancer, violinist and composer. The only known fact in his personal life is that he was married on 27 May 1637 to Antoinette Guibourg, the widow of the painter and costume designer Daniel Rabel. Belleville was in charge of organizing court entertainments for Louis XIII from *c*1616 to *c*1637 and contributed to nearly all ballets performed at court during this time. As a dancer he rivalled Louis Constantin and the celebrated dancing-master Jacques Cordier. He wrote all the dance tunes and some of the *airs* for Etienne Durand's *Ballet de la*

*délivrance de Renaud* (1617) and for the *Ballet de Tancrède* (1619). His virtues as a musician were extolled by Michel de Marolles (*Mémoires*, Amsterdam edn, 1755, iii, pp.207–8), and together with the singer Marais it was said of him by contemporaries that '[ils] n'ont besoing que d'estre nommez pour avoir des louanges'. An allemande and a four-part instrumental piece, *Le testament du Sieur de Belleville*, survive, and a number of other pieces were arranged for the lute and published in *Airs de différents auteurs mis en tablature sur des accords nouveaux* (Paris, 1631). Some appear in A. Souris, ed.: *Oeuvres de Chancy, Bouvier, Belleville, Dubuisson, Chevalier* (Paris, 1967).

**Bell Gamba.** *See under* ORGAN STOP.

**Bell guittern.** *See* CITHRINCHEN.

**Bell harp** (Ger. *Schwungzither*). A type of wire-strung psaltery characteristically swung while being played. It is classified as a box zither. Examples were produced in the early 18th century by John Simcock of Bath, who may have invented the instrument (fig.1). A modern form, known as 'fairy bells' (fig.2), was played by English and

1. *Bell harp by John Simcock, Bath, c1740 (Horniman Museum, London)*

2. *Bell harp ('fairy bells') by R. Cook & Co., London, 19th century (Pitt Rivers Museum, Oxford)*

French street musicians in the late 19th century and early 20th, and as a domestic and convivial instrument in England (see Coker). The player holds the instrument in both hands, the left thumb plucking the longer strings and the right thumb, with a plectrum, the shorter ones. At the same time he swings the instrument about at arm's length, a technique that produces an evocative, undulating sound. 18th-century bell harps were about half a metre high and had between 14 and 24 triple or quadruple courses tuned diatonically, 16 being the most common number. Many instruments had wooden lugs projecting from the sides, on which the player could rest his wrists and thus help control the momentum of the swing. Modern 'fairy bells' are somewhat larger and have between eight and 16 single courses, tuned diatonically.

DAVID KETTLEWELL

**Bell'haver, Vincenzo.** *See* BELLAVERE, VINCENZO.

**Belli, Domenico** (*d* Florence, bur. 5 May 1627). Italian composer and musician. According to Fétis he served the

ducal court at Parma at the beginning of the 17th century, but documents have not been found to support this assertion. On 10 August 1607 he became a member of the prestigious Compagnia dell'Arcangelo Raffaello, which put him into contact with many of the most important Florentines of the day. In a letter of 27 October 1609 to Cardinal Ferdinando Gonzaga (also a member of the confraternity), Belli indicated that he would be glad to enter the new cardinal's service in Rome. But he remained in Florence and from 1610 to 1613 he was tutor in music to the clerics of S Lorenzo, Florence, a position in which he succeeded Marco da Gagliano. Minutes of the chapter of canons there show that in addition he was given responsibility for music in S Lorenzo for Holy Week in 1611 and 1612. On 19 September 1618 both he and his wife Angelica were enrolled as musicians at the Medici court. He appears in payment records (in *I-Fas*) for the last time in April 1627; his wife continued in court service after his death.

All of Belli's surviving music was published in 1616. He composed his *Orfeo dolente* for Carnival in that year. It consists of five scenes (to a text at least partly by Gabriello Chiabrera) that were presented as *intermedi* between the acts of Tasso's *Aminta*, which the Rinaldi family had produced at their residence, the Palazzo della Gherardesca, in Florence. (The arguments for dating the work before 1600 made by A. Tirabassi: 'The Oldest Opera: Belli's *Orfeo dolente*', *MQ*, xxv, 1939, are specious.) Belli also wrote the music for Jacopo Cicognini's *Andromeda*, which was produced on 9 March 1618, again at the Palazzo della Gherardesca. The music is lost, but a description of it in which Belli is highly praised is contained in a letter (*SolertiMBD*) written by Caccini to the secretary of the Grand Duke of Tuscany the day after the performance.

In a remarkable letter written from Florence to Ferdinando Gonzaga, Duke of Mantua, on 11 June 1616, Belli indicated that his *Arie* were regarded as 'difficult and unsingable' because of the quantity of quavers in their basses. He continued by asking the duke to have the songs performed at the Mantuan court so that their unfortunate reputation might be improved. The bass lines are indeed rhythmically elaborate and are notable as well for the striking degree of chromaticism they contain. Some foreshadow the typical bass figurations of later strophic-bass cantatas, as also do the formal schemes of some of the songs. One song, *Occhi belli a me severi*, is in effect an early example of the form, with refrains and a ritornello in addition. Through both his harmonic and formal adventurousness, Belli belongs among the most radical monodists of the early 17th century.

EDMOND STRAINCHAMPS

**Belli, Girolamo** (*b* Argenta, nr Ferrara, 1552; *d* ?Argenta, *c*1620). Italian composer and teacher. He received his early musical training from Luzzaschi and began his career as a singer at the Gonzaga court at Mantua; he later moved to Rome. His earliest datable compositions are four madrigals in a manuscript (*I-MOe* 1358) compiled in about 1580, and one in *Il lauro secco* (RISM 1582[5]); the latter was published in Ferrara and suggests that he was there during the early 1580s, although he is not known to have settled there until 1583. Einstein's claim that Belli served the Duke of Mantua between 1584 and 1587 was probably based on remarks in Bertolotti (1890) and on the dedications of Belli's second book of six-voice madrigals and of *I furti amorosi*, but there is no archival evidence to support it. Belli dedicated the first two publications of his own works to Duke Alfonso II d'Este and his wife, Margherita Gonzaga, almost certainly in the hope of securing an appointment as a court musician; but the court records (in *I-MOs*) show that these ambitions were not realized. Most of his life seems to have been spent in Argenta as a teacher and *maestro di cappella*; his pupils included Giovanni Nicolò Mezzogorri and Biagio Tomasi. Baruffaldi incorrectly interpreted letters to Belli from Alessandro Guarini as meaning that Belli founded the Accademia degli Elevati at Argenta, but they refer to Belli's heraldic motto and academic pseudonym in the Accademia degli Armonici at Cesena. He was also connected with the Accademia degli Intrepidi at Ferrara from at least 1608, when he dedicated his *Madrigali e canzoni* (now lost) to his fellow academicians.

Stylistically Belli's secular music is clearly influenced by Luzzaschi's. His debt to his teacher was publicly acknowledged in his *Nono libro de madrigali a cinque voci*, where he parodied four madrigals from Luzzaschi's *Madrigali per cantare e sonare a uno, due e tre soprani* (Rome, 1601). The *Furti amorosi* are neat exercises in intellectual wit; their texts are patched together from well-known authors and the music often refers to celebrated contemporary madrigals. Similar in musical style are the contents of the first book of six-part madrigals, which also includes a five-section setting of Guarini's popular poem *Baci soavi e cari*. Many of Belli's madrigals are lost, including at least seven books for five voices and a book of madrigals and canzoni for four voices. Seven madrigals from the lost seventh book for five voices were included by Francis Tregian in the anthology that he began to compile during the second decade of the 17th century (*GB-Lbl*).

The *Sacrae cantiones* of 1585 are dedicated to Pope Sixtus V, who is praised in the opening motet, *O Pastor optime*. Many of the book's motets are contrapuntal and sober in style. The *Sacrae cantiones* of 1594, dedicated to Cardinal Aldobrandini, include a sequence of double-choir motets followed by a mass setting (also cast for two four-part choirs) written in the Venetian manner. The *Salmi* of 1610 were published with a separate organ part.

WORKS

*published in Venice unless otherwise stated*

IAIN FENLON

**Belli, Giulio** (*b* Longiano, nr Forlì, *c*1560; *d* ?Imola, after 1620). Italian composer. According to his own testimony, he was a pupil of Giovanthomaso Cimello in Naples before 1569; he then returned to Longiano and entered the Franciscan monastery there on 30 September 1579. On 7 November 1582 he became *maestro di cappella* at Imola Cathedral and on 20 May 1590 he was engaged for three years in a similar capacity at S Maria, Carpi; in 1591, however, he moved to S Francesco, Bologna, as 'praefectus musices'. He seems to have been at Ferrara in 1592 and 1593, and in 1594 or 1595 he went to Venice as *maestro di cappella* of the church of the Ca' Grande; in 1596 he took a similar position at Montagnana Cathedral. In 1597 he was *maestro di cappella* at the court of Duke Alfonso II d'Este and at the Accademia della Morte in Ferrara, and was *maestro* at Osimo Cathedral in 1599. From 1600 he was *maestro di cappella* at the cathedral and archiepiscopal seminary of Ravenna, and in 1603, after a brief stay at Reggio, he became *maestro* at Forlì Cathedral. At the beginning of 1606 he returned to the Ca' Grande and on 9 May moved to S Antonio, Padua, where he stayed until 1608. In 1610 he was *maestro di cappella* at S Francesco, Assisi, and from 7 January 1611 to 1 April 1613 he again worked at Imola Cathedral. In 1615 he was once more *maestro di cappella* at the Ca' Grande and in 1621 he returned finally to Imola. A Franciscan monk named Sante Belli, *maestro di cappella* at Correggio in 1590, seems to have been his brother. Some sources have incorrectly identified Giulio Belli with a scholar of the same name from Capodistria. He has also been confused with G.C. Belli, a court lutenist at Mantua. Several of Belli's students have become known as composers, including G.B. Spada and Roberto Poggiolini.

A contemporary writer noted that Belli was a 'virtuous and highly honoured man, and most skilled in his profession' (see Casadio). This is confirmed mainly by his sacred works, some of which ran into many editions. His early music shows the influence of Palestrina and of the north Italian polychoral style, but his later works, particularly the sacred concertos, use smaller forces and acknowledge contemporary practice by including continuo parts. He also added continuo parts to later editions of some of his works that had originally been composed *a cappella*. Most of his masses are for five voices, but rapidly changing vocal groupings in the antiphonal choruses often give the impression of six to eight parts. His masses parody motets more often than madrigals, but he wrote a fine mass on Palestrina's *Vestiva i colli*. He was less prolific as a composer of secular vocal music, but he was sufficiently well-known as a madrigalist to find a place in Morley's *Madrigals to Five Voyces* (RISM 1598[15]). His canzonettas of 1584 are characterized by lively part-writing and consonant harmony. His instrumental pieces of 1613 are early examples of three-part canzonas.

WORKS

*all published in Venice*

SACRED VOCAL

Missarum liber primus, 5vv (1586; in 2/1597 and subsequent edns Missa 'Vestiva i colli' replaced Missa 'Estote fortes')

**Bellin, Guillaume.** *See* BELIN, GUILLAUME.

**Bellincioni, Gemma (Cesira Matilda)** (*b* Como, 18 Aug 1864; *d* Naples, 23 April 1950). Italian soprano. She was taught by her father, a professional bass, and later by the famous tenor Roberto Stagno, whom she first met in 1886 and subsequently married. Except in the role of Violetta (in which she was praised by Verdi), she was rarely at her best in the older type of opera, and came into her own, both as actress and as singer, with the arrival of the *verismo* school; the great event of her life was her sensational portrayal of Santuzza in the première of *Cavalleria rusticana* (1890), with Stagno as Turiddu (see illustration). Though very successful in the principal European opera houses and in South America, she failed to establish herself at Covent Garden, where she appeared in 1895 amidst a company that was exceptionally strong in soprano talent; even her Santuzza, like her Carmen, was overshadowed by the immense popularity of Calvé. She created many other roles in *verismo* operas, among them Giordano's Fedora, with the then unknown Caruso as Loris. The last phase of her career was dominated by *Salome*; she appeared in the first Italian performance of the opera (1906, Turin) under Strauss, who much admired her interpretation, and sang the role over 100 times. After World War I she spent some years as a teacher of singing in the Netherlands, and in 1924 reappeared as Santuzza, Tosca and Carmen at The Hague, Rotterdam and Amsterdam. Her 14 early recordings (1903–5), though dramatic, lend support to the view that sheer voice was not her strongest suit; they show beside marked agility and individuality of style, a shrillness and excess of vibrato that cannot wholly be ascribed to the date of recording.

*Gemma Bellincioni and Roberto Stagno as Santuzza and Turiddu in Mascagni's 'Cavalleria rusticana'*

DESMOND SHAWE-TAYLOR

**Bellingan, Johannes.** *See* BEDYNGHAM, JOHANNES.

**Bellini, Vincenzo** (*b* Catania, 3 Nov 1801; *d* Puteaux, nr Paris, 23 Sept 1835). Italian composer. He was a leading figure in early 19th-century opera, noted for his expressive melodies and sensitive approach to text-setting.

1. EDUCATION AND EARLY CAREER (1801–26). Bellini was born into a musical family in Sicily, the eldest of seven children of Rosario Bellini (1776–1840) and Agata Ferlito (1779–1842). His grandfather, Vincenzo Tobia Bellini (1744–1829), originally from the Abruzzi, had studied in Naples at the Conservatorio di S Onofrio a Capuana, and from 1768 worked in Catania as an

organist, composer and teacher. His father, Rosario, was also a composer, *maestro di cappella* and teacher, although his career was apparently overshadowed by that of Vincenzo Tobia. An anonymous manuscript now in the Museo Belliniano in Catania, almost the sole source of information about Bellini's childhood, tells of prodigious musical feats, but amid its hyperbole the account outlines what was a fairly typical career path for a musically gifted young Italian at this time. Without formal training, the infant Vincenzo reportedly sang an aria by Fioravanti at the age of 18 months, took over from his grandfather as conductor during a church service at three, and by the age of five played the piano expertly. The same chronicler reports a rigorous and well-rounded Classical education, encompassing Latin, Italian literature, philosophy and modern languages, though neither Bellini's correspondence nor his literary instincts later in life show much evidence of such training. He wrote his first composition at six, and the following year began to study composition formally with his grandfather. During his childhood and teenage years, he wrote much sacred music and some secular songs, many of which received local performances.

In 1819 he was granted a scholarship to study at the Real Collegio di Musica in Naples, where his teachers included Giovanni Furno, Giacomo Tritto and, after 1822, Niccolò Zingarelli. Besides the traditional lessons in harmony and counterpoint, an important element of Bellini's training with Zingarelli was the composition of hundreds of wordless *solfeggi* (none of which survive); his sense for vocal writing must also have benefitted from his study of theoretical aspects of singing with Girolamo Crescentini. The conservatory's mostly septuagenerian faculty promulgated a conservative style of composition represented by Neapolitan composers Cimarosa and the recently deceased Paisiello, espousing simple melodies and clear text-setting while violently opposing the florid vocal style and 'noisy' orchestration of Rossini, who, as resident composer of the Naples theatres from 1815 to 1822, was an ever-present threat. Bellini absorbed the Neapolitan doctrine thoroughly and produced works that pleased his teachers without ignoring the Rossini example. The conservatory training required regular attendance at the theatre, where Rossini was standard fare, and Bellini was reported as being particularly struck by performances of *Semiramide*, *Mosè in Egitto* and *Maometto II*; influential works by other composers included Donizetti's *La zingara*, Mayr's *Medea in Corinto*, and Spontini's *La vestale*. A simultaneous attraction and resistance to Rossini's style is one of the most intriguing aspects of Bellini's student works; indeed, the confrontation with Rossini remained both a creative problem and a spur to innovation throughout his career.

When he graduated in 1825, Bellini was given the opportunity to present an opera at the conservatory; performed by an all-male cast of students, *Adelson e Salvini* became popular enough to be repeated every Sunday in the school's *teatrino*. Bellini himself thought highly enough of the work to revise it over the next few years, but he never succeeded in securing a professional performance, and ended up in what would become a lifelong practice with unsuccessful works – recycling numbers into his next four operas. In an early instance of the determined careerism at which he excelled, Bellini built on this first operatic success, lobbying the conservatory's governor and superintendent of theatres to enforce a statute by which the most promising student each year should be invited to compose a new work for one of the two professional theatres in Naples. Bellini fulfilled this commission with *Bianca e Fernando*, to a libretto by Domenico Gilardoni; the opera had its première in May 1826 at the Teatro S Carlo, where it was renamed *Bianca e Gernando* to avoid an apparent allusion to the reigning prince and recently deceased king of Naples.

Although written close together, these two student operas have surprisingly little in common stylistically. *Adelson e Salvini*'s *semiseria* plot and the cast of inexperienced singers seem to have called forth a mixture of a conventional *buffo* idiom and a smoother, almost folk-like vocal style, reminiscent of Paisiello. *Bianca e Fernando*, basically a 'rescue opera', also embraces established idioms, but here it is a *seria* style, characterized by two-tempo (or 'double') arias and generous vocal display. While *Bianca* is thus more predictable in its largest dramatic outlines, the two operas share a varied and imaginative approach to the construction of individual lyric pieces. The most predictable part of the form is the fast, concluding section of the double aria, the cabaletta, and in these early works cabalettas are the only numbers to be constructed along the lines of what Friedrich Lippmann has identified as the standard Bellinian melodic design, sometimes called the 'lyric prototype'. This refers to a structure that distributes two quatrains of poetry across four (usually) four-bar phrases: the first two lines of poetry are set as a four-bar phrase, the next two as a modified repetition (*AA′*); the music for lines 5 and 6 introduces a contrasting motive and moves away from the tonic (*B*), and the last two lines return to the tonic, either with a version of the opening motive or cadential material (*A″* or *C*).

The lyric prototype became an increasingly important element of Bellini's style after *Il pirata*, but in these first operas longer, freer designs are much more common. For example, Salvini's solo in the Act 2 finale of *Adelson e Salvini*, 'Ecco signor la sposa', begins with a conventional *AA′BB′* (all four-bar phrases), but when a new idea arrives in the text the music moves with it, proliferating new motifs (*CC′DD′*), before returning to a modified version of *A* to close. A surprising amount of the music in these early operas is designed according to an individual formal logic that resists representation as schemas of letters. In Adelson's half-declamatory, half-decorated aria 'Obbliarti! abbandonarti!' in the Act 1 finale of *Adelson*, for example, melodic repetition begins only in the seventh bar after a florid and proclamatory opening (ex.1); and the slow movement of Fernando's entrance aria, 'A tanto duol quest'anima' in *Bianca e Fernando* shows erratic melodic contours and a free, almost *ad hoc* formal plan that owes more to the alternation of verse metres in Gilardoni's poetry than to any conventional musical form.

Such freedom of construction suggests that, even while conforming to the conservatory's doctrine and (largely) resisting the lure of florid vocal writing, Bellini was already borrowing from Rossini in other ways, especially in his treatment of small-scale form, crafting lyric movements that eschewed symmetry and melodic repetition in favour of a freer alternation of declamation and ornament. While the extremes of Bellini's early style – melodic naivety drawn from Paisiello and Rossinian formal freedom with its occasional forays into pure

**Ex.1** *Adelson e Salvini*, Act 1

virtuosity – may seem diametrically opposed, both could be seen as ways of bringing song closer to the rhythms and contours of speech.

2. Achievement of fame (1827–9). In May 1827, Bellini left Naples, drawn north by a contract from impresario Domenico Barbaia to compose for Milan's Teatro alla Scala. He left behind in Naples two significant personal attachments, to Maddalena Fumaroli, a young woman he had hoped to marry once his financial position permitted, and to Francesco Florimo, his fellow student at the conservatory and closest friend. Once established in Milan, Bellini soon forgot Maddalena, but the attachment to Florimo never wavered, and his long and frequent letters to his friend are by far our fullest source of information about his professional and personal life. Florimo remained in Naples as librarian at the conservatory until his death in 1888, but his true calling was as chronicler and guardian of Bellini's fame. In 1882 he published a biography and edition of Bellini's letters; although Florimo's desire to protect and enhance his friend's reputation sometimes led him to censor or even substantially falsify the content of the letters, his portrait of the composer remains valuable and influential.

In Milan Bellini quickly formed a new series of personal and professional connections. He took rooms with Francesco and Marianna Pollini, who became almost surrogate parents, moved easily into society circles, and embarked on what would be his most important working relationship, with the librettist Felice Romani. As resident poet at La Scala, Romani was appointed as librettist for Bellini's first Milanese effort, *Il pirata*. The collaboration was such a success that Bellini began to insist on working only with Romani, and the two collaborated on all his subsequent operas except the last, *I puritani*. Romani had a remarkable sense for building dramatic situations with inherent musical potential, but what made him Bellini's ideal poet was his ability to craft beautiful lines and phrases in a classical mould. As Bellini himself put it in a letter to Florimo, 'just notice in *Il pirata* how *the verses, not the situations*, inspire my talent … that's why I must have Romani'. Romani was inclined to autocratic treatment of his collaborators: his practice was to present composers with the *fait accompli* of a finished libretto, with little latitude for revision. Only Bellini and Meyerbeer enjoyed special status: sketch materials show that Bellini had active input from the very first stages of preparation, and indeed often presented Romani with already-composed music, demanding verse metres that fitted their rhythms and phrasing. Perhaps because of his own perfectionism, Romani was usually good-natured about Bellini's incessant demands for revision. Harmonious as the match was artistically, it often met with practical difficulties, since Romani was frequently over-committed and notoriously late in delivering poetry. Bellini suffered much from these delays; the phrase 'Romani is late' became a refrain in his letters, and in 1833 this chronic tardiness led to a serious rift.

*Il pirata* had its première at La Scala in October 1827 (fig.1) with a cast headed by three singers who maintained close ties to Bellini throughout his career: soprano Henriette Méric-Lalande (the first Bianca and Alaide in *La straniera*), Giovanni Battista Rubini, who created the tenor leads in *Bianca e Fernando*, *La sonnambula* and *I puritani*, and baritone Antonio Tamburini, who would sing in premières of both *La straniera* and *I puritani*. The opera was an immediate success, and was quickly taken up in Naples and Vienna, establishing Bellini as a leading figure of his generation and assuring his financial and professional security. Although Bellini was paid only about 2000F for *Pirata* itself, the success put him in a position to demand twice as much for his next opera, *La straniera*. *La sonnambula* and *Norma* would earn just over 10,000F each, fulfilling Bellini's long-standing dream of outdoing the 5000F Rossini had been paid for *Semiramide* in 1823, previously the top fee for an Italian operatic commission. Bellini was unusual in being able to earn his living entirely from operatic commissions, but even at the peak of his earning power, he seems to have lived fairly frugally, sending money to his family in Catania and indulging only in his taste for silk gloves and other fine clothing.

*Il pirata's* libretto is a radical departure from the Classical idiom and the calcified generic outlines of Bellini's Naples operas: drawn from Charles Maturin's tragedy *Bertram* (in an adaptation by J.S. Taylor), the plot is quintessentially 'Romantic', set on a storm-tossed seashore and focussing on the proscribed love between a Byronic pirate-exile and a married woman who ends the opera insane. Bellini devoted six months (an unprecedentedly long period by the standards of the time) to *Il pirata's* composition, and the Romantic innovations of both text and music seem to have been quite self-conscious. The autograph score bears witness to struggles over almost every detail, including transpositions, orchestration, and trimming back of cadential passages. One not particularly reliable witness even reported hearing Bellini exhort Rubini to a more impassioned performance during rehearsal by asking, 'if I had taken it into my head to create a genre and a musical style that strictly expresses the words, and to make singing and drama into an integrated whole, ought I to give it up because you don't wish to support me?'. Identifying Romanticism in Italian opera of this period is contentious: certainly there is little about Bellini's music (or Donizetti's) at this stage that breaks sharply with past structures in the way we tend to expect of the Romantic. Indeed, for Italian composers, Romanticism was first of all a matter of literary innovation, an invitation to abandon mythological or classical

*1. Design by Alessandro Sanquirico for Act 1 of Bellini's 'Il pirata', La Scala, Milan, 27 October 1827: lithograph*

plots in favour of those based on more recent history, preferably centred around a violent and passionate conflict and set in a remote and mysterious location. But musical experiment also played a role: if double arias and other conventional structures were rarely jettisoned completely, they often became a background for injections of *couleur locale*, an elevation of the status of the chorus to participant in the drama, or melodic gestures that infuse lyric numbers with something of the rhythms of conversation.

Although Bellini's decisive step into Romanticism and an individual style is – with some justification – often dated from the première of *La straniera* two years later, many of the later opera's innovations are anticipated in *Il pirata*, both in vocal style and approach to form. The lyric prototype design now dominates even more completely in the cabalettas, but is rare in slow movements, which tend to be more varied. The opening section of Imogene's *aria finale*, 'Col sorriso d'innocenza', expands on a lyric prototype design in order to make room for declamatory text-setting, resulting in a melding of syllabic and florid vocal writing that is almost the signature of this early style (ex.2). The *A′* phrase (bar 5) begins as a gracefully ornamented version of the opening motive, but after two bars moves off into a halting, nearly monotone exclamation ('deh! favella al genitor') that extends the phrase by two bars and leads to a florid cadence. Contrasting vocal styles are similarly melded in this aria's cabaletta, 'Sole, ti vela', where the alternation of syllabic declamation and coloratura (and the sharp registral shift) captures the extremes of the heroine's madness (ex.3).

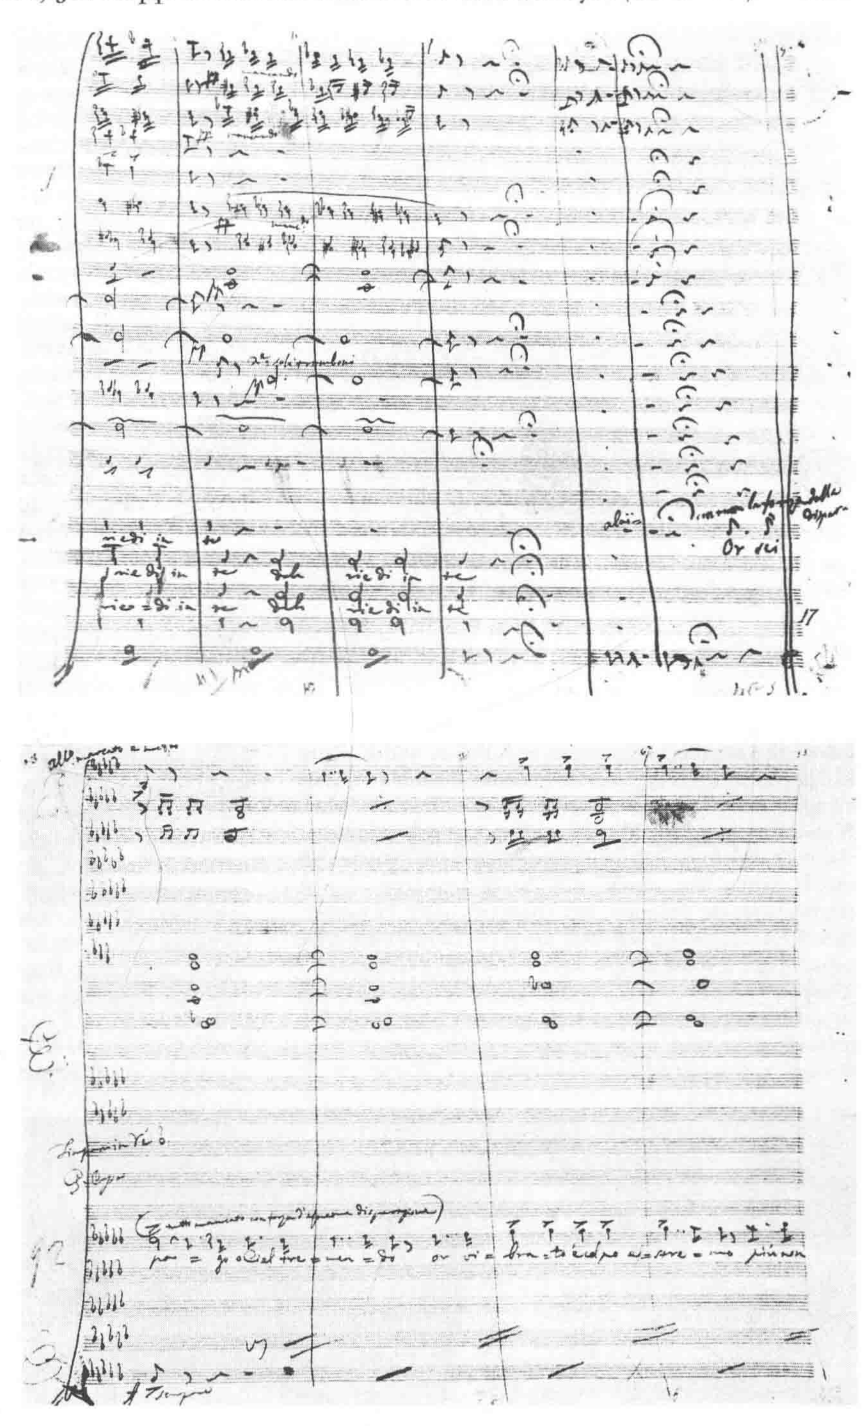
An extreme example of the freedom with which Bellini lays out individual movements is the episodic organization of the slow movement of Imogene's entrance aria, the dream narration, 'Lo sognai, ferito, esangue', a piece that

Ex.2 *Il pirata*, Act 2

would exert an influence on dream narrations by both Donizetti ('Regnava nel silenzio' from *Lucia di Lammermoor*) and Verdi ('Condotta ell'era in ceppi' from *Il trovatore*). The form follows the logic of the text, proposing new melodic figures as each new image is described, even moving in and out of recitative. Such loose construction is often combined with a remarkable economy of motivic material, sometimes reaching the point of obsessiveness, as where Imogene's first 15 bars merely prolong and embellish the fifth scale degree, mostly elaborated through a rocking back and forth between D and E♭. The dream narration takes on a sense of periodicity only at the arrival of the E♭-major phrase ('Era sorda la natura') that becomes a sort of refrain, returning with new words to close the movement.

Ex.3 *Il pirata*, Act 2

After the acclaim of *Il pirata*, Bellini turned to revising *Bianca e Fernando* for a Genoa performance, with new text by Romani substituting for some of Gilardoni's original poetry. Bellini began revision before receiving Romani's verses, using words by a mediocre poet as a template and later grafting Romani's verses onto the existing melodies. It seems typical of Bellini's compositional priorities that he found writing new music without poetry less of a problem than composing two new arias for the Genoa Bianca, Adelaide Tosi, without the singer on hand to consult. Some of Tosi's demands were extravagent, but, always eager to earn loyalty from good performers, Bellini acceded gracefully, even to her insistence that he rewrite her entire entrance aria twice. Tension arose only when he began to suspect that her dissatisfaction was provoked by Donizetti's verdict that the aria was 'worth nothing', a *contretemps* that prompted Bellini's bitter remark that 'friendship within the profession is quite impossible'. Such rivalries, real or imagined, would torment Bellini more and more as time went on; he could be fiercely competitive and ungenerous with colleagues and his letters are strewn with references to the plots laid by his 'enemies'. However, as John Rosselli has suggested, these remarks might be not so much signs of paranoia as the normal concerns of an often solitary man who had invested everything in professional success and who, having no one but Florimo to confide in, poured his anxieties into the letters without inhibition.



Bellini's position in Italy was secured decisively by the première of *La straniera* in February 1829, again at La Scala (fig.2). He had agonized over presenting a second opera in Milan so soon after the success of *Il pirata*, but the new work was immediately recognized as a bold and successful experiment; it was in reviews of the première that the word *filosofico* was first invoked to describe Bellini's style. Early critics remark again and again on opera's revolutionary use of *canto declamato*, a term that points to two separate elements, a predominance of syllabic writing and the practice of setting some lines of unrhymed, loosely metred recitative verse (or *versi sciolti*) as brief bursts of arioso, thus injecting melodic interest and periodic phrase-structure into stretches of recitative that had previously been more strictly plot-orientated. Bellini had already experimented sparingly with this technique in both *Bianca e Fernando* and *Il pirata*, but in *La straniera* arioso and a rigorously syllabic style become items of a Romantic doctrine, reaching extremes of adventurousness and austerity that Bellini never again attempted.

*La straniera* also goes much further than *Il pirata* in combining formal freedom with thematic economy, lending the opera a brooding, obsessive character. Berlioz, who admired *La straniera* alone among Bellini's works, captured this when he approvingly described Valdeburgo's cabaletta, 'Meco tu vieni', as 'devoid of development' (ex.4). Berlioz's phrase could apply equally well to many other passages, including the circular crotchet figure spun out by the orchestra in the introduction to the Act 1 terzettino or the repetitive rhythmic profile and stepwise melodic contours of Alaide and Arturo's duet slow movement, 'Ah! se tu vuoi fuggir'.

The minimalism of these melodies is clearly related to an effort to strip away ornament and to bring even the lyrical sections of the form closer in character to the cadences of conversation, a tendency that shows up more systematically in the crotchet-based cabalettas that were to become a Bellinian trademark, such as the closing sections of the duets for Isoletta and Valdeburgo or Alaide and Arturo (*La straniera*) or Gualtiero's 'Ma non fia sempre odiato' (*Il pirata*). In a sense, Bellini's style in these early operas is defined by his willingness to risk monotony in order to achieve novelty and expressive force.

3. Rapprochement with the Rossinian style (1829–31). After the success of *La straniera*, Bellini was enough in demand to exert unprecedented control over the practical aspects of his career. In an age when composers were routinely expected to accede to the demands of singers and impresarios, he could be increasingly exigent about the practical circumstances of operatic production, refusing to sign a contract if the singers had not yet been determined, and sometimes electing not to work at all rather than compromise his conditions. This unusual freedom proceeded partly from the financial security of high commission fees, but also perhaps from the fact that for extended periods between 1828 and 1833 Bellini lived without expense in the home of his mistress, Giuditta Turina, a young and wealthy married woman. He had met Turina in Genoa in 1828 and he became her lover by September of that year, as Bellini recounted with surprising candour in a letter to Florimo. The liaison was discreet without being secretive: although Turina's husband and parents probably accepted Bellini's residence in their homes, she did not accompany Bellini on his travels except in the last few years of their relationship. Turina's character and the nature of the relationship remain mysterious, partly because Florimo destroyed many letters containing personal disclosures. However, one thing the letters make clear is that having a married mistress suited Bellini perfectly, in that Turina provided a limited emotional contact who could never make excessive demands nor threaten to compete with his career.

Partly thanks to the support of Turina (including her canny management and investment of his earnings), Bellini was able to compose more slowly than most of his

*2. Two pages from the autograph MS of the Act 2 finale of Bellini' 'La straniera', first performed 14 February 1829, showing the opening of the cabaletta 'Or sei pago' (I-Mr)*

contemporaries, writing at a rate of about one opera each year compared to the more usual three or four. However, Romani's delays often meant that an entire score had to be composed within only a month or so of a scheduled première, rather than at the more leisurely pace Bellini preferred. These rush jobs could be stunning successes (as with *La sonnambula*), but the forced haste never failed to bring on minor health problems and attacks of nerves. What is more, the intermittent pace imposed by Romani meant that even at the peak of his career Bellini must have spent several months of each year idle, waiting for words to set to music. He found such enforced inactivity burdensome, but apparently lacked the energy to compose without a pressing deadline.

After the première of *La straniera*, the next project came all too quickly, a commission for a new work to open Parma's Nuovo Teatro Ducale in May 1829. The ceremonial nature of the occasion made this a sensitive undertaking and difficulties with the choice of subject arose immediately. An official of the Parma theatre

Ex.4 *La straniera*, Act 2

complained in an official report that Bellini had rejected the Classical libretto he proposed as 'cold and tedious', taking the man to a local print shop to view a series of gory engravings as examples of the sort of Romantic subjects that appealed to him. By the time Voltaire's *Zaïre* was agreed upon, only a few months remained to prepare libretto and score. Civic pride was already wounded before the première by reports that Bellini and Romani had been seen loitering in cafés while the theatre's copyists awaited material, and matters did not improve when Romani prefaced the libretto with a note admitting that the text lacked polish because it had been 'written in shreds while the music was being composed'. Not surprisingly, the première was received coldly. However, Bellini lost no time in rescuing much of *Zaira*'s music, re-using about a third of it in his next work, *I Capuleti e i Montecchi*, for La Fenice (fig.3). The music that had failed so completely in Parma was acclaimed in Venice, probably more because of a more congenial public climate than through any aesthetic improvements.

Late in 1831 Bellini and Romani began work on an *Ernani* (based on Victor Hugo's play) for Milan's Teatro Carcano, but after several pieces had been composed the project was abandoned, replaced with *La sonnambula*. Bellini once mentioned fear of censorship as a reason for the change of subject, but Romani's widow, Emilia Branca, suggested less charitably that Bellini had wished to avoid presenting another tragic opera after the success of Donizetti's *Anna Bolena* earlier in the season, and had seized on the pastoral subject of *La sonnambula* to avoid direct comparison with his rival. Branca's account doesn't quite stand up to historical scrutiny – the change of subject was announced before the *Anna Bolena* première – but the canny careerism behind her explanation seems characteristic of Bellini.

Whatever the reasons, the switch of topics was an inspired decision: *La sonnambula*'s successs surpassed even Bellini's previous acclaim in Milan. Based on a Parisian ballet, the opera places the vogueish melodramatic theme of sleepwalking against a pastoral background more typical of the old-fashioned genre of *opera semiseria*. The chorus plays a larger role than in any other Bellini opera, celebrating impending marriages and singing the bride's praises in hallowed 18th-century fashion, but also commenting extensively on the action and even at one point offering collective testimony to the heroine's innocence.

The three operas of this period can be regarded as a group mainly because they share a renewed interest in the florid vocal writing so strictly avoided in *La straniera*. The reasons for the retreat from the self-consciously innovative, 'philosophical' style are complicated: the heated journalistic debates over the excesses of *La straniera* may have been a deterrent to further experiments with *canto declamato*, and, in the case of *Zaira* (as Filippo Cicconetti suggested in 1859), the Parma public's reputation as dedicated Rossinians may have played a role, although if so, this was one of the few occasions when Bellini's instinct for audience taste failed him. Both *Zaira* and *I Capuleti* have been criticized for retreating into superficial vocal display and a mechanical succession of

*3. Design by Francesco Bagnara for the closing scene (Act 2 scene iii) of Bellini's 'I Capuleti e I Montecchi', La Fenice, Venice, 11 March 1830: pen and ink with wash (Museo Correr, Venice)*

double arias, failed attempts – some have argued – to adopt the assembly-line working methods of his contemporaries. This seems unfair: these works, too, show elements of experiment, if not in the crucial area of vocal style. *Zaira* is striking for its integration of complex action into ensemble scenes, most impressively in the Act 2 finale, where a midnight rendez-vous, a murder and a suicide fall into place around a largo concertato quintet and *aria finale* for the grief-stricken bass, Orosmane; the more famous tomb scene from *I Capuleti* (fig.3) combines action and lyricism with similar flexibility.

The sweeping adaptation of eight entire numbers from *Zaira* in *Capuleti* was far from an exceptional instance of self-borrowing. Bellini re-used much material from his first two operas – one chorus from *Bianca e Fernando* ('Tutti siam?') reappears almost note-for-note in both *Zaira* and *Norma* (as 'Non partì!') – but he never recycled numbers from his successes, which would have been remembered by audiences. Bellini's self-borrowings were at once pragmatic and 'Romantic', initially motivated by reluctance to waste good music, but also guided by a subtle concern for dramatic context. When the last section of the terzetto from *Zaira* turns up as the stretta of *I Capuleti*'s Act 1 finale, the two scenes share not only a general sentiment (two characters looking forward to a reunion in heaven) and a verse metre, but also end with identical poetic couplets. Similarly, Nelly's cavatina, 'Dopo l'oscuro nembo' from *Adelson e Salvini* and its reworking as Giulietta's romanza ('Quante volte, o quante') in *I Capuleti* are linked by the dramatic situation, a soprano alone, reflecting on her desperate fate. These two pieces are actually part of a larger group of harp-accompanied, minor-key, single-movement arias for sad sopranos that goes back to Desdemona's Willow Song from Rossini's *Otello* (other Bellinian examples are 'Sorgi, o padre' from *Bianca e Fernando* and Alaide's romanza in *La straniera*). Rossini's model is heard not only in general features of timbre and tonality, but also in an allusion to the Willow Song's characteristic melodic gesture of gasping chromatic descent (ex.5).

Other manifestations of this pairing of dramatic situations with related melodic figures include the falling-4th figure used to launch duet movements beginning with the word 'Vieni!' (or 'Taci!') in the Imogene-Gualtiero duet in Act 2 of *Il pirata* and the Elvira-Arturo duet in Act 3 of *I puritani* (ex.6); and the resemblance between

the E♭ major refrains of Imogene's cavatina (at 'Era sorda la natura') and Elvira's 'Rendetemi la speme' in Act 2 of *I puritani*, both of which appear as moments of celestial clarification in the midst of an otherwise disordered musical and verbal discourse.

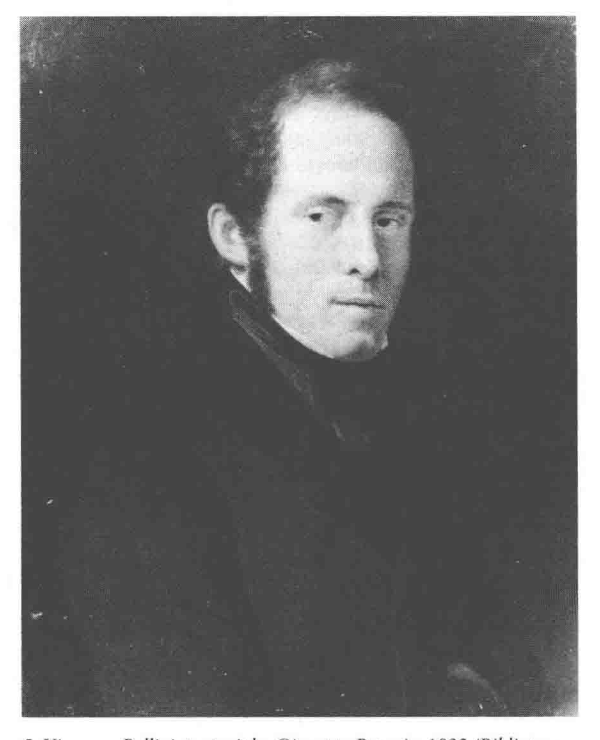
Only one self-borrowing ignores dramatic context altogether: the giddy cabaletta of Zaira's 'Non è, non è tormento' recurs in curiously effective tragic guise as Romeo's heart broken solo 'Deh! tu, deh! tu bell'anima' in the tomb scene of *I Capuleti*. Despite the frequency of the practice in the operatic world, scholarly opinion has traditionally regarded such extensive self-borrowing and self-allusion as a problem, challenging Bellini's reputation as a composer of uncompromising originality, who (to use his own phrase) 'vomited blood to compose' and took such care to suit music to words. However, the clear sense for detail that guides each recycling might just as easily testify not only to Bellini's practicality and economy of means, but also to his strong theatrical instincts.

As in the earlier operas, the force of Rossini's example in this period can be felt as much on the level of form as of melodic style. While most set pieces continue at least

*4. Giuditta Pasta as Amina and Giovanni Battista Rubini as Elvino in Act 1 scene i of Bellini's 'La sonnambula', Teatro Carcano, Milan, 6 March 1831, with (below) the opening of their duet 'Prendi, l'anel ti dono': lithograph by Antonio Lanzani*

to allude to the lyric prototype, the design of individual movements looks in two directions: back to the virtuoso, asymmetrical Rossinian designs already prominent as far back as *Adelson e Salvini*, and forward to a new type of organization, more driven by harmonic and motivic activity, its formal idiosyncrasies often motivated directly by the dramatic situation. From about 1830, arias increasingly aspire to the condition of ensembles, with dialogue inserted in the central *B* section and melodic continuity provided by the orchestra: in the middle section of her Act 2 slow movement in *I Capuleti*, Giulietta converses with Lorenzo just before taking the sleeping potion, and in *La sonnambula* Elvino participates in the *B* section of Amina's 'Ah! non credea mirarti', singing lines added to the libretto by Bellini himself. On a larger scale, the first encounter between the lovers in *La sonnambula* teeters between aria and ensemble. Labelled 'Cavatina: Elvino' in the autograph, but listed as a duet in the published scores, the number foreshadows the lovers' impending conflict by assigning them sharply contrasting material throughout. After a slow movement presented almost entirely by Elvino ('Prendi, l'anel ti dono'; fig.4), the cabaletta emphasizes Amina's inarticulateness by isolating her melodically. Her whispered, agitated motive ('Ah! vorrei trovar parola') is forgotten as soon as Elvino enters with his confident new melody

and moves to the relative major; rather than the two voices uniting at the cabaletta's conclusion, the lovers are subsumed into exclamations by the ever-present chorus, who – with perhaps a touch of irony – celebrate the 'single thought' that unites the couple ('L'un nel altro un sol pensier').



*La sonnambula* also inaugurates the period of what Verdi admiringly called Bellini's 'melodie lunghe, lunghe, lunghe' – although it is worth recalling that Verdi intended the phrase to refer to the 'lesser-known' *Il pirata* and *La straniera*. (Letter to Camille Bellaigue, 2 May 1898; Cesari and Luzio eds.: *I copialettere di Giuseppe Verdi* (Milan, 1913), 415–16.) The term has become something of an analytical cliché, too often used as a blanket term of praise, almost a synonym for beautiful melody; but it has a more precise meaning. The locus classicus of 'long melody' is perhaps Amina's 'Ah! non credea mirarti': a long-breathed phrase, certainly – the first section spins out a remarkable 11 bars before coming to rest on a tonic – but with a melodic contour that is itself anything but long (ex.7). After the small arch of the first two measures, the melody proceeds in short gasps, never managing more than a few beats before being interrupted by a rest, and sometimes almost breaking down into speech-like units (as at bar 3). This combination of an 'endless' harmonic line and a melodic contour made up of breathless, declamatory fragments is typical of Bellini's 'long melodies': a similar balance is struck in other well-known examples, such as 'In mia mano alfin tu sono' and 'Qual cor tradisti' (both from the final scene of *Norma*) and Elvira's 'Qui la voce sua soave' from *I puritani*.

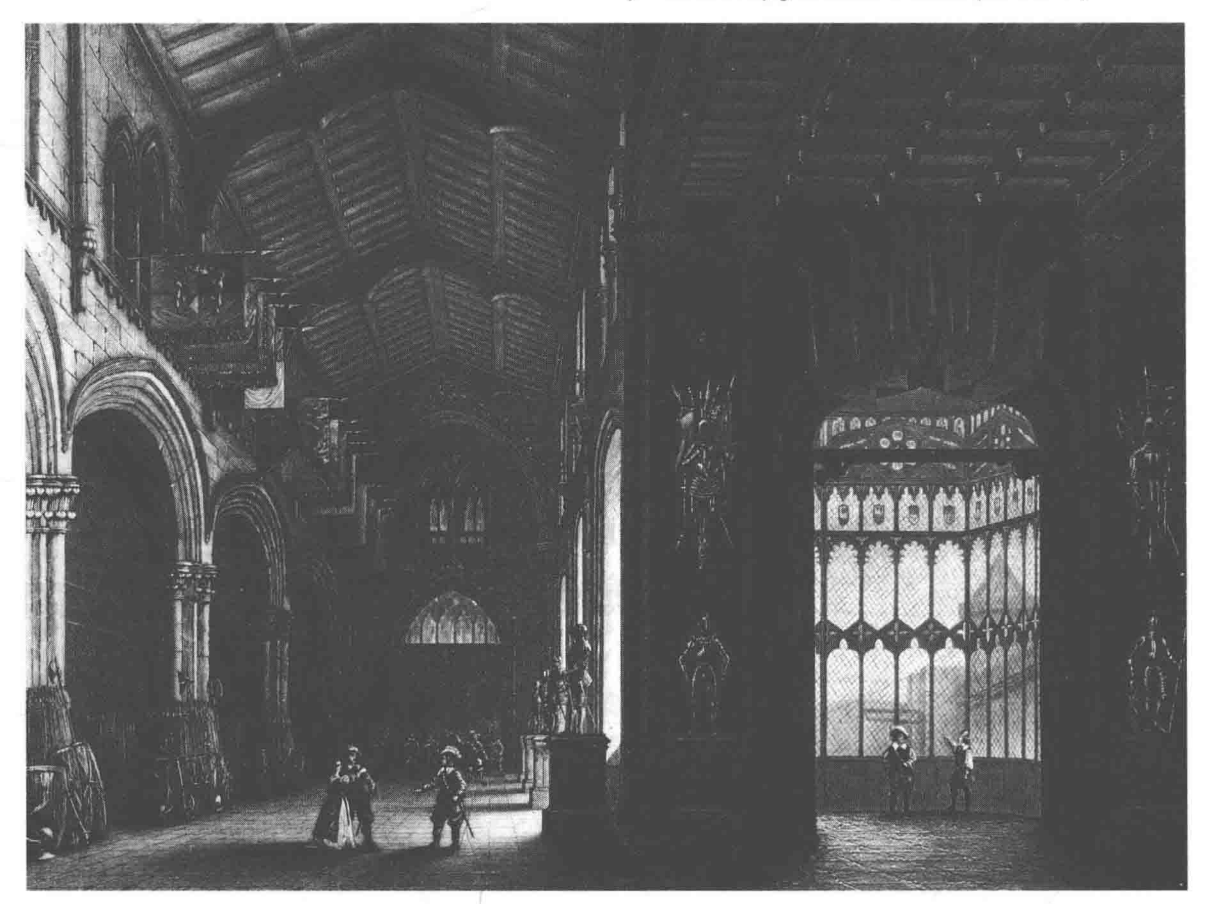
Ex.7 *La sonnambula*, Act 2

4. Last works (1831–5). With the commission in 1830 of two operas that were to receive their premières at La Scala during the next two years (*La sonnambula* and *Norma*), Bellini reached his goal of financial pre-eminence, earning an unprecedented L12,000 for *Norma* alone. The December 1831 première of *Norma* in Milan was, however, no more than a moderate success (although far from 'fiasco, fiasco, fiasco' reported in one of the letters falsified by Florimo); several of the singers were below par, and it was not until the following summer in Bergamo, slightly-revised and with a superior cast, that the opera achieved the success it still enjoys today. The plot is drawn from a play by Alexandre Soumet, which had its première in Paris only the year before; Romani and Bellini tempered Soumet's boulevard-theatre excesses by omitting the sensational ending, in which Norma goes mad and throws herself off a precipice. Although the Classical restraint with which Bellini and Romani approached their melodramatic source might suggest a retreat from the Romantic experiments in both plot and music of *Il pirata* and *La straniera*, it is probably more accurate to see *Norma*, like *Sonnambula*, as a step towards a different brand of Romanticism, its passions all the more forceful for being collapsed into an understated dramatic design. Indeed, the pair's very next collaboration, *Beatrice di Tenda*, written in 1833 for La Fenice, embraces precisely those violent and tragic aspects of Romantic opera they had played down in adapting *Norma* and in substituting *La sonnambula* for *Ernani*. The plot of *Beatrice* is Romantic, but in the most conventional way: set in the generic Renaissance castle that provides the background for so many operas of the period, it concerns a tyrant who wrongly acccuses his wife of adultery and has her supposed lover tortured, then put to death. Even Romani himself called the subject 'horrible': he had already begun work on a *Cristina di Svezia* based on Dumas, but Giuditta Pasta, Bellini's first Amina and Norma, convinced Bellini to set *Beatrice* after she and Bellini together saw a ballet on the subject. This was probably far from an unwelcome or isolated instance of intervention from Pasta: throughout his career Bellini was unusually open to, even dependent on, advice from friends, and Pasta was foremost among both friends and artistic advisors. During the early 1830s Bellini paid extended visits to the Pastas' house at Lake Como and even at times entertained hopes of marrying their daughter, Clelia.

In this case, however, listening to Pasta turned out to be a mistake: not only was *Beatrice* received with utter

*5. Vincenzo Bellini: portrait by Giuseppe Patania, 1832 (Biblioteca Comunale, Palermo)*

coolness in Venice, it became the occasion for the disagreement that ended Bellini's relationship with Romani. As usual, Romani was late in delivering the poetry, so much so that La Fenice's impresario, Alessandro Lanari, called out the police to pressure him. The première was delayed by a month and the Venetian public became impatient, groundlessly suspecting that Bellini was devoting his energies to composing a new opera for a foreign theatre while neglecting their commission. Relations between the collaborators had deteriorated into hostility by the March 1833 première, but the irrevocable rift came just after this, when Romani and an anonymous defender of Bellini's exchanged vitriolic letters in Venice and Milan newspapers, blaming each other for the delays and for the opera's failure. Romani's complaints focussed on the selection of the subject, accusing Bellini of holding things up by dithering too long over the choice and of being too swayed by his 'Minerva' – Pasta. Bellini's champion, of course, tossed the blame back to Romani, and countered charges that *Beatrice* was merely a cynical retread of *Norma* (a claim that seems incomprehensible when the two scores are placed side by side). By 1834 Bellini and Romani had renewed their correspondence and were discussing future projects; the relationship might have been repaired had Bellini's sudden death not intervened.



After the *Beatrice* imbroglio, Bellini embarked on a period of rest and travel. In spring 1833 he paid an extended visit to Naples and Sicily, returning home for the first time in six years. The following spring he spent four months in London in connection with performances at the Italian opera there; extended periods of both 1833 and 1834 were spent in Paris. All this travel may partly have been motivated by a break with Giuditta Turina late in 1833: her marriage had reached a point of crisis and she wanted to live openly with Bellini. He refused, perhaps no longer as much in love as he had been five years earlier, but also – always – wedded to his career. As he confided to Florimo, 'such a relationship would be *fatal* to me, because it would take away *my time* and *my peace* as well'. In London and Paris Bellini was much in demand in society circles, despite speaking no English, and French only (as Heine put it) 'world-destroyingly, ... [breaking] French words on the wheel like an executioner'. Although he clearly glittered in salon society, he found the carnival atmosphere of Paris tiresome at times, and passed long periods of retreat at the house of his friend S. Levy at Puteaux just outside Paris.

In Paris much energy was directed toward securing a contract at the Opéra, negotiations that were complicated by his insistence on a fee equal to Rossini's. Things were easier at the Théâtre Italien, where Bellini signed a contract early in 1834 for the opera that would become *I puritani*. The première in January 1835 featured the group of principal singers that would become famous as the *Puritani quartet*: Giulia Grisi, Rubini, Tamburini, and Luigi Lablache. The libretto was by exiled republican poet Carlo Pepoli, who made up for his utter lack of experience with infinite good humour and flexibility in the face of Bellini's incessant reprimands and requests for revision. Thanks to Pepoli's novice status, Bellini was obliged to spell out what he wanted more explicitly than ever before, and their correspondence is the most complete statement we have of Bellini's views on opera. Particularly interesting are Bellini's remarks concerning the tone he sought for *I puritani*. He hoped to capture something of the sentimental pastoral tone of Paisiello's *Nina*, another opera with a mad heroine and a happy ending; *I puritani*'s unusual fusion of a misty historical atmosphere vaguely reminiscent of Walter Scott and a gentler style seems typical of the pastel-tinged, fluidly structured plots Bellini preferred in these last years, and might also be seen as a nostalgic return to the Neapolitan roots of his earliest style, now infused with a Romantic air.

At the same time as Bellini fought to match Rossini's earning power in Paris, he also sought both the older composer's friendship and his official stamp of approval as director of the Théâtre Italien. The relationship between the two had been fraught with tension, at least on Bellini's side, since an 1829 meeting in Milan when Rossini had complimented *Il pirata*, but remarked that Bellini's style was so 'philosophical' as to lack orchestral brilliance. Orchestration continued to be a main area of artistic disagreement, and Rossini's comments on the score of *I puritani* were orientated towards broadening the timbral palette and generally increasing the role of the orchestra to cater to the Parisian enthusiasm for complex instrumental passages. Rossini was encouraging, but Bellini wanted more: he wrote to Florimo that he longed for the affection 'of a father for his son, of a brother for his brother', a phrase that – even if one ignores its Oedipal resonances – speaks of the enduring and complex connection Bellini felt with the older composer, perhaps stretching back to the half-heeded prohibitions of his Naples teachers against Rossinian ornament.

Given the concentration with which Bellini absorbed French operatic style during these years, it seems surprising that *I puritani* marks no more of a break with Bellini's previous style than does, for example, *La sonnambula* or *Norma*. In fact, among the last operas it is *Beatrice di Tenda* that stands out, set apart by the florid style assigned to the heroine and by its predictable approach to aria and ensemble forms. One reason for this may be that Bellini was already experimenting long before the move to Paris, absorbing cosmopolitan trends and setting his sights on international success. Becoming more 'French' primarily meant formal experimentation, exploring alternatives to the lyric prototype and blurring or expanding the still-dominant double aria structures, but it also entailed scenic innovation: giving the chorus a larger role and using stage space more imaginatively. *I puritani*, with its rich exploitation of offstage effects, does this with virtuosity, but the tendency can already be felt in the final scene of *La sonnambula*, where the sight of Amina sleepwalking along a narrow beam above the mill-wheel is not only a striking stage picture, but a crucial plot ingredient, serving as wordless proof of her innocence.

Like *La sonnambula*, the last operas move freely between syllabic and florid style. Norma's dominant idiom is mostly syllabic 'long melody', but in moments of fury or religious transport she sings floridly ('Oh non tremare, o perfido' in the Act 1 finale; 'Casta diva'); similarly, Elvira's cavatina, 'Son vergin vezzosa', presents her as a giddy, virtuoso bride-to-be, but in her Act 2 mad scene a more declamatory style predominates. Both *Norma* and *I puritani* offer numerous examples of 'long' melodies in the manner of 'Ah! non credea mirarti', built of speech-like fragments strung together by harmonic or orchestral threads of continuity with few intermediate cadences or melodic repetition. In this last period the lyric prototype finally becomes the default mode for both slow

*6. The Hall of Arms (Part 1 scene iii) from Bellini's 'I puritani', Théâtre Italien, Paris, 24 January 1835, designed by Domenico Ferri: engraving by Vittore Pedretti after M. Verardi*

movements and cabalettas, but at the same time French-accented alternatives become more common, especially ternary and strophic designs. Pollione's dream narration ('Meco all'altar di Venere') from Act 1 of *Norma* gestures toward both lyric prototype and ternary form, returning to the opening pair of phrases after an extended departure; however, in an effect that anticipates Verdi's treatment of such climactic moments in dream and vision scenes, as Pollione quotes Norma's curse the movement opens out into a loosely-organized passage of monotone declamation and chromatic harmony, never returning to its opening material.

The construction of the double aria as a whole was similarly diversified. Less willing to suspend conflict simply to make room for lyrical expansion, Bellini occasionally omits slow movements in duets for characters who are at odds dramatically, such as Romeo and Tebaldo in *I Capuleti* or Agnese and Orombello in *Beatrice*; in *Norma*, Adalgisa and Pollione simply do not take the time for a cantabile as they decide to flee together to Rome. The edges of individual sections within a double aria can also be blurred, as in the first duet for Norma and Adalgisa, where dialogue in *versi sciolti* evoking Norma's memories of past love ('O rimembranza') is layered over the slow movement's orchestral introduction; the cantabile proper begins only after ten bars when Adalgisa begins to tell of the birth of her love for Pollione ('Sola, furtiva, al tempio', ex.8). This double exposition is, in a sense, an extension of Bellini's lifelong practice of beginning set pieces with *versi sciolti* set as arioso, but here the blurring of aria and recitative also creates the sense of a musical discourse moving simultaneously on two levels: Norma's past and Adalgisa's present, Norma's fragmented dream of happiness and Adalgisa's melodically present reality.

A more radical challenge to the symmetries of the double aria is posed by *Norma*'s Act 2 finale, which constantly spills over the confines of the standard *aria finale* model to become a free succession of lyric numbers, as much ensemble as aria. In the autograph score, Bellini labelled this finale only with a tempo marking, but he described it to a friend as composed of 'a *pezzo concertato* and a stretta', both pieces 'of a completely new type'. In addition to replacing the cantabile-cabaletta sequence with a pair of slow movements ('Qual cor tradisti' and 'Deh! non volerli vittime'), the *Norma* finale eliminates the plot tension that usually propels a double aria: the central conflict is resolved during the previous duet with Pollione, leaving these last two lyric movements as sites of pure vocal pleasure. This impulse towards loose structure and sonority for its own sake reaches an apex in the third act of *I puritani*. The act runs without interruption through a romanza for tenor, a duet and a finale. But, in a curious parallel to the idea of a 'long, long, long melody' built from separate tiny motifs, the effect of large-scale continuity is tempered by repeated

Ex.8 *Norma*

fragmentation and interruption of individual numbers: in the romanza, the offstage soprano and onstage tenor toss fragments of the melody to each other; during the duet the soprano slides in and out of madness, her psychological shifts accompanied by recalled themes; and platoons of soldiers pass by offstage, their martial music breaking into the lyric movements of the lovers' duet. Paradoxically, the *I puritani* finale introduces so much scenic activity and so many plot reversals that suspense is almost erased: the tight balance between plot events and static set pieces disintegrates, replaced by a continuous dramatic discourse that, rather than becoming *more* like spoken drama, spills over into sheer song.

This final act of the final opera is an intriguing document of Bellini's late development and perhaps a hint of the qualities that might have emerged had he lived longer. His style would almost inevitably have become even more French, building on the dramatic continuity of moments like this third act of *I puritani* and on the flexible shaping of individual movements. The real innovation of *I puritani* is its use of the stage, in the emphasis it throws on spatial effects and especially its ongoing dialogue between onstage and offstage music; this seems a particularly Bellinian conception of the scenic emphasis of French *grand opéra* and one that might well have been developed further. Finally, the delicate musical *tinta* of *I puritani*, when seen in the context of the various attractions and resistances to Romantic plots evident in the negotiations over *Zaira*, *Ernani*, *Norma* and *Beatrice*, suggests that Bellini was moving toward a new vision of operatic Romanticism, a style less based on the sharply articulated conflicts and shocking stage effects of many of Donizetti's plots (and, indeed, of Victor Hugo's plays), but one that was more fluid, and perhaps as concerned with reviving a vaguely remembered pastoral mode as with engineering sharp breaks or steps into innovation.

Bellini died on 23 September 1835 after several weeks of illness. Much speculation has centred around the fact

that he apparently died alone in Levy's house at Puteaux, and that during his illness an acquaintance who visited the house was sent away by servants without being allowed to see him. These events are sad but hardly sinister: Bellini died of an attack of the amoebic dysentery that had plagued him intermittently since 1831. A requiem mass was held at Les Invalides on 2 October, with Rossini, Paer, Carafa, and Cherubini as pall-bearers; Rossini served as executor of the estate. The remains rested in Père Lachaise cemetery in Paris until 1876, when they were transported by train to Catania in a grandiose procession met at every station with patriotic speeches, musical performances, sentimental spectacles and copious tears.

5. Reception and influence. It is a revealing quirk of Bellini reception that the fullest statement of the composer's aesthetic comes from a letter that is almost certainly fabricated, supposedly written around 1829 to Agostino Gallo and first published in 1859. In it 'Bellini' describes his method of setting a libretto to music:

> shut up in my room, I begin by declaiming each character's lines with all the heat of passion, and I closely observe the inflections of my voice, the speeding up and slowing down of the declamation in each situation, the overall accent and the expressive tone that characterizes a man in the grip of passion, and I find the motifs and the general rhythmic character best suited to demonstrate them and infuse them with new life by means of harmony. Then I throw them onto paper, try them out on the piano, and when I myself feel the corresponding emotion, I judge that I have succeeded.

There is something deeply appealing about this picture of a composer locked up with his work, arriving at melodic inspiration by *becoming* his characters – so much so that the editor of the first modern collection of Bellini's letters could not resist including the 'Gallo' letter, although she felt obliged to add a footnote questioning its authenticity. If nothing else, the letter is a trace of the extravagant mythologising that surrounded Bellini from the last few years of his life until well into the 20th century. Similar legends were, of course, woven around other composers of the period, but the terms in which the Gallo letter imagines the moment of creation sets Bellini apart from colleagues like Rossini, Donizetti, or even the young Verdi, for whom the compositional process was more likely to be pictured as rapid, business-like, even a bit careless.

The Gallo letter springs from a tendency to see Bellini as the lone Romantic among Italian opera composers, pioneering what contemporary critics labelled a 'philosophical' style. In popular reception, the Romantic label spread from the music to the man: Bellini's delicate manners, fine features and blond hair – the qualities summed up in Heine's phrase 'a sigh in dancing pumps' – have obscured equally reliable evidence of the composer's energy and strong will. In one *authentic* statement of a compositional aesthetic, from an 1834 letter to novice librettist Carlo Pepoli, Bellini adopts an exigent, even hectoring tone and ascribes a power to opera that seems far from gentle: 'Carve it in your head in adamantine letters: *Opera must draw tears, must horrify, must kill through singing*'. As such forceful passages remind us, the familiar image of a gentle man known for writing elegiac music, uniquely sensitive to the tones and rhythms of poetry, must be balanced with that of the confident professional willing to browbeat his librettist and to contemplate (however metaphorically) *killing* listeners with his music. Similarly, the Romantic portrait of an idiosyncratic, rule-breaking rebel is softened by passages from the correspondence showing that Bellini was friendlier to operatic convention than is often thought. Indeed, he was probably as much in sympathy with the operatic world that surrounded him as resistant to it, often content to rely on conventional musical structures inherited from predecessors, and both willing and able to cater to the tastes of his audience.

Although a handful of biographies appeared before Bellini's death, it was really only in the last quarter of the 19th century that influential attempts were made to establish Bellini's reputation. Florimo's notorious biography with its severely censored edition of the letters appeared in 1882. This period also saw a polemical battle over self-borrowing waged by two students of the sketches housed in the newly established museum in Catania. In his 1882 book, Michele Scherillo claimed that Bellini had re-used numbers originally sketched for *Ernani* in *La sonnambula*. Although Bellini himself had mentioned this in a letter to the publisher Giovanni Ricordi, native Catanese and Bellini acquaintance Antonino Amore was outraged by the idea. Amore excavated the *Ernani* sketches, only to prove Scherillo's case: he uncovered not only a fragment of a chorus from *La sonnambula* but several numbers later used in *Norma* as well. The passion with which Scherillo and Amore argued their cases seems out of proportion with the importance of the issue (after all *Ernani* was never finished and never performed) unless we consider that what was at stake was the much larger question of Bellini's originality, and even his image as a 'philosophical' composer for whom words and music were intimately, uniquely connected.

If this image was gaining ground in Sicily by the end of the century, it had a much longer history in Germany; indeed, it may even have originated as a German import. As W.F. Kümmel has shown, Bellini's music caught on remarkably quickly in Germany: as early as 1828 critics in the *Allgemeine musikalische Zeitung* described him as unusually well acquainted with the German classics and approvingly cited his distaste for cabalettas and his desire to dispense with Italian operatic conventions generally, if only audiences would permit. The same aspects that earned him the philosophical label in Italy were received by German critics simply as 'German': as Schumann put it, Bellini was a 'butterfly who fluttered around the German oak'. This tendency to appropriate Bellini culminated, of course, in Wagner, who seems to have maligned Bellini's music as 'shallow and empty' with about the same frequency that he found himself whistling or singing tunes from *La straniera* or *I puritani* or *Norma*. When he wasn't merely criticizing, Wagner cast Bellini as an early link in the great Wagnerian aesthetic chain, more than once referring to Bellini's decisive break with Classicism (which, strangely, he located in *I Capuleti*) and to the melodic simplicity that must have had such a great effect 'after Rossini, in whom everything was dissolved into runs'.

However, no amount of Wagnerian disapproval or appropriation could have had much impact on the popular fate of Bellini's operas, whose fortunes were linked to those of bel canto opera generally. Like several works of Donizetti and Rossini and the young Verdi, Bellini's more famous operas were performed frequently and continuously until the end of the 19th century, then fell out of favour for several decades. *Il pirata* and *I Capuleti* were

revived in Rome and Catania respectively to mark the centenary in 1935, but lasting revivals and resurgences of interest came only with championship by great sopranos in the 1940s and 50s. The leading figure was, of course, Maria Callas, who chose the role of Norma for prominent débuts (including those at Covent Garden and the Metropolitan Opera House) in the 1950s, and sang famous performances of *I puritani* (from 1949), *La sonnambula* (1955) and *Il pirata* (1958). Other influential revivals include Monserrat Caballé's 1967 performance of *Il pirata*, Joan Sutherland's *I puritani* (including a 1964 production at Covent Garden, London, where the opera had not been heard for over 70 years), and Renata Scotto's *La straniera*, *I Capuleti* and *La sonnambula*. This is only the most recent chapter in a reception history that has always rested as much on the advocacy of singers as on more scholarly assessments of the operas: Giuditta Pasta's contribution to the initial success and subsequent popularity of *La sonnambula* and *Norma* is an obvious case, but even more interesting are the fortunes of *Beatrice di Tenda*, which, after its disastrous reception at the Venice première, became solidly established in the Italian repertory through the 1840s, mainly owing to several sopranos who included the role in their repertories, partly, no doubt, in order to compete with each other.

Today the practical aspect of Bellini's reputation is thriving, and scholarly activity is increasing. Most of the operas are solidly in the repertory, although performances and recordings are confined to a rather narrow school of singers who specialize in the style. Studies of individual operas, especially the early works, are few and far between. However, a critical edition is now underway, and publication in recent years of the first complete edition of the letters, a comprehensive critical study of Romani based on previously unknown documents, and a new biography that for the first time closely measures Florimo's manipulations of the correspondence provide an invaluable documentary basis that could inject a new energy into interpretative and analytical work on the operas.

WORKS

OPERAS

| *Title* | *Genre, acts* | *Libretto* | *First performance* | *MS sources: printed scores* |
|---|---|---|---|---|
| Adelson e Salvini | op semiseria, 3 | A.L. Tottola, after P. Delamarre | Naples, S Sebastiano Conservatory, Feb 1825 | *I-CATm** |

SACRED

*all works composed before 1825*

Compline, lost; Cor mundum crea, F, 2 solo vv, org, in *Pubblicazione periodica di musica sacra sotto gli auspici della S.C. di Propaganda Fide*, ii/2 (Rome, 1879), also in *Cronache musicali*, i (Rome, 1900), no.28; Credo, C, 4vv, orch; Cum sanctis, *I-Nc**; De torrente, *Nc**; Dixit Dominus, solo vv, 4vv, orch, inc. *Nc**, facs. of pt.iii, Tecum principium, in *Vincenzo Bellini: Composizioni giovanili inedite* (Rome, 1941); Domine Deus, *Nc**

Gallus cantavit, ?autograph *I-CATc*; Gratias agimus, C, solo S, orch; Juravit, *Nc**; Ky, *Nc**; Laudamus te, *Nc**; Litanie pastorali in onore della B.V., 2S, org; Mag, 4vv, orch, frag. *F-Pn**; Mass, a–A, S, A, T, B, 4vv, orch, inc. *I-CATm** (Milan, 1843); Mass (Ky–Gl), D, SSTB, orch, dated 1818, *Nc**; Mass (Ky–Gl), G, SSTB, orch; Mass, g, solo vv, vv, orch, frags. *CATm**, *Nc**

Pange lingua, 2vv, org, *CATm**; Qui sedes, *Nc**; Qui tollis, *Nc**; Quoniam, *Nc**; Quoniam, T, vv, orch, *F-Pn**; Quoniam and Cum sanctis, *I-Nc**; Salve regina, A, 4vv, orch, *CATm**, facs. in *Vincenzo Bellini: Composizioni giovanili inedite* (Rome, 1941); Salve regina, f–F, solo B, org (Milan, 1862); 4 Tantum ergo and Genitori: B♭, solo S, orch, E♭, solo S, orch, vs (Florence and Rome, n.d.), F, 2S [Genitori, 4vv], orch, G, 4vv, orch

5 Tantum ergo: F, solo S, orch, vs (Florence and Rome, n.d.), D, solo A, orch, *I-Nc** dated 1823 (Milan, 1862), E, S, A, T, B, vv, orch, *Nc** dated 1823 (Milan, 1862), F, solo A, T, orch, *Nc** dated 1823 (Milan, 1862), G, solo S, orch, *Nc** dated 1823, (Milan, 1862); 2 TeD, C, E♭, 4vv, orch; Versetti da cantarsi il Venerdì Santo, 2T, orch, autograph in private collection Marusia Manzella, Rome, mentioned in F. Pastura: 'Le tre ore di agonia', *Rivista del Comune di Catania* (1953); Virgam virtutis, *Nc**

OTHER VOCAL

*composed after 1825 for 1v, pf, unless otherwise stated*

6 ariette da camera (Milan, 1829 [Ricordi]; Naples, n.d. [Clausetti]; Paris, ?1831 [Launer, no copy found]; Naples, n.d. [Girard]) [A]

Bellini per camera: raccolta completa delle sue ariette (Naples, n.d.) [the Girard edn. of 6 ariette da camera, enlarged by 8 additional nos.] [B]

Brezze dell'Etna: 26 ispirazioni del cigno catanese (Naples, n.d.) [all 26 nos. probably not pubd] [C]

Soirées musicales: Sammlung beliebter Arietten und Romanzen (Vienna, 1839 [Mechetti]) [D]

3 ariette inedite (Milan, 1837–8 [Ricordi]) [E]

Composizioni da camera (Milan, 1935, 2/1948 [Ricordi]) [F]

Principal MS sources, some autograph: *F-Pn*, *I-CATm*, *Fn*, *Mc*, *Nc*, *Rsc*, *US-NYpm*, *Wc*

A palpitar d'affanno, romanza, no.270 in Aurora d'Italia e di Germania (Vienna, n.d.), also in Prima ed ultima composizione di Bellini (Turin, n.d.)

L'abbandono, romanza, B, C, D, F; as L'ultima veglia (Milan, 1836); as La mammoletta (Paris, n.d.)

L'allegro marinaro, ballata (Milan, 1844), B, C, F

Almen se non poss'io (Metastasio), arietta, A, B, C, D, F

Bella Nice che d'amore, arietta, A, B, C, D, F

Chi per quest'ombre (Giudiccione), free canon, 4vv, unacc., 15 Aug 1835, facs. in *Gazette musicale de Paris*, ii (Oct 1835), also in A. Pougin: *Bellini: sa vie, ses oeuvres* (Paris, 1868), following p.228

Dalla guancia scolorita, free canon, 2vv, pf, 1835, in *Strenna letteraria artistica musicale del giornale 'Il pirata'* (Bologna, 1872), also in *La musica popolare*, ii (1883), following p.145

Dolente immagine di Fille mia, arietta (Naples, *c*1824; Paris, n.d.), B, C, D, E, F, orch pts. *I-Nc**

E nello stringerti a questo core, aria, 1v, orch, before 1825, *Nc**

La farfalletta, canzoncina, ?1813, F

Guarda che bianca luna, romanza, ?Palermo, 1832

Il fervido desiderio, arietta, B, C, E, F

Imene, wedding cantata, S, T, T, vv, orch, ?1824, frags. *I-CATm**, *US-NYpm**, trio [Ombre pacifiche] pubd (Florence and Rome, n.d.)

Malinconia, ninfa gentile (I. Pindemonte), arietta, A, B, C, D, F

Ma rendi pur contento (Metastasio), arietta, A, B, C, D, F

No, traditor, non curo, aria, S, pf, before 1825, *I-CATm* [probably orig. with orch]

O souvenir: pagina d'album, arietta (Florence and Rome, n.d.)

Per pietà, bell'idol mio (Metastasio), arietta, A, B, C, D, F

Quando incise su quel marmo, aria, S, orch, before 1825, *Nc**, with pf acc. (Milan, 1836), also as no.269 in Aurora d'Italia e di Germania (Vienna, n.d.), B, C, F [incl. introductory recit]

La ricordanza (C. Pepoli), 1834, *US-Wc**

Si, per te, gran nume eterno, cavatina, S, orch, before 1825, *I-Nc**

Sogno d'infanzia, romanza (Milan, 1835), B, C, D, F

T'intendo, si, mio cor (Metastasio), 4S, unacc., *c*1824, *US-NYpm**

Torna, vezzosa Fillide, romanza, *I-Mc*, F

Vaga luna che inargenti, arietta, no.246 in Aurora d'Italia e di Germania (Vienna, n.d.), B, C, E, F

Vanne, o rosa fortunata, arietta, A, B, C, D, F

Lost: Amore, Malinconia, La speranza (C. Pepoli), 3 sonnets, 1834–5; Alla luna (Pepoli), 1834–5; Numi, se giusti siete (P. Metastasio), romanza, announced on title-page of C; Scena ed aria di Cerere, erroneously said by Weinstock, 1971, to be in *I-Nc*; Arietta, Milan, for Lady Christina Dudley-Stuart, 1828; Cavatina, Milan, for album of Duchess Litta

Spurious and doubtful: Ah, non pensar = section of Introduzione of Beatrice di Tenda; Era felice undì = transr. with notable changes of a cavatina by Mercandente; Se il mio nome (Berlin, n.d.), D = Rossini: Il barbiere di Siviglia; Tu che al pianger, B, actually by F. Florimo; Le dernier soir, romanza (Paris, 1841) [authenticity very doubtful]

INSTRUMENTAL

Orch (all composed before 1825): Capriccio, ossia Sinfonia per studio, c; 6 sinfonie: B♭, *I-CATm**, c (Milan, 1941), d-D (Milan, 1941), D, facs. in *Vincenzo Bellini: Composizioni giovanili inedite* (Rome, 1941) (Padua, 1959), E♭, facs. in *Vincenzo Bellini: Composizioni giovanili inedite* (Rome, 1941), E♭ (Milan, 1941); Ob Conc., E♭, *Nc**, facs. in *Vincenzo Bellini: Composizioni giovanili inedite* (Rome, 1941) (Milan, 1961)

Kbd: Allegretto, g, pf, *I-Fn**; Capriccio, G, pf 4 hands, *Nc*; Pensiero musicale, pf, ed. F.P. Frontini (Florence and Rome, n.d.); Polacca, pf 4 hands; Org Sonata, G, *US-NYpm**; Tema, f, pf, *c*1834, *F-Pn**

Spurious: Sonata, F, of 4 hands, *Nc** = transcr. of Beethoven's Allegretto alla Polacca op.8

MARY ANN SMART (text), FRIEDRICH LIPPMANN, SIMON MAGUIRE/MARY ANN SMART (works), FRIEDRICH LIPPMANN/MARY ANN SMART (bibliography)

**Bellinzani, Paolo Benedetto** (*b* Ferrara, *c*1690; *d* Recanati, 25 Feb 1757). Italian composer. Ferrara is cited as his birthplace in the *Serie cronologica de' principi dell' Accademia de' filarmonici di Bologna*, but archival documents in Udine and Recanati suggest Mantua. On 15 April 1715, when in Verona, Bellinzani was appointed *maestro di cappella* of Udine Cathedral and on 29 April was granted the benefice of S Ermagora. He must by then have taken holy orders and been proficient in *canto fermo* (plainsong) and *canto figurato* (polyphonic vocal music), subjects in which he had to instruct the clergy. On 11 December 1717 Bellinzani asked to be relieved of Vespers until Christmas in order to compose church music – possibly his *Salmi brevi*, which came out in the following year. On his nomination as a censor in Ferrara, Bellinzani left Udine in 1718 and moved to Pergola. He resigned his post at Udine on 30 September 1721, stating his intention to go to Pesaro. From 1724 until 1727, and probably until 1730, he was *maestro di cappella* of Pesaro Cathedral. The years 1722 and 1723 are unaccounted for; claims that he was *maestro di cappella* of Ferrara Cathedral in 1722 seem unfounded. In 1727 he was admitted as a composer to the Accademia Filarmonica of Bologna. On 7 June 1730 he was appointed *maestro di cappella* of Urbino Cathedral, remaining there until 27 August 1734, when at Ferrara Cathedral he took up a similar post which also entailed the running of a music school attached to the seminary. On 19 May 1735 he relinquished his appointment, to go to Orvieto, where he probably remained for two years. In 1737 he succeeded Pietro Benedetti as *maestro di cappella* of Recanati Cathedral, a post he held until his death.

In their day Bellinzani's compositions enjoyed great popularity. He was an unusual combination of learned contrapuntist and sensitive melodist, generous with the use of ornamentation in his vocal lines. Not surprisingly, some have found his church music more secular than sacred in atmosphere. His instrumental music is heavily indebted to Corelli, as his op.3 sonatas, which close with a set of variations on the folia, clearly show.

WORKS

SACRED VOCAL

[4] Missae 4 vocibus concinendae, SATB, vle/theorbo, org, op.1 (Bologna, 1717)
[12] Salmi brevi per tutto l'anno, SATB, SATB, 2 vn ad lib, vle/theorbo, org, op.2 (Bologna, 1718)

MICHAEL TALBOT/ENRICO CARERI

**Bellis, Giovanni Battista de.** *See* DE BELLIS, GIOVANNI BATTISTA.

**Bellison, Simeon** (*b* Moscow, 4 Dec 1883; *d* New York, 4 May 1953). American clarinettist of Russian origin. He learnt first from his father, and at nine was playing in bands conducted by him. From 1894 to 1901 Bellison studied under Joseph Friedrich at the Moscow Imperial Academy. He was first clarinet for the opera orchestras in Moscow (1904–14) and Petrograd (1915). During the Russo-Japanese War and World War I he was in the army. In 1920 he settled in America and was first clarinet in the New York PO from 1920 to 1948. He organized and played in the following ensembles: the Moscow Quintet (toured Russia, Poland and Latvia, 1902), Zimro (toured Siberia, China, Japan, India, Dutch East Indies, the USA and Canada, 1917–20); the Clarinet Ensemble (75 players, formed in 1927 to tour the USA). Bellison had a high reputation as a teacher in Russia and the USA. He used Oehler clarinets, choosing a very hard reed which he tied on, and produced vibrato by finger movement. He was an authority on Hebrew music, and wrote many articles, as well as a novel, *Jivoglot*.

PAMELA WESTON

**Bellissen, Laurent.** *See* BELISSEN, LAURENT.

**Bell-lyra** [bell-lyre, lyra-glockenspiel] (Ger. *Stahlspiel*; *militär-Glockenspiel*). A portable glockenspiel in lyre form designed for the use of marching bands. It is classified as an 'idiophone: set of percussion plaques'. In the latter half of the 19th century the glockenspiel became a feature in German military bands. Originally the instrument consisted of a row of metal cups (later, steel bars) mounted in a pyramid on an upright rod held in one hand of the player, while the other held the beater. The bars (usually 15) were arranged in a single row and were detachable for key changes. Later instruments, with a compass of two or more octaves arranged in two or more rows mounted on a lyre-shaped frame, were supported from the shoulder. When 'fully dressed' the instrument bore the traditional horse-tail plumes. Its form is surely inspired by the TURKISH CRESCENT.

The modern bell-lyra, with its bars of steel or alloy arranged keyboard fashion with the 'black' notes to the player's left, is often similarly adorned. A typical instrument has a compass of two octaves, and continues to be

*Bell-lyra by the Ludwig Drum Co., Chicago*

associated with marching bands. A rare instance of its use as an orchestral instrument occurs in Britten's church opera *The Burning Fiery Furnace* (1966).

JAMES BLADES

**Bellman, Carl Michael** (*b* Stockholm, 4 Feb 1740; *d* Stockholm, 11 Feb 1795). Swedish poet. He became known as an entertainer and creator of satirical drinking-songs during the 1760s, and his popular fame eventually brought him to the attention of the Swedish court. With the help of Gustavus III he acquired a government position that left him ample time to devote to his craft. His fortunes turned when the king was murdered in 1792, and his last years were plagued by debt and illness; but his fame continued to grow, and he has remained the favourite of latterday Swedish 'troubadours'.

Bellman was one of Sweden's most gifted poets of all time. His preferred medium was parody (the re-use of popular melodies to new poetry); but with his bold verses, intricate metrical patterns and improvements in his borrowed melodies he created an inimitable song form that has retained its popularity to the present day. He has been compared with Hogarth, but his message is more subtle than that of the artist, and his moral position is not as easy to determine. His best-known song collections are *Fredmans epistlar* (Stockholm, 1790; ed. G. Hillbom and J. Massengale, Stockholm, 1990) and *Fredmans sånger* (Stockholm, 1791; ed. G. Hillbom and J. Massengale, Stockholm, 1992): the former is a collection of fictional letters portraying imaginary scenes in the lives of known contemporary drunkards and loose women, and the latter is a mixed group of drinking-songs, satires and lyrical

*Carl Michael Bellman playing a cittern: portrait by Per Krafft the elder, 1779 (Gripsholm Slott, Mariefred)*

pieces. The transcriptions for the melodies in both cases were provided by Olof Åhlström, who was also Bellman's publisher.

Much of the music for both collections has been traced to France. Bellman used *ariettes* from the *opéra comique*, instrumental dances and *airs* that have been found in old songbooks and in Swedish 'dance books' containing melodies transcribed for one or two violins. Less frequently, he took simple melodies by such well-known composers as Haydn and Handel. He often extensively revised his melodies, and the sources of more than a quarter of the tunes to his two popular song collections have not been identified. We have no concrete evidence that Bellman composed music in the traditional sense of the word, but an occasional melody or two, such as the interestingly awkward setting to *Fredmans sång* no.34, may be his own composition. The majority of his some 1700 poems have been published, with their music, in the standard edition, *Bellmans skrifter* (Stockholm, 1921–).

J. MASSENGALE

**Belloc, Enrique** (*b* Buenos Aires, 28 Jan 1936). Argentine composer. He studied philosophy at the Buenos Aires National University. In 1961 he won a Ford fellowship to be an artist-in-residence in West Berlin. He studied with Schaeffer at the Pierre Bourdan Research Centre in Paris on a French government grant (1964–8). He was conductor-in-residence of the City of Buenos Aires Symphonic Band (1969–71) and deputy conductor of the National SO (1971–2); he has also directed the Buenos Aires PO, the University of Tucumán SO and contemporary music ensembles. His awards include the Argentine Composers' Union Prize (1969) and the Buenos Aires Municipal Prize for his work in electro-acoustic music (1994–5). He was invited by the Groupe de Recherches Musicales to record *Homenaje a Pierre Schaeffer* in 1993 and to compose a work to commemorate the 50th anniversary of *musique concrète* in 1997.

VALDEMAR AXEL ROLDAN

**Belloc-Giorgi** [Bellochi; Giorgi-Belloc; née Trombetta], **(Maria) Teresa** (*b* San Benigno Canavese, nr Turin, 2 July 1784; *d* San Giorgio Canavese, 13 May 1855). Italian contralto. She made her début in 1801 at Turin. Engagements in Parma and Trieste followed and in 1803 she appeared in Paris, singing the title roles of Paisiello's *Nina* and Paer's *Griselda*. In the following year she sang *Nina* at La Scala, where she continued to appear during the next 20 years. From 1812, when she sang Isabella in the first performance of *L'inganno felice* in Venice, until her retirement in 1828, she specialized in Rossini roles. She created Ninetta, a soprano part, in *La gazza ladra* at La Scala (1817), but the contralto roles of Tancredi, Cenerentola and Isabella in *L'italiana in Algeri* were the most successful in her repertory. She appeared in London in 1819 under the name of Bellochi.

ELIZABETH FORBES

**Bello** [Abello, Vello] **de Torices** [Torizes], **Benito** [Benitto] (*b* Benavente, *c*1660; *d* Madrid, after 1717). Spanish composer. He was born into a noble family and probably studied with Andrés Lorente. He married Ana Pérez Daza y Brabo before 1687 and in that year was living at Alaejos. In 1691 he was in royal service as *maestro de capilla* of the convent of the Descalzas Reales in Madrid, and in 1696–7 of the royal church of S Cayetano. At some point, possibly before 1701, he became *maestro de capilla* of S Justo y Pastor in Alcalá de Henares, where he worked until 1714. In that year he was elected *maestro* of La Seo at Zaragoza. He was again in Madrid in 1718, as 'maestro de música del Colegio del Rey', his last known position. Bello de Torices is mentioned in Alaejos's necrology as the 'great musician and composer'. His son, Juan de Alaejos, a Hieronymite monk at El Escorial from 1706 to 1752, was also a composer.

Bello de Torices's compositional style combines Spanish 17th-century traditions with a growing Italian influence. Works are found under a number of variants of his name, but some might be by other composers named Torices. The richest collection of his works, at El Escorial, was probably assembled by his son and includes four eight-part masses accompanied by two organs, 15 other Latin works and 17 villancicos; there are villancicos too, in other Spanish archives (*E-Bc*, *PAL*, *SA*, *SE* and *V*) and in Munich (*D-Mbs*). Bello de Torices was sensitive to text and a master of both imitative counterpoint and poly-

choral procedures. An excellent example of his work is the Christmas calends villancico *Aves, flores, luces, fuentes* (ed. in Laird, 1986, ii, 1–40), scored for three three-part choirs and continuo; the third choir includes two shawms and a bass wind instrument (probably a dulcian).

ROBERT STEVENSON, PAUL R. LAIRD

**Bello Montero, Atanasio** (*b* Caracas, late 18th century; *d* after 1847). Venezuelan composer, educator and impresario. A disciple of Pedro Palacios y Sojo, he worked with the Venezuelan composers Luís Jumel and José María Izáza. With Jumel he founded a music academy that opened in Caracas on 22 October 1821; he and Izáza organized a philharmonic society in 1831. On 21 September 1834 Bello became director of the free music school founded by the Sociedad Económica de Amigos del País which taught solfeggio and singing. In 1847 he took the first opera company to Bogotá. Among his most famous works is the Vigil and Mass of the Dead performed in 1842 on the removal of Bolivar's ashes to Caracas.

WORKS

Sacred: Pange lingua, 1825; Lamentation to Our Lady of Sorrows, 1826; Vigil and Mass of the Dead, 1842; Ave maris stella; O vos omnes; Stabat mater; Estaba junto a la cruz; Grad and Off; Pésame a María santissima; Miserere; TeD; Lamentation for Wednesday of Holy Week; 2nd Lamentation; Mass; Mass, a 2vv; Tantum ergo

Other works: Los pepitos (juguete lyrico); National Song for 9 Feb 1843; National Song for 5 July 1845; Quien es esta, tono

SHARON E. GIRARD

**Bellona and Rennell.** *See* MELANESIA, §IV, 3(ii).

**Belloni, Giuseppe** (*b* Lodi, nr Milan, *c*1575; *d* after 1606). Italian composer. The only information about him is drawn from the dedication of his op.1 – that he was a priest from Lodi, who entered the Congregazione della Beata Vergine Annunziata established in the Brera Jesuit college in Milan. He was a competent composer in a traditional polyphonic style.

MARIANGELA DONÀ

**Bellosio, Anselmo** (*b* Cassine, Piedmont, 2 Dec 1743; *d* Venice, 21 Aug 1793). Italian violin maker. He was probably a pupil of Giorgio Seraphin, whose business he took over in 1777, having begun making instruments in Venice several years earlier (he had gone there to serve as a footman). The neatness and fine quality of Bellosio's instruments led many experts to believe that his working period was a generation earlier. By his time the craft of violin making had fallen into decline in Italy, but in spite of limited demand Bellosio worked on in the best tradition, continuing to finish his violins with the old Venetian varnish. His instruments are rare, though many have been attributed to better-known names. He had two pupils, Pietro Novello (*b* 1759; *d* after 1800) and Marc Antonio Cerin (*b* Venice, 18 June 1774; *d* after 1808). Cerin had much to do with the manufacture of the later instruments labelled by Bellosio and was almost his equal as a maker. After his master's death he was comparatively inactive, and as no successor came forward the great 18th-century Venetian school of violin making can be said to have died out in his shop under the clock tower in the Piazza S Marco.

CHARLES BEARE

**Bellotta, Francesco** (*b* Palermo, 1834; *d* Palermo, 1907). Italian harpist and composer. He studied the double-action harp under Filippo Scotti (1790–1865) and Scotti's son Alfonso at the Naples Conservatory. He founded the first school of modern harp at the conservatory in Palermo, as Filippo had done in Naples. The brilliant capriccio for harp, *Il ritorno del pastore*, is representative of some 50 solos he wrote on Neopolitan and Mediterranean fantasias, canzonas, studies and opera transcriptions for harp, harp and piano, and piano, which were published by Sandron, Cottrau, Mariani, Ricordi and Ashdown.

ALICE LAWSON ABER-COUNT

**Bellou, Sotiria** (*b* Halia [now Drosia], Halkida, 1921; *d* Athens, 1997). Greek *rebetika* musician. One of the best known performers of *rebetika* songs, she was famous for her deep, earthy voice. At the age of 19, after a disastrous marriage, she fled to Athens where she became involved with the left-wing opposition to the German occupation. She also began singing and playing the guitar and was discovered by the well-known *rebetika* composer VASSILIS TSITSANIS. He wrote two songs, *Otan pineio sti taverna* ('When you drink in the tavern') and *To paidi pou eixes filo* ('The boy who was your friend'), which established her reputation.

From 1948 to 1956 she was at the height of her fame. An unusually free spirit and openly lesbian, Bellou was the first woman to perform at the legendary *rebetika* club Jimmy the Fat's. As the *rebetika* lost their popularity she

was abandoned by the record companies and survived by selling cigarettes in taverns. In 1966 she began a new recording career, collaborating with well-known Greek composers such as Dionysis Savvopoulos and making some of her best recordings for Lyra records. Bellou performed regularly with Vassilis Tsitsanis in her later years at the Harama Club. Among her best known songs are *Yramma tha steilo sto theo* ('I'll send a letter to God'), *Apopse kaneis bam* ('Tonight you're dynamite') and *San pethano sto karavi* ('If I die on the boat').

For bibliography *see* REBETIKA.

GAIL HOLST-WARHAFT

**Bellovacensis, Vincentius.** *See* VINCENT DE BEAUVAIS.

**Bellows.** Properly speaking, the bellows of an organ or a harmonium supply wind directly to the soundboards (*see* WIND-CHEST), their own capacity being the only storage of wind against a large demand. Because at least two rectangular bellows are needed to wind an organ they have been called 'a pair of bellows'. Wind is driven by the bellows' weighting (stone or lead weights, or a person standing on them) directly through wind-trunks into the pallet-boxes of the various soundboards; without an intervening reservoir to store and regulate the air, the resulting pressure may fluctuate.

The word appears to be a part of or an abbreviation of 'blast-belly/bag' (*blaest-bel(i)g*), which may indicate that early forms were bags made from animal belly-skins; in 1398, John de Trevisa defined 'organum' as being an instrument blown 'wyth bellowes'. Some early bellows were reinforced with hoops of pliable wood such as willow or ash; the resemblance of these hoops to belly-ribs gave the English name 'ribs' to the folding wooden parts of later hinged leather-and-wood bellows. Some of these were multi-fold and some single-fold (*Spanbälge* or *Faltenbälge*; the terms used in written descriptions were not usually precise). Another type was tall and square like a Chinese lantern (Mersenne, *Harmonicorum libri*, 1635–6): the top was raised by a pulley and the inflated bellows slowly collapsed, expelling wind through the trunk bellow. The 'box-bellows', in which a weighted box was driven down like a piston inside another box to expel air from it, avoided ribs altogether.

The introduction of a combined apparatus for small organs (probably late in the 17th century and certainly by Snetzler, 1742), in which wind was stored in a wedge-shaped RESERVOIR (a later term) and a single bellows beneath was used merely for blowing air into it by means of a pedal, effectively separated the wind-raising and -storage functions of the simple bellows. By the 1780s, small organs in clocks and barrel organs were fed by linked 'cuckoo' bellows (*see* CHAMBER ORGAN); many reed organs and mechanical instruments with pneumatic mechanisms are provided with bellows operated by foot treadles. By the early 1800s in England, horizontal reservoirs of any but the smallest size were fed by two transverse bellows. These could be operated through crankshafts by a 'circular handle' (e.g. by Elliot and Buckingham, 1808, for All Saints' Church, Derby). Hydraulic pistons, powered by pressure from the water-mains, were used to raise feeder-bellows (from 1854), and steam-generated power, gas (1862), oil (Töpfer, 1855) or large electric motors (from 1888) were all employed in various ways. Finally, fan blowing (from about 1895), using efficient electric motors, made the use of bellows unnecessary, although not necessarily undesirable. For further discussion and illustrations, *see* ORGAN, §II, 11, esp. figs.14, 15 and 16; *see also* CONCUSSION BELLOWS.

The HARMONIUM in common use in India and Pakistan usually has a bellows at the back of the instrument that is pumped with one hand while the other fingers the keyboard. In common with the European harmonium, the reeds are blown by compression bellows; the American organ, however, is sounded by suction bellows which, by creating a partial vacuum, pull air through the reeds (*see* REED ORGAN). Several varieties of BAGPIPE are winded by bellows strapped to the arm.

MARTIN RENSHAW/R

**Bells, tubular.** *See* TUBULAR BELLS.

**Belly** [table, soundtable, soundboard, top plate] (Fr. *table*; Ger. *Decke*; It. *tavola*). The upper surface of the body of a string instrument. It is normally made of a species of pine or spruce of fairly fine and even grain, which runs along the length of the instrument. In bowed string instruments (viols and violins), the belly is arched (*see* VIOLIN, fig.2); in plucked string instruments (lutes and guitars), the belly is flat. Folk instruments of the fiddle and lute families often have a skin soundtable (for example *see* RABĀB, with illustrations).

DAVID D. BOYDEN

**Belly rail.** On a piano or harpsichord, the transverse, wooden brace that supports the front edge of the soundboard.

**Belmonte** (*fl c*1480). Spanish composer. He wrote the three-voice canción *Pues mi dicha non consiente* preserved in the Cancionero Musical de la Colombina *E-Sc* 7–1–28; ed. in MME, xxxiii, 1971), compiled in the latter part of the 15th century. Almost nothing is known about him, although he may have been the Alfonso de Belmonte who was cantor at León Cathedral in the 1450s and 60s. He clearly knew Urrede's celebrated song *Nunca fue pena mayor* since he transposed its melody down an octave and used it as the tenor of his setting, which belongs stylistically to the generation of composers before Juan del Encina. It is possible that he moved in the same circles as Urrede, but his name has not come to light either in connection with the royal chapels, the court of the Duke of Alba, or Salamanca, so that this skilful song composer remains an enigmatic figure.

TESS KNIGHTON

**Bělohlávek, Jiří** (*b* Prague, 24 Feb 1946). Czech conductor. He studied with Celibidache at the Prague Academy of Performing Arts and began his career as assistant conductor of the Czech PO before winning a state conducting competition in 1970 and reaching the finals of the Karajan International Competition the next year. He was then appointed conductor of the Brno State PO, 1972–8, and chief conductor of the Prague SO, 1978–89. He made his North American début at Toronto in 1982 and his British début in 1987 (BBC Welsh SO) before becoming principal conductor and artistic director of the Czech PO, 1990–92. In 1994 he was appointed chief

guest conductor of the Deutsche Kammerphilharmonie, Bremen, and the following year became principal guest conductor of the BBC SO. His performances are noted for their fluency, discipline and technical finish. He is an eloquent advocate of the music of Martinů, and conducted *The Greek Passion* at the Edinburgh Festival (1990) and *The Epic of Gilgamesh* in London (1995). Bělohlávek has made vivid, idiomatic recordings of works by Martinů, Fibich, Ostrčil and others.

NOËL GOODWIN

**Beloiu, Nicolae** (*b* Ocniţa-Dâmboviţa, 9 May 1927). Romanian composer. He studied composition at the Bucharest Academy of Music (1948–53) under Leon Klepper, while also attending university courses in mathematics and classes at the Institute of Architecture. These studies led to the formation of a well-ordered and meticulous music personality. After a period of work in the creative department of Romanian National Radio (1960–72), he took up a post at the Bucharest Academy of Music, teaching orchestration (from 1970) and serving as rector (1990–92).

His modal style is interspersed with elaborate chromatic harmonies, usually deployed in non-developmental structures and setting up tension through the interaction of melodic lines and harmonic clusters. His music displays a powerful sense of colour as well as an attraction to elaborate superimpositions resulting in massive blocks of sound. Painstaking and demanding, he composes slowly, with great attention to detail and careful revision. His most significant works are for orchestra.

OCTAVIAN COSMA

**Bel'styukow, Syarhey Pyatrovich** (*b* Bolbasovo, Vitebsk province, 1956). Belarusian composer. He graduated from the Minsk Conservatory in 1980 having studied the piano with G.I. Shershevsky. Between 1982 and 1987 he studied composition; he then held an assistant lectureship and undertook postgraduate studies with Hlebaw. In 1992 he was appointed head of the music section and the conductor of the Teatr yunogo zritelya ('Theatre of the Young Viewer'); in 1994 he became the deputy chief editor of the music and entertainment programmes of Belarusian Radio.

Bel'styukow strives for emotionally substantial music, and he values the symbolic ambiguity of artistic images and the theatrical expressiveness of form. He is drawn to stage improvisation (he has collaborated with theatre and cinema producers) and is absorbed in the traditions of the 17th and 18th centuries, as in his two toccatas for piano and *Pechal'noye prinosheniye Motsartu* ('A Sad Offering to Mozart'). He has a Romantic tendency to attempt the instrumental incarnation of ethical and philosophical problems. His closeness to the legacy of the Russian school shows itself in the symphony *Gravyurï* ('Engravings'; 1990), and in his Second Symphony with bells (1993). The old Church Slavonic of the Bible translation by F. Skorina and the image of this Belorussian teacher are embodied in the chorus *Tvar Skarïnï* ('The Face of Skorina'). The composer addressed philosophical problems of existence in his cantata *Spadchina* ('Legacy') and in his *Vsenoshchnoye bdeniye* ('All-Night Vigil').

Bel'styukov is attracted by the late 20th-century fascination with the acoustic metamorphosis of sound in time and space. His belief in the need for a synthesis of electronic music and acoustic instruments is realized in *Muzïka dlya goboya i magnitnoy lentï* ('Music for Oboe and Magnetic Tape'; 1989), *Strontsiy-90* ('Strontium-90'; 1990) and in *Muzïka morya* ('Music of the Sea'; 1993). His stylistic mobility bears testimony to the general activity in creative thought and is characteristic of late 20th-century Belarusian art.

**Beltramo di Fulgenzio.** *See* QUEMAR, VINCENZO.

**Belwin-Mills.** American firm of music publishers. Belwin, Inc., was founded in 1918 by Max Winkler, and Mills Music Publishers started a year later under the aegis of Jack and Irving Mills; the two organizations merged as the Belwin-Mills Publishing Corporation in 1969, with Martin Winkler as director. Formerly located in Melville, New York, the company is now based in Miami and is one of the most important publishers of educational

music, producing many widely-used piano series, a number of class band methods and material for teaching string instruments. The firm represents such composers as Creston, Crumb, Davidovsky, Dello Joio, Ellington, Vittorio Giannini, Gould, Holst, Menotti, Penderecki, Schuller, Sessions, Virgil Thomson, Toch and Villa-Lobos, and also issues popular music. Divisions of the company include J. Fischer, H.W. Gray, McAfee Music, Musicord Publications and Pro Art Publications. In 1985 Belwin-Mills was acquired by Columbia Pictures, who divided the firm's printing and publishing concerns; during 1987–8 the printing arm was sold to Boston Ventures while the publishing company was purchased by the London-based Filmtracks firm (subsequently a subsidiary of EMI). Since 1988 the publishing company has been known as CPP/Belwin Inc., a name retained by Warner-Chappell Music, who have owned the company since 1994. The firm's catalogue has continued to grow, expanding in particular on the education traditions associated with the Belwin name.

W. THOMAS MARROCCO, MARK JACOBS/R. ALLEN LOTT, LESLIE A. TROUTMAN/R

**Belyayev** [Belaieff], **Mitrofan Petrovich** (*b* St Petersburg, 10/22 Feb 1836; *d* St Petersburg, 28 Dec 1903/10 Jan 1904). Russian music publisher. He was the son of Peter Abramovich Belyayev, a rich timber merchant, and was educated at the German-speaking Reform School in St Petersburg where he learnt the piano, violin and viola. When he was 15, he joined his father's flourishing business. He became an active participant in an amateur symphony orchestra directed by L.W. Maurer, and after its dissolution on the death of its conductor in 1878 a nucleus of its members, including Belyayev, continued to meet. Here Belyayev first came into contact with the group's conductors, Lyadov and Borodin. A wide range of contemporary Russian music was promoted to which Belyayev appears to have been exposed for the first time. Belyayev was introduced to Glazunov and after hearing his Symphony no.1 in 1882 resolved to publish it. He achieved this in 1886 despite opposition from Balakirev, who was seeking to have the work published by Jürgenson. This inaugurated a lasting struggle between Belyayev and the leader of The Five.

Belyayev had established a music publishing house in 1885, registering it in Leipzig as 'M.P. Belaieff' for copyright reasons. Admission to the catalogue was restricted to Russian nationals and those who had become naturalized. Between 1886 and 1904, music by 35 composers was published including Glazunov, Rimsky-Korsakov, Lyadov (these three were lured away from Bessel), Borodin, Cui and N.V. Shcherbachyov. Lyapunov, who eventually settled with Zimmermann, Balakirev's publisher, is represented by an early set of piano pieces, and several posthumous works of Musorgsky appeared in 1890. Other main contributors to the catalogue included Grechaninov, Skryabin and Taneyev. In the years leading to Belyayev's death and thereafter until the Revolution, the quantity of music published diminished and the admission of new composers slowed, though quality was maintained. He published Glière's chamber works from 1904 onwards, Medtner's Piano Sonata op.5 (1904), Stravinsky's *The Faun and the Shepherdess*, op.2 (1908), and six orchestral works by Glinka in the early 1900s.

Between 1885 and 1903 full scores of at least 80 orchestral works, choral music, 15 operas and ballets were published, including Borodin's *Prince Igor*, described as 'the jewel in Belyayev's crown'. Many of these works received their premières at the Russian Symphonic Concerts initiated by Belyayev in 1885 which were restricted to Russian music. Belyayev's insatiable appetite for playing chamber music led to gatherings at his home, resulting in the composition of about 35 string quartets, some specially written, together with a few octets, sextets and quintets. A special feature of some of these was the use of the motif B–L–A–F as an act of homage; F.M. and S.M. Blumenfeld and Kopïlov also wrote piano pieces embodying the motif. Another Belyayev initiative was the Russian Quartet Evenings, effectively extensions of the Russian Symphonic Concerts, and in 1889 he promoted two concerts of Russian music in Paris.

Belyayev published virtually no church music, and issued only music of quality, anticipating the policy of Edition Russe de Musique. All of his publications were printed on superior paper with a distinctive grey wrapper, by C.G. Röder of Leipzig. Title-pages were often adorned with chromo-lithographed designs, many of high artistic value.

Rimsky-Korsakov, who had assumed control of the Belyayev enterprise on the death of the latter in 1903/4, retired in 1907 and was succeeded by N.A. Artsïbushev, a contributor to the catalogue from its outset. All music publishing passed into the control of the state after the Revolution, but the firm was resuscitated by Artsïbushev in western Europe and ultimately passed into the hands of C.F. Peters, Leipzig.

RICHARD BEATTIE DAVIS

**Belyayev, Viktor Mikhaylovich** (*b* Uralsk region, 6 Feb 1888; *d* Moscow, 16 Feb 1968). Russian musicologist, folksong scholar and music critic. He graduated in 1914 in composition from the Petrograd Conservatory, where he had studied with Glazunov, Lyadov and Jāzeps Vītols. Having joined the staff of the conservatory the previous year, he was appointed senior lecturer in 1916 and professor of theory in 1919. After the October Revolution he participated in the work of various state musical organizations, and in 1922, after moving to Moscow, he was elected a member of the Academy of Artistic Sciences. During the 1920s he was an active figure in the Association for Contemporary Music, whose journal *Sovremennaya*

*muzïka* ('Contemporary Music') he edited together with V.V. Derzhanovsky and L.L. Sabaneyev. He also pursued a wide range of activities as a music critic, writing for Soviet and foreign publications. Belyayev taught at the Moscow Conservatory (1938–40, 1943–59), and in 1944 was awarded the honorary doctorate. From 1959 until the end of his life he was a senior research fellow at the Institute for the History of the Arts in Moscow.

Belyayev was one of the most distinguished representatives of Soviet musicology. Early in his career he wrote a large number of articles and brochures about eminent Soviet composers, including Prokofiev, Myaskovsky, Vasilenko and Anatoly Aleksandrov, and also prepared for publication S.I. Taneyev's incomplete *Ucheniye o kanone* ('Studies about the Canon', Moscow, 1929) and A.D. Kastal′sky's *Osnovï narodnogo mnogogolosiya* ('Principles of Folk Polyphony', Moscow, 1948). His principal research interests were in ancient Russian music and the folk music of the different nationalities of the Soviet Union. Of particular importance is his pioneering work on the musical culture of Central Asia, which he began to investigate during several visits to Ashkhabad, Tbilisi, Baku and other Central Asian cities (1928–37), and during his evacuation to Tashkent during World War II. He prepared many modern editions of folksongs collected and published by 19th-century Russian scholars such as Trutovsky, Rupin and D.N. Kashin. He also edited many general books on music history and a number of folklore anthologies, notably new critical editions of 18th- and 19th-century collections.

YURY KELDÏSH/IOSIF GENRIKHOVICH RAYSKIN

**Bělza, Igor′ Fyodorovich** (*b* Kel′tse, Russia [now Kielce, Poland], 26 Jan/8 Feb 1904; *d* Moscow, 5 Jan 1994). Russian musicologist, composer and literary scholar. After studying composition with Boris Lyatoshyns′ky at Kiev Conservatory (1922–5), he went on to study philology at Kiev University. He then taught at Kiev Conservatory (1925–41), and in 1936 was appointed professor. He was also a professor at Moscow Conservatory (1943–9) and was on the staff of the Institute for the History of the Arts (1954–61). In 1961 he was appointed director of the culture department at the Institute for Slav and Balkan Studies in the USSR Academy of Sciences, later becoming a scientific consultant there from 1970 to 1989. He also served on a number of musical committees. In 1954 Bělza was awarded the doctorate for his dissertation on Czech Classical music. He also received honorary doctorates from Prague University (1967) and the Chopin Music Academy in Warsaw (1983), and was an honorary member of a number of musical and literary societies in Europe. In addition to his literary studies he

made a valuable contribution to research into the history of Czech, Polish and Slav music, and also published books, pamphlets and articles on many Russian composers including Lyatoshyns'ky, Rachmaninoff, Skryabin and Glière. His compositions include four symphonies, five piano sonatas, two cello sonatas, a string quartet, an orchestral overture, film music and vocal pieces. From 1965 until his death he was the founder chairman of the Academy of Sciences Dante Society and a member of the Pushkin Commission.

LEV GINZBURG/LYUDMILA KORABEL′NIKOVA

**Bembo, Antonia** (*b* ?Venice, *c*1640; *d* Paris, *c*1720). Italian composer and singer. Documents in Venice corroborate the 'autobiography' provided by the dedications of her six volumes of manuscript music, in the Bibliothèque Nationale, Paris: she was the only child of the doctor Giacomo Padoani and in 1659 married Lorenzo Bembo, a Venetian nobleman. Before 1676 she moved to Paris, where she sang for Louis XIV, who awarded her a pension, enabling her to live in the community of the Petite Union Chrétienne des Dames de Saint Chaumont. She composed in most of the contemporary vocal genres: opera, serenata, aria, *air*, secular and sacred cantata, *grand* and *petit motet*. Her first collection, *Produzioni armoniche*, consists of 41 arias and cantatas on Italian, French and Latin texts, mainly for soprano and continuo (1 ed. C. Fontijn, Fayetteville, AR, 1999; 1 ed. in J.G. Paton, Italian Arias of the Baroque and Classical Eras, Van Nuys, CA, 1994; 3 ed. in Fontijn, 1996). Bembo's Italian musical training is reflected here in vocal virtuosity, madrigalisms, long melismas and expressive dissonance. Book 2 is dedicated to Marie-Adélaïde of Savoy, Duchess of Burgundy, on the occasion of the birth of the first Duke of Brittany in 1704. It contains a three-voice *Te Deum* and a five-voice Italian serenata ('un picciolo divertimento'), revealing a firm grasp of musical structure, melodic control and harmonic modulation. The characteristics of books 3–6 testify to the many years that Bembo lived in France. Book 3 contains two motets, a five-voice setting of the *Te Deum* (a *grand motet* in the style of Lully and Lalande; ed. W. Führlinger, Altötting, 1999) and a three-voice setting of Psalm xix. The 1707 opera *Ercole amante*, the only manuscript bearing a date, sets Buti's libretto, as used by Cavalli, Bembo's teacher, in 1662. Though similar to contemporary Italian operas, Bembo's work attests to its French provenance in its use of chorus, *ouverture* and instrumental dance forms. The French idiom is particularly evident in her last book, *Les sept pseaumes de David*, which marks a return to vocal chamber music and shows her command of gallic prosody with numerous metrical changes.

CLAIRE FONTIJN, MARINELLA LAINI

**Bembo, Pietro** (*b* Venice, 20 May 1470; *d* Rome, 11 Jan 1547). Italian literary theorist and poet. Born into the Venetian aristocracy, he had a typical humanist upbringing broadened by frequent journeys with his father, an ambassador of the Venetian republic. After two years (1492–4) spent studying Greek in Messina, Bembo spent a year at the University of Padua. In 1497 he went to Ferrara, remaining at the d'Este court for two years. There he took an active part in courtly life and made many friends, including Ariosto, Tebaldeo and the Latin poet Ercole Strozzi. At that time he began his first vernacular work, *Gli asolani*.

In 1501 Aldo Manuzio published Bembo's edition of Petrarch; in 1502 his edition of Dante appeared. Both are volumes of fundamental importance in Italian philology and represent the foundation of Bembo's interest in Tuscan as a literary language. During another stay in Ferrara (1502–3) he met Lucrezia Borgia, the new wife of Alfonso d'Este; their brief relationship was the most celebrated of his love affairs.

*Gli asolani* (Venice, 1505), a dialogue on the theme of love, has a courtly setting like that of Castiglione's *Il libro del cortegiano*. The work has many echoes of Boccaccio, but the poems interspersed throughout it are in illustration of Petrarchan themes. An example is a section (bk 1, chap.13) devoted to the theme of lovers torn by conflicting emotions; the two poems in this part, *Quand'io penso al martire* and *Voi mi poneste in foco*, were much favoured by madrigalists. Bembo's ideal for the musical performance of his poetry was at that time a solo female singer accompanied by the lute (bk 2, chap.25). This ideal was personified when in 1505 he met Isabella d'Este and sent her some poetry to be 'recitato et cantato' by Isabella herself. Two poems from *Gli asolani* were set to music at this time, appearing in Petrucci's seventh and eleventh frottola volumes.

Bembo spent some years (1506–12) at the court of Urbino. During this period he wrote the *Stanze* for a carnival (later set to music in its entirety by Jacques du Pont and in part as madrigal cycles by Wert and Andrea Gabrieli) and began his greatest work, the *Prose della volgar lingua*. In 1513 he became secretary to Pope Leo X, and he remained in papal service in Rome until the pope's death in 1521, when he returned to Venetian territory and took up residence in Padua. The *Prose della volgar lingua* appeared in Venice in 1525, dedicated to the Medici pope Clement VII. In its championship of Petrarch as the perfect literary model this work was of far-reaching importance. Though Bembo did not deal directly with music his poetic categories of dignity (*gravità*) and charm (*piacevolezza*) and his stress on the sound of words, on the need for Ciceronian decorum and variety of language, and on the importance of rhyme choice and of varied schemes for verse lengths are thought to have been of determining influence in shaping the aesthetic stance of the early madrigal.

During Leo X's reign Bembo's influence was felt by the musician and printer Antico and members of the papal chapel. In the years he spent at Padua his circle included many Venetian men of letters, among them a group frequented by Willaert; the madrigals of Willaert's *Musica nova* may represent the most impressive musical testament to the power of Bembo's Petrarchist theories.

Bembo realized a lifelong ambition when he became a cardinal in 1539. His last years were spent chiefly in Rome, where his ecclesiastical duties were accompanied by literary work, chiefly revisions of his Latin and Italian writings. His poetry (which includes the *Rime*, Venice, 1530, in addition to the above-mentioned works) was set by many madrigalists, from Arcadelt through the Venetians in Willaert's circle (Perissone, Donato) and Roman-trained musicians (Palestrina, Monte) to later composers such as Ingegneri, Monteverdi and Gagliano. His theories of language must be considered the chief literary impulse in the rise and development of the 16th-century madrigal.

JAMES HAAR

**Bemetzrieder, Anton** [Antoine] (*b* Dauendorf, Bas-Rhin, 26 March 1739; *d* London, after 1808). French theorist and teacher. After obtaining degrees in philosophy (1760) and law (1762) from the University of Strasbourg, he established himself in Paris in 1766 and began to study music. In 1769 he met Diderot, whose daughter became his harpsichord and harmony student. His first work, *Leçons de clavecin, et principes d'harmonie*, was a tremendously successful dialogue-form treatise, which was edited and endorsed by Diderot. He continued publishing pedagogical works in French until he left Paris in 1781, moving to London, where he taught music and expanded, re-edited and translated his earlier works. He also wrote on music education, mathematics, philosophy and ethics.

In his writings Bemetzrieder emphasized the importance of improvisatory skills in combination with contemporary continuo practice. In his later works he developed these ideas in a four-stage pedagogical process which comprised the art of reading music, accompaniment, virtuoso performance and composition. He saw composition as the creative application of an analytical process of 'decomposition', which used grammatical models for phrase structure and a reductive harmonic signifier called the *basse générale*. He taught students to understand musical discourse by analysing chains of chords in various types of harmonic phrases. Although his speculative theory was built on the idea of the major triad being generated by the resonating body, he presented his system as a rejection of Rameau's work and of mathematical

calculation. In his contribution to the quarrel between the Gluckists and Piccinnists, *Le tolérantisme musical* (1779), Bemetzrieder took up a neutral position, arguing for an international operatic aesthetic.

**Bemus.** Annual festival held from 1970 in BELGRADE.

**Bena, Augustin** (*b* Pianu-Alba, 9 Oct 1880; *d* Cluj, 10 Jan 1962). Romanian composer. He was first taught music at home, then at Blaj with Iacob Mureşianu, at Braşov with Max Krause and at Sibiu with Hermann Kirchner. Later, he studied at the Berlin Hochschule with Max Bruch (1903–5) and the Bucharest Conservatory (1905–6) with Georgescu Kiriac (conducting) and Castaldi (composition). After studies in philosophy and philology, he obtained a doctorate in the latter at the University of Cluj. Initially, his career was divided between teaching music and conducting choirs in schools and festivals in the towns of Sibiu and Năsăud. Later he became a professor at the Cluj Conservatory, where he was rector (1925–40), holding a prominent position in the musical and educational life of Transylvania. He also was curator of the Music History Museum at the Cluj Conservatory.

His output includes vocal-orchestral notes such as *Ave Maria* (1906) and *Suspine* ('Sighs', 1910), and a Serenade for string orchestra (1906). However, his favoured field remained choral music. He composed in a homophonic, unpretentious style which achieved considerable local popularity. His most important choral works, based on the distinctive features of Romanian folk music, include *La fântână* ('At the Fountain'), *Pe Mureş şi pe Târnavă* ('On the Mureş and the Târnavă') *Flori de nufăr* ('Water Lilies') and *Eu mă duc, codrul rămâne* ('I am Going, the Woods are Staying'). The simplicity of the harmonic structure and the predominance of the melodic element can also be found in his religious works such as the *Liturghia* for mixed chorus (1912).

OCTAVIAN COSMA

**Beňačková(-Cap), Gabriela** (*b* Bratislava, 23 March 1944). Slovak soprano. She studied in Bratislava, making her début in 1970 at the National Theatre, Prague, as Natasha (*War and Peace*). In 1975 she first sang Jenůfa, a role she has repeated many times in Europe and the USA. She made her Covent Garden début in 1979 as Tatyana (*Yevgeny Onegin*), returning as Leonore (*Fidelio*), and her Metropolitan début in 1991 as Kát'a followed by Mimì, Jenůfa, Leonore and Rusalka. Her repertory also includes such roles as Desdemona, Mařenka, Manon Lescaut, Marguerite (Gounod's *Faust*), Aida, Elsa, Ariadne and Smetana's Libuše, which she sang at the reopening of the Prague National Theatre in 1983. Beňačková has a beautiful, vibrant voice and sings with great involvement, especially in Czech music. She has recorded several of her major operatic roles, and is an admired soloist on disc in works such as Dvořák's Requiem and *Stabat mater*, Janáček's *Glagolitic Mass* and Beethoven's Ninth Symphony.

ELIZABETH FORBES

**Benade, Arthur (Henry)** (*b* Chicago, 2 Jan 1925; *d* Cleveland, 4 Aug 1987). American acoustician. His parents being missionaries, he spent much of his childhood in Lahore. After returning to the USA to study at

Washington University, St Louis (AB 1948, PhD 1952), Benade was appointed in 1952 to the physics faculty at Case Institute of Technology, Cleveland, which later became Case Western Reserve University. Promoted to a full professorship in 1969, he continued in that post until shortly before his death. A skilled woodwind player, he had an exceptional ability to relate the results of acoustical research to the practical requirements of musicians and musical instrument makers. Benade established a research programme which made many fundamental contributions to the understanding of the operation of wind instruments. Also active in string instrument research, he was a founding member of the Catgut Acoustical Society and its president between 1969 and 1972. Through his technical papers, and through the hospitality which his laboratory afforded to foreign visitors, Benade was a major influence on a generation of music acousticians, and in popular articles and books he introduced a much larger public to the basic science of musical instruments. The Acoustical Society of America awarded him its Silver Medal in 1984 and its Gold Medal posthumously in 1988.

MURRAY CAMPBELL

**Benary, Barbara** (*b* Bay Shore, NY, 7 April 1946). American composer, performer, instrument builder and ethnomusicologist. She received the BA from Sarah Lawrence College, and the MA and PhD from Wesleyan University, where she studied Indonesian and Indian music. She has performed with the ensembles of Philip Glass, Jon Gibson, Alvin Lucier, Philip Corner and Daniel Goode. In 1976 she co-founded, with Corner and Goode, the Gamelan Son of Lion, New York, a new music collective and repertory ensemble under her direction. In addition, she has built several Javanese-style iron gamelans, including the instruments used by the Gamelan Son of Lion and Gamelan Encantada, Albuquerque, New Mexico.

Benary's compositional output has been primarily in the areas of ensemble and chamber music, and music for the theatre. She has described herself as a 'part-time minimalist who also likes to write melody'. Many of her works integrate world music forms, structures and instruments with traditional Western materials. Her works for gamelan ensemble, which number more than 30, have been performed internationally. *Karna: a Shadow Puppet Opera* (1994) combines gamelan, vocal oratorio and Javanese *wayang kulit* (leather shadow puppets). She has also written theatre and dance scores for such companies as the New York Shakespeare Festival, Lenox Arts Theatre and the Bali-Java Dance Theatre. She describes her approach to music in D. Goode: 'Braiding Hot-Rolled Steel: the Music of Barbara Benary', *Musicworks*, no.56 (1993), 14–23. Her improvisational structures are published in her book *System Pieces 1971–1992* (Hanover, NH, 1992).

WORKS

Yeats), 1966; Systems, improvisations, 1973–93; Gamelan Works, vols.1–4, 1974–94; Hot-Rolled Steel, gamelan, 1985; Sun on Snow, vv, insts, 1985; Karna: a Shadow Puppet Opera (chbr op), vv, insts, gamelan, 1994; Downtown Steel, wind, perc, 1995; Tintinnalogia, vn, pf, perc, 1995; Aural Shoehorning, b cl, perc, Javanese gamelan, 1997

Principal publishers: Frog Peak, American Gamelan Institute

JODY DIAMOND

**Ben-Asher.** Family who in the 9th century, according to tradition, invented the Tiberian system of Hebrew EKPHONETIC NOTATION. *See also* JEWISH MUSIC, §III, 2(ii).

**Benatzky, Ralph** [Rudolph Josef František] (*b* Mährisch-Budweis [now Moravské-Budějovice, Czech Republic], 5 June 1884; *d* Zürich, 16 Oct 1957). Austrian-Moravian composer. In 1890 his family moved to Vienna, where he took up a military career which injury forced him to abandon in 1907. He then studied in Vienna, Prague and Munich, gaining a doctorate in German philology in 1911 and studying music with Mottl. Benatzky began a musical career as a writer of song lyrics and as conductor in Munich, before becoming director of a cabaret in Vienna and writing words and music for songs, particularly for the singer Josma Selim whom he married in 1914. These songs included the Viennese *Ich muss wieder einmal in Grinzing sein* (1915), and Benatzky also composed several operettas before moving to Berlin. There he concentrated on music for spectacular revue-style operettas, including *Casanova* (a Johann Strauss pastiche, 1928) and *Im weissen Rössl* ('White Horse Inn', 1930). For the latter work Benatzky wrote the bulk of the score including the title song, but others of the best-known numbers were by Robert Stolz, Robert Gilbert and Bruno Granichstaedten. Benatzky's first wife died in 1930, and in 1933 he left Germany, moving to Paris, Vienna, Hollywood (1940) and Zürich (1948). He was buried in St Wolfgang, the setting of *Im weissen Rössl*. Apart from his stage music Benatzky composed some film scores, and is estimated to have produced over 5000 songs. His style was unambitious but catered admirably for the tastes of the time.

OPERETTAS
(*selective list*)

Casanova (3, R. Schanzer and E. Welisch), Berlin, Grosses Schauspielhaus, 1 Sept 1928 [arr. of music by J. Strauss, II]; Die drei Musketiere (2, Schanzer and Welisch, after A. Dumas *père*), Berlin, Grosses Schauspielhaus, 28 Sept 1929; Meine Schwester und ich (2, R. Blum and Benatzky, after G. Berr and L. Verneuil: *Ma soeur et moi*), Berlin, Komödienhaus, 29 March 1930; Im weissen Rössl (3, H. Müller and R. Gilbert, after O. Blumenthal and G. Kadelburg), Berlin, Grosses Schauspielhaus, 8 Nov 1930; incl. songs by Gilbert, R. Stolz and B. Granichstaedten

Bezauberndes Fräulein! (4, Benatzky, after P. Gavault: *La petite chocolatière*), Vienna, Deutsches Volkstheater, 24 May 1933; Axel an der Himmelstür (3, P. Morgan, A. Schütz and H. Wiegel), Vienna, An der Wien, 1 Sept 1936; Der Silberhof (Benatzky, after C. Birch-Pfeiffer: *Grille*), Mainz, Stadttheater, 4 Nov 1941

ANDREW LAMB

**Bencard, Johann Kaspar** (bap. Würzburg, 30 Oct 1649; *d* Augsburg, 24 Dec 1720). German publisher. He started publishing in Frankfurt, and in 1670 took over the Jesuits' academic press in Dillingen an der Donau. In 1694 he moved to Augsburg. He produced mainly theological literature, and also occasionally printed music, including masses and *Tafelmusik* by Samuel Friedrich Capricornus (1670–71), the *Mirantische Mayen-Pfeiff* by the Capuchin monk Laurentius von Schnüffis (1692, 1707) and religious works by the Benedictine monk Cajetan Kolberer (1709–10). Bencard's widow and heirs in Augsburg and Dillingen produced a composition tutor by Justinus à Desponsatione BVM (1723).

ADOLF LAYER

**Bencini, Antonio** (*b* Rome; *d* Rome, *c*1748). Italian composer, probably the son of PIETRO PAOLO BENCINI. Few details of his career in Rome are known; his position in 1742 as *maestro di cappella* of S Lorenzo in Damaso, in particular, is uncertain. The success which his music enjoyed is apparent from the number of copies of his works which survive in church archives in Rome, for example in S Maria in Trastevere, S Giovanni in Laterano and S Pietro (Cappella Giulia). However, the attributions are not always reliable: in the Cappella Giulia collection, for example, two copies of the same *Magnificat* have different attributions, one to Pietro Paolo Bencini and the other to Antonio. The dates of the librettos which he set to music suggest that he was not active after 1748.

WORKS

E quando, quando almo Signore al giorno (cant.), 3vv, insts, Rome, Palazzo Apostolico, 24 Dec 1729

JEAN LIONNET

**Bencini, Giuseppe** (*fl* 1723–7). Italian composer. In 1727 he served as *virtuoso da camera* to the Grand Duke of Tuscany in Florence. His sole surviving works are four cantatas for solo soprano and instruments: *Fileno*, *April s'intorn*, *Qual dispera tortorella*, *Impara a non temer* and *Consolati sul sasso* (*GB-Cfm*) and a volume of *Suonate per cimbalo* (*Mp*). He is also credited (in *SartoriL*) with having written an oratorio, *Il trionfo di Gedeone*, performed at Florence, 1723, and an opera, *Il Nerone*, for the same city, 1727; both works are lost.

HANS JOACHIM MARX

**Bencini, Pietro Paolo** (*b* ?Rome, *c*1670; *d* Rome, 6 July 1755). Italian composer. In 1690 he appeared for the first time at the general assembly of the Compagnia dei Musici di Roma, when he would have been between 18 and 20 years old. Several copies of his cantatas are dated 1696 and the libretto of his Latin oratorio, *Susanna a propheta Daniele vindicata*, for the Arcicon fraternita del SS Crocifisso, was published in 1698. *L'innocenza protetta*, his first oratorio in Italian, was composed for the brotherhood of Florentines in Rome in 1700. In 1702 Crescimbeni included Bencini among the most celebrated musicians in Rome, suggesting that the few works that survive from before this date represent only a small part of his output. In 1703 he was appointed *maestro di cappella* of the German church of Maria dell'anima (the church did not maintain a regular *cappella* so he only worked there on feast days). It was probably during this period that Bencini was noticed by the ambassadors of the emperor, for whom he later worked. On 28 May 1705 he was appointed assistant to Giovanni Bicilli, who had been *maestro di cappella* of S Maria in Vallicella since 1648. The death of Bicilli in October 1705 left Bencini in sole charge. From 1703 he took part in the tour of the *maestri di cappella*, organized by the Compagnia dei Musicisti. He was elected guardian of the company in September 1706, 1707, 1712 and 1715, serving for a year each time. In January 1727 he succeeded G.O. Pitoni as *maestro di cappella* of S Lorenzo in Damaso. When Pitoni died he also succeeded him as *maestro* of the Cappella Giulia at S Pietro on 1 February 1743. In 1749 the chapter of S Pietro appointed Niccolò Jommelli as Bencini's assistant. When Jommelli left Rome in 1752 he was replaced by G.B. Costanzi, who succeeded Bencini after his death.

Bencini's sacred music, despite its apparent simplicity, is characterized by an elegant vocality much appreciated by singers. The vast majority of his liturgical music survives in the Vatican archives and seems to have been written before his appointment at S Pietro. Although some solo arias, particularly in the psalms, contain sections in the *galant* style, he remained faithful to Baroque canons. His music was still in use at S Pietro at the beginning of the 19th century. The few surviving compositions which set Italian texts reveal a composer full of melodic inspiration, although he seems to have been rather timid in developing it.

WORKS

*music lost unless otherwise stated*

Susanna a propheta Daniele vindicata (orat, G.A. Magnini), Rome, Ss Crocifisso, 7 March 1698
L'innocenza protetta (orat, G. Buonaccorsi), Rome, 1700

JEAN LIONNET

**Benda.** Bohemian family of musicians, active in Germany.

**(1) Jan Jiří** [Johann Georg, Hans Georg] **Benda** (*b* Mstětice, Bohemia, 25 April 1686; *d* Nowawes, nr Potsdam, 4 Dec 1757). Village musician. A linen weaver, he married in 1706 Dorota Brixi of the well-known Bohemian musical family. Of their six children surviving infancy, five became musicians: (2) Franz, (3) Johann, (4) Georg, (5) Joseph and (6) Anna Franziska.

The removal of the Benda family to Prussia in 1742 was arranged by Frederick the Great at the instigation of Franz, Jan Jiří's eldest son, who already held a prominent position in the king's orchestra. It is not clear, however, how much this was due to a recognition of the whole family's musical potential and how much to the religious persecution of the parents in Bohemia after a visit to Franz in 1734.

**(2) Franz** [František] **Benda** (*b* Staré Benátky, Bohemia, bap. 22 Nov 1709; *d* Nowawes, nr Potsdam, 7 March 1786). Violinist and composer, son of (1) Jan Jiří Benda. His autobiography, written in 1763, presents details of his early training and the musicians with whom he associated during his long career; the documentation of his own activities and references to his associates make this one of the most frequently cited documents of the era.

As a youth Benda was an excellent singer, and this talent provided for much of his early musical education as well as for his material needs, starting in 1718 at St Nicholas's in Prague, from 1720 in the Hofkapelle at Dresden. He returned to Prague in 1723 as an alto and student in the Jesuit seminary, where he began his first compositions, now lost. While participating in a performance of J.J. Fux's *Costanza e Fortezza*, he was particularly impressed by the singing of Gaetano Ursini, whose style he emulated. The Jesuits permitted Latin texts to be added to these italianate arias, which Benda sang with great success and could still remember well into his later years. When his voice broke he returned to his parents' home and began to focus his studies on the violin, particularly through studying the concertos of Vivaldi. At his father's insistence he learnt the linen weaving trade, but he also played for dancing in taverns; he claimed later to have learnt much from a blind fiddler, particularly in matters of rhythm. Benda next held a series of appointments as a violinist in aristocratic households in Vienna, where he encountered many of the best musicians of the day. Together with several of these young musical friends, Benda ran away from his employers, eventually finding a position as Hofkapellmeister to Count Suchaczewsky in Warsaw, where he remained for more than two years. From this point his reputation as a musician and violinist preceeded him, and in 1732 he was invited to join the royal court orchestra in Warsaw, an offer which he accepted. However, dissatisfaction with his salary and duties led him to seek a better position, and the death of August II on 1 February 1733 provided an opportunity to return to Dresden; while visiting nearby Ruppin, he was engaged as violinist by Crown Prince Frederick of Prussia on 17 April 1733. During his early years in Frederick's entourage Benda visited Dresden again, renewed his acquaintance with the violinist Johann Georg Pisendel and participated in performances with C.P.E. Bach and J.E. Goldberg. He remained to his death in the service of Frederick, following him to Rheinsberg in 1736 and then to Potsdam when Frederick assumed the throne in 1740. He was appointed Konzertmeister in the king's Kapelle in 1771.

As a member of one of the outstanding musical establishments of the mid-18th century, Benda found himself in company with some leading musicians. He studied the composition and performance of adagios with Johann Gottlieb Graun, and later studied concerto writing

*1. Franz Benda: etching by Friedrich Wilhelm Skerl, 1783*

with Johann's brother, the Kapellmeister Carl Heinrich Graun. He continued to be recognized as a singer during the early years of his appointment, and in his autobiography related that he was expected to perform arias at court regularly. Benda evidently became a mainstay of Frederick's orchestra. In his autobiography he estimated that he had accompanied the king, an avid flautist, in 10,000 concertos. His position was reflected clearly in the salary schedule for 1744–5, in which he ranked third, behind the Kapellmeister C.H. Graun and Konzertmeister J.G. Graun. Charles Burney described Benda as one of the prominent musicians at the court in Berlin, one who had 'acquired a great reputation in his profession, not only by his expressive manner of playing the violin, but by his graceful and affecting compositions for that instrument'. J.F. Reichardt praised Benda as a performer who could 'overwhelm and command the heart of his audience'. Benda's stature was reflected in the publication of his death notice in the *Berlinische Nachrichten von Staats- und gelehrten Sachen* of 16 March 1786: 'On the seventh of this month one of the most noteworthy and highly esteemed men of his time died, the royal Konzertmeister Franz Benda .... It is generally known that he was one of the greatest musicians, and that upon his instrument, the violin, he created an epoch.'

Few works by Benda were published during his lifetime. In 1763 he modestly listed his compositions as '80 violin solos, 15 concertos, a few symphonies and a considerable number of caprices'. More recent research has shown his total output to be considerably more extensive, but in the absence of a verified musical autograph, doubts remain over the attribution of works to individual members of the Benda family. Many of his works for violin and bass have embellishments written out in the fast movements as well as in the adagios. Burney noted that his manner of playing embellished slow movements was 'so truly cantabile, that scarce a passage can be found in his compositions, which it is not in the power of the human voice to sing, and he is so affecting a player, so truly pathetic in an Adagio, that several able professors have assured me that he has frequently drawn tears from them in performing one'. Important as they are in the documentation of 18th-century performing practice, these embellishments, which are preserved in a number of archives, may have been prepared as only pedagogical examples; they were perhaps copied by Benda's pupils or added to the solo line of violin sonatas in emulation of his style of playing.

Benda's fame attracted many violin pupils after the end of the Seven Years War in 1763, and several later occupied important musical positions in northern Europe. Their influence coalesced to form a recognizable school of German violin playing that was founded on Benda's own style and documented most clearly in his violin sonatas and caprices. Johann Adolph Scheibe (p.580) recognized Benda's influence when he wrote that 'Pisendel in Dresden, and Benda in Berlin, in regard to the violin, have been original geniuses and their own teachers, and one can call them the fathers of the violinists among the Germans, as was true of Tartini in Italy'. Johann Joachim Christoph Bode, in his translation of Burney's *The Present State of Music in France and Italy*, maintained that 'no violinist has exerted the influence of this excellent man, who created for us Germans an original style, and whose solos and concertos have represented music's most worthy intention' (iii, 91).

Of his six children who survived infancy, four became musicians: (7) Maria Carolina, (8) Friedrich, (9) Karl Hermann Heinrich and (11) Juliane.

**(3) Johann (Georg) [Jan Jiří] Benda** (*b* Staré Benátky, bap. 30 Aug 1713; *d* Berlin, early 1752). Violinist and composer, son of (1) Jan Jiří Benda. In 1733 he was in Dresden with his brother (2) Franz Benda, and in 1734 he travelled with him from there to Ruppin, where he joined the musical establishment of Crown Prince Frederick as a viola player, later becoming a violinist in the royal orchestra. His music is rooted in the early 18th century, with all movements of each work normally in the same key and frequent use of counterpoint. The Breitkopf catalogue lists three violin concertos (one in *S-Skma*) and a sonata for flute, violin and bass (*D-Bsb*). Other compositions include ten caprices for solo violin, five violin sonatas (*A-Wgm*, three perhaps duplicated in *CZ-Pnm* and *B-Bc*) and 11 flute sonatas (*DK-Kk*); eight duets for two violins and a violin concerto have been attributed both to Johann and to Franz Benda (see work-list for (2) Franz Benda). A violin concerto in G ascribed to Benda in an edition by Samuel Dushkin is thought to have been composed by Dushkin himself.

**(4) Georg (Anton) [Jiří Antonín] Benda** (*b* Staré Benátky, bap. 30 June 1722; *d* Köstritz, 6 Nov 1795). Composer, son of (1) Jan Jiří Benda. In 1735 he attended the Piarist high school in Kosmonosy (Bohemia) and from 1739 to 1742 he went to the Jesuit college in Jičín. In 1742 he emigrated with his parents and sister to Prussia, where he joined his brothers as a violinist in the court orchestra.

In May 1750 he was appointed Kapellmeister to Duke Friedrich III of Saxe-Gotha. During the first years of his service, he wrote cantatas for the court chapel and various instrumental works. Initially opera was not performed at Gotha because of the clergy's opposition, but on 11 August 1765, the birthday of the Duchess Luise Dorothea, the first performance of Benda's only Italian opera *Xindo riconosciuto* took place; regular stagings of Italian intermezzos there commenced in the following month. Benda was then granted six months' paid leave to study in Italy. Departing from Gotha on 10 October 1765, he visited Venice (where he met Hasse), Bologna, Florence and Rome, and during this time became acquainted with operas by Galuppi, Gluck, Traetta, Piccinni and Paisiello. On his return, he composed two intermezzos which were staged before performances were suspended after Luise Dorothea's death on 22 October 1767. In recognition of his service to the court, Benda was given the new title of *Kapelldirector* in August 1770.

With the death of Friedrich III in 1772 and his succession by Ernst II, Benda's chapel duties were reduced. However, an important new period of composition was stimulated by the arrival of the Seyler theatrical troupe at Gotha in June 1774, which gave Benda his first opportunity to write German stage works. The first of these was *Ariadne auf Naxos*, a melodrama (i.e. a work combining spoken text and music) written by Johann Christian Brandes for his wife Charlotte, who took the title role at the première. Its widely reported success led to the composition of a second melodrama *Medea* for Sophie Seyler, the other leading lady of the company; its text was written by Friedrich Wilhelm Gotter, the Gotha court archivist, who provided texts for four Singspiele by Benda staged in Gotha, *Der Jahrmarkt*, *Walder*, *Romeo und Julie* and *Der Holzhauer*.

On 20 March 1778 Benda resigned as *Kapelldirector*, a decision apparently influenced by his dislike of the composer Anton Schweitzer, who had come to Gotha with the Seyler troupe and remained as music director of the Hoftheater founded in September 1775. On 11 April 1778 he prepared a 'Specification' of the works he had composed during his service at Gotha. He then went to Hamburg to work in the theatre but left in October 1778 for Vienna, where his melodramas were well received; his hope of an appointment there did not, however, materialize. A third melodrama *Pygmalion*, composed in Vienna, was staged after his return to Gotha in September 1779. He then retired on a small pension and lived in seclusion first at Georgenthal near Gotha, where he prepared various works for publication, then at Ohrdruf and finally at Köstritz; in his last years he also frequently stayed at Bad Ronneburg. In 1781 he went to Paris to direct a performance of *Ariadne* at the Comédie-Italienne. He also made visits to Mannheim, where in 1787 his last Singspiel *Das tartarische Gesetz* failed in its first and only performance. In 1792 he composed his last work, a cantata for soprano and orchestra entitled *Bendas Klagen*.

Although in his lifetime Benda was equally famous as a composer of church music, today he is chiefly remembered for his German stage works and in particular for his melodramas. He did not originate the latter genre in Germany, but in *Ariadne* and *Medea* created the first successful examples of the form, which immediately became much imitated; Mozart's enthusiasm for these works is recorded in a letter to his father dated 12 November 1778. Benda's source of inspiration was *recitativo accompagnato* and its alternation of brief sections of instrumental music and spoken text; only occasionally does he combine music and text in a single, simultaneous stream. Each melodrama is based on one or two themes and a number of repeated episodic motifs; all

*2. Georg Benda: engraving by F.C. Geyser after Jacob Wilhelm Mechau*

are varied (sometimes substantially) to fit the dramatic situation. Changes of harmony and instrumentation play an important role. In *Ariadne* imitations of natural sounds are used to enhance the dramatic effect; in *Medea*music expresses the deeper facets of the heroine's psychological development.

Of Benda's Singspiele, *Der Jahrmarkt* and *Romeo und Julie* enjoyed considerable popularity in the repertories of the north and central German theatres; *Romeo* and the earlier *Walder* were among the first Singspiele to have plots of a serious nature, this being reflected in the music of both works by the inclusion of longer, highly dramatic, through-composed scenes. Both have certain features of serious opera: extensive arias, *recitativo accompagnato* and, in *Romeo und Julie*, a funeral chorus of the kind used by Gluck, while *Der Jahrmarkt* already includes strong dramatic and lyrical scenes, effective musical characterization and large-scale musical numbers within the Singspiel framework. The secular vocal music is less well documented; Benda's music written for Stöltzel's *Ode* (1767) was later set to a new text by Grossmann and given at performances in Bonn and Frankfurt during 1781 in memory of the then recently deceased playwright Lessing. (Neefe, who added an overture for these performances, also later furnished Benda's music with an oratorio text, *Das Andenken an die Erlösung des Gottmenschen*, in which form the work has sometimes been incorrectly attributed to Benda's son (12) Friedrich Ludwig Benda.) Benda's secular cantatas from the early 1770s, such as *Amynts Klagen*, approach the style of his later melodramas: the orchestral passages of their accompanied recitatives, in particular, resemble the instrumental episodes of his melodramas.

Among Benda's instrumental works, a set of keyboard sonatas published in 1757 attracted favourable comments from writers including Hiller, Burney and Gerber. Benda's fame also rests on his orchestral works, especially his sinfonias and harpischord concertos. His concertos anticipate early Romantic trends (especially in the slow movements) but retain Baroque features such as long-breathed, non-periodic themes; strongly rhythmic unison passages are also typical. The sinfonias, dating mostly from the period 1750–65, are each in three movements with the first in a clearly articulated sonata form and the second in a lyrical style.

Five of Georg's children became musicians; besides (12) Friedrich Ludwig already mentioned, Heinrich Benda (1754–before 1806) was a violinist, and Catherina Justina (*b* 1757), Hermann Christian (1759–1805) and Carl Ernst Eberhard Benda (1764–1824) were all singers with various theatre companies.

(5) **Joseph Benda** (*b* Staré Benátky, bap. 7 May 1724; *d* Berlin, 22 Feb 1804). Violinist and composer, son of (1) Jan Jiří Benda. In 1742 he was taken by Frederick the Great to Potsdam, where he continued his studies with his brother (2) Franz. He became a violinist in the Prussian court orchestra in the same year and on Franz's death in 1786 was appointed Konzertmeister, a duty he fulfilled until 1797. The only certain known works of his are a violin sonata (in *D-Bsb*) and 12 caprices for solo violin in *Etude de violon ou caprices … de Messieurs François et Joseph Benda*, ii (Leipzig, 1804). Of his four sons, the eldest, (10) Friedrich Ernst Benda, and the youngest, Carl Friedrich Franz Benda (1754–1816), became musicians.

(6) **Anna Franziska** [Anna Františka] **Benda** [Hatašová] (*b* Staré Benátky, bap. 26 May 1728; *d* Gotha, 15 Dec 1781). Soprano, daughter of (1) Jan Jiří Benda. *See* HATAŠ family, (2).

(7) **Maria Carolina Benda** [Wolf] (*b* Berlin, 27 Dec 1742; *d* 8 Feb 1820). Singer and composer, daughter of (2) Franz Benda and his first wife, Franziska Louise. She studied singing and the harpsichord with her father and took a position as a *Hofsängerin* in Weimar in 1761. She married the Weimar Kapellmeister Ernst Wilhelm Wolf in 1770, but continued her musical career and performed at the Weimar Liebhabertheater (1775–83), where Goethe was director. She composed the songs *Die Rose* and *An die Rose* (published in *Der teutsche Merkur*, 1779) and a setting of *Ich träumte wie um Mitternacht*, which appeared first in her husband's collection *Ein und fünfzig Lieder* (1784) and later in the *Mildheimisches Liederbuch* (1817).

(8) **Friedrich (Wilhelm Heinrich) Benda** (*b* Potsdam, 15 July 1745; *d* Potsdam, 19 June 1814). Composer and violinist, son of (2) Franz Benda. He studied the violin with his father and theory with J.P. Kirnberger. He seems to have spent his entire working life as a violinist at the Prussian court and was also active in the concert life of Berlin. Of his two through-composed operas, *Orpheus* and *Alceste, Orpheus* was especially popular in Berlin. However, he was noted chiefly for his instrumental music.

WORKS

STAGE

Orpheus (Spl, 3, G.F. von Lindemann), concert perf., Berlin, 16 Jan 1785, vs (Berlin, 1787)

Alceste (Spl, 3, C.M. Wieland), concert perf., 15 Jan 1786, Berlin, lost

Das Blumenmädchen (Spl, 1, F. Rochlitz), Berlin, 16 July 1806, *D-Bsb*

OTHER WORKS

*printed works published in Berlin unless otherwise stated*

Vocal: Pygmalion (cant.) (Leipzig and Dessau, 1784); Die Grazien (cant., F.W. von Gerstenberg) (1789); Die Jünger am Grabe des Auferstandenen (orat), Berlin, 1792, ?lost; Das Lob des Höchsten (orat), Berlin, 1806, ?lost

Orch: 2 vn concs., op.2 (1779); 3 fl concs., op.4 (*c*1782); ?7 syms., 2 in *D-SWl*, 3, *c*1790, *HR*, 2 dated 1795, ?lost; Conc., 2 vn, *Bsb*; Va Conc., *Bsb*, doubtful, ? by F.L. Benda;? hpd concs., 1 in *GB-Ckc*, attrib. F.L. Benda, probably by F.W.H. Benda

Chbr: 6 Trios, 2 vn, b, op.1 (1778); 3 Sonatas, hpd, fl/vn, op.3 (*c*1781); 3 Sonatas, pf/hpd, fl, op.5 (*c*1786); Sonate III, harp/pf, vn and fl ad lib (n.d.); ?2 str qts, 1 in *B-Bc*

Kbd: sonatas in Clavier-Magazin für Kenner und Liebhaber (1787); Sonata, pf/hpd 4 hands, op.6 (1799)

**(9) Carl Hermann Heinrich Benda** (*b* Potsdam, 2 May 1748; *d* Berlin, 15 March 1836). Violinist, son of (2) Franz Benda. He studied with his father, entered the service of the Prussian court about 1766 and became Konzertmeister as a successor to his uncle, (5) Joseph Benda, in 1802. He was also a pianist and worked as a répétiteur at the Royal Opera in Berlin; he retired in 1809. Of his compositions only a violin sonata is extant (in *D-Bsb*); his only known publication, the *Sechs Adagios für das Pianoforte nebst Bemerkungen über Spiel und Vortrag des Adagios von Carl Benda*, issued by Hummel, is an edition of other composers' music.

**(10) (Johann) Friedrich Ernst Benda** (*b* Potsdam or Berlin, bap. 10 Oct 1749; *d* Berlin, 24 Feb 1785). Violinist and harpsichordist, son of (5) Joseph Benda. By 1766 he was a member of the Berlin court orchestra. In 1770 he founded with Carl Ludwig Bachmann a series of Liebhaberkonzerte in Berlin which he directed until his death. His only known composition is a *Minuetto per il cembalo con variazioni*(Leipzig, 1768); no copies of this edition are extant, but a manuscript similarly entitled (identified only by the surname 'Benda') survives in the library of Brussels Conservatory.

**(11) (Bernhardine) Juliane Benda** [Reichardt] (*b* Potsdam or Berlin, 14 May 1752; *d* Berlin, 9 May 1783). Singer and composer, daughter of (2) Franz Benda. She had a reputation as an unusually expressive singer and even before her marriage to J.F. Reichardt in 1777 was a published composer. Her *Lieder und Klaviersonaten* (Hamburg, 1782) contains 17 songs and two sonatas; some 13 other songs appeared during her lifetime in almanacs and in a collection of *Oden und Lieder* (1779–81) by her husband.

**(12) Friedrich Ludwig Benda** (*b* Gotha, bap. 4 Sept 1752; *d* Königsberg [now Kaliningrad], 20 or 27 March 1792). Composer and violinist, son of (4) Georg Benda. In 1775 he joined the orchestra of the Seyler troupe, then resident in Gotha, and travelled with it as rehearsal violinist (répétiteur) to Dresden, Leipzig and Frankfurt. On the disbandment of the troupe in 1779, he went with his wife, the singer Felicitas Agnesia Rietz, first to Berlin and then to Hamburg, where he was engaged by the theatre. In 1782 he moved to Ludwigslust as first violinist and *Cammer-Compositeur* to the Duke of Mecklenburg-Schwerin. During the following years he and his wife travelled widely, giving concerts in many cities including Vienna and Prague. With the break-up of his marriage Benda was dismissed from his post at Ludwigslust in December 1788 and spent his few remaining years in Königsberg.

Benda's output as a composer was varied. While a member of the Seyler troupe, his most important work was a setting, containing italianate arias, of Grossmann's *Der Barbier von Seville*, which entered the repertory of several theatre companies. Apart from an aria for his wife to sing in a performance of Grétry's *Le jugement de Midas* at Hamburg in 1781, he wrote no more for the stage until he settled in Königsberg, where he composed three operettas; the tuneful melodies of *Louise* and *Mariechen* won them particular success there. He also wrote some instrumental music, mainly for the violin, but his duties at Ludwigslust seem mostly to have entailed the provision of church music.

WORKS

STAGE

Der Barbier von Seville (komische Oper, 4, G.F. W. Grossmann, after P.A. Beaumarchais), Leipzig, 7 May 1776, *D-Bsb*, vs (Leipzig, 1779)

Narrenballett, ?1779

Der Tempel der Wahrheit (prol, F. Meyer), 25 Sept 1780

Der Verlobung (Spl, F.E. Jester), Königsberg, 1789

Louise (komische Oper, 3, Jester), Königsberg, 16 Jan 1791, vs (Königsberg, 1791)

Mariechen (komische Operette, 3, Jester), Königsberg, 1792, vs (Königsberg, 1792)

OTHER WORKS

**Bendall, Wilfred (Ellington)** (*b* London, 22 April 1850; *d* London, 16 June 1920). English composer. He studied with Charles Lucas and Edouard Silas and at the Leipzig Conservatory. His chief dramatic compositions were one-act comic chamber operas performed in London. Some, including *Lovers' Knots* (C. Bridgman; St George's Hall, 5 May 1880), appeared among the German Reeds' entertainments; others, such as *Beef Tea* (H. Greenbank; Lyric, 22 Oct 1892), were companion pieces for longer musical works. His most popular work, *Quid Pro Quo* (R. Barrington and Bridgman; Opera Comique, 17 Oct 1881), appeared with Frederic Clay and W.S. Gilbert's

comic opera *Princess Toto*. Bendall composed several cantatas, including *Parizādeh* (1884) and *The Lady of Shallott* (for female voices). In 1894 Bendall was engaged as Sullivan's secretary, and in his last years Sullivan relied on him to copy and correct his works, and in some cases arrange them for publication.

FREDRIC WOODBRIDGE WILSON

**Bendazzi, Luigia** (*b* Ravenna, 1827/8; *d* Nice, 5 March 1901). Italian soprano. The child of illiterate parents, she studied in Milan with Antonio Piacenti and in 1850 was apprenticed to the Bolognese composer Federico Dallara; with him (and his wife) she lived for nine years in what seems to have been at first a relationship of total, possibly sexual, dependence. She made her début in 1850 at Venice as Elvira in *Ernani*; after scoring a notable success at the San Carlo, Naples, in 1851, she sang in all the major Italian houses. Verdi objected to her in 1853 as a possible Violetta because she was too much the powerful dramatic soprano, but he exploited her resources in 1857 when she created Amelia in *Simon Boccanegra*; she was also successful as Amelia (*Un ballo in maschera*), Lady Macbeth, and Valentine in *Les Huguenots*. After appearances at the Liceo in Barcelona in 1869–70 her career faded. She married the composer Benedetto Secchi; their daughter Ernestina Bendazzi (1864–1931), also a soprano, married the tenor Alfonso Garulli.

JOHN ROSSELLI

**Bendeler, Johann Philipp** (*b* Riethnordhausen, nr Erfurt, bap. 20 Nov 1654; *d* Quedlinburg, 26 Dec 1709). German theorist. He became a teacher at the Gymnasium at Quedlinburg in 1681, and he was also appointed Kantor there in 1687. He held both positions until his sudden death from a heart attack while conducting a choir during a Christmas service. Like his brother Johann Jacob he was a godson of Andreas Werckmeister, whose *Hypomnemata musica* (1697) includes encomiums by both brothers. Johann Philipp had earlier published an encomium in the form of a canon notated in intervallic proportions in Werckmeister's *Musicae mathematicae Hodegus curiosus* (Frankfurt and Leipzig, 1687). He may have been a pupil of Werckmeister; in any case he was a close disciple. His most important treatise, *Organopoeia* (*c*1690), continues a tradition established by Werckmeister of writing about the physical and mechanical nature of organs. His treatise is in three parts: 'Vom Pfeiffwerck', which contains important and innovatory comments about pipe measurement, 'Von Abtheilung der Lade', which concerns the construction and divisions of the wind chest, and 'Von der Stimmung', which deals with tuning and temperament. Temperament is also the subject of his *Aerarium melopoeticum* (1688). In a particularly interesting work, *Directorium musicum* (1706), he investigated the nature and desirable resolutions of the numerous quarrels arising between school rectors and Kantors; understandably Bendeler's arguments are weighted on the Kantor's side. He printed favourable judgments on typical legal disputes derived from the universities at Halle and Helmstedt and from the court of assessors of the electorate of Saxony at Leipzig, where three decades later J.S. Bach became involved in the same kinds of difficulty with the rector J.A. Ernesti.

THEORETICAL WORKS

*Aerarium melopoeticum* (Nuremberg, 1688)
*Organopoeia, oder Unterweisung wie eine Orgel nach ihren Hauptstücken . . . aus wahren mathematischen Gründen zu erbauen* (Frankfurt and Leipzig, *c*1690/*R*, 2/1739 as *Orgel-Bau Kunst, oder Unterweisung*)
*Planimetria practica* (Quedlinburg, 1700)
*Redlich bezahlte Schuld oder gründlichst ausgeführte Quadratura circuli* (Frankfurt and Leipzig, 1700)
*Directorium musicum* (Quedlinburg, 1706)

GEORGE J. BUELOW

**Bendeler, Salomon.** *See* BENDLER, SALOMON.

**Bender, Paul** (*b* Driedorf, nr Wetzlar, 28 July 1875; *d* Munich, 25 Nov 1947). German bass. A pupil of Louise Ress and Baptist Hoffmann, he made his official stage début as Sarastro in 1900 at Breslau. In 1903 he was engaged by the Munich Opera, and continued as their first bass for 30 years; his last performance, as Rossini's Don Basilio, took place there only seven days before his death. Bender made his Covent Garden début in 1914 as Amfortas in the British stage première of *Parsifal*; although the role was described as being rather high for his fine *basso cantante*, he made a profound impression. His other roles during this German winter season were Hunding, Sachs and Jacob in Méhul's *Joseph*. When German performances resumed at Covent Garden in 1924 and 1927, Bender showed his outstanding gifts as a comedian in the parts of Osmin and Baron Ochs, but was again much admired in his Wagner roles, especially as Hagen. He sang all the leading bass roles of the German repertory at the Metropolitan (1922–7), where some of his performances were described as 'ponderous'. This is the very opposite of the impression he made, during the same period, on visitors to the Munich and Salzburg festivals. Bender was a fine actor, and his great stature contributed to an imposing stage presence. He became famous also as a lieder singer, especially in the songs and ballads of Carl Loewe. Among his many recordings, the most valuable are those of Loewe ballads made in 1930 and 1933, which reveal a gripping dramatic power, a distinctness of enunciation and a quiet humour that are in sum delightful.

DESMOND SHAWE-TAYLOR

**Bendidio, Lucrezia** (*b* Ferrara, 8 April 1547; *d* after 1584). Italian noblewoman and amateur singer. She came from an ancient and powerful Ferrarese noble family and entered the service of Leonora d'Este as a lady-in-waiting in 1561. In that same year she encountered the 18-year-old Torquato Tasso, who wrote numerous celebratory poems about her and incorporated her as Licori into his pastoral play *Aminta*. In 1562 she was married to Count Baldassare Macchiavelli of Ferrara, a widower with one daughter. It was an unhappy marriage with no children.

A gifted singer, Bendidio was unrivalled during the 1570s as a soprano in the private musical evenings of the Ferrarese court (for accounts of her singing see Solerti, Durante and Martellotti, and *NewcombMF*). Poems about her and her singing were written by Tasso, Ridolfo Arlotti, Annibale Pocaterra, and especially G.B. Pigna. Her sister Isabella (*b* 13 Sept 1546; *d* after 1610) also sang in the private Ferrarese court entertainments, at least before her marriage in 1573 to the powerful Ferrarese nobleman Cornelio Bentivoglio. Isabella was the mother of Guido and Enzo Bentivoglio, the earliest patrons of Frescobaldi in Rome. The Bendidio sisters were eclipsed as singers at Ferrara by the formation in 1580–81 of a new and more highly skilled group of singing ladies, made up of Laura Peverara, Livia d'Arco and Anna Guarini. Anna Guarini was the niece of Lucrezia and Isabella and the daughter of the Ferrarese poet Battista Guarini.

ANTHONY NEWCOMB

**Bendinelli** [Bendinello], **Agostino** (i) (*b* Verona, *c*1550; *d* Verona, 23 Nov 1598). Italian composer and singer. He has in the past been confused with Agostino Bendinelli (ii). He lived in Verona, where he attended the Scuola degli Accoliti and completed his musical education under Gabriele Martinengo, *maestro di cappella* of the cathedral. He became a priest, and in 1580 was appointed a singer in the cathedral choir and one of the 12 resident chaplains who formed the teaching staff of the Scuola. In codicils to his will dated 8 September 1598 he settled a legacy of 50 ducats upon Ippolito Baccusi, then *maestro di cappella* of the cathedral, on condition that he should arrange for some of his unpublished works to be printed posthumously; it is not known if Baccusi carried out this request. Bendinelli's counterpoint is clear and tightly constructed, lively in rhythm and deployed within a harmonic language that is varied by some effective modulations. In his compositions for double choir the more contrapuntal passages throw the homophonic sections into relief with restrained dramatic effect. An example of technical mastery is provided by the canon at the unison in the tenor of the motet *Meditabor in mandatis* in the 1588 collection.

ENRICO PAGANUZZI

**Bendinelli, Agostino** (ii) (*b* Lucca, 26 April 1635; *d* Lucca, after 1702). Italian composer and teacher. He was a canon of S Giovanni in Laterano, Rome. About 1660 he was superintendent of the monastery of S Frediano, Lucca. He was prior of S Agostino, Piacenza, about 1671 and of S Leonardo, Lucca, in 1674. Records at S Frediano show him as 'abbate privilegiato' for 1691–3, 1697–8 and 1703. He taught A.M. Pacchioni and G.M. Bononcini, who paid tribute to him in his *Musico prattico* (Bologna, 1673, p.106) and included a canon by him in praise of Bononcini himself. Another canon, in honour of the dedicatee, prefaces Bendinelli's only known volume of music, *Psalmi vespertini ternis, quaternis, quinisque vocibus ad organum concinendi una cum litaniis BVM* op.1 (Bologna, 1671). Its contents, in the concertato style, with solo episodes and full sections alternating, indicate his technical competence.

GIUSEPPE VECCHI

**Bendinelli, Cesare** (*b* in or nr Verona; *d* ?Munich, 1617). Italian trumpeter and writer on the trumpet. He was active as a trombonist in Schwerin from 1562 to 1565. From 1567 he was in Vienna and then from 1580 until his death he was chief court trumpeter in Munich. In 1614 he presented the Accademia Filarmonica in Verona with a manuscript trumpet method, *Tutta l'arte della trombetta* (ed. in DM, 2nd ser., v, 1975; Eng. trans., 1976), the earliest one now known, the contents of which he had collected from the best players of his day or written himself. His method is of historical importance because it contains the first dated pieces, of 1584, 1587 and 1588, for the clarino register of the trumpet, and elucidates the late Renaissance practice of improvising over a second or 'sonata' part in a five-part trumpet ensemble. He claimed too to have been the first to apply tonguing syllables – an important aid to both articulation and register placement – to the trumpet. He also presented the academy with his trumpet, made by Anton Schnitzer in 1585 in pretzel shape. Bendinelli's portrait survives on a votive painting donated by him after a near-fatal boating accident on the Danube in 1582 to the pilgrimage church at Aufkirchen, near Starnberg, Bavaria.

EDWARD H. TARR

**Bendīr** [bendair]. Large single-headed frame drum of North Africa. The head, which is usually goatskin, is stretched over a flat wooden hoop usually no more than 15 cm wide. The diameter of the rim varies but is rarely more than 60 cm across the head. The frame usually has a single bored thumb-hole, which facilitates one method of playing. Very often, three or four gut or nylon snares are attached to the inner side of the drum, and these resonate against the skin when the drum is played. Occasionally jingles are attached through slots made around the frame. At many ambient temperatures the skin is slack, and is tightened either by placing the drum in direct sunlight or by heating it over a brazier.

The *bendīr* is played in a variety of ways, but is most commonly held upright against the body, supported by

*Bendīr played by a musician from a female A'issawa ensemble, Morocco*

the left hand with the thumb through the thumb-hole and the fingers resting on the skin of the drum. By releasing or applying pressure to the skin with these fingers, 'open' and 'closed' tones can be struck. The head is beaten with a flat right hand, either in the centre, which produces a relatively deep note, or at the edge, producing a higher pitch. (These positions are reversed for left-handed players.) The *bendīr* can also be held between the legs or against the chest and beaten with both hands.

The *bendīr* is such a common instrument in the Maghrib that it is employed in many kinds of music, either singly or as an ensemble of *benader*. However, it is an instrument of low status, largely found in rural traditions and women's musics; instruments bearing snares and jingles are particularly associated with these musics, as the loud buzzing overtones are considered to be sensually stimulating and therefore unsuitable for urban art music or men's religious music.

TONY LANGLOIS

**Bendix, Victor (Emanuel)** (*b* Copenhagen, 17 May 1851; *d* Copenhagen, 5 Jan 1926). Danish composer, pianist and conductor. He studied at the Copenhagen Conservatory and was trained as a composer by Gade and J.P.E. Hartmann and as a pianist by, among others, Liszt (from 1881). After leaving the conservatory he worked as a répétiteur at the Copenhagen Royal Theatre. Later he worked at the Royal Academy of Music, where he was much in demand as a piano teacher; he was extremely active as a concert pianist, sometimes with his second wife, Dagmar Bendix, also a fine pianist. He was an excellent conductor, and in this role made great contributions to the musical life of Copenhagen. From 1897 he established and conducted the Copenhagen Philharmonic Concerts, and his concert performances of *Siegfried* and *Tristan und Isolde* and his staged performances of Verdi's *Don Carlos* were welcome innovations, in contrast to the usual repertory (mainly Beethoven, Schumann, Mendelssohn and Gade) of the Copenhagen Musical Society. He was also a founder of the Copenhagen Korforening.

Bendix wrote many songs, but these are less important than his compositions for the piano, both solo and with other instruments: these include the Piano Trio op.12, the Piano Concerto op.17 and the Piano Sonata op.26. Still more valuable, however, is his symphonic music, especially the first two symphonies. The Second Symphony, *Sommerklange fra Sydrusland* ('Summer Sounds from Southern Russia') (1888), composed in a Slavonic folk style, is both graceful and coherent. The other symphonies, however, like much of his music, suffer from a badly integrated mixture of styles derived on the one hand from Gade and on the other from Liszt and Wagner. As Danish music began to follow a new course in the 1890s under the influence of Carl Nielsen, Bendix's music, which originally had been progressive, soon assumed the character of an echo from the past; he was almost silent as a composer during the last 20 years of his life.

WORKS

BO MARSCHNER

**Bendl, Karel** (*b* Prague, 16 April 1838; *d* Prague, 20 Sept 1897). Czech composer and conductor. He was born into a middle-class family and in accordance with his parents' wishes first studied glove-making, but at 16 entered the Prague Organ School. He studied with Karel Pietsch and (after Pietsch's death) with Josef Leopold Zvonař, and graduated with honours in 1858. One of his close friends at the organ school was Dvořák, at whose disposal Bendl placed his piano and collection of scores. After completing his studies, Bendl taught at Celestin Müller's music institute. There his colleague was Jindřich Pech, the brother of Eliška Krásnohorská, who later wrote the

librettos for five of Bendl's operas. Bendl wrote several early pieces under the pseudonym Karel Podskalský, and won his first success as a composer when the periodical *Dalibor* awarded him a prize for his song *Poletuje holubice* ('The Dove is Fluttering', 1861). From autumn 1864 he spent ten months abroad, at first as assistant conductor at the Brussels Opera, then as chorus director of the German opera in Amsterdam; he also stayed in Paris for a while.

In 1868 his first opera, *Lejla* (1867), was performed at the Provisional Theatre in Prague. This work, based on a Spanish theme about the siege of Granada at the end of the 15th century, represents Bendl's response to grand opera. Encouraged by its success, he went on to compose other operas. *Břetislav* (1869), on a subject from Czech history, also takes as its starting point the principles of grand opera, while the comic opera *Starý ženich* ('The Elderly Suitor', 1871–4) follows the model of Smetana's *The Bartered Bride*. Bendl also attempted romantic fairy tale opera (*Die Wunderblume*, 1876, to a German libretto) and operetta (*Indická princezna*, 'The Indian Princess', 1877), but no other work matched the success of *Lejla*.

In 1861 Bendl was a co-founder of the Prague Hlahol, the first and most important of Prague's choral societies, whose performances became a focal point of the Czech cultural and social scene. He was its conductor from 1865 to 1877, and the bulk of his choral works – whose popularity made him one of the most frequently performed composers of the day – were written for this society. Bendl's performance of Dvořák's *Hymnus* in 1873 marked his friend's first public success as a composer. In addition to the Czech repertory, he also performed choral works by German and French composers (Liszt, Wagner, Bazin and Thomas). From 1868 to 1878 he edited the Hlahol collection of male choruses for the publisher Emanuel Starý.

During this period, he was also assistant conductor at the Provisional Theatre (July 1874 – May 1875) and choirmaster at the Orthodox church of St Mikuláš in Prague (1877–8). In October 1878 he accepted the post of choirmaster of the mixed chorus attached to the 50-piece private orchestra of the Russian Baron Paul von Dervies, whose establishment alternated between Lugano and Nice. The ensemble made an important contribution to the artistic life of both cities, and included some ambitious operatic productions among its performances, most notably, Glinka's *A Life for the Tsar*. Reviews paid glowing tribute to Bendl's role as choirmaster. Probably at the baron's instigation, he composed his opera *Gina*, on an Italian libretto by Giorgio Tommaso Cimino (it was completed by 1884, but was not performed). In August 1880 Bendl asked to be released from the baron's service, and on his way home may have spent some time in Milan, although there is no documentary evidence of this.

From 1881 until the end of his life he lived in Prague. From 1883 to 1886 he edited the music section of the paper *Humoristické listy* – his sense of humour is attested by several jokey compositions, for example the melodrama *Uzený slaneček* ('The Kipper'), the duo *Reformátoři divadla* ('The Theatre Reformers'), *Kočičí dueto* ('Cat's Duet') and others – and from 1886 to 1890 he again worked at St Mikuláš.

At that time opera was uppermost in his mind. 1881 saw the first performance of *Černohorci* ('The Montenegrins', composed in 1877, before Bendl's departure from Prague), which takes French grand opera as its starting point. *Karel Škréta* (1883) and *Dítě Tábora* ('The Child of Tábor', 1886–8), both to librettos by Krásnohorská, are on subjects from Czech history and musically lean towards the work of Smetana. The one-act *Máti Míla* (1895) – the original German version *Mutter Mila* (1893) was still unperformed at the end of the 20th century – represents Bendl's response to Italian *verismo*.

The orchestral *Jihoslovanská rhapsodie* ('South Slavonic Rhapsody', 1881) is (like *The Montenegrins*) an expression of the composer's interest in all things Slavonic, an interest further stimulated by the international success of Dvořák's *Slavonic Dances*. The *Slavnostní pochod* ('Festive March', 1881), composed to mark the opening of the Czech National Theatre, is in the spirit of romantic stage marches. The most noteworthy work in Bendl's small output of chamber music is the String Quartet in F major (1896–7).

Bendl's compositional style, light and easily accessible, fully met the requirements of middle-class society. In his time he was highly regarded and was considered to be almost equal to Dvořák and Smetana. His musical language was predominantly a lyrical one; his early pieces betray a close affinity with the music of Mendelssohn, and earned their composer the nickname 'Bendelssohn' within Krásnohorská's circle. The whole of his output reveals a dependence on contemporary models and musical fashions, which he was always happy to follow.

From November 1894 Bendl stood in for Dvořák at the Prague Conservatory, teaching orchestration during Dvořák's absence in the USA; after Dvořák's return Bendl continued to teach at the conservatory for a further two years. From 1890 onwards he was a member of the Czech Academy of Sciences, Arts and Letters, and for an eight-month period (1890–91) was president of the Union of Czech Choral Societies. He died as the result of a stroke.

MONIKA BÁRTOVÁ-HOLÁ

**Bendler** [Bendeler], **Salomon** (*b* Quedlinburg, 1683; *d* Brunswick, 1724). German bass, son of the theorist J.P. Bendeler, who taught him. He is said to have enjoyed great success in north Italy and throughout Germany; he sang at Weissenfels and Brunswick (1708), Hamburg, Leipzig and Danzig. In 1712 he appeared in Handel's *Rinaldo* (as Argante) and Gasparini's *Ambleto* at the Queen's Theatre in London. In 1717 he was appointed chamber singer to the Duke of Brunswick, accepting the job (according to one account) on condition that he could hunt in the duke's forests. He sang in Schürmann's *Telemachus und Calypso* that summer. Munchausen-like tales are told of the depth, power and resonance of his voice: that in London his *E*♭ below the bass staff drowned an orchestra of 50 playing *fortissimo* and on another occasion the full organ at St Paul's.

WINTON DEAN

**Bendusi, Francesco** (*b* Siena, *fl* ?Verona, *c*1553). Italian composer. His only known compositions, a collection of ensemble dance pieces, occupy an important place in the history of instrumental music of the 16th century; this work is not only the first but also one of the rare Italian publications of its kind. It comprises 24 dances, 21 of the galliard or saltarello type, titled either by genre, such as *Pass'e mezo ditto il Romano* and *Pass'e mezo ditto il Compasso*, or with fanciful titles, for example *Moschetta*, *La mala vecchia* and *Gioia*, which often refer to popular songs and villottas. The dances are thought to have been composed for the Accademia Filarmonica in Verona, and may represent a repertory typical to that region.

The music is in mensural notation with consistent use of the sign ₵ except in the 'Cortesa Padoana'. The dances entitled *Incognita* and *Bandera* alternate bars of two and three beats, suggesting that they were intended for a special choreography. The harmonic bases employed by Bendusi include an early form of the folia, and some bear a striking resemblance to those used by Ortiz in the eight *recercadas* in book 2 of his *Tratado* of 1553. Two years after Gardane's publication of Bendusi's pieces, 23 were incorporated into *Viel feiner lieblicher Stucklein*, a collection of 322 compositions for instrumental ensemble printed in Breslau (RISM 1555[35]).

JEANETTE B. HOLLAND/ARTHUR J. NESS

**Benecken, Friedrich Burchard.** *See* BENEKEN, FRIEDRICH BURCHARD.

**Benedette di Giov. dito Benoit.** *See* BENOIT.

**Benedetti, Francesco Maria** (*b* Assisi, bap. 12 Dec 1683; *d* Assisi, bur. 2 July 1749). Italian composer and priest. Baptized Giovanni Domenico Antonio, he took the name Francesco Maria when he entered the Franciscan order as a novice on 25 November 1699. He served for two and a half months in the chapel of the basilica of S Francesco, Assisi, before moving to Città di Castello on 1 July 1704, perhaps having already taken his final vows. He presumably had musical duties there, for a respond for the feast of St Anthony of Padua by him is dated 20 September 1704. Between 10 April 1706 and 10 February 1707 he was in Assisi as first organist of the basilica. A Bull of Pope Clement XI of 6 November 1706 allowed him to take holy orders 13 months earlier than the minimum prescribed age of 25, and he was ordained priest at the end of 1706. In March 1707 he was moved to Turin, and while he remained there until September 1711, there are three autograph motets dated 1710 by him in Assisi. On 3 October 1711 he returned to Assisi as *maestro di cappella*, replacing F.A. Urio. In 1715 he was invited to compose two 'academic' cantatas (*Dialogo della Virtù e della Fama* and *Virtù e Honore*) to celebrate the resumption of meetings of the Accademia degli Eccitati after 15 years. During this period his monastical commitments increased: he became a member of the Council of Fathers and was granted a licence to hear the confessions of the laity. On 30 April 1716 he left Assisi for S Francesco, Turin, where he stayed, probably with the same duties of *maestro di cappella*, until 1721 or 1722. Compositions dating from 1722 to 1727 suggest that he went to Aosta Cathedral, again as *maestro di cappella*. His signature in the Register of Masses on 19 July 1727 shows that he had returned to Assisi by this date, replacing F.M. Zuccari. On 22 December 1734 Benedetti was appointed *maestro di cappella* of Urbino Cathedral, but he was unable to accept the post as a decree of 1703 prohibited friars from taking up such positions outside the order.

At Assisi Benedetti successfully combined religious duties and musical tasks. He was a prolific composer, an energetic organizer of music for the most important feasts of the year, and as a teacher he was highly esteemed by Padre Martini. In 1741 Benedetti obtained permission to build at his own expense an apartment in the monastery, which eventually passed to his successors. In 1744 at Città di Castello the title of 'Discreto perpetuo' was conferred on him, because 'for 24 years in succession he has acted as master of music in the holy chapel of Assisi and in various cathedrals in Piedmont, during which time he composed many musical works to great acclaim from those who heard them'. On the title-page of a *Magnificat* composed in Aosta in 1725 an unknown hand described him as 'accomplished and strong'. Interest in his music continued after his death: Padre Martini requested scores of two of his *Compiete* and of 'mute di psalmi pieni a 8'; and one of his requiem masses was sung until the mid-19th century.

Benedetti's musical output, almost entirely sacred, provides an interesting example of Italian late-Baroque contrapuntal style. He wrote with clarity and rhythmic insistence, making rich use of progressions, dynamic effects and contrasts of timbre. His choice and use of ensembles shows technical ability and a preference for concertato forms. His works, over 270, include motets, sacred and 'academic' cantatas, masses, offices for matins and compline, collections of psalms for a whole year, single psalms and antiphons, oratorios, passions, lamentations, *sonate da organo capricciose*, organ responses and sonatas for strings and continuo. Most exist, in autograph or contemporary copies, at Assisi (*I-Ac*, *Af*) and Aosta (*I-AOc*), but others are in Bologna (*I-Bsf*), Loreto (*I-LT*) and Münster (*D-Müs*). His theoretical work *Le regole per sonare sulla parte del basso* (1737) survives in Bologna (*I-Bc*, autograph and copy).

CATERINA PAMPALONI

**Benedetti, Gianfrancesco** (*b* Lucca, *c*1700; *d* Lucca, after 1760). Italian composer. He was *maestro di cappella* of the royal and archducal chapel in Mantua (as a collection of his psalm settings from 1742 testifies). According to Nerici he published while at Mantua a concerted four-part mass and vespers in honour of Filippo Neri; his only extant mass and vespers (manuscript at Lucca) is probably the same work. Although a large instrumental force (violin concertante, oboe, first and second violins, viola, cello, double bass and organ) accompanies a double four-part choir, the results are not exciting; contrapuntal effects are achieved only as a result of the homophonic choirs and homophonic instruments not moving rhythmically together. His six *Salmi a 4 voci brevemente concertati con violini* (with a *Magnificat*) show the same characteristics. It may seem curious that the work is dedicated to Benedetti's 'Guardian Angel'; but it should be noted that Lucca had a religious society in honour of guardian angels (Congregazione degli Angeli Custodi) and he may have been a member.

CAROLYN GIANTURCO

**Benedetti, Jacopo dei.** *See* JACOPONE DA TODI.

**Benedetti, Luigi** (*b* Bergamo, 2 Nov 1933). Italian organist. He studied at the Milan Conservatory from 1950 to 1960, under Carlo Lonati (piano), Alceo Galliera (organ) and Bruno Bettinelli (composition). Following his début recital in Milan in 1958, he began to build a solo and ensemble career of distinction. In 1986 he played the inaugural concert on the restored organ in Milan Cathedral, having been appointed organist there in 1983. Benedetti's international career includes solo recordings on a number of labels, performances in many organ festivals and recordings for radio and television. He plays in the Frescobaldi Ensemble, gives concerts for organ and trumpet, and conducts the Gruppo di Canto Ambrosiano, Milan, which specializes in Gregorian and Ambrosian chant.

PAUL HALE

**Benedetti, Piero** [Pietro] (*b* Florence, *c*1585; *d* Florence, after 14 July 1649). Italian composer. He seems to have spent his life in Florence. Autograph letters from him reveal that he was at Mantua in 1608 to provide musical assistance at the time of Francesco Gonzaga's wedding festivities, though he later complained bitterly that he had received no remuneration for his services. In 1610 Cardinal Ferdinando Gonzaga invited him to Rome to serve him at least temporarily, but he declined, saying that he had to remain in Florence because his family would suffer too much by his absence. On the title-pages of his publications of 1611 and 1613 he indicated that he was a member of the Accademia degli Elevati (founded by Marco da Gagliano in 1607), with the academic name 'L'Invaghito'. Parigi referred to him as a chaplain at the Florentine court in 1618, and he is in fact recorded as such in the court salary rolls for 1620. He became Gagliano's associate in a narrower sense on 27 May 1630, when he was made a canon of S Lorenzo, Florence, with the title 'S Amato Abate'. He made his will on 14 July 1649 (according to a document in *I-Fas*).

Benedetti seems to have been a musical dilettante: his name has not been found in salary lists of musicians, and he restricted himself almost entirely to the composition of solo songs, a genre favoured by amateurs at this period. His three surviving books of *Musiche* are notable for their extremes of musical style: harsh dissonance, often unprepared and either irregularly resolved or not resolved at all, appears unexpectedly in some pieces, for example in the setting of Tasso's *Ho visto, al pianto mio* in the *Musiche* of 1617 (in *FortuneISS*); unusual harmonic progressions and the juxtaposition of long harmonically static passages with sections of rapid and seemingly directionless harmonic movement are not uncommon, as in the setting of Petrarch's *In qual parte del ciel* also in the 1617 volume; and the frequent use of short and dotted values alongside very long ones often gives the melodic phrases a discontinuous character. Many of Benedetti's monodies display a striking use of declamatory style, particularly in the madrigals (which are more prevalent in the earlier books), though he was also fond of setting penultimate syllables to long ornamental melismas that contrast sharply with the surrounding syllabic treatment of the text. Nearly all the texts that he set are secular, though there are a few spiritual ariettas and sonnets, mostly in the last book. In this same book nine songs are headed 'Parole dell'autore', but several of these are adaptations of texts by well-known poets. In his books of 1611 and 1613 Benedetti included two pieces by Gagliano and one by Peri. Their presence makes all the more apparent the radical and amateurish style of his own songs, which are a fascinating extreme in the history of the monodic genre and indispensable examples of musical mannerism in early 17th-century Italy.

EDMOND STRAINCHAMPS

**Benedicamus Domino.** A versicle sung at the end of all canonical hours except Matins, at the close of Mass in place of the *Ite missa est* in penitential seasons, and following the commemorations after Vespers and Lauds. It was performed by a soloist (or group of soloists), and its choral response, 'Deo gratias', was set to the same music.

The *Benedicamus* seems to have emerged as a distinct portion of the liturgy in Carolingian Francia. A late 8th-century customary, *Memoriale qualiter*, shows that the versicle served as the closing sentence for meal times (Hallinger, 1963), and liturgical commentator Amalarius of Metz in his early 9th-century discussion of the Offices (see Hanssens) treats it as commonplace.

The earliest melodies for the monophonic *Benedicamus* are scattered among patristic manuscripts from the late 10th century; later the tunes appear in more organized fashion in tropers, prosers and graduals. By the 13th century the number of collections devoted to the *Benedicamus* seems to have decreased, and those that exist occur mostly in missals and graduals, primarily in the kyriale, or, more rarely, in the Canon of the Mass. There is no comprehensive modern catalogue of *Benedicamus* melodies, but partial listings of monophonic and polyphonic settings are available in a number of different studies (see Reaney; Bryden and Hughes; Huglo; Barclay; Gallo; Robertson, 1988; and van der Werf).

The most elaborate *Benedicamus* melodies were reserved for the great Offices of Vespers and Lauds. Simpler ones were employed in lesser services and when the chant was substituted for the *Ite missa est* at Mass. The ornate chants served as showpieces, and the soloists – usually two or three singers, though maybe as many as five or six in the late Middle Ages – would normally stand conspicuously in one of three places in a church: on a step, in the middle of the Choir, or in front of the main altar. Often the soloist(s) for the *Benedicamus* would also sing the solo portions in the Great Responsory at Vespers and in the alleluia at Mass.

The paucity of collections of *Benedicamus* melodies from the late Middle Ages suggests that the chant's transmission was largely oral. A 12th-century customary of Abbot Peter the Venerable of Cluny lends support to this view; it notes that on high feasts the *Benedicamus* could be drawn from melismas of responsories: 'The *Benedicamus* should be sung according to the melody ... *Virgo Dei genetrix est, flos filius ejus* [responsory *Styrps jesse*]. The melody is not taken from the whole verse, however, but from the end of the verse, that is *Flos filius ejus*' (Hallinger, 1975, p.103). In the 13th century the Sarum Rite likewise sanctioned the practice of adapting the *Benedicamus* from a melismatic section of a responsory: 'On duplex feasts and on feasts when the invitatory is sung by three, some appropriate *Benedicamus* is sung from the *historia* [i.e. the Matins responsories] of the feast with which it deals or some other which is appropriate to the feast' (Frere, i, 254).

Three highly unusual collections of monophonic *Benedicamus* melodies clearly illustrate the practice of borrowing tunes from melismas of other chants. These collections survive in the following late 13th-century manuscripts: a Sarum missal, *GB-Mr* lat.24, ff.14–14*v* (see Harrison, 1965); a missal from ST DENIS in Paris, *F-Pn* lat.1107, ff.395*v*–96*v* (see Robertson, 1991, pl.18); and a gradual from St Corneille in Compiègne, *Pn*lat.17329, ff.246*v*–49 (see *MGG2*, pl.1; and Robertson, 1987, fig.1). The *Benedicamus* melodies are preceded by verbal and sometimes melodic cues alluding to the parent sources, which consist of antiphons, Kyries and sequences in addition to responsories; the text is carefully underlaid to the parent melisma through use of assonance. A singer could thus compose a *Benedicamus* melody orally by emulating the vowel sounds of the original chant and by changing from one syllable of 'Benedicamus Domino' to the next at the same moment when a shift would have been made in the model chant from one syllable to another. The melisma comes sometimes from the solo section, sometimes from the choral section, of a responsorial chant; this frequent use of choral music for the *Benedicamus* undoubtedly facilitated the choir's performance of the florid *Deo gratias* responses.

Further evidence for the oral transmission of *Benedicamus* melodies is preserved in ordinaries and customaries, which state that the *Benedicamus* should be sung 'as', 'like' or 'on' ('ut, 'sicut', 'super') a melody from another chant (e.g. the statutes of Lincoln Cathedral; see Bradshaw and Wordsworth, i, 369). Rubrics such as these indicate that melodies for the *Benedicamus* were routinely created from chants already notated elsewhere, often in the same book. This economy of notation likewise helps account for the lack of large numbers of written-out *Benedicamus* collections in the late Middle Ages. Favourite *Benedicamus* chants circulated throughout Europe, with such melodies as *Flos filius*, *Clementiam* (from *Qui cum audissent*, the responsory for St Nicholas), *O Christi pietas* (from the antiphon of the same name for St Nicholas) and *Clemens* (from the Kyrie *Clemens rector*) dominating the repertory.

Tropes for the monophonic and polyphonic *Benedicamus Domino* survive from the beginning of the manuscript *Benedicamus* tradition in sources from southern France and in the Codex Calixtinus. In some monophonic settings the trope text is set to the melisma of the host *Benedicamus* melody through the imitation of the vowels of the original, often of the syllable 'Do-' of 'Domino', as, for example, in *F-Pn* lat.887, f.46*v*: 'Benedicamus regi magno ore pioatque puro Deo nostro Domino' (ed. in Arlt, 1970, i, 165). Polyphonic tropes in the Aquitanian repertory run the gamut of styles from melismatic organum to note-against-note style, including settings in which organum and discant are mixed. The trope poem often precedes the text 'Benedicamus Domino' or some variant on these words, altered for grammatical reasons, as in *Noster cetus psallat letus*, in which the text ends 'benedicat Domino'. In *F-Pn* lat.1139, f.61*v*, *Noster cetus* is written in successive notation, an Aquitanian practice in which voices were copied one after the other instead of in parallel fashion, so that they seem to form a monophonic composition (Fuller, 1971). Quite often in these pieces the *Benedicamus* melody is not identifiable, and the poem obscures the structure of the composition to a point where the term 'Benedicamus *versus*' or 'Benedicamus verse-trope' would be more appropriate; these compositions resemble the genres of *versus* and conductus. Many *Benedicamus versus* texts were intended for the Virgin Mary.

An early example of Parisian polyphony from the late 11th century, in an antiphoner from the abbey of St-Maur-des-Fossés (*F-Pn* lat.12584, f.306), includes two polyphonic *Benedicamus* settings in note-against-note style . The Notre Dame school of the 12th and 13th centuries likewise produced two- and three-voice *Benedicamus* settings cast in most of the major genres of this repertory: organa dupla and tripla, clausula, rondellus and Latin and French motet. In 1198 Bishop Odo of Sully sanctioned the use of the polyphonic *Benedicamus* in the Parisian liturgy: 'and I add that the reponsory and the Benedicamus will be sung in triplum or quadruplum or organum' (Guérard, i, 74). Only three melismas (*Flos filius*, *Clementiam* and *Quem queritis*) and a few simple tones served as tenors in the Parisian repertory.

After the 13th century the quality of polyphonic setting of the *Benedicamus* declined somewhat, and composers' flagging interest in the versicle probably reflects the trend towards cultivation of sections of the Mass Ordinary in place of the Office in the late Middle Ages. Many *Benedicamus* settings from the 14th century to the 16th appear in southern German and northern Italian sources. These pieces, composed in simple note-against-note style with frequent voice crossing, are written-out examples of the oral practice *cantus planus binatim* (e.g. *D-Bsb* 40592, ff.179*v*–180; see Gallo; and Treitler). The few mensural *Benedicamus* compositions from the late Middle Ages tend to use the *Flos filius* and *Clementiam* melodies in their tenors, and a handful of settings of the versicle in imitative polyphony are found in the Trent codices.

Certain *Benedicamus* melodies have remained in use to the present day. A Venetian print from 1555 (*I sacri e santi salmi ... et Benedicamus*) contains a troped setting of *Flos filius* in imitative polyphony around a long-note cantus firmus by Adrian Willaert, and this same tune serves at Vespers on feasts of the First Class in modern publications (see *LU*, 124–7).

ANNE W. ROBERTSON

**Benedicite** [Canticle of the Three Children, Song of the Three Young Men]. One of the biblical canticles ('Bless the Lord, all you works of the Lord') sung in Eastern and Western liturgies. The canticle was known in the medieval West as 'benedictiones' because of the constant repetition of the exhortation 'benedicite' ('bless'). The text is a Greek interpolation in the third chapter of the book of *Daniel* (Apocrypha), which narrates the story of the miraculous survival of Shadrach, Meshach and Abednego in the fiery furnace prepared as a punishment for their refusal to worship the golden image of King Nebuchadnezzar. (The Vulgate equivalents of their Hebrew names are Ananias, Mishael and Azarias; see *Daniel* i.6–7.) The interpolation includes the prayer of Azarias (iii.26–45), beginning (in its Latin version) 'Benedictus es Domine Deus patrum nostrorum … qui iustus es' and the song of the Young Men, divided into two sections (iii.52–6 and 57–90), beginning 'Benedictus es Domine Deus patrum nostrorum … et benedictum nomen' and 'Benedicite omnia opera' respectively. The latter calls upon all creation to bless the Lord, an exhortation answered by the refrain 'laudate et superexaltate eum in saecula' ('praise and exalt him forever'). For Western liturgical use 'laudate' was replaced by 'hymnum dicite'.

By the last quarter of the 4th century the *Benedicite* had entered liturgical use in the Christian East. It eventually became a standard feature of the solemn and festal Byzantine morning office (Orthros), the last five verses interrupted by *stichoi* (brief poetic stanzas). When the biblical texts were replaced by poetic versions, the *Benedicite* provided the basis for the 8th of the nine odes of the *kanōn* at Orthros. (The 7th ode paraphrased the prayer of Azarias and the first song of the Three Young Men, vv.26–45 and 52–6.) The reading of *Daniel* iii that concluded the Hesperinos (Vespers) readings of Holy Saturday in the Byzantine rite ended with the chanting of verses 57–88 by the *psaltēs* (cantor), to which the congregation responded with the refrain 'hymneite kai hyperypsoute auton eis tous aiōnas' ('praise and exalt him forever').

The *Benedicite* (vv.57–88 without the refrain but concluded by a doxology and v.56) served as the variable Old Testament canticle of Sunday and festal Lauds in the medieval Western monastic and secular Office. Several 6th-century monastic rules, including that of Benedict of Nursia, referred to the singing of 'benedictiones' in their descriptions of the morning Office. (In secular use a shorter version of the canticle, consisting of vv.52–7 only, was sung during Lent; see *AR*, 12.) As part of the regular psalmody of Lauds the *Benedicite*, like the other psalms, was sung to a simple psalm tone.

In the medieval Western liturgy an elaborate 3rd-mode setting of the canticle formed part of the Office of readings at Mass on Ember Saturdays. In this context it exemplified the *lectio cum cantico*: a liturgical reading terminating in a lyrical song, for which the lector might be instructed by a rubric to change the 'tone' of his delivery. This version of the *Benedicite* (analysed in Ferretti) is found in the earliest Gregorian chant manuscripts (listed in Bernard). Introduced by a moderately florid prelude ('Benedictus es in firmamento caeli'), the individual strophes are constructed from three biblical verses, each beginning with the word 'benedicite', set to an embellished recitation tone (musical form: *AA′B*). Each strophe is completed by a single statement of the refrain 'Hymnum dicite et superexaltate eum in saecula' ('Sing a hymn and exalt him highly forever'). Four of the strophes (2, 6, 9, 10) begin melismatically, and it has been suggested that these divide the 'blessings' according to the following themes: cosmic creation and the elements; the earth and its creatures; rational creation; and the redeemed. The final verse concludes with a melodically heightened version of the refrain.

This setting was eventually supplanted in the Ember Saturday liturgy by a completely different one, centonized from *Daniel* iii.52–6 and other biblical sources, with the refrain 'et laudabilis et gloriosus in saecula' after every verse (*LU*, 348; see also *GS*, pl.9). A single formula, related to mode-7 psalmody, is repeated for all the verses and the concluding doxology. The Old Roman gradual of S Cecilia in Trastevere (dated 1071, *CH-CObodmer* C.74, ff.7*r*–8*v*) has an adaptation of the original Gregorian version in its main corpus, supplemented by the later Gregorian version added in the margins. The Old Beneventan liturgy divided the complete text of the *Benedicite* into four segments distributed over the four embertide Saturdays (a practice also indicated by a rubric in the S Cecilia gradual and known from other central Italian sources). A paraphrase of the canticle, *Omnipotentem semper adorant*, by Walahfrid Strabo (*d* 849), was substituted for the biblical text in some medieval manuscripts.

The Gallican liturgies inserted the *benedictiones* between the New Testament reading and the Gospel of the Mass, and they occupied a similar position in the Mozarabic Mass on Sundays and feasts of the principal martyrs (i.e. sung before the *psallendum* that preceded the Gospel). While neither text nor music for the Gallican *benedictiones* has survived, the 10th-century Mozarabic antiphoner of León (*E-L* 8) contains 26 versions, ten assigned to specific feasts and a separate collection of 15 settings for use throughout the year. Each has a different selection of verses and apparently a slightly different melody (notated in unheighted neumes and hence untranscribable). In the Ambrosian (Milanese) rite selected verses of the canticle were sung to an elaborate melody on Good Friday and after the third lesson of the Easter vigil. The Ambrosian melody (Suñol, 183; see also PalMus, 1st ser., v, 1896/*R*, 249, and vi, 1900/*R*, 296) has two refrains ('et laudabilis ... ' and 'hymnum dicite ... '), each with an 'amen' response.

At the Beneventan Easter vigil the entire third chapter of *Daniel* received an impressively dramatic presentation. (An assignment to Good Friday in some manuscripts cannot be original.) The lector began in the ordinary lesson tone, then changed to a slightly more elaborate recitative for the prayer of Azarias; the lesson tone was then resumed for verses 46–50. At that point, one of the cantors sang the verse 'tunc hii tres', and the whole culminated with the choir chanting together a florid setting of four verses of the canticle concluded by a doxology. The same practice is also found in non-Beneventan manuscripts from central Italy.

The Benedicite was rarely set polyphonically in the Renaissance: Josquin's motet *Benedicite omnia opera* begins with verse 57. The *Benedicite* (in English) was included in the Anglican service of Matins as an alternative to the *Te Deum* (*see* SERVICE), and numerous settings have been composed since the 16th century for use in that context.

JOHN CALDWELL, JOSEPH DYER

**Benedict,** Sir **Julius** (*b* Stuttgart, 27 Nov or 24 Dec 1804; *d* London, 5 June 1885). British composer and conductor of German birth. His date of birth is usually given as 27 November 1804, but Squire (*DNB*) stated that it was generally believed to have been 24 December. Benedict's father, a local banker, placed him under Ludwig Abeille for musical instruction; at the age of 15 he went to Weimar as a pupil of Hummel, who introduced him to Beethoven. His father, anxious for him to study with Weber, took him to Dresden in February 1821, and Hummel persuaded Weber to take Benedict as his first pupil. Weber soon treated him as a member of his family, and gave him 12 lessons a month. Benedict accompanied Weber to Vienna in September 1823 for the first performance of *Euryanthe* (25 October), and was present at Weber's famous meeting with Beethoven at Baden on 5 October. When Weber left Vienna on 5 November Benedict stayed behind to keep an eye on the subsequent performances.

In the summer of 1824 Weber passed him on to Barbaia, who had already secured him the post of conductor at the Kärntnertortheater. In 1825 Barbaia took him to Naples, where he became conductor at the S Carlo and Fondo theatres; he remained there for nine years as a successful conductor, pianist and teacher. He wrote three operas for Naples: despite his training they seem to have been principally in the style of Rossini. In 1834 he went to Paris, and in 1835 to London, which became his home for the rest of his long career.

In 1836 Benedict was appointed conductor of the Opera Buffa at the Lyceum Theatre, where on 31 January 1837 he brought out his one-act opera *Un anno ed un giorno*, performed at Naples earlier in the season. He was engaged as musical director at Drury Lane (1838–48) during the period of Alfred Bunn's management, which was also the most promising time for English Romantic opera. In addition to *The Bohemian Girl*, *Maritana* and other highly successful operas by Balfe and Wallace, Benedict brought out three English operas of his own, with more modest success. In 1848 he conducted Mendelssohn's *Elijah* at Exeter Hall, when Jenny Lind made her first appearance in oratorio. He accompanied Lind on an American tour in 1850, directing most of her concerts. On returning to London in 1852 he became conductor at Her Majesty's. His two remaining operas were produced by the Pyne-Harrison company at Covent Garden; one of them was *The Lily of Killarney* (based on Boucicault's *The Colleen Bawn*), by far his most popular work.

Meanwhile Benedict had become established in that thoroughly English institution, the provincial festival. He conducted every Norwich Festival from 1845 to 1878, the meeting due in 1851 being postponed until the following year to allow his return from the USA. He began to compose secular cantatas for the Norwich Festival in 1860, and wrote an English oratorio in 1870.

He had also in 1855 founded a Vocal Association modelled on the German Gesangverein, and conducted its concerts at the Crystal Palace for ten years. He accompanied for many years at the Monday Popular Concerts, and conducted the Liverpool Philharmonic Society from 1876 to 1880. J.F. Barnett described Benedict in these later years:

> He was one of the busiest musicians of the time ... It was said by some he composed during the night and taught during the day; notwithstanding he continued to be present at nearly every important concert or fashionable reception given by patrons of musical art ... Benedict was a man of engaging manners, and, of course, quite a society man; yet ... he was at all times most accessible.

In 1871 Benedict, who had previously been naturalized, was knighted, together with Elvey and Sterndale Bennett. German and Austrian honours followed on his 70th birthday. In spite of his industry and reputation, he was in need of financial assistance at the end of his life: in 1884 a 'Sir Julius Benedict Testimonial Fund' was set up with royal patronage to raise money for him, with a Jubilee Concert at the Royal Albert Hall. He continued to teach almost until his death, which occurred suddenly from heart failure. He was twice married.

The geographical progress of Benedict's career closely paralleled that of Handel; and, as with Handel, it was the Italian influence, rather than the German or English, that formed the basis of his operatic and vocal style, despite his close association with Weber. In his earlier English operas he transferred the Rossinian idiom directly to the English situation. Perhaps for this reason he could not at first match the success of technically inferior composers such as Balfe and Wallace. He gradually learnt how to write an English ballad, and in *The Lily of Killarney* he at last produced a work which could equal the popularity of *The Bohemian Girl* and *Maritana*. It can be called the first Irish national opera, though without political overtones: it deliberately evokes nostalgia for old Ireland, using musical conventions established by Thomas Moore's *Irish Melodies*. Several themes are pentatonic, including a sinister 'murder' motif (anticipated in the overture). As well as several well-written ballads there are extended scenes of dramatic tension, such as the Trio and the Act 2 finale. The scene for Danny Mann, wrestling with conflicting emotions of tenderness for Eily (the Lily of the title) and fanatical devotion to his friend's cause, is especially powerful.

In later life his music became superficially more English: he wrote choral cantatas, an oratorio, even an anthem; but to the end he was apt to plunge into a cabaletta whenever he had the chance. On the other hand, his thorough contrapuntal training, of little use in his operas, showed up well in the choral works. *The Legend of St Cecilia*, thought by some critics to be his finest work, has some strong choral polyphony as well as some trivial solo songs.

Benedict was one of the most accomplished pianists of his day, and devoted more of his time to composing, editing and teaching piano music than to any other branch of the art. His piano style could be called pre-Lisztian, maintaining to the end the light-textured virtuosity of Field, Hummel and Weber. His concertos are worthy examples of this idiom, with by no means perfunctory orchestral parts. Most of his published piano pieces, however, are hack-work, including fantasias on operas by Balfe, Barnett, Bellini, Donizetti, Flotow, Gounod, Halévy, Meyerbeer, Verdi and Wallace; fantasias on Irish, Scottish and Welsh melodies; 'Souvenirs' and 'Remembrances' of this and that – including even *Recollections of the Monday Popular Concert* (1867); variations, dances, marches, and pieces with programmatic titles. His most pleasing style is a simple lyrical one, as in *Evening Thoughts* op.49 (1853). He published an important edition of Beethoven's piano works; edited sonatas and other major works by J.L. Dussek, Mendelssohn, Weber and others; and prepared valuable collections of teaching pieces that throw light on his methods as a teacher. Like Balfe, he tried his hand at chamber music in later years, with modestly successful results. In purely orchestral music, he seems ill at ease in the absence of his two habitual companions, the piano and the voice. His biography of Weber, published in 1881, has proved to be one of the most important sources for that composer's life.

WORKS

*printed works published in piano or vocal score in London, unless otherwise stated*

STAGE

*operas, first performed in London unless otherwise stated*

Giacinta ed Ernesto (L. Ricciutti), Naples, Fondo, 31 March 1827
I portoghesi in Goa (2, V. Torelli), Naples, S Carlo, 28 June 1830, *I-Nc**
Un anno ed un giorno (1, D. Andreotti), Naples, Fondo, 19 Oct 1836; (lib rev. S.M. Maggioni), Lyceum, 31 Jan 1837, selections (1837)
The Gypsy's Warning (2, G. Linley, R.B. Peake), Drury Lane, 19 April 1838; pubd as Der Zigeunerin Warnung (Mainz, 1838); as Der Zigeunerin Weissagung, Berlin, 14 Oct 1840
The Brides of Venice (4, A. Bunn), Drury Lane, 22 April 1844 (1844); as Die Bräute von Venedig, Kassel, 20 Aug 1845
The Crusaders (3, Bunn, after J.-H. Vernoy de Saint-Georges), Drury Lane, 26 Feb 1846, selections (1846); as Der Alte vom Berge, Prague, May 1847
The Lily of Killarney (grand romantic op, 3, J. Oxenford and D. Boucicault, after Boucicault: *The Colleen Bawm, or the Brides of Garryowen* and G. Griffin: *The Collegians, or The Colleen Bawm*), CG, 10 Feb 1862 (1862)
The Bride of Song (1, H.B. Farnie), CG, 3 Dec 1864 (1864)

Adaptation of Flotow: Alessandro Stradella, Drury Lane, 1846
It. recitatives for Weber: Oberon, Her Majesty's, 1860, and for Mozart: Il seraglio, CG, 9 June 1881

CHORAL

L'amor timido (cant., P. Metastasio), Stuttgart, Aug 1822
Undine (cant., Oxenford), Norwich Festival, 1860 (1864)
6 Choral Songs (1862)
Richard Coeur de Lion (cant., Oxenford), Norwich Festival, 1863 (1864)
The Legend of St Cecilia (cant., H.F. Chorley), Norwich Festival, 1866 (1866)
St Peter (orat, Chorley, rev. J. Bennett), Birmingham Festival, 1870 (1870)
Praise the Lord, anthem (1877)
Graziella (cant., H. Hersee), Birmingham Festival, 1882 (1882)

OTHER VOCAL

Variations de concert sur le Carnaval de Venise, 1v, pf (1865)
6 Four-Part Songs, op.79 (1870); 5 other qts
Marie Stuart (L. Courtenay), scena, 1v, pf (1883)
9 trios; 9 duets: 8 Eng., 1 It.; 99 songs: 79 Eng., 3 Fr., 3 Ger., 14 It.

ORCHESTRAL

2 syms.: g, op.101, fs (1874); C, ?1874–6, private collection, London*
4 ovs.: Festival, op.42 (*c*1850); The Octoroon (1862); Le ménestrel, op.76 (1876); The Tempest, op.77 (1876)
2 pf concs.: A♭, op.90 (1867), 1st movt as Concertino no.1, op.18 (Leipzig, 1831); E♭, op.89 (1867), 1st movt as Concertino no.2, op.29 (Mainz, *c*1833)
Romeo and Juliet, incid music (1882)

CHAMBER

Sonata, vn, pf, op.1 (Leipzig, *c*1822)
Andantino, concertina, pf (1858)
Sonata, vn, pf, op.88 (1867)
String Quartet, c, op.87 (Berlin, 1875)
Romanze, D, vn, pf, op.105 (Berlin, *c*1877)

PIANO

2 sonatas: op.2 (Leipzig, *c*1823); D, op.4 (Vienna, *c*1825)
Rondo, A, op.3 (Vienna, *c*1825); Rondo brillant, A♭, op.5 (Vienna, 1827)
Caprice en forme de galop, D, op.15 (Leipzig, *c*1832); *c*60 other pieces incl. 18 fantasias on operatic/popular tunes
20 Popular Melodies for Young Performers (1850)
3 Easy Lessons, pf 4 hands (1876)
Exercises (1876)

EDITIONS

Select Practice for the Pianoforte (London, *c*1850)
Beethoven's Works for the Pianoforte (London, 1858)

NICHOLAS TEMPERLEY

**Benedictine monks.** The 'Black Monks', known since the 14th century as the Order of St Benedict (OSB). The order consists of a large number of monastic communities and federations which follow the Rule of St Benedict (*see* BENEDICT OF NURSIA), but it is to be distinguished from monastic bodies such as the Cistercians which, while retaining the Rule, broke away from the mainstream of Benedictinism to form autonomous orders.

1. Benedictine monasticism. 2. Music and liturgy.

1. BENEDICTINE MONASTICISM. When Benedict composed his Rule (*c*530) for the monastery of Monte Cassino, he could hardly have foreseen that it would become the universal norm for Western monasticism; or indeed that Benedictine monasticism was to play so central a role in the development of European civilization that historians today refer to the period between the 8th and the 12th centuries as the 'Benedictine centuries'.

The first of these historical triumphs was substantially complete by the time of Charlemagne (*d* 814), who recognized no other monastic rule within his realm. The process by which it took place is not traceable in every detail. For example, there is no evidence supporting the tradition that the Rule came to the Roman monasteries after the destruction of Monte Cassino by the Lombards in 577, and that it was brought from Rome to England when Pope Gregory sent Augustine of Canterbury (supposedly a Benedictine) there in 596 (see Brechter; Knowles, 2/1963, p.17). There is more substantial evidence for the parts played by later figures such as Benedict Biscop (*d* 690) and Boniface (*d* 754); in any event it is now generally assumed that the Rule, by virtue of its sheer quality, was gradually accepted as equal to the more venerable rules that it eventually superseded.

However, from the viewpoint of the Carolingian desire for uniformity the Rule had one defect: it was designed for Monte Cassino alone and had no provisions for assuring uniform observance among many monasteries. Charlemagne's son, Louis the Pious (*d* 840), who shared his father's desire for unity, found an energetic ally in the monk Benedict of Aniane (*d* 821). In 817 Louis appointed him president of a council of abbots at Aachen which drew up legislation designed to supplement the Rule with numerous specific regulations and to provide for their observance.

Benedict's grand scheme was not to be realized, owing to the chaotic conditions of his time which deteriorated further with the Scandinavian incursions of the later 9th century. However, reforms similar to his achieved spectacular success in the following centuries. Cluny, founded in 910, was ruled by a series of brilliant abbots and by the 11th century came to preside over a quasi-feudal network of nearly 1000 monastic houses. Similar 'orders' were organized under other abbeys, including Bec in Normandy and Gorze in the Rhineland.

Nearly all monasteries, whether federated or autonomous, adopted the Cluniac way of life. This was far removed from the simple monasticism of Benedict of Nursia, in which a community of lay monks devoted their time to manual labour, the recitation of the Office, and very basic spiritual reading. The later monks were priests rather than lay brothers; they had abandoned the practice of manual labour and devoted themselves almost exclusively to the performance of an immensely elaborate Office. Their churches were no longer the simple oratories of Benedict's time but towering stone structures that inspired the early 12th-century Cluniac Raol Grabar to speak of 'the white mantle of churches which the world put on'. Romanesque ecclesiastical architecture was in fact a Benedictine architecture, as can be witnessed today in countless churches ranging from the exquisite Ste Foy of Conques, France, to the mighty English cathedral of Durham. The portals, capitals and cloisters of churches such as those at Autun, Moissac and Vézelay were adorned with sculpture of surpassing imagination, while the monks engaged in copying manuscripts developed their craft into a major art form.

The order counted among its ranks many of the most learned men of the time, for example, Lanfranc, Anselm and Abelard, who fulfilled the promise of Carolingian Benedictines such as Alcuin and Hrabanus Maurus. It provided the Church with its most brilliant bishops and at the same time exercised great influence in secular affairs, both by furnishing advisers for rulers, and acting as a feudal authority by virtue of its extensive territorial holdings. In fact Europe in about 1100 could, without exaggeration, be regarded as a Benedictine civilization.

Among the first signs that this hegemony was at an end was the breaking away of reform groups in the 11th and

12th centuries. Some, like the Camaldolese and the Carthusians, sought a return to the pre-Benedictine eremitical life, while others like the Vallombrosans and Cistercians wished only to revert to a primitive observance of the Rule. During the 12th and 13th centuries the leadership of the Black Monks was successfully challenged in many areas: for example, intellectual leadership with the rise of the universities, and artistic leadership with the undertaking of book illumination by urban workshops of lay artists.

In the 14th and 15th centuries the process of decline continued in spite of reform efforts like the establishment of the Italian Cassinese Congregation (1424) and of the Bursfeld Union in Westphalia (1434). Perhaps the most serious aspect of the decline was an increase in the practice of *commendam*, whereby a secular prelate or even a layman might hold the office and benefices of abbot without participating in the regular life of his monastery. Thus deprived of internal leadership, monasticism offered little resistance to the Protestant Reformation; by 1560 it had entirely disappeared in England, Switzerland, Holland and western Germany, and was severely weakened in France and central Europe. Yet in the 17th century the institution's remarkable resilience was manifested in a revival best exemplified by the French congregations of St Vanne (1604) and St Maur (1621). The latter produced a century of scholars including Jean Mabillon, Luc d'Achéry and Bernard de Montfaucon, whose vast output in patristic philology and medieval history and whose critical method still command respect.

The climate of 18th-century rationalism was unhealthy for monasticism, and the French Revolution, together with the movement towards secularization in other Catholic countries, dealt it what appeared to be a death blow. By 1830 there were but a handful of monasteries, barely maintaining themselves, mostly in southern German-speaking areas. Then came the most remarkable of all monastic revivals. Within a few decades vigorous foundations sprang up, including Solesmes in France (1837) and Beuron in Germany (1868); the first American monastery was founded at Beatty, Pennsylvania, in 1846, and monasticism in Britain, after its tentative beginning at Downside in 1814, was flourishing by mid-century. The 19th-century renaissance maintained its momentum until after World War II, and by about 1960 Benedictinism was at its most flourishing since the 12th century, both with respect to numbers and to the quality of observance. Then came a blow from an unexpected quarter. The modern reform movement in Roman Catholicism, given impetus by the Second Vatican Council (1962), has called, in effect, for a purge of the medieval elements in the Church. Benedictine monasticism, even taking into account its adaptability, is essentially a medieval institution; in the decades since Vatican II it has been forced to engage in an exercise of self-questioning about the relevance of its mode of life for the present and the future.

2. Music and liturgy. The fortunes of Benedictine music have consistently followed the fortunes of general Benedictine history. During the 'Benedictine centuries' the order was in the forefront of musical development; during the later medieval period of decline it receded into the background, and in the 19th-century revival it achieved a dramatic restoration of Gregorian chant.

Benedictine musical history begins with the Rule; chapters 8–19 are devoted to the earliest concise and comprehensive description of the Office, including its daily horarium, the weekly ordering of the 150 psalms, and the occasions at which the various antiphons, responsories, hymns (*ambrosiana*), lessons and versicles were to be sung. The horarium was based on the Roman system which divided the day and the night into 12 hours each; at the latitude of Monte Cassino a day hour varied in length from about 45 minutes on 21 December to 75 minutes on 21 June. The first service, *vigiliae* (the later Matins), began shortly after the eighth hour (between 1.50 and 2.30 a.m.) during the winter cycle (from 1 November to Easter); during the summer cycle it began about an hour before dawn. The second service, *matutini* (the later Lauds), began at dawn. The first of the shorter services, Prime, began at sunrise, Terce at the beginning of the third hour, Sext at midday and None in the early afternoon. Vespers was recited about half an hour before sunset, and Compline at dusk, after a break for supper in the summer or a simple collation in winter. A point that has long troubled historians is the omission from the Rule of daily Mass, but recent commentators have found a satisfactory explanation for this in the fact that Benedict and his fellow monks were not priests.

The Benedictine Office must have taken from three to four hours to perform, considerably less time than that of the later Carolingian and Cluniac liturgies. The relatively primitive nature of 6th-century Monte Cassino has caused some to question whether the Office was actually sung there or whether it was merely recited. Watkin, after examining both the language of the Rule and the contemporary state of the chant, has argued convincingly that it was sung. He conceded nevertheless that liturgical music was far from being as important for Benedict as it was for later monasticism. It is clear that Benedict's famous phrase 'nihil operi Dei praeponatur' ('nothing is to be put before the work of God'; chap.43) means simply that a monk must stop whatever he is doing at the appointed time for the Office, and not, as was later suggested, that the Office is the single essential function of the monastic life.

Music did, however, come to occupy a place of enormous importance within Benedictinism. Two historical developments help to explain this. First, since Benedictinism came to be virtually synonymous with Western ecclesiastical culture, new musical achievements were necessarily Benedictine. Thus Benedictine monks were crucial to the development of the so-called Gregorian chant, which took place in Frankish lands of the 9th century, and they were responsible for copying many of the earliest notated chant manuscripts.

The second was an internal development: the change from the lay monk to the clerical choir monk. By Carolingian times Benedictine monasticism had abandoned manual labour, had accepted that monks were normally priests, and had come to regard the singing of the liturgy as its central task. This process, which can be observed in the *Capitularies* of Benedict of Aniane, reached its climax two centuries later in monastic centres like Cluny. By that time the singing of the liturgy must have required about eight hours on a normal day and considerably longer on Sundays and feast days. There were massive accretions to the original Benedictine liturgy. The daily conventual Mass, sung at Terce, was to be expected within a clerical monasticism, but a second Mass, usually for the dead, was added after Prime, and

eventually yet another in honour of the Blessed Virgin. Before Matins were sung the 15 'gradual psalms'; after Prime the seven penitential psalms and the litany; and after all the Hours *psalmi familiares* on behalf of monastic patrons. By the 9th century an Office of the Dead was added, consisting of Matins, Lauds and Vespers; by the late 10th century an Office of All Saints, comprising Lauds and Vespers; and this itself was then replaced by a full Office of the Blessed Virgin. Most of these accretions were confined to ferial days, while the liturgy of Sundays and feast days was expanded by the addition of tropes, verses, proses etc. rivalling in length the original chants.

The secular cathedrals and churches, which in general conformed to monastic usage, likewise accepted these liturgical additions. The popularity of the latter is indicated by their forming the basis of late medieval lay Offices such as are contained in the English Prymer, the French Book of Hours and the German *Hortulus animae*. Musically, many of them were comparatively insignificant, but certain of them, such as the Office and Mass of the Blessed Virgin, were of great importance for late medieval polyphony.

Apart from liturgical chant (in the restricted sense), there are several Benedictine musical achievements of central importance, most notably, the establishment of music theory, the development of ecclesiastical vocal polyphony, the introduction of the pipe organ into the church and the creation of liturgical drama. The music theory of late antiquity, even when expounded by Christian theorists such as Boethius and Cassiodorus, was a mathematical discipline, basically unconcerned with contemporary music. However, Benedictine theorists of the period from the 9th to the 11th centuries, like Aurelian, Hucbald of St Amand, Pseudo-Odo and Hermannus Contractus, while retaining a mathematical bias, took the crucial step of applying classical modes of thought to an analysis of their everyday musical experience – the chant – and worked out fundamental theoretical concerns such as the system of consonances and the eight ecclesiastical modes. The earliest efforts at notated polyphony also took place within Benedictinism and first flowered in the polyphony of the Winchester Troper and that of the Cluniac monasteries associated with St Martial of Limoges. The pipe organ, which after its reappearance in the West in 757 came to be employed by monastic teachers as a vivid illustration of the mathematical laws underlying pitch relationships, made its way into abbey churches with increasing frequency during the 10th century. The most noteworthy example of this was the introduction of the organ into English churches during the monastic revival of Dunstan, Oswald and Ethelwald (*d* 983), the last of whom oversaw the installation of the legendary organ in the Old Minster at Winchester. It was also under Ethelwald's aegis that the *Regularis concordia* ('Monastic Agreement of Monks and Nuns of the English Nation') was produced; this document contains the earliest preserved example of a fully rubricated liturgical drama, the QUEM QUERITIS dialogue.

In the second half of the 12th century, however, as general cultural leadership passed into the hands of groups other than the Black Monks, so too did liturgical leadership. Benedictine liturgy, with its accretions, became an obvious target for reform. The Cistercians, for example, eliminated tropes and excised long melismas from the chant. More important was the rite of the papal curia (see Van Dijk and Walker): in order to bring the liturgy into conformity with its active and mobile way of life, the curia shortened it by eliminating tropes and other accretions and by assigning the votive Offices to specific dates rather than having them sung daily. The Franciscans adopted the curial liturgy and promulgated it, creating a serious rival to the Benedictine observances and eventually exercising a crucial influence upon Pius V's Breviary (1568) and Missal (1570). The Benedictines themselves in large measure adopted the principles underlying the curial liturgy: the 15th-century Bursfeld and Cassinese reforms, followed by the 1612 monastic breviary of Paul V, left the Benedictines with a Mass almost identical to the 'Roman' (i.e. curial) Mass and an Office differing only from the 'Roman' in certain peculiarities, such as Benedict's original ordering of the psalms, and in vestiges of the votive Offices.

Closely tied to the surrendering of liturgical leadership is the loss of musical leadership; this is most decisively demonstrated in the development of modal and mensural polyphony within the sphere of the secular cathedral of Notre Dame in Paris, and its exposition by scholastic theorists like Johannes de Garlandia and Franco of Cologne. From the remaining centuries of the Middle Ages and to modern times, Benedictinism remained largely outside the mainstream of musical progress, preserving the chant and occasionally incorporating contemporary trends. To cite an example of the latter, in late medieval England, where many of the great cathedrals like Canterbury, Durham and Winchester were also Benedictine abbeys, endowed chapels were constructed and secular musicians engaged to train choristers to perform polyphonic votive Masses and Offices. A more extraordinary adaptation took place in the splendid 17th- and 18th-century monastic churches of Bavaria and Austria: the choir screens were removed and orchestras were installed in the sanctuary to accompany the concerted music at Mass and Vespers. At the same time operas and oratorios were performed in the halls of the grander Benedictine establishments; Kremsmünster and Melk, to name but two, figured among the principle musical centres of the time, as is attested by their great collections of symphonies. Mozart himself played the organ on one occasion at Melk.

In the monastic renaissance of the 19th century, Benedictine musical conservatism was channelled into creative revival. The Liturgical Movement, which swept the church in the 19th and 20th centuries, and whose influence is still felt throughout the Western Church, was in its early stages primarily the product of new Benedictine foundations such as Solesmes and Maria Laach. In the USA the movement had its unofficial centre at St John's Abbey, Collegeville, Minnesota, the largest Benedictine community in the world. Central to the movement was the meticulous performance of Gregorian chant. The monk scholars of SOLESMES did much to restore the chant, and while their rhythmic system was controversial, it enabled the chant to function both as practical church music and as an aesthetic experience for the musically cultivated. Pius X in his *Motu proprio* (1903) and Pius XII in *Mediator Dei* (1947) proclaimed it as the primary official music of the Church.

It is no small irony that in recent decades the very Liturgical Movement that was largely the creation of

Benedictines has portrayed the singing of chant as a practice of dubious liturgical value.

**Benedictio cerei** (Lat.: 'blessing of the candle'). *See* EXULTET.

**Benediction** [Benediction of the Blessed Sacrament] (from Lat. *benedictio*: 'blessing'). In the Roman rite, a ceremony comprising the exposition and veneration of the Sacred Host, the singing of hymns and a blessing of the faithful with the Host. It is not part of the Mass in the strict sense. Benediction probably developed from the new devotion to the Sacrament that appeared in the Latin West from the 12th century, reflected in innovations such as the Elevation within Mass and the processions carrying the Sacrament on the feast of Corpus Christi (instituted 1264). Hildebrand, Benedictine abbot at Hildesheim, issued instructions in 1301 that the faithful were to be blessed with the Host at a station during the Corpus Christi procession while the choir sang the antiphon *O admirabile commercium* (Browe, 74, n.9, cited also in Righetti, 613); there is further evidence of Benediction in northern Europe in the 14th century, but not in Italy until much later.

Benediction developed as an evening devotion, not necessarily allied to Corpus Christi, and it was further emphasized as a counterblast to the Reformers' denial of the doctrine of transubstantiation; nevertheless, the service was not recognized by the Roman Church as a true liturgical action until 1958. The chant prescribed for Benediction is *Tantum ergo*, but the detail of the service is variable and many other eucharistic chants are customary; there are 250 chants in the *Cantus selecti ad benedictionem* (Paris, 1963), and vernacular hymns have been used for it too. Polyphonic settings and organ music have, since the Counter-Reformation, also played an established role within the service; the repertory of settings of the *Tantum ergo*, *Ave verum corpus* and other texts is vast, and most Catholic church composers since the 16th century probably contributed to it.

□

**Benedictional** (Lat. *benedictionale, liber benedictionum*). A book containing the blessings pronounced by the bishop at Mass before Communion in the Western Church. Some manuscripts, such as the Benedictional of Ethelwold (10th century, *GB-Lbl* Add.49598), are richly illuminated. *See* LITURGY AND LITURGICAL BOOKS, §II, 4(v).

**Benedictiones.** Office antiphons and Mass chants in the Mozarabic rite. *See* MOZARABIC CHANT, §§3(v) and 4(iv).

**Benedictis** [Benedetti] **da Pascarola, Giovanni Tommaso** (*b* ?Pascarola, ?1550–60; *d* before 1601). Italian composer. He was named after his probable birthplace, a village 13 km north of Naples. His *Primo libro de madrigali* for five voices was published in Venice; its dedication (to 'Giovan Thomaso Saracino') is dated the last day of February 1589. On the title-page he is called 'Don'. On 12 June of that year (not 1587 as stated in *MGG1*) the governors of SS Annunziata in Naples, dissatisfied with their ailing *maestro di cappella* Giovanni Domenico da Nola, decided to replace him with 'R[everen]do Giov. Tommaso' at the monthly wage of 70 ducats. Nola successfully blocked this move by appealing to an ecclesiastical council. Pannain stated, perhaps erroneously, that Pascarola was *maestro di canto* of the Annunziata chapel from 1576. Cerreto in *Della prattica musica* (1601) mentioned Pascarola among the excellent composers no longer living.

Although the inclusion of a madrigal by Pascarola in Califano's book (1584) might suggest that Califano taught

Pascarola, the two composers' styles are markedly different. Pascarola's works are more intricate, relying less on chordal texture and more on lengthy points of imitation which use double subjects, inversion, diminution and (double) augmentation. The poems are by Sannazaro (20), Petrarch (four) and Tansillo (one).

Pascarola was probably not related to Donato de Benedictis, a Celestine monk from Taranto who in 1614 published at Venice a book of motets for from two to four voices with basso continuo.

KEITH A. LARSON

**Benedict of Nursia** (*b* Nursia [now Norcia], Umbria, *c*480; *d* Monte Cassino, after 546). Italian saint and monk. His Rule became the norm for Western Christian monasticism. The only source of information concerning Benedict's life is book 2 of Pope Gregory's *Dialogues* (*c*594). Gregory was primarily interested in Benedict's miracles, and although he outlined the main events of Benedict's life he did not assign dates to them. The sole date of any certainty is that of the visit of the Ostrogothic King Totila to him near Monte Cassino, probably in 546; all others rest on speculation.

Benedict was born into a 'good family' (Gregory's 'liberiori genere'). As a youth he was sent to Rome to pursue his studies ('liberalibus litterarum studiis'), but after a time, distressed by the worldliness of that city, he left it and settled near Sublacum (now Subiaco) for three years, living the austere life of a hermit in a cave on the craggy cliffs of the Anio valley. As his fame spread, he was asked by a group of lax monks to undertake a reform of their monastery at Vicovaro. This venture was unsuccessful, and he then began to organize his growing band of disciples into a cluster of small monastic communities according to the Eastern model.

His activity excited the jealousy of a local priest, Florentius; this prompted Benedict to leave his monasteries in the charge of others and to set out towards the south with a small group of companions. He stopped at Casinum, a ruined town on the Via Latina between Rome and Naples; there, on the summit of the mountain overlooking the town, he founded Monte Cassino, the monastery that was to be the mother house of Benedictinism. It was probably this new, carefully organized and self-sufficient monastery for which he wrote his celebrated Rule.

In its 73 short chapters the Rule represents a remarkable blend of practical and spiritual teaching. The administrative needs of the monastery are dealt with concisely and comprehensively, and spiritual directives are given in a manner that tempers austerity with humanity; in this latter respect, the Rule is unlike much earlier monastic legislation. Musically, the Rule is significant in that it stresses the importance of the Office and clearly sets forth its horarium (chaps.8–19), specifying how the 150 psalms are to be distributed throughout the week.

Benedict's Rule was unquestioningly assumed to have played a central part in the development of Western civilization; but the author's personal achievement was called into question when in 1938 it was claimed that the Rule was in great part derived from the *Regula magistri*, an anonymous monastic rule previously assumed to have been dependent on that of Benedict. An intense controversy ensued, but most scholars now acknowledge the anteriority of the *Regula magistri* and Benedict's dependence upon it. Nevertheless, the significance of Benedict's own accomplishment has been reaffirmed, for the value of his Rule resides largely in its character as a concise, well-integrated combination of the best material in earlier sources. The long, rambling, and occasionally eccentric *Regula magistri* cannot seriously compete with Benedict's Rule in historical importance.

JAMES W. McKINNON

**Benedict of Peterborough** (*d c*1193). Benedictine abbot and composer. He was a monk, and later chancellor (1174) and prior (1175), of the cathedral priory of Christ Church, Canterbury, and was appointed abbot of Peterborough in 1177. A friend of Archbishop Thomas Becket, whose murder he may have witnessed, he composed the rhymed monastic office of St Thomas of Canterbury (*d* 1170) as well as many other writings about Thomas, presumably shortly after the saint's martyrdom. The plainchant Office, which begins with the *Magnificat* antiphon *Pastor cesus* (first responsory *Studens livor*), includes 22 antiphons and 12 responsories and is one of the most advanced compositions of its time, with texts in accentual rhyming verse and music of great melodic richness, fully exploiting tonal resources within a modal framework. The Peterborough chronicler Robert of Swapham expressly attributed both text and music to Benedict: 'totam dico, quia dictamen cantu excellenter insignivit'.

DAVID HILEY

**Benedictus (i)** (Lat.: 'blessed'). Part of the SANCTUS after the first Hosanna, consisting of the sentence 'Benedictus qui venit in nomine Domini' followed by a repeat of the Hosanna. It is an adaptation of a quotation from *Matthew* xxi.9: 'Hosanna to the Son of David! Blessed is he who comes in the name of the Lord! Hosanna in the highest!' which is itself an adaptation of Psalm cxviii.26. It is found in the Roman liturgy from the 7th century, and may have

been added to the Roman Sanctus, together with the two Hosannas, through Gallican influence. It was also sung in various oriental rites and is attested in the Jewish Pesaḥ (Passover) ritual.

In the Roman Mass, the Benedictus was until recently separated from the Sanctus by the consecration (a procedure outlined in the *Caeremoniale episcoporum* of 1600). According to Jungmann (*Missarum sollemnia*, ii, 137) this was 'obviously an attempt to accommodate to the canon a polyphonic style of song wherein the richer melody of the Sanctus ... stretches out to the consecration, while the Benedictus, along with the second Hosanna, fills out the rest of the canon'. Wagner and others also attributed the practice to the influence of polyphony, and certainly the Benedictus has usually appeared as a separate section in polyphonic masses since the Middle Ages. (*See also* ORDO CANTUS MISSAE.)

In Renaissance polyphonic settings, the Benedictus was usually set for fewer voices than the rest of the Mass; later it was at times set as a solo aria (Bach's B minor Mass), for soloists and chorus (Mozart and Haydn), or was emphasized by a change in tempo (Schubert, Beethoven, Stravinsky).

Although the Benedictus was included in the Communion Service in the Anglican Prayer Book of 1549, and set by Marbeck (1550), it was omitted from the 1552 and subsequent editions. This may explain why there is music for it in the Wanley Partbooks (1546–7, containing ten masses in English), whereas it was rarely set by Elizabethan and later composers. By the 19th century, however, the Benedictus was once again included in music for the Anglican rite.

RICHARD SHERR

**Benedictus (ii)** (Lat.: 'blessed'). The first word of the canticle of Zechariaḥ (Zachary), 'Benedictus Dominus Deus Israel' (*Luke* i.68–79), sung towards the end of the Office of Lauds in most Latin rites, after the 9th *ōdē* of the *kanōn* in the Byzantine morning Office of Orthros (it replaces this *ōdē* during Eastertide), and before the Nicene Creed at Anglican Matins. It is also the first word of the canticle of David, 'Benedictus es, Domine Deus Israel patris nostri' (*1 Chronicles* xxix.10*b*–13), the festal canticle sung to the ordinary Office psalmody at Monday Lauds in the Roman monastic and secular Office.

The original assignment of the canticle of Zechariah to Lauds was presumably prompted by the words: 'the day-spring from on high hath visited us to give light to them that sit in darkness'. Benedict of Nursia referred to the canticle as the 'canticum de evangelia', and a near contemporary, known only as the 'Master', called it simply 'evangelia' in his rule for monks. In the Gregorian (though not the Old Roman) repertory, a special psalmody in each of the modes and with ornate intonations and cadences is reserved for the singing of the *Benedictus*; the 'Gospel antiphon' sung with it is also generally more ornate than the normal Office antiphons. At solemn celebrations of Lauds the incensation of the altar takes place during the singing of this canticle. In the Gallican rite the *Benedictus* was sung at Mass immediately before the collect, but no evidence regarding the nature of its chant has survived.

Polyphonic music for the Roman Catholic Holy Week Office of TENEBRAE, which concludes with Lauds, sometimes included a simple *falsobordone* or predominantly chordal setting of the *Benedictus*. Palestrina wrote several settings (some of which may not be authentic) as did Lassus, Victoria, Gesualdo, Corteccia, Antoine de Févin, J.G. Pérez, Tallis and Orazio Vecchi. Polyphonic settings of the text in English have continued to be composed by musicians writing for the Anglican morning SERVICE.

For liturgical texts from the book of *Daniel* beginning with the word 'Benedictus' *see* BENEDICITE.

JOHN CALDWELL, JOSEPH DYER

**Benedictus a Sancto Josepho** [family name Buns] (*b* Geldern, *c*1642; *d* Boxmeer, North Brabant, 6 Dec 1716). Dutch composer. He entered the Carmelite monastery at Geldern in 1659, took his vows in 1660 and was ordained in 1666. Before 1671 he was transferred to the monastery at Boxmeer, where he served as sub-prior at least during the years 1671–4, 1677–83 and 1692–1701; he was also organist from 1679 until his death.

Benedictus composed mainly sacred vocal works, which include seven masses, two requiem settings, six litanies, ten partly allegorical dialogues and numerous motets on Latin liturgical and non-liturgical texts. All have instrumental accompaniments; the majority have an instrumental introduction, some even a symphony or sonata in the middle. These works, which are predominantly in a concertato style, are sound technically, but there is little imaginative modulation and only sporadic chromaticism. The sonatas op.8 are arranged in a cycle of fifths, with a sonata which modulates from F♯ minor to E♭ major at the centre of the cycle.

**Beneken** [Benecken], **Friedrich Burchard** (*b* Kloster Wennigsen, nr Hanover, 13 Aug 1760; *d* Wülfinghausen, nr Hanover, 22 Sept 1818). German composer. He studied theology at Göttingen, then lived for a time in Kloster Wennigsen before being offered a pastorate in the town of Ronneberg in 1790. In 1802 or 1803 he became pastor of the church in Wülfinghausen, where he remained until his death. Although he published several philosophical works, he is primarily remembered as a lied composer, especially of the well-known *Wie sie so sanft ruhen* (often wrongly attributed to C.G. Neefe or to C.H. Graun). This work, an elegy, first appeared in *Lieder und Gesänge für fühlende Seelen* (1787); it was shortly thereafter published separately, and later became known under numerous other titles, including *Der Gottesacker*, *Grabgesang*, *Der Friedhof* and *Der Entschlafenen*. It has been frequently set for choir as *Am Grabe*. His numerous other lieder and several keyboard pieces (mostly simple minuets) similarly show a simple, direct style.

WORKS

Collections: [14] Lieder und Gesänge für fühlende Seelen, nebst 6 Menuetten (Hanover, 1787); Lieder und kleine Klavierstücke für gute Menschen in den Stunden des Frohsinns und der Schwermuth (Hanover, 1794); Lieder der Unschuld und Liebe (Hanover, 1802); Lieder der Religion, der Freundschaft und Liebe (Hanover, *c*1805)
77 lieder in A.L. Hoppenstedt: Melodien zu den Liedern für Volksschulen, i, ed. Beneken (Hanover, 3/1809)
In memoriam: Rosen welken und verschwinden (Göttingen, 1776), ?lost

RAYMOND A. BARR

**Benelli, Antonio (Pellegrino)** (*b* Forlì, 5 Sept 1771; *d* Börnichau, Saxony, 16 Aug 1830). Italian tenor, composer and singing teacher. He made his début as a singer in 1790 at Naples, where his own opera *Partenope* was produced eight years later. After appearing at the King's Theatre in London (1798–1800), as Paolino (*Il matrimonio segreto*), Paisiello's Almaviva, and Admetus (Gluck's *Alceste*), he settled in Dresden in 1801 and sang there for over 20 years until his voice failed. He then taught singing in Berlin until 1829, when he was dismissed for publishing an attack on Spontini. Though not gifted with a large or brilliant voice, Benelli was a good teacher, and composed many vocal pieces.

ELIZABETH FORBES

**Benenoit.** *See* BENOIT.

**Beneš, Juraj** (*b* Trnava, 2 March 1940). Slovak composer. After studying the piano at the Conservatory in Bratislava (1954–60), he continued his musical education at the Academy of Music and Dramatic Art, where he studied composition with Cikker until 1964. Appointments followed as répétiteur with the Slovak National Opera (1964–74) and as lecturer in music theory at the Education faculty of Comenius University (1974–83) and then at the Bratislava Academy; he became a full lecturer at the latter in 1989. Between 1988 and 1991 he was also dramaturge at the Slovak National Opera. His works have received several awards, including first prize (for *Lunovis canzone corale*) at the Arezzo competition in 1978, twice the Ján Levoslav Bella Prize (for *Tri monódie* and the Second String Quartet), in 1983 and 1989 respectively, and the prize from the Slovak Ministry of Culture (for *Hostina*, 'The Feast') in 1984. In 1994 he was elected president of the Slovak section of the ISCM, and in 1997 he became a professor of composition in the Czech Republic.

Beneš's early works, such as *Préférence* (1974), *Waltz for Colonel Brumble* (1975) and *Musique pour Grock* (1975) are allusions, pastiches on modernist compositional techniques. As with later works, they contain linear musical thinking whereby harmonic organization is of secondary importance. The individual horizontal lines, designed to create dense layered textures, develop separate melodic ideas supported by tonal or atonal harmony. Beneš occasionally uses counterpoint, imitation, quotation, motor rhythms and polyrhythms, his aim being to express motion that is freely progressing but free also of large contrasts, gradations and high drama; in this sense he was one of the first Slovak postmodernists of his generation. *Šest' tancov* ('Six Dances', 1975), the concert aria *O virtú mia* (1983) and Canzona no.2 (1985) are indicative of his predilection towards historical forms. In the latter half of the 1970s modality appeared in his music for the first time.

WORKS
*(selective list)*

STAGE AND VOCAL

Ops: Cisárove nové šaty [Emperor's New Clothes] (1, Beneš, after H.C. Andersen), 1966; Skamenený [Petrified] (1, Beneš, after J. Král), 1974; Hostina [The Feast] (3, after P.O. Hviezdoslav), 1980; The Players (2, after W. Shakespeare: *Hamlet*), 1994
Choral: Sym., chbr chorus, vn, 1974; 3 Female Choruses, 1974; 2 Male Choruses, 1975; 4 Mixed Choruses, 1976; Lunovis canzone corale, children's chorus, 1978; Hymna k 130. výročiu narodenia P.O. Hviezdoslava [Hymn for the 130th anniversary of the birth of P.O. Hviezdoslav], 1978; Capriccio per coro misto sulla una villanella di Orlando di Lasso, 1980; Requiem (Hviezdoslav, J. Král, I. Krasko, Latin fragments), solo vv, chorus, orch, 1986; Madrigalsonetto secondo Petrarca-Liszt, 1991
Other vocal: Monológy (M. Kundera), 7 songs, A, str qt, 1962; Cantamines, 5 songs, S, fl, hp, 1970; 4 piesne [4 songs], T, pf (LH), 1973; Vocalisez (Z. Herbert), 3 songs, S, pf, 1973; 6 romansov [6 Romances] (K. Prutkov), Bar, pf, 1974; Styskani po matce [Nostalgia for Mother] (M. Cervenka), low male v, drum, pf, 1975; Addio . . ., 5 songs, A, pf, 1975; Kľúč [Key] (M. Valek), 2 songs, B, cl, 1975; Zlomky Janka Krála [Fragments by Janko

Král], B, 1976; 3 monodie [3 Monodies] (Hviezdoslav), S, 2 vn, vc, hpd, 1979; Temptation of St A, 6 male vv, 1981; O virtú mia (Dante), B, org, 1983; Il sogno di Poppea, 7 canzoni, S, pf, 1984 [after Monteverdi]; Intoleranza, S, pf, 1987; Quatro identificazioni, S, pf, 1988; Cant. 'Eating', S, b cl, 1992; Cant. no.2 'Déjeuner' (J. Prévert), S, cl, perc, 1995

INSTRUMENTAL

Orch: Allegro, 1974; Mémoire, 1977; Music for Tpt, Perc and Str, 1978; In memoriam Pavel Raška, 12 str, 1981; Music for Orch, 1982; Prelúdium, 1983; Music for J.S., 1985; Music for Trbn and Orch, 1989; Puzzle, str, 1990; When music . . ., 1991; Musica d'inverno, vc, orch, 1992; His Master's Voice, 1997

Chbr: Suite, vc, pf, 1971; Préférence, 9 insts, 1974; Musique pour Grock nos.1–3: fl, chit; cl, vn, trbn; str trio, 1975; Waltz for Colonel Brumble, 11 insts, 1975; Intermezzo no.1, 6 fl, 1976; Canzona no.1, wind qnt, 1977; Str Qt no.1, 1977; Intermezzo no.2, 12 vc, 1979; Prelúdium a sonáta [Prelude and Sonata], ob, hp, 1984; Str Qt no.2, 1984; Canzona no.2, fl, ob, bn, vc, 1985; Str Qt no.3, 1989; Going to, 6 vc, 1994; Chanson triste, vn, cl, vc, 1996

Pf: Variácie, 1961; Sonata no.1, 1971; Manželská hudba [Matrimonial Music], 2 pf, 1976; Sonata no.2, 1976; Sonata no.3, 1977; Sonata no.4, 1978; Suite no.1, 1980; Suite no.2 'Old Boys Anthology', 1981; Sonata no.5, 1985; Intermezzo no.3, 2 pf, 1987; Nocturnes nos.1–2, 1989; Nocturnes no.3, 1992; Alice was beginning . . ., 1993; Sonata no.6, 1995; Nocturnes nos.4–5, 1997

Other solo: 3 skladby [3 pieces], ob, 1964; Ciaccona, bn, 1975; 6 tancov [6 dances], fl, 1975; 5 invenzioni, trbn, 1976; Populacijó Hajkeles, org, 1976; Sonata, vn, 1976; Melanchólia, positive org, 1977; Lamento, vn, 1979; Sonata, cl, 1981; Sonata, vc, 1985; For instance Black Pony, basset hn, 1992; Il seme seducente della genealogia, fl, 1994

YVETTA LÁBSKA-KAJANOVÁ

**Benestad, Finn** (*b* Kristiansand, 30 Oct 1929). Norwegian musicologist. He studied the violin privately with Ernst Glaser (1947–50) and music at the University of Oslo (1950–53, MA 1953), and worked as a teacher (1950–59) and music critic (1953–61) in Oslo. In 1961 he took the doctorate in musicology at the University of Oslo with a study of Johannes Haarklou; he was professor of musicology at the University of Trondheim (1961–4) and at the University of Oslo (1965–98). He was a Fulbright scholar at the University of California, Los Angeles, 1968–9.

Benestad has exercised an important influence on the development of higher music education in Norway, both in the universities of Trondheim and Oslo and as chairman of the national Benestad Committee (1970), which reported on the training of music teachers in Norway. He is also the author of widely used teaching manuals. His most important publications have been his valuable studies of 19th-century Norwegian composers (Thrane, Haarklou, Grieg and Svendsen) but his interests also include musical aesthetics. He was a member (from 1962), and later chairman (from 1980), of the editorial committee for *Edvard Grieg's Complete Works* (Frankfurt, 1977–95), for which he was the sole editor of a number of volumes (vols. viii, ix, xviii and xix). He was awarded the Edvard Grieg Prize in 1981, a prize by the University of Oslo in 1996 in recognition of the effective way in which he has communicated the results of his research, and he later received honorary doctorates from St Olaf College, Minnesota (1993) and Westphälische Wilhelms-Universität Münster (1996). He was elected a member of the Norwegian Academy of Science and Letters in 1979, the Royal Danish Academy of Sciences and Letters in 1991 and the Academia Europaea in 1993.

JOHN BERGSAGEL

**Benet** [Benett, Bennet, Benmet, Bonet, Bonnet, Jo. Benet Anglicus], **John** (*d* ?1458). English composer. In his early or middle years he may have had some contact with John Dunstaple. Benet's motet *Lux fulget ex Anglia*, dedicated to St Thomas of Hereford, was probably written for Hereford Cathedral (where Dunstaple was a canon), possibly for the celebrations of the centenary of St Thomas's canonization in 1420; like Dunstaple, Benet composed a motet for St Alban's Abbey. He was perhaps a pupil or protégé of the more famous composer.

He may have been the John Benet who was a vicar-choral of Lincoln Minster from 1437 to 1441; a John Benet of London, clerk, was appointed master of the six choristers of St Anthony's Hospital in the City of London in 1443. The terms of the indenture suggest that he may have been approaching the end of his career; he was still there in 1449, but a London citizen's will dated in July of that year may imply that the mastership was by then vacant. A John Benet, presumably the same man, was listed in 1448–9 as a member of the London Gild of Parish Clerks (see H. Baillie, *PRMA*, lxxxiii, 1956–7, pp.15–28). By the time of his death he was living in the parish of St Olave, Southwark, where he was buried; earlier he had lived in St Benet Fink, the parish of St Anthony's Hospital. The probate for his will is dated 4 December 1458.

Benet's earliest works appear to be an incomplete mass (nos.1–3) and a Sanctus (no.16). The mass, a very early cyclic setting, is one of the first known English works to use the terms 'unus' and 'chorus'; it is unified only by a striking homogeneity of style and by the motto opening. Both mass and Sanctus contain a good deal of rather uneven movement in minims – even in passages employing minor prolation – in a manner foreign to the elegance of the later English idiom.

Benet's transitional style is shown in the second mass (nos.4–8), a work of disputed authorship but probably from his pen. Again there is no cantus firmus; each movement is built on a tenor that constantly varies the same handful of phrases; the discantus makes use of a few recurring figures, but not in the consistent fashion of a true motto.

In his final period Benet attained to the harmonic clarity and smooth rhythmic flow of Dunstaple's mature works. An incomplete mass on *Jacet granum* (nos.9–10), if it is indeed his, demonstrates that he played an important part in developing the isomelic tenor mass; the two surviving movements are also linked by a common opening. A second Sanctus *Jacet granum* (no.18), probably an earlier work, begins differently and transposes the plainchant a 4th lower.

None of Benet's other single movements of the Ordinary appears to be based on chant. The Kyrie *Deus creator* (no.11) is a splendidly sonorous canon; duets and trios prevent the unusually thick texture (four voices) from cloying. The Gloria no.13 is paired in *GB-Ob* Add.C.87* with Credo no.15: the two works are not linked thematically, although they employ the same low clefs and dark colouring and the same melodious yet economical methods of declamation. The true pair with the Gloria may perhaps be an anonymous Credo, no.14, that stands next to Credo no.15 in *I-TRmp* 90; it has however been transposed a 5th higher. The Sanctus (no.17) follows an uncommon plan: a pair of duets (voices 1 and 2; 2 and 3) followed by a full section for three voices, the whole scheme three times repeated.

Benet's three fine motets, isorhythmic in all voices, employ Dunstaple's normal technique of two taleae twice repeated in the proportion 3 : 2 : 1.

He is not to be identified with BENOIT.

WORKS

MASSES AND MASS MOVEMENTS

[1–3] Gloria, Sanctus, Agnus, 3vv; Gl ed. in DTÖ, lxi, Jg.xxxi (1924/*R*), 85; San and Ag ed. H.E. Wooldridge and H.V. Hughes, *Early English Harmony*, ii (London, 1913/*R*), 120 (although there is no common source, these movements may be grouped because of their similar openings and style)
[4–8] Kyrie 'Omnipotens Pater', Gloria, Credo, Sanctus, Agnus, 3vv; ed. in MB, viii (2/1970), 176, 138 (also attrib. Power and Dunstable; probably by Benet)
[9–10] Mass 'Jacet granum' (Gl, San), 3vv, *I-AO*, *TRmp* 87, 90, 92, *I-TRcap* (Trent 93); ed. in Trowell (1960), iii, 5 (chant, respond for St Thomas of Canterbury, in voice 3; San anon., unique attrib. 'Bonnet', or possibly 'Bonnum', in *AO* index)
[11] Kyrie 'Deus creator omnium', 4vv; ed. in CMM, xxxviii (1967), 69 (voices 1 and 2 in canon)
[12] Gloria, 3vv; ed. in CMM, 1/2 (1969), no.25 (also attrib. Power; probably by Power; attrib. 'Bonet', or possibly 'Bonum', in *I-AO*)
[13] Gloria, 3vv, *D-Mbs* 3232a, *GB-Ob* Add.C.87*, *I-TRmp* 90, *TRcap* (Trent 93) (scribal pairing with no.15; probably forms a pair with no.14)
[14] Credo, 3vv, *TRmp* 90, *TRcap* (Trent 93) (anon., but opening bars similar to those of no.13 transposed a 5th higher; probably forms a pair with no.13)
[15] Credo, 3vv, *D-Mbs* 3232a, *GB-Ob* Add.C.87*, *I-TRmp* 90, *TRcap* (Trent 93) (scribal pairing with no.13)
[16] Sanctus, 3vv, *TRmp* 92
[17] Sanctus, 3vv, *TRmp* 92
[18] Sanctus, 3vv, *TRmp* 90, *TRcap* (Trent 93) (chant, respond 'Jacet granum' for St Thomas of Canterbury, in voice 3 transposed a 4th lower; not a pair with no.9)

MOTETS

[19] Gaude pia Magdalena/O certe precipuus, 3vv; ed. in EECM, viii (1968), 40 (chant, respond for first Vespers, St Mary Magdalen, in voice 3)
[20] Lux fulget ex Anglia/O pater pietatis, 3vv, *I-MOe* α.X.1.11 (to St Thomas de Cantelupe, Bishop of Hereford; lacks voice 3 and end of 2; ed. (reconstructed) in Trowell and Wathey
[21] Tellus purpurium/Splendida flamigero, 3vv, *MOe* α.X.1.11 (to St Alban), ed. W.T. Marrocco and N. Sandon, *Medieval Music* (London, 1977), no.88

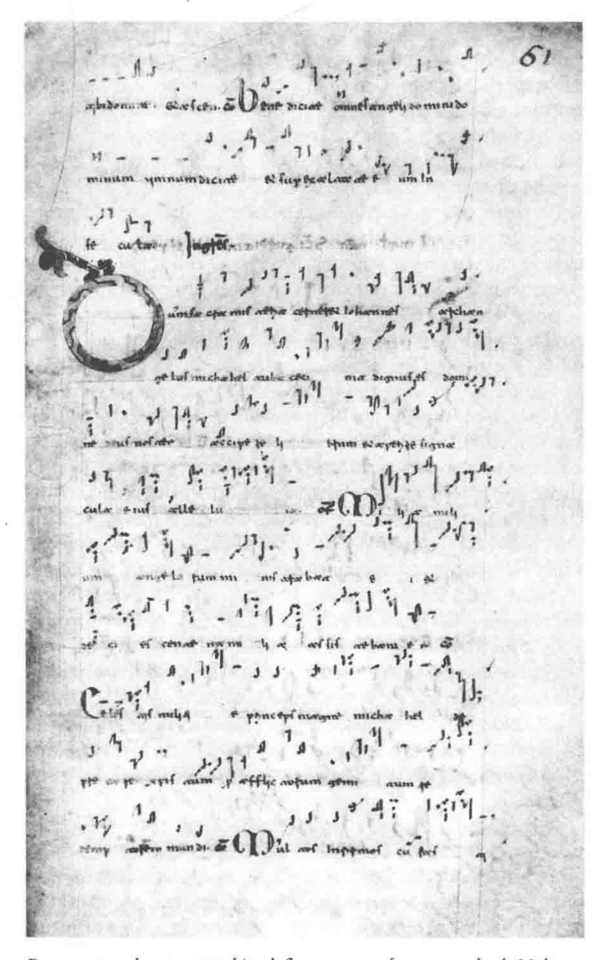
BRIAN TROWELL

**Beneventan chant.** A Latin liturgical chant repertory from southern Italy, in use from the 7th century until the 11th,

when it was suppressed. Independent in many respects of parallel developments in the Roman Church, the Beneventan chant is characterized by a formulaic and rather ornate musical style, by a tonality not dependent on a system of eight modes, and by the use of non-standard and non-biblical texts. The term 'Beneventan' is used in the literature to refer to the city of Benevento, to the area of southern Italy in which the characteristic Beneventan script was practised, or to things generally associated with this area. Thus the versions of Franco-Roman chant and the tropes and sequences composed and used there have also often been called 'Beneventan'; this article is concerned only with the early Beneventan liturgy and its music.



1. Chronology. 2. Sources. 3. Liturgy. 4. Musical characteristics.

1. CHRONOLOGY. A Latin liturgy had certainly existed in southern Italy before the Lombard invasions of the 6th century, and some of the liturgical anomalies of books such as *I-BV* 33, a 10th-century missal of the Roman rite, may be remnants of what some have called an earlier 'Campanian' liturgy. Centred on the city of Benevento, the Beneventan rite and its chant developed during the 7th and 8th centuries when Lombard power was at its height. It includes music for St Barbatus (bishop); for the apparition of St Michael on Monte Gargano, a feast and a shrine particularly dear to the Lombards and Beneventans; and for the Holy Twelve Brothers of Benevento, whose remains were interred by Duke Arichis II in his palace church of Santa Sofia in 760.

The Beneventan chant bears many relationships to the northern, Ambrosian (Milanese) chant; both were liturgical repertories of regions dominated by the Lombards, and Ambrose has been claimed as the ancestor of the two rites. The Beneventan chant was, in fact, called 'cantus ambrosianus' by its scribes, thereby acknowledging a Lombard link. Musical similarities, too, suggest that the Lombards once shared a liturgy, but as a result of geographical and political separation, particularly after the fall of the Lombard kingdom of Pavia to Charlemagne in 774, each region gradually developed its own tradition.

By the 8th century, however, the Gregorian chant must already have been in place in southern Italy, to judge from archaic features in Gregorian books from this region. Beneventan and Roman chants may have co-existed in the Beneventan zone for a time: a rubric in *I-Rvat* Ottob.145 states, 'Quando non canimus ipse ant. secundum romano. quo modo supra scripte sunt canimus secundum Ambro[sianum] hoc modo' ('when we do not sing these antiphons according to the Roman [rite, liturgy] as they are written above, we sing them according to the Ambrosian [i.e. Beneventan], as follows'; perhaps the Beneventan chant persisted among those who felt a long loyalty to Lombard heritage. The growing pre-eminence of the Roman chant can be traced through the saints of Benevento: the Twelve Brothers, celebrated from 760, have a Beneventan Mass; St Mercurius, whose relics were brought to Benevento in 768, has none. In 838 the relics of the apostle St Bartholomew were brought to Benevento, but the Mass for St Bartholomew, unique to manuscripts of the Beneventan zone, is in Gregorian style. The chronicle of Monte Cassino reports that in 1058 Pope Stephen IX strictly forbade the singing of 'Ambrosian' chant there: 'Tunc etiam et Ambrosianum cantum in ecclesia ista penitus interdixit'.

2. SOURCES. As a result of the deliberate suppression of the Beneventan chant, what remains of the repertory survives in some 90 manuscript sources from the late 10th century onwards – palimpsests and fragments from complete books containing mostly doublets, appendixes, and supernumerary additions in manuscripts of the Gregorian chant, the repertory that ultimately replaced the Beneventan. Two south-Italian missals of the late 10th century, *I-Rvat* 10673 and *BV* 33 (PalMus, xiv and xx respectively), include among their Franco-Roman liturgy a substantial portion of the Beneventan Holy Week liturgy. Three manuscript graduals from Benevento Cathedral contain almost all the surviving Beneventan chants for the Mass: *BV* 38 and 40 (11th century) include an annual cycle of masses in Gregorian chant together with a repertory of tropes and sequences, but they also contain 19 doublet masses in Beneventan chant along with special Beneventan music for Holy Week; the final fly-leaf of *BV* 35 (12th century) from an 11th-century Beneventan Mass book contains the end of the Christmas Mass and the beginning of that for St Stephen. These 11th-century sources are notated in clefless neumes with only approximate diastematy (see illustration); however, careful analysis of comparable melodies and formulae results in mostly reliable transcriptions.

*Beneventan chant notated in clefless neumes from a gradual, 11th century (I-BV 40); the Gregorian communion 'Benedicite' is followed by the Beneventan Mass for the feast of the Invention of St Michael (8 May), beginning with the ingressa 'Dum sacra misteria'*

Ex.1 *I-BV* 40, f.61–61*v*

Also among the sources are the 25 magnificent EXULTET rolls of southern Italy, which were used in important monasteries and cathedrals for the blessing of the Paschal candle during the Easter Vigil service. Such rolls, when they contain the special Beneventan text of the *Exultet*, or the Beneventan melody that persisited long after most churches had converted to the imported Franco-Roman text, testify to the extent and influence of the Beneventan ritual.

3. LITURGY. Sources of the Beneventan liturgy are incomplete, since no sacramentary, missal, lectionary or antiphoner has survived. Although music exists for most of the principal feasts, there is little evidence that the Beneventan rite included a specific set of chants for every Sunday of the year as in the fully developed Roman calendar. Non-biblical texts and texts that rearrange biblical phrases and ideas occur frequently; such a variety of texts recalls the Milanese rite with its similar range of textual sources and suggests parallels with the poetry of the Byzantine Church. Some Beneventan texts have parallels at Milan or in the Greek rite, but most do not.

The chants of the Beneventan Mass always number at least four: *ingressa*, alleluia, offertory and communion; sometimes a gradual is also present. Ordinary chants are rare in the surviving sources, but the Creed was frequently present in the Mass (a Lombard symptom, perhaps, from a time when orthodoxy was not taken for granted); a single threefold Kyrie was sung after the Gloria (as in the Milanese rite). The *ingressae*, sung without psalmody as at Milan, are among the most elaborate chants. Graduals are included in only six Beneventan masses, each consisting of a single verse with a partial repetition of the opening portion sometimes indicated. All surviving masses except those for Holy Week have alleluias, most of them sung to the same melody; another melody was used for St Stephen and maybe for other saints; a third melody was sung on Holy Saturday and was adapted, perhaps at a later stage, to other texts for Christmas, St Peter, the Transfiguration and (in the Old Roman gradual *CH-CObodmer* 74 only) the Epiphany. Offertories and communions are present for each Mass and are usually relatively simple antiphons (although the Easter communion is exceptionally elaborate). Many masses have two communions, recalling the Milanese *confractorium* and *transitorium*. Some communions are found elsewhere as offertories or as antiphons.

It is possible that the Beneventan Mass never had, and was never intended to have, the fixity that has come to be associated with the Roman Mass. A number of Beneventan chants serve multiple functions: pieces may appear as antiphons, as offertories or as communions. In addition, there are many places where sources do not agree about the piece to be assigned to a certain function in the Mass, particularly in the case of offertories and communions. This may indicate that the preservation of Beneventan chant in a Gregorian format, which requires a fixed chant for every liturgical function, has misrepresented the less fixed, more flexible nature of the Beneventan repertory.

The unique Beneventan Holy Week rites are especially well documented; they are given with full rubrics, beginning with sources from the late 10th century. Elements of these Holy Week practices, which have survived for far longer than anything else in the Beneventan rite, are found in many sources in which no other Beneventan music has been retained. Music for three Vespers services (Good Friday, St John the Baptist and Epiphany) has also survived, and a few groups of antiphons in Beneventan style have been assimilated into Gregorian books for the Offices of regional saints. There are a small number of antiphons among the pieces for rogations, and a pair of pieces for the Purification, whose style seems decidedly Beneventan even though there is nothing in their transmission to suggest that the scribe knew of their Beneventan origin.

4. MUSICAL CHARACTERISTICS. Beneventan chant is uniform in style, proceeding at a regular, rather ornate pace using mostly stepwise intervals. Throughout the chant are small melodic formulae which are repeated far more often than are their counterparts in other chant dialects. Few stylistic distinctions can be made in the repertory on the basis of liturgical function or modal category, or between music for the choir and music for the cantor. The tonal range is limited. There is no evidence that the Beneventan chant was ever subject to the effects of the eight-mode system of organization that affects much medieval music. Almost every piece ends on one of two notes (A or G), no special characteristics being specific to either group. Some larger pieces, notably the *ingressae*, are made up from many repetitions of a single long phrase.

The Beneventan communion for the feast of the apparition of St Michael (ex.1), a piece of very modest proportions, shows some typical features of the chant: recitations on a repeating *podatus* ('Multos infirmos') or on a rising three-note figure ('orando'); formulae repeated throughout the repertory (e.g. the music on 'curasti'). This piece shares its melodic shape with three other antiphons in the repertory.

The simple and unified stylistic attributes of the Benevantan chant provide a view on a specific localized musical practice of the 8th century, a valuable repertory in itself and a paradigm for the early stages of chants found in more evolved forms in other repertories.

THOMAS FORREST KELLY

**Beneventi, Giuseppe.** *See* BONIVENTI, GIUSEPPE.

**Benevento di San Rafaele.** *See* SAN RAFAELE, BENVENUTO ROBBIO.

**Benevic, Antonín.** *See* BENNEWITZ, ANTONÍN.

**Benevoli, Orazio** (*b* Rome, 19 April 1605; *d* Rome, 17 June 1672). Italian composer. He was the son of a confectioner from Lorraine, Robert Venouot (italianized as Benevolo). From 16 February 1617 to 15 March 1623 he was a choirboy at S Luigi dei Francesi, Rome, where he was taught music by Ugolini and also studied grammar and Latin. When the administration of the church passed to the Oratorio di S Filippo Neri, Benevoli, who was still only 18, obtained his first position as *maestro di cappella* of S Maria in Trastevere, Rome, in February 1624. He remained there until 1630, when he moved to a similar post at Santo Spirito in Sassia, succeeding Gregorio Allegri and also filling the posts of organist and music master. At the same time he took part in the solemn festivals celebrated at S Luigi dei Francesi and S Pietro. From 5 June 1638 to 24 September 1644 he was *maestro di cappella* of S Luigi dei Francesi, succeeding his teacher Ugolini. He then went to Vienna, where he became Kapellmeister to Archduke Leopold Wilhelm, brother of the Emperor Ferdinand III. At the beginning of 1646 he returned to Rome and according to Baini resumed his old post at S Luigi for a few weeks. From 23 February 1646 he was *maestro di cappella* of S Maria Maggiore. A decree of 7 October 1646 named him as successor to Virgilio Mazzocchi as *maestro di cappella* of the Cappella Giulia at S Pietro, and he held this important post until his death. On 14 August 1650 his 48-voice mass for 12 choirs, composed for Salzburg in 1628 and now lost, was performed. Benevoli was Guardiano della Congregazione di S Cecilia in 1654, 1665 and 1667. His personal pupils included Ercole Bernabei, Antimo Liberati and Paolo Lorenzani. Liberati blamed Benevoli's lifelong poverty for the lack of contemporary published editions of his works. Only from 1642 did his music appear in print, and then only single pieces in various anthologies.

Appraisals of Benevoli's music have hitherto been confined almost entirely to the 53-voice *Missa salisburgensis*, which was assumed to have been performed at the dedication of Salzburg Cathedral in 1628. It was regarded as at once a stroke of genius from the pen of a 23-year-old and as an anticipation of the climactic products of the monumental Roman Baroque style. In fact Hintermaier has proved that this was not the mass performed in 1628 and that Benevoli definitely did not compose it. It was probably performed at Salzburg in 1682 together with the hymn *Plaudite tympani*, and Biber has been suggested as the likeliest composer of it.

Various influences can be found in Benevoli's output, which consists entirely of sacred music and comprises, at one extreme, monodic pieces with continuo and, at the other, masses of various kinds, many for large forces. Several works are known to have been lost. Those masses that continue the Palestrina tradition, in *stile pieno* with a tendency towards homophony, stand in apparent contrast to his otherwise forward-looking technique (using *stile concertato* with opposition between soloists and ripieno), but it should be remembered that alongside innovations the perpetuation of Palestrina's style was specially required of 17th-century Roman composers of sacred music. The progressive Benevoli can be seen in a marked tendency towards modern major-minor harmonies and tonality, in his approach to form and in his treatment and disposition of textures. A characteristic feature is the principle, inherited from Palestrina and the Venetian school, of interlocking blocks of choral sound, sometimes polyphonic, sometimes homophonic. The various choirs, usually in four parts, are to be placed far apart, alternate during imitative sections, whether short or long, and then reunite. Each choir is a self-contained musical entity, and a work for four choirs, for example, is thus in 16 real parts. Counterpoint is less prominent than in the works of other representatives of the Roman school. Instrumental accompaniment is confined to basso continuos, which carry particular weight in the polyphonic structure. The solo vocal parts are freely ornamented with *fioritura*. A peculiarity of Benevoli's work is composition for equal voices, for example in his *Regna terrae* for 12 sopranos in 6 choirs with organ, and in his *Et ecce terremotus* for four basses and continuo.

WALTER GÜRTELSCHMIED/SIEGFRIED GMEINWIESER

**Benga.** Term used in Kenya to refer to a variety of popular music forms. It is used in particular to refer to a style of music that emerged in the 1960s among the Luo people in the area surrounding Lake Victoria in western Kenya. Kikuyu and Kamba musicians also developed regional variations of *benga*. The *benga* guitar-based style became nationally recognized during the 1970s. The roots of the guitar-playing style may be found in *nyatiti* (lyre) playing; the interaction of bass and lead guitars in *benga* resembles the interdependence of the bass and the treble in *nyatiti* playing. *Benga* is characterized by a tight blend of vocals and lead and bass guitars, with the bass guitar providing a strong rhythmic pulsation throughout. D.O. Misiani was a highly important figure in the development of Luo *benga*, and he and his group Shirati Jazz became widely known for their *benga* recordings and performances; other noted performers include the Victoria Kings and George Ramogi. Joseph Kamaru was active in the development of Kikuyu *benga* and helped to transfer elements of *benga* performing style to gospel choral music. *Benga* was preserved as an older guitar-band tradition in western Kenya, but also influenced the development of emergent musical traditions during the last two decades of the 20th century.

GREGORY F. BARZ

**Bengali music.** This article covers the musics of both Bangladesh and the Indian state of West Bengal. These comprise the region of Bengal, unified culturally, linguistically and historically. Its initial partition into East and West Bengal by the British in 1905 led to a great outpouring of nationalist sentiment and was a key moment in the struggle for Independence. Although the partition was reversed in 1911, at Independence in 1947, when the sub-continent was divided into India and Pakistan, Bengal was partitioned into West Bengal and East Bengal (East Pakistan). West Bengal, with a predominantly Hindu population, remained a province in India; East Bengal, with a predominantly Muslim population, became the eastern province of Pakistan with its seat of government in West Pakistan. East Pakistan fought a war of liberation against Islamabad in 1971 and became the sovereign country of Bangladesh.

### *I. Music before 1947*

#### 1. Traditional genres.

*(i) Devotional song.* The first mention of Bengali music is found in the Buddhist yogic *charyāgīti* ('*charyā* song') of the 8th to 12th centuries CE. These poems, the earliest written sources in Bengali, use the term *rāga* and contain specific rāga names, for example *Bhairavī*, *Gunjari* and *Baṅgāla* (on *rāga see* INDIA, §III, 2). Buddhism declined rapidly in Bengal with the introduction of devotional Hinduism, particularly that of the 12th-century Vaisnava poet-composer Jayadeva. His *Gītagovinda*, written in Sanskrit and depicting the sensuous love of Rādhā and Kṛṣṇa, also mentions rāga names and is claimed by some scholars to be based on *dhruvapada* form.

The *Gītagovinda* and the *Śri Kṛṣṇa kīrtana*, a song-drama written between 1450 and 1500 by Baṛu Chandīdāsa and including hundreds of songs based both on rāgas and traditional Bengali forms, served as the musical basis for the flowering of Bengali Vaisnava culture in the early 16th century. This was inspired greatly by Śrī Caitanya (1486–1533), whose spiritual teachings were taken up by poet-composers who composed many *padāvalī kīrtana* (also known as *vaiṣṇaiva gīti*) on Rādhā-Kṛṣṇa love. Narottam Ṭhākur (1531–1587) is regarded as the founder of the Vaisnava music movement, which continued until the end of the 18th century. Initially the songs were based on traditional Bengali melodies, but they later incorporated some elements from Hindustani music, including *ālāp*.

In the mid-18th century a different tradition of devotional song began to emerge. These were *śāktapada saṅgīt*, songs in praise of the goddess as represented by Dūrgā and Kālī, the texts of which were largely derived from the narrative *maṅgala gāna* of the preceding centuries. If *padāvalī kīrtana* represented the eternal feminine, Rādhā, and masculine, Kṛṣṇa, *śāktapada saṅgīt* exemplified the eternal mother, both compassionate and with terrifying physical features. Rāmprasād Sen (1720–81) set the trend, which was followed by contemporary

and later poet-composers, including Kāzi Nazrul Islām (see §2(v) below). Rāmprasād Sen also developed an individual musical style that became known as the 'melody of Rāmprasād'.

*(ii) Ṭappā.* Secular love songs, *ṭappā* (*see* INDIA §IV, 1), were introduced to Bengal at the beginning of the 19th century by Rāmnidhi Gupta (1741–1839). The form was developed by Golām Nabi (1742–92) in Lucknow, and Rāmnidhi Gupta began to sing self-composed Bengali versions of *ṭappā* in sessions in Calcutta, achieving rapid and great popularity. This neo-urban music proved to be a turning point in Bengali music. Until this point urban music had been largely devotional, but with the introduction of *ṭappā*, urban audiences could hear songs not about divine but about human relationships. Rāmnidhi Gupta's success, and that of the *ṭappā* poet Kālidās Chatterjī, inspired many other Bengali poet-composers to follow his model. These included Dāśarathi Ray (1806–57), Śrīdhar Kathak (*b* 1816), Govinda Adhikārī (1800–72), Āśutoś Deva (1803–56), Kaśiprasād Ghosh (1809–73) and Manomohan Basu (1831–1912).

Rāmnidhi's efforts to connect Bengali with Hindustani genres was also supported by other composers working in various places in Bengal. Devān Raghunāth Ray (1750–1836) from Burdwan and Devān Kārtikeyachandra Ray (1820–85) from Krishnanagar began to compose Bengali songs modelled on *khayāl* (*see* INDIA, §III, 5(iii)(6), and Rāmśaṅkar Bhaṭṭāchārya (1761–1853) from Vishnupur took *dhrupad* as a model. The Bengali nobility also contributed to the propagation of Hindustani music, emulating the Mughal courts by employing *baiji* (female singer-dancers), who enjoyed enormous prestige through their skill in performing classical genres. The music most favoured by the aristocracy was commonly known as *rāgasaṅgīt* ('song based on rāga'), a style of Bengali song that drew heavily on rāga traditions. This set the scene for the manifold developments in Bengali music of the 19th century.

*(iii) Brahmasaṅgīt.* One of the first genres to emerge as a result of a reinvigorated musical scene in Bengal was the congregational *brahma* song. These were the prayer-songs associated with Brāhma Dharma, a new religious movement founded by Rāmmohan Ray (1774–1833). The songs were in praise of one indivisible god, in contrast to the worship of many gods, goddesses and *avatār*s ('incarnations') in previous devotional song genres. Rāmmohan Ray was instrumental in composing *brahma* songs and inspired others to do the same. In 1828 he founded the Brāhma Samāj, which took on responsibility for the propagation of Brāhma Dharma, including the prayer-songs. The idea of congregational singing may have come from Anglican traditions, which the movement's leaders would have observed on their trips to England. Although written in rāga, in performance the songs were often accompanied by piano or harmonium.

Initially the songs were based stylistically on *ṭappā*, but when the *dhrupad* specialist Viṣṇu Chakravartī was invited to join the Brāhma Samāj as a music teacher, the songs soon became associated with *dhrupad*. When Rāmmohan Ray died in England, the leadership of the sect passed to Devendranāth Tagore (1817–1905), an admirer of *dhrupad* who wanted all *brahma* songs to be performed in this style. The division of the sect by two breakaway factions, the Indian Brahma Society, founded in 1866 by Keśav Chandra Sen (1838–84), and the General Brahma Society, founded in 1878 by Śivnāth Śāstrī (1847–1919) and Ānandamohan Basu (1847–1906), reflected a musical split. The two new factions adopted popular forms, including *padāvalī kīrtan*, as a basis for their prayer-songs, while *dhrupad* remained the principal basis for the prayer-songs of the old Brāhma Samāj, one of the greatest composers of which was Rabindranath Tagore (see §2(i) below).

*(iv) Svadeśī gān.* Bengali patriotic songs, *svadeśī gān*, are a product of the struggle for self-government in South Asia. The genre began to grow from the second half of the 19th century, and the sentiments it expresses were first heard in the poems and songs of Iśwar Chandra Gupta (1812–59), who had many followers, including poets and social reformers. The history of Bengali patriotic song may be said to date from 1867, with the organizing of the annual Hindu Melā exhibition. This was undertaken by the prominent nationalist Navagopāl Mitra and patronized by the Joṛāsānko Tagore household. It was an occasion to display rural goods, watch traditional physical feats and, most importantly, to sing patriotic songs. The organizers saw this as a means of reaching many people at one event with their political message.

It is not known which songs were performed at the first *melā*, but the second session was inaugurated by a heroic song with a text by Satyendranāth Tagore and music by Viṣṇu Chakravartī. This song became very popular and prompted others to compose patriotic songs for subsequent sessions, which continued until 1880. Dwijendranāth Tagore, the younger brother of Satyendranāth, wrote a song describing the miseries of British rule, and these songs from the two brothers set the two dominant styles for subsequent songs, either heroic or mournful. Other composers of patriotic songs include Jyotirindranāth Tagore, Manomohan Basu, Ganendranāth Tagore, Hemchandra Bandyopādhyāy, Govinda Chandra Ray, Viṣṇuram Chattopādhyāy and Rangalāl Bandyopādhyāy. Rabindranath Tagore contributed songs to some of the later Hindu Melā. The founding of professional theatre in Calcutta in 1872 provided another platform for patriotic song, as did the setting up of the Indian National Congress (1885), whose sessions invariably included the singing of *svadeśī gān*.

If the first phase of Bengali patriotic song was triggered by the Hindu Melā of 1867, the second was due to the opposition to the partitioning of Bengal (1905–11) by Lord Curzon. The first patriotic songs were written mostly in Calcutta and drew on the traditions of Hindustani music and occasionally Western music. In contrast, the songs in opposition to the partition were greatly influenced by traditional Bengali music, particularly *bāul gān* (see §III, 1 below). Rabindranath Tagore was very active in this movement, along with other composers including Dwijendralāl Ray, Rajani Kānta Sen, Mukunda Dās, Atulprasād Sen, Kāliprasanna Kavyaviśarad, Amritalāl Basu, Pramathnāth Ray Chaudhuī, Vijay Chandra Majumdar, Aświni Kumar Datta, Sarala Devi Chaudhurani, Kāmini Kumar Bhaṭṭāchārya and Manomohan Chakravartī. When the plan for partition of Bengal was rescinded in 1911 the enthusiasm for Bengali patriotic songs waned, and by this time many of the chief musical exponents of the movement had either died or retired. However, with the massacre of peaceful protestors by the British at Jalianwallahbag, Amritsar (1919), and the start of the non-cooperation movement (1920–21) led by Mahatma

Gandhi, patriotic song began to flourish again in Bengal, harnessed to the independence struggle. The chief composer of patriotic song at this time was Kāzi Nazrul Islām (see §2(v) below).

2. KEY FIGURES IN BENGALI MUSIC. Educated in the Indian and Western music systems, Jyotirindranāth Tagore (1849–1925), son of Devendranāth Tagore, systematized the urban music of Bengal and tried to put it into a framework based on Western music. He founded a music school, published music journals and developed a notation system to preserve and teach music. He propagated the concept of written music as opposed to the Indian improvisatory oral tradition and fought a hard battle to establish the absolute right of the composer over a composition. His work prefaces the achievements of the five great poet-composers of Bengal, namely, RABINDRANATH TAGORE, Dwijendralāl Ray, Rajanikānta Sen, Atulprasād Sen and Kāzi Nazrul Islām. The songs of these poet-composers are usually identified by proper names: *Rabīndrasaṅgīt* ('songs of Rabindranath [Tagore]'), *Dwijendragīti* ('songs of Dwijendralāl [Ray]'), *Rajanikānter gān* ('songs of Rajanikānta [Sen]'), *Atulprasāder gān* ('songs of Atulprasād [Sen]') and *Nazrulgīti* ('songs of [Kāzi] Nazrul [Islām]'). A further figure who may be mentioned here is Dilip Kumar Ray (1897–1980), who was known for his vocal ability and knowledge of Indian and Western musicology. His compositional style was based on 'light' classical music and *padāvalī kīrtan*. However, his retirement to Auroville in 1928 cut short his musical career.

*(i) Rabindranath Tagore (1861–1941).* Considered by many to be the greatest Bengali poet, songwriter and composer, Rabindranath Tagore was the first non-European to receive the Nobel Prize for literature (1913) and was the composer of some 2500 songs. He classified his songs into four major categories: *pūjā* ('worship'), *svadeś* ('homeland'), *prem* ('love') and *prakriti* ('nature'), and two minor ones, *vichitra* ('variety') and *ānushthānik* ('ceremonial').

Tagore composed about 650 *pūjā* songs for the Brāhma Samāj (see §1(iii) above). These were written in a style influenced by *dhrupad*, and even though as a religious movement Brāhma Dharma has declined, Tagore's *brahmasaṅgīt* are still popular. He also wrote some 70 *svadeśī* or patriotic songs, mostly composed during the Swadeshi movement, including *My Golden Bengal, I Love You*, which is now the national anthem of Bangladesh. In these he drew on traditional *bāul gān*, a move that proved very influential for subsequent Bengali urban music. He wrote nearly 300 nature songs, stylistically close to *khayāl* and *ṭappā*, and more than 400 love-songs. His 'ceremonial' songs were written to cover a wide range of occasions, such as a farewell reception or the sinking of a tubewell.

Tagore was also responsible for the genre *nṛtya-nāṭya* ('dance-drama'), which he developed in the 1930s out of his *gītināṭya* ('song-drama') composed in the late-19th century. He was apparently inspired by diverse musical theatre forms in India (particularly *kathakali*), the West, China, Indonesia and Japan. The texts are based on Hindu and Buddhist legends. The *nṛtya-nāṭya* are performed by dancers (who present the story in mime), singers (who sing dialogues and choruses) and accompanying instrumentalists. There is no scenery, only a backdrop of floral designs. The musicians sit on the floor behind a decorated screen, about 30 cm high, at the rear of the stage. His best known *nṛtya-nāṭya* are *Chitrāngada* and *Chandālika* (both 1936).

Brought up in the Joṛāsānko Tagore household, known as the centre of the Old Brahma Society, he was exposed to many *dhrupad* performances, and on many occasions he said that his compositional style was greatly shaped by the *dhrupad* tradition, particularly his adoption of its four-part textual structure (*see* INDIA, §III, 5(iii)(a)). He also pursued the concept of composed music and pioneered the rights of a composer over a composition. He was very careful in teaching his music and preparing its notation, grooming a generation of performers to pass on his compositions unchanged.

*(ii) Dwijendralāl Ray (1863–1913).* Dwijendralāl Ray is mostly known for his patriotic and humorous songs and for the style he created out of a combination of rāga and the melodic patterns of Western music. He also combined *khayāl* and *ṭappā* to create a third style known as *ṭapkhayāl*. Brought up in a rich musical environment and educated in India and England, Dwijendralāl Ray possessed a wide knowledge of both Indian and Western music. His love-songs and devotional songs are also remarkable in respect to popularity and quality. He made use of *kīrtana* and *bāul* genres in devotional and love-songs, and he was also a dramatist. Most of his songs were performed on stage, contributing to the rising popularity of Bengali stage music.

*(iii) Rajanikānta Sen (1865–1910).* Predominantly known for his devotional songs, which draw on *khayāl* and *ṭappā*, Rajanikānta Sen created a large body of Bengali devotional music that is easily distinguished from that of his contemporaries by his highly individual approach to composition. He took part in the movement opposed to the partition of Bengal and composed a number of songs inspired by the movement's idealism. The best known Bengali song on the boycotting of foreign goods was composed by him.

*(iv) Atulprasād Sen (1871–1934).* A barrister who lived in Lucknow, Atulprasād Sen's prime contribution to Bengali music was to make *ṭhumrī* an integral part of Bengali urban music. He himself composed many songs in a *ṭhumrī* style (*see* INDIA, §III, 5(iii)(c)) and also pioneered the idea of composing Bengali *ghazal*, writing 210 songs in all. Like Rabindranath Tagore, he classified his songs into four broad groups: *devatā* ('god'), *prakriti* ('nature'), *mānava* ('man') and *svadeś* ('homeland'). In addition to composing using the 'lighter' Hindustani styles, he also adopted elements of *kīrtan* and *bāul* genres.

*(v) Kāzi Nazrul Islām (1899–1976).* Kāzi Nazrul Islām, whose career ran from around 1920 to 1942, wrote nearly 3000 song texts, composing the music for hundreds of them. He joined HMV in the first half of 1928 and subsequently worked for all the other recording companies in Calcutta as a songwriter, composer and trainer. He worked with sound film in Calcutta from its inception in 1931 and with the Bengali theatre, contributing significantly to the development of stage music. His contribution to Calcutta radio's music programme is also substantial.

Known as the rebel-poet of Bengal for his staunch anti-British attitudes, Kāzi Nazrul Islām created a new genre of Bengali patriotic songs reflecting a fiery heroic sentiment. He also wrote songs raising Muslim consciousness and songs promoting Hindu–Muslim harmony, composing

devotional pieces for both communities. He pioneered the concept of Islamic songs in Bengali urban music, and his compositions on the goddess Kāli and Rādhā–Kṛṣṇa love are still widely sung. By composing a number of songs with socialist themes, he laid the foundations in Bengal of what later became known as 'people's music'. Building on the compositions of Atulprasād Sen, Nazrul Islām experimented with the Bengali *ghazal* and established an academic basis for the genre.

He is credited with reviving rāgas that were being forgotten, as well as creating new ones. He is also regarded as the founder of a style of *khayāl*-based Bengali song known as *rāg pradhān gān*. Nazrul Islām also contributed to the new urban musics being created around the commercial recording industry and to the development of the film song. These marked a move away from traditional practices in that a lyric writer, composer and singer cooperated to produce a finished product. The compositional style aimed at entertaining filmgoers and record-buyers and grew out of a combination of many genres, such as khayāl, tappā, *ṭhumrī*, *ghazal*, *dhun* and *kīrtan*. Nazrul Islām embraced these developments, and his use of traditional music models, particularly of *jhumar*, a Santāl dance and song genre, was an important addition to these new musics.

Contemporaries who worked alongside Kāzi Nazrul Islām in the 1930s and 40s include the songwriters Hiren Basu, Hemendra Kumār Ray, Tulsi Lāhiri, Anil Bhaṭṭachārya, Ajay Bhaṭṭachārya, Pranab Ray, Subodh Purakāyastha, Shailen Ray, Vani Kumār, Sourindramohan Mukhopādhyāy, Premendra Mitra and Dhirendranāth Mukhopādhyāy; the composers and music directors Hiren Basu, Hemendra Kumār Ray, Tulsi Lāhiri, Vinay Goswāmī, Himāngsu Datta, Nitāi Matilāl, Kamal Dās Gupta, Suval Dās Gupta, Krishna Chandra De, Shailesh Datta Gupta, Chitta Ray, Rāichand Varāl, Vishenchānd Barāl and Pankaj Kumār Mallik; and the singers K. Mallik, Āngur Bālā, Indu Bālā, Harimati, Kamalā Jhariā, Rādhārāni, Shaila Devi, K.C. De, Kānan Devi, Juthikā Ray, Shachin Dev Barman, Abbasuddin Ahmed, Satya Chaudhury, Mrināl Kānti Ghosh, Jaganmay Mitra, Suprabhā Sarkar and Kundanlāl Sāigal.

3. FILM AND 'PEOPLE'S MUSIC'. Bengali film music grew out of the music of Bengali professional theatre and has come to dominate the modern musical scene since the inception of sound film in Calcutta in 1931 and the subsequent use of play-back singing. Initially Bengali film music was shaped by the writers and directors Hiren Basu, Pankaj Kumār Mallik, Rāichand Varal, K.C. De and Kamal Dās Gupta. Although at first the songs were based on 'light' Hindustani genres, songwriters and composers have subsequently turned to other more popular and often international genres for inspiration. This has caused some commentators to make unfavourable comparisons with earlier film scores, which they claim have an identifiably Bengali character.

The Indian People's Theatre Association (IPTA) was founded in 1943 in opposition to international imperialism and fascism. It had a great effect across the country and initiated, in Bengal in particular, a music movement known as 'people's music'. The principal inspiration for this music movement came from the cultural programme of the Communist Party of India and the IPTA, whose activists wanted to reach the working-class people in Bengal with the message of their struggle to restructure society on a socialist model. Vinay Ray, Jyotirindra Maitra, Hemānga Biswās and Salil Chaudhurī who initiated the movement as songwriters, composers and organizers, were quickly joined by many other activists, and the movement that began in Calcutta soon spread to Bengali villages.

### *II. Music after 1947*

Urban music in West Bengal has largely been confined to film and record production. All India Radio Calcutta also played a role, while television ownership has only recently become at all widespread. A group of talented songwriters, composers and performers joined those who had been working from the 1930s: Mohinī Chaudhurī, Śyamal Gupta, Gauripasanna Majumdār, Pulak Bandyopādhyāy and Shivadās Bandyopadhyay as lyric writers; Anupam Ghaṭak, Rabin Chattopādhyāy, Hemanta Mukhopādhyāy, Nachiketa Ghosh, Salil Chaudhurī, Dilip Sarkār, Sudhin Dāsgupta, Pravir Majumdār, Abhijit Bandyopādhyāy and Anal Chattopādhyāy as composers; and a generation of singers, including Hemanta Mukhopādhyāy, Dhananjay Bhaṭṭācharya, Pānnalal Bhaṭṭāchārya, Śyamal Mitra, Satināth Mukhopādhyāy and Manavendra Mukhopādhyāy. The songs of Rabindranath Tagore are becoming increasingly popular again with an educated urban élite, and *Nazrulgīti* have retained their popularity. The 'people's music' movement, after its extremely popular initial impact, suffered a setback due to ideological divisions within the Communist Party and its subsequent split into the Communist Party of India and the Communist Party of India (Marxist).

Urban music in Bangladesh took two different directions, patriotic and modern song. Patriotic songs, like those leading up to Independence in 1947, grew out of popular protest. The people of East Pakistan were seen by the government in West Pakistan as a population to be dominated and exploited. Organized protest in East Pakistan against West Pakistan started as early as 1948, on the status of Bengali as a state language. The Language Movement reached its culmination on 21 February 1952, when demonstrating students and other activists were fired upon and killed by the police. This marked the beginning of a popular struggle that culminated, under the leadership of Sheikh Mujibur Rahman, in the War of Liberation in 1971, which lead to the founding of the independent nation of Bangladesh. The songs that accompanied the movement were often those of Rabindranath Tagore, Dwijendralāl Ray, Rajanikānta Sen, Atulprasād Sen and Kāzi Nazrul Islām, and they became powerful symbols of Bengali nationalism. In addition, songs of IPTA were sung. Poets and composers from East Pakistan also worked together to produce a repertory of patriotic song, including the great song of the Language Movement of 1952, *Can I Forget 21 February, Tinged with my Brother's Blood?*, with a text by Ābdul Gaffār Chaudhury and music by Āltāf Māhmud.

During the nine months of the War of Liberation a group of songs, now known as the songs of the Liberation War, were regularly broadcast from the Independent Bangladesh Radio Station. They included songs of the earlier movements and the principal song of the freedom struggle, *My Golden Bengal, I Love You* by Rabindranath Tagore, which subsequently became the national anthem of Bangladesh. Songs that were newly composed include the extremely popular *Victory to Bangladesh and Victory to Bangladesh, Bangladesh will Win.*

Before partition all institutional support for popular urban song had been located in Calcutta. Dhaka did not possess the infrastructure to produce records and films; radio was the only medium that was established. Film production started up in the early 1960s and television later in the decade. There was little development from record companies. Despite these initial limitations, composers and lyric writers worked in close cooperation during the 1950s and 60s and built up a body of popular song that provided the foundations for contemporary musical activity in Bangladesh. Composers, lyric writers and performers who have contributed to the development of music in Bangladesh include the composers Ābdul Āhad, Yusuf Khān Quoreshi, Ābdul Hālim Chaudhuri, Samar Dās, Kāder Zāmeri, Khādem Hussain Khān, Sheikh Lutfur Rahmān, Sheikh Mohitul Huq, Dhir Āli, Mansur Āli, Āltaf Māhmud, Rabin Ghosh, Khān Ātāur Rahmān, Subal Dās, Satya Sāhā, Khandakār Nurul Ālam, Āzad Rahmān and Sujeya Śyām; the writers Sikandār Ābu Jāfar, Sayed Sidiqui, Māsud Karim, Āzizur Rahmān, Ābdul Latif, Khān Ātāur Rahmān, Mohammed Maniruzzāmān, Abu Hena Mostafā Kāmāl and Gāzi Mazhārul Ānwar; and the performers Feroza Begum, Āfsari Khānam, Husnā Bānu, Sanjidā Khātun, Fāhmida Khātun, Ajit Ray, Āltaf Māhmud, Jāhedur Rahim, Sukhendu Chakrabartī, Ātiqul Islām, Ānjuman Āra Begum, Ferdousi Rahmān, Ābdul Jabbār and Nilufar Yāsmin.

### *III. Local traditions*

Although Bengal has strong and diverse rural musical traditions that have influenced many of the urban musics described above, the flow of urban media into rural districts is now displacing traditional musics, with the result that many are now no longer performed. Bengal is also home to a considerable Ādivāsī population, one group of which are the Santāls, who live in the Burdwan and Birbhum Districts of West Bengal and the northern parts of Bangladesh (*see also* INDIA, §VII, 3). They perform the dance and song genre *jhumar*, usually accompanied by a bamboo flute and a MADAR drum, which like *bāul gān*, has been influential on urban Bengali composers, including Kazi Nazrul Islām.

1. *Bāul gān*. 2. Occupational songs. 3. Narrative and dramatic genres.

1. 'BĀUL GĀN'. Baul is a Bengali heterodox religious sect, characterized by its male and female followers' rejection of caste and scripture-based ideals and their assertion that the mind and body are the paths to enlightenment, in part derived from the *bhakti* ('devotional') Vaisnava traditions of Śrī Caitanya. Song (known as *bāul gān*) and dance are important elements of devotion and a means of earning a living for Baul mendicants, and their songs are widely known and popular throughout Bengal, perhaps due to the interest shown by composers such as Rabindranath Tagore. There is, in theory, no one situation that is considered most appropriate for the performance of *bāul gān*, and a Baul may be reluctant to perform texts that deal with secret beliefs in public. However, there are collective situations, *melā* ('fairs') and *utsab*, where it would be considered odd if a Baul did not perform.

The Jayadeva Melā held at Kenduli is one of the most popular religious fairs in Bengal. The large crowds attracted to the event, which lasts for a couple of days, provide good audiences for the Bauls who provide entertainment, often performing for long stretches of time. A slightly different environment is provided by the Pous Melā, held at Rabindranath Tagore's school, Santiniketan. The performances at this event tend to be folklorized, with scheduled times, a performance platform and a largely educated and middle-class audience. An *utsab* is a smaller gathering, often organized by an individual family or religious group, where the music-making is more collective and the festivities domestic. These may also take place on the anniversary of a famous Baul, at their place of burial or worship. The annual Baul Festival in Kustia in Bangladesh (in memory of Lālan Śāh, the greatest Baul poet of Bengal), has now acquired national status.

The songs themselves, while not explicitly stated to be in particular rāgas, do bear some relation to classical rāgas in scale forms and characteristic melodic phrases. Baul musics are to a certain extent identified by the instruments they play to accompany their own singing. The most characteristic of these are: the VARIABLE TENSION CHORDOPHONE instruments *gōpīyantrā* and *khamak*; the *dōtārā*, a four-stringed plucked chordophone; *ghuṅur* and *nūpur*, ankle bells; and the *duggi*, a small kettledrum with a clay body, frequently paired with the *gōpīyantrā*.

2. OCCUPATIONAL SONGS. *Bhātiāli* are boatmen's songs, sung by people in the low-lying river regions of West Bengal and Bangladesh. They are characterized by long melodic phrases that move from a middle register, via clusters of pitches, to a high concluding pitch. There are references in medieval texts to a rāga Bhātiāli or Bhātiāri, which some musicologists assert has a connection with the present-day genre. Other songs that have a connection with boats are *sārigān*. This is a collective term for 'work song', and their quick tempos and regular rhythms may be seen as an inducement to physical labour. One of the best known types of *sārigān* is that sung for boat racing by the crew, accompanied by a thin brass gong or a drum. With the mechanization of physical work *sārigān* are fast disappearing.

*Bhaowāiyā* denotes diverse genres originating in the high and dry land of Rangpur in Bangladesh and Coochbihar in West Bengal. One of these is a vocal genre associated with bullock-cart drivers. *Bhaowāiyā* have a characteristic 'voice break', when the singer momentarily interrupts the melody with a plosive sound. A further genre associated with occupation is *jhāpān*, the snake charmers' song. Previously, nomadic groups of snake-charmers, often travelling by boat, would catch snakes, treat snake bites and display snakes for entertainment. They would accompany these activities with songs in praise of Manasā, the snake goddess.

3. NARRATIVE AND DRAMATIC GENRES. *Chau* is a dance-drama found in Purulia district, West Bengal, and in adjoining areas in Bihar and Orissa (*see* INDIA, §IX, 2(i)(a)). The narrative songs, which are believed to be derived from *jhumar*, have mythological texts. A song genre widely performed in the Rajshahi district of Bangladesh and the Maldaha district of West Bengal is *gambhīrā*. The genre name refers to Śiva, and previously these were songs addressed to the deity. This is no longer the case; they are now narrative compositions, combining singing, dancing and acting that deal with everyday affairs, often expressing problems that rural people confront. Ballad recitation traditionally known as *puthi-pāṭh* ('reading') is a form of singing. The *bayāti*, which

here means 'reader', sings the narrative by chanting a melody made of three or four notes.

*Jārigān*, a narrative genre of the Muslim community, began as a commemoration of the Karbala massacre (680 CE), in which one of the grandsons of Hazrat Muhammad was killed. Present-day *jārigān* also comprises secular stories (mythological and historical) as well as religious and political themes. The music unfolds through solo narrative and strophic singing by the *bayāti* ('leader'), and at the end of each section the chorus (*dohār*) sings a refrain in a faster tempo. The *jāri* ensemble is led by a double-headed drum and includes a harmonium, small brass cymbals and bells, all played by members of the chorus. The *dohār* stand around the leader, who sways, crouches and swings both hands to signal their entry.

The general Bengali term for sung drama is *pālāgān*, of which the most popular rural form is *yātra*. This developed towards the end of the 18th century and, although mostly spoken, is heavily dependent on songs, music and dance. The plots are based on religious and historical subjects, and the performance requires colourful costumes and make-up. A raised, square platform serves as an open-air stage, and the audience sits on all sides. The stage and the audience are sheltered by a large canopy about nine metres above the ground. The instrumental ensemble sits on the floor close to the stage. This consists of Western instruments such as saxophone, trumpet, clarinet, violin and harmonium, and local ones such as *jhāñj* (cymbals), *khanjani* (small cymbals), *mandirā* (paired brass idiophones) and *ḍhol*. The performance begins with a long, slow instrumental prelude, which also acts as an interlude between sections and concludes the performance. *Yātra* usually begin at 9 or 10 p.m. and continue almost until dawn. Participants in a *yātra* usually belong to a guild; a single performance may require more than 30 performers, including actors, dancers and musicians.

Although not strictly a narrative genre, *kavigān* revolves around a question from mythological literature. It takes the form of a poetic contest between two singing parties, each led by a *kaviyāl*, the leading poet, who is supported by a singing group called the *dohār*. One poet–singer performs his extemporized 'questions' and challenges his opponent to refute them with 'answers'. The performance is divided into several sections interspersed with breaks. The audience judges the contest and chooses the winner on the strength of the performers' use of alliteration, puns, imagery and wit. This complex tradition developed during the late 18th and mid-19th centuries and is equally popular in urban and rural areas. *Letogān* is a similar genre found in Burdwan District in West Bengal. It includes acting and dance, and the leading poet is called the *godākavi*.

KARUṆĀMAYA GOSWAMĪ

**Bengoecha de Cármena, Soledad** (*b* Madrid, 21 March 1849; *d* Madrid, 1893). Spanish composer. She studied the piano, harmony and instrumentation with Arriola, Jesús Monasterio and Ledesma. During her childhood she took part in the concerts organized by her father at home. The first performance of her Mass (1867) was received with enormous enthusiasm, and the Madrid critics wrote that the beauty of its texture was reminiscent of Renaissance Spanish polyphony. In 1874 her zarzuelas *Flor de los cielos* and *El gran día* were produced in the Teatro Jovellanos, Madrid. The zarzuela *A la fuerza ahorcan* (1876) was performed only twice, despite critical praise. Her finest works were the overture *Sybille*, composed in Paris in 1873 (première 1875), and the *Marcha triunfal*, both performed at the Sociedad de Conciertos, Madrid. Her musical style combines elements of German music and Italian opera. She was a founder-member of the Sociedad Artístico-Musical de Socorros Mutuos.

WORKS
*(selective list)*

Stage (all zarzs, first perf. in Madrid): Flor de los cielos (1, N. Serra), 5 April 1874; El gran día (1, Serra), 5 April 1874; A la fuerza ahorcan (3, P. Vizcaino), 6 March 1876
Orch: Sybille, ov., 1873; Capricho, orchd F. Espino; Geneviève, melody; Marcha triunfal
Sacred: Misa [Mass], 1867; Ave verum, T/S, C, chorus, 1881; O salutaris hostia, S, C (Madrid, 1881); Salve, S, chorus, pf/hp, 1883; Benedictus; 2 salutaciones a la Virgen, S, chorus, hp; Salve coreada
Other vocal: Les larmes, S, pf, 1873; Balada (Serra), 1v, pf; Serenata (R. Zapzter de Otal), 1v, harmonie-flûte, pf
Pf: Scherzo (Madrid, 1868); Gran vals de concierto (Madrid, 1869); Capricho, scherzo (Madrid, 1872); Marcha triunfal (Madrid, 1883); Mazurca, 1893

RAMON SOBRINO SANCHEZ

**Bengraf, (Johann) Joseph** (*b* Neustadt an der Saale, nr Würzburg, 20 June 1745; *d* Pest, 4 June 1791). German composer. His father Michael Bengraf was a town

musician in Neustadt. He settled in Pest about 1776 and in 1784 became *regens chori* at Pest parish church, for which he wrote much sacred music: as late as 1831 the music catalogue of the church listed about 130 works by him. His inventories of the church's instruments and music (1786–90, 1791) reveal a lively, up-to-date music programme. He also composed secular music, of which his *Ballet hongrois* (1784) is regarded as the earliest known example in print of the then newly developed Hungarian dance form, the *verbunkos*.

ÁGNES SAS

**Bengtsson, Erling Blöndal** (*b* Copenhagen, 8 March 1932). Danish cellist. He studied with Fritz Dietzmann in Copenhagen, 1937–45, and with Piatigorsky at the Curtis Institute of Music, Philadelphia, 1948–50. He made his recital début in Copenhagen in 1936, and his concerto début with the Tivoli SO in 1942, after which he followed an international solo career, playing with leading orchestras and conductors. He performed the Walton concerto with the BBC SO conducted by the composer in 1958, and has given the first performances of many works by Scandinavian composers. From 1949 to 1953 he taught at the Curtis Institute, for some time as Piatigorsky's assistant. He was professor at the Copenhagen Conservatory, 1953–90, and also taught at the Swedish Radio Music School in Stockholm, 1958–78, and at the Hochschule für Musik in Cologne, 1978–82. In 1990 he was appointed professor at the University of Michigan School of Music at Ann Arbor. Bengtsson has made numerous recordings including all the Beethoven sonatas and the Bach suites. His playing has warmth, security and elegance and a deep musical understanding. He plays a cello by Nicolas Lupot dated 1823. He was made a First Knight of the Danish Order of Dannebrog in 1965.

MARGARET CAMPBELL

**Bengtsson, (Lars) Ingmar (Olof)** (*b* Stockholm, 2 March 1920; *d* Stockholm, 3 Dec 1989). Swedish musicologist. He studied the piano with Olof Wibergh at the Stockholm Royal Conservatory (1937–40) and then privately with Gottfrid Boon, making his début in 1942; concurrently he studied at the universities of Stockholm and Uppsala (from 1941), specializing in musicology under Moberg, and with Handschin at the University of Basle (1947), where he gained practical experience with the Schola Cantorum Basiliensis. He was active as a music critic for the Stockholm daily *Svenska dagbladet* (1943–59), as a pianist and harpsichordist (until 1955) and from 1947 as lecturer at the musicology institute of Uppsala University; in 1955 he took the doctorate there with a study of J.H. Roman's instrumental music and was appointed reader. He succeeded Moberg as professor (1961–85), and was also elected president of the Swedish Society for Musicology (1961–86) and editor of its journal; in 1962 he became editor of *Studia musicologica upsaliensia: nova series*. He was also a moving force in the publication of Swedish music, especially through the editorship of the series Monumenta Musicae Svecicae (1958–) and the Berwald edition. In 1965 he founded the Swedish Archive of the History of Music.

Bengtsson's studies of 18th-century Swedish music are particularly important and his practical experience of earlier music informs his musical editions as well as his valuable revised and much enlarged edition of Dart's *The Interpretation of Music*, issued in Swedish as *Musikalisk praxis*. His wide range of interests and the ability to systematize knowledge are manifest in his important survey of the discipline of musicology, *Musikvetenskap*. In his own writing, as well as in his leadership of musicology in Sweden, he showed an increasing interest in descriptive and analytical theories of music.

JOHN BERGSAGEL/HENRIK KARLSSON

**Benguerel (y Godó), Xavier** (*b* Barcelona, 9 Feb 1931). Catalan composer. Between 1940 and 1954 he lived in Chile, where his parents were in exile because of the Spanish Civil War. In 1954 he returned to Barcelona, where he studied with Taltabull. He finished his musical education on a mainly self-taught basis; at the same time, by joining the Generación del 51, he quickly became part of the Catalan musical movement. He has received commissions from The Hague, the Berlin Schütz Festival, the Baden-Baden SWF, the Zagreb Biennial, the National and Radio and Television Orchestras of Spain and the festivals of Alicante, Barcelona, Perpignan and other towns.

Aesthetically, Benguerel's music has its foundations in the great masters of the century, Bartók, Schoenberg and Stravinsky, whose postulates he adopts and personalizes, at the same time incorporating the resources of the new Polish school. Prominent in his copious output, which embraces practically the full range of muscial genres, is his continual interest in timbre and his handling of tension. Among his most important works are *Paraules de cada día*, *Arbor*, the Cello Concerto, the *Llibre vermell*, *Set Faules de La Fontaine* and the *Missa spirensis*. Some of his vocal music is based on texts by his father, Xavier Benguerel Llobet.

WORKS

STAGE AND VOCAL

Stage: Llibre Vermell (ballad op, 11 cantos from *Llibre Vermell de Montserrat*), 1987; Spleen (op, 1, 4 scenes, L. Permanyer), 1992
Choral: Cant. d'amic i amat (R. Llull), Mez, chorus, orch, 1959; Arbor (X. Benguerel Llobet, and others), chorus, orch, 1972; Metamorfosis (Ovid), unacc. chorus, 1972; Requiem (liturgical texts, S. Espriu), S, Mez, T, 2 Bar, chorus, orch, 1989; 2 poemes (A. Machado), chorus, pf, 1995; La sanch, Mez, Bar, chorus, orch, 1996; Missa spirensis, chorus, brass ens, org, timp, 1997
Works for solo voice and ens, incl. Paraules de cada día (Benguerel Llobet), Mez, ens, 1967; 7 faules (La Fontaine, trans. Benguerel Llobet), nar, 10 insts, 1995; L'encanteri de les bruixes, spkr, 4 gui, 6 perc, str, 1998

INSTRUMENTAL

Orch: Conc., 2 fl, orch, 1961; Simfonia contínua, 1962; Simfonia, small orch, 1966; Simfonia per a un festival, 1966; Simfonia, large orch, 1968; Test-Sonata, 1968; Dialogue orchestrale, 1969; Org Conc., 1970; Gui Conc., 1971; Quasi una fantasia, vc, ww, brass, pf, perc, 1971; Destructio, 1972; Perc Conc., 1975; Vc Conc., 1977; Raíces hispánicas, 1978; Tempo, gui, str, 1983; Música, perc, str, 1990; Obertura episódica, 1991

FRANCESC TAVERNA-BECH

**Ben-Haim** [Frankenburger], **Paul** (*b* Munich, 1 Oct 1897; *d* Tel-Aviv, 14 Jan 1984). Israeli composer of German birth. After serving in World War I, he graduated from the Munich Academy of Music (1920) where his teachers included Friedrich Klose (composition). He went on to hold the posts of choral director and vocal coach at the Bayerisches Staatstheater under Bruno Walter and, in 1924, became Kapellmeister of the Augsburg Opera. He was also active as a pianist. His early compositions, written during these years, include the String Trio (1927), which demonstrates his fondness for stylistic pluralism in its juxtaposition of extreme chromaticism and jazzy rhythms, and works that display the influence of Orientalism (*Pan*, 1931) and neo-classicism (Concerto grosso, 1931). His friendship with the Jewish composer and organist Heinrich Schalit (1886–1976) led to the composition of a number of *a cappella* motets on biblical texts, culminating in a setting of Psalm cxxvi 'Wenn der Herr'

(1929) that was well received at the Nürnberger Sängerwoche (1931).

With the rise of Nazism and Hitler's ascendance to power, Frankenburger emigrated to Palestine (October 1933) where he changed his surname to Ben-Haim, after his father's Hebrew name. One of many refugee composers from central Europe, he worked towards an appropriate mode of expression for his new life within a heterogeneous emigrant Jewish society. Although he fulfilled a few conducting engagements with the Palestine Orchestra (founded 1936), he concentrated primarily on composition and teaching, holding appointments at the Shulamit Music School, the Jerusalem Academy of Music and the Music Teachers' Training College. He learnt Hebrew and became interested in modern Hebrew poetry, writing a series of intimate Hebrew lieder to poems by Hayyim Nahman Bialik (*Hakhnisini*), Rahel (*Akara*, 'The Barren', 1939) and others, as well as the biblical verse *Shimu iyim elai* ('Listen O Isles unto Me', 1945).

In 1939 Ben-Haim began a long period of collaboration with Bracha Zephira (1910–90), a folksinger of Yemeni descent. As well as serving as her accompanist, he transcribed and arranged around 35 of her songs for various instrumental ensembles. Through their partnership he became familiar with the tunes, vocal production and intonations of traditional Middle Eastern music, features he borrowed for use in his own works. Zephira's melodies can be heard in the First Symphony (1940), integrated into the primary thematic material of the slow movement, the Clarinet Quintet (1941) and the Piano Concerto (1949).

Brought to prominence through commissions and frequent performances of his works by artists such as Menuhin, Pressler, Bernstein, Heifetz, Wiesel and others, Ben-Haim became internationally known soon after 1945. His flowing melodies, idiomatic instrumental writing and rich orchestration made his music appealing to audiences all over the world. Although he held the music of Bach in highest esteem, he was also strongly influenced by the harmonic and melodic styles of Debussy, Ravel and Falla and the dramatic and symbolic expression of Mahler. While most of his music is tonal with modal embellishment, he used dodecaphony to depict strong images, such as the dry bones in the *Vision of a Prophet* (1959).

Ben-haim's honours included the 1957 Israel Prize for the orchestral work *The Sweet Psalmist of Israel* (1953). In 1972, after attending an honorary concert organized by the City of Munich, he was severely injured in a car accident that left him partially paralysed; this condition substantially limited his activities during the last 12 years of his life.

WORKS
*(selective list)*

Vocal: Ps cxxvi 'Wenn der Herr', male vv, 1929; Entrückung (S. George), Bar, pf, 1931; Pan (H. Lautensack), S, orch, 1931; Joran (R. Borchardt), S, T, Bar, B, chorus, orch, 1933; Akara [The Barren] (Rahel), 1v, pf/str qt, 1939; Variations on a Hebrew Melody, 1v, vc, pf, 1939; Hakhnisini [Take Me under your Wings] (H.N. Bialik), 1v, pf, 1940; Ps xxi, 1v, orch, 1940; Shimu iyim elai [Listen O Isles unto Me], A/Bar, pf, 1945; Liturgical Cant. (Pss), Bar, chorus, orch/org, 1946–50; Ronni, akara [Sing, O Barren] (Bible: *Isaiah*), SATB, 1947; Songs without Words, 1v, orch/pf, 1951 [arr. various ens]; Hazono shel navi [The Vision of a Prophet] (Bible: *Ezekiel*), T, SATB, orch, 1959; Bein hadassim [Myrtle Blossoms from Eden], S, Mez/Bar, pf/orch, 1966; Kabalat shabat (Friday evening service, Union Prayer Book), 1966; 80 German lieder, 1912–31; arrs. of traditional Middle Eastern songs, 1939–56; other Hebrew lieder

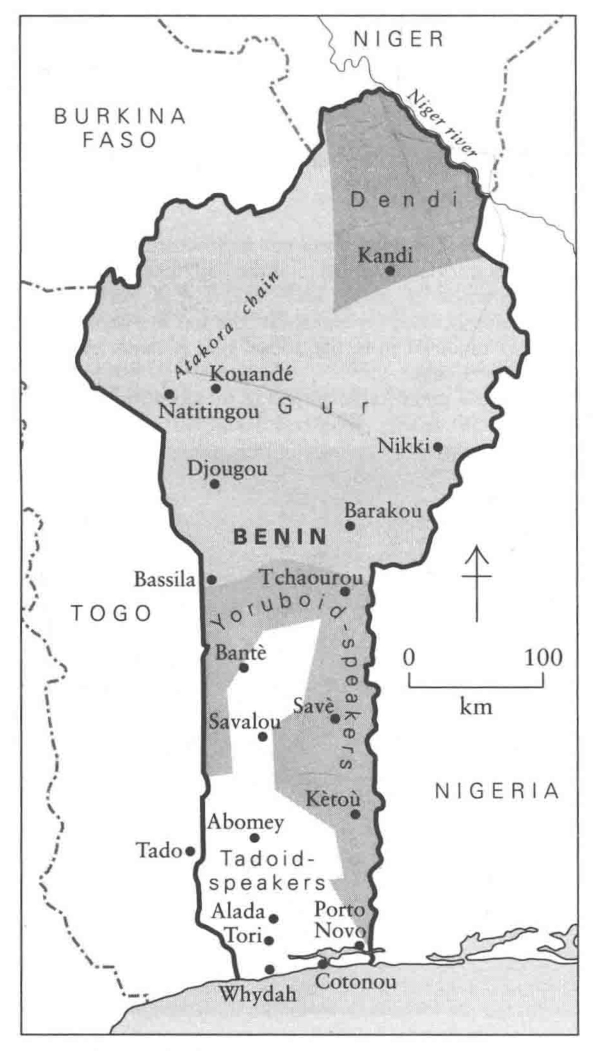
JEHOASH HIRSHBERG

**Benigni.** The published inventories of the Trent codices (DTÖ, xiv–xv, Jg.vii, 1900, and DTÖ, lxi, Jg.xxxi, 1924) list Benigni as the composer of a textless three-voice piece in *I-TRmn* 90 and *TRmd* 93, dating from the mid-15th century. In both cases the ascription has been read incorrectly: it is most probably Benigun. Since the same song is intabulated in the Buxheim keyboard manuscript (*D-Mbs* Cim.352*b*) with the title *Se belle anglicum*, it is likely that the composer was English, and was presumably JOHANNES BEDYNGHAM.

DAVID FALLOWS

**Benigun, Johannes.** *See* BEDYNGHAM, JOHANNES.

**Benin** (Fr. République du Benin) [formerly Dahomey]. Country in West Africa. Its frontiers, which cover an area of 112,622 km² and which result from the colonial partition of Africa at the end of the 19th century, do not correspond to any natural boundaries. With a population of 6·22 million (2000 estimate), the country groups together a number of peoples among whom there was no sort of unity before their conquest.



Lying north to south, Benin extends from the Niger to the Atlantic and forms a perpendicular cut through both the climatic zones and the West African societies that run from east to west, parallel to the coast of the Gulf of Guinea. From north to south, one moves progressively from dry, sparsely populated tropical regions to humid, densely populated equatorial regions. In the north-west a mountain massif that straddles Togo and Benin constitutes a region of its own.

1. Languages and ethnic groups. 2. Musical traditions of the main linguistic groups: (i) Tadoid-speaking peoples (ii) Yoruboid-speaking peoples (iii) Gur-speaking peoples. 3. Modern developments.

1. LANGUAGES AND ETHNIC GROUPS. Linguistically, Benin may be divided into three broad regions: the north, where most of some 25 different languages, spoken by peoples sometimes ethnically quite distinct from one another, belong to a linguistic group called Gur, and the south, where an equivalent number of languages forms two quite separate groups, presently labelled Tadoid (or Gbe) and Yoruboid. Tadoid languages are part of a greater linguistic group called Kwa, extending westward

through Ghana to Côte d'Ivoire and Liberia. Yoruboid languages are part of another group called Benue-Congo, extending eastward through Nigeria and Cameroon. Responding to this great diversity of languages, lands and climates, Benin is equally ethnically diverse. These linguistically divided regions interpenetrate at certain points and to varying degrees and often form enclaves. Each region is composed of several subgroups with their own characteristics (fig.1).

Throughout the country, with the exception of the north-western mountainous region of Atakora, more or less centralized and stable organizations of the kingship type have imposed themselves on regional populations since colonial times, thus giving birth to strata in the society, each with, at least partly, its own musical repertory. Another division is that separating initiated and non-initiated people, with, again, important consequences concerning music. All this, together with the cultural differences between men's and women's musical practices, as well as those between young people and adults, results in a highly diverse number of musical styles.

1. *Map of Benin showing the major linguistic groups*

2. Musical traditions of the main linguistic groups.

*(i) Tadoid-speaking peoples.* ('Tadoid': from Tado, capital of the ancient Aja kingdom, located in Togo). Their languages are closely related to Ewe, spoken in Togo and eastern Ghana, and they occupy the whole of the coastal region and the greater part of the south of Benin. Although this region may be subdivided historically, culturally and musically into provinces corresponding to ancient kingdoms, it will be treated here as a whole.

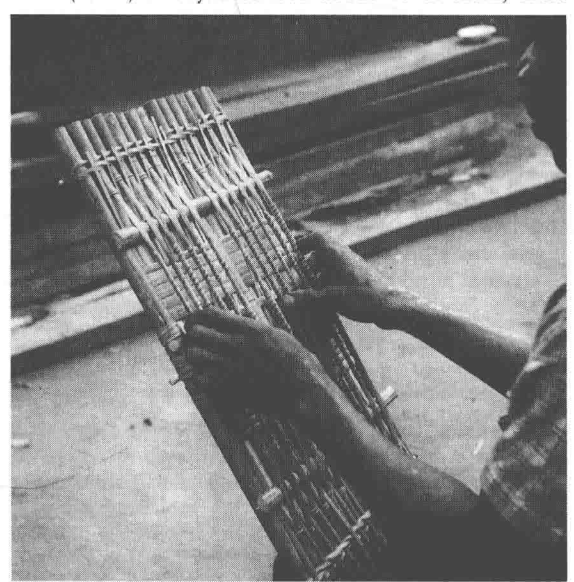
A type of xylophone, the largest known, is found between Tori and Porto Novo (fig.2). It is in fact two log xylophones juxtaposed but forming an inseparable unit. The larger instrument is placed across an earth pit. It comprises seven to ten keys, of which the largest is a beam about 150 cm long, the smallest about 90 cm long. The musician sits on the edge of the pit with the four keys of lowest pitch on his left and the rest on his right. He strikes the instrument with two beaters of different shape, material and weight, the heavier being held in the left hand.

The smaller xylophone is placed opposite. This smaller instrument comprises eight keys and is played by two musicians. The two xylophones are tuned differently: the keys of the small one are tuned to regularly ascending pitches, while the keys of the large one are tuned to pitches arranged in a saw-tooth fashion. The two xylophones form a sacred instrument that is brought out only on certain occasions and for certain *vodun* (gods).

Between Savalou and Porto Novo another instrument is found that is unique to this region, although a related form is used in parts of neighbouring Nigeria; it is the raft zither with bound strings (fig.3). This is relatively large, about 50 cm long by 20 cm wide, usually with 12 strings in two groups of six. It is an idiochord made from a number of palm stems tied together to form a flat board or raft; each string is a raised strip of a stem to which it remains attached at either end. The strings are held taut by two transverse bridges, one at each end of the instrument, and are stopped by sliding rings. They are bound by a ribbon of reed wound tightly round each string to weight it and thus lower its pitch. This initial tuning, determined by the weight of the string, is modified by varying the tension with the sliding rings. A small reed stem that serves as a buzzer is attached to each string.

Although it is gradually disappearing, the raft zither is often played with the bark flute and is used to accompany singing. A bark zither with a single string, used as a musical toy by children, is made from a palm stem that is much longer than those used for the raft zither. The centre of the stem is placed on a resonator made of an inverted half-gourd resting on the ground. The instrument is played by two people: one strikes the string with two fine sticks while the other stops it with a knife blade (Rouget, 1982).

Another instrument is the notched flute made of a liana stem that has been detached by heat. It has three finger-holes burnt in its length. The top of the pipe has a V-shaped notch and the bottom is partly closed by a small circular piece of gourd. In the 18th century, the King of Abomey granted a Whydah family the privilege of forming a bark flute ensemble to accompany long strophic songs performed by a chorus of women. Hunters use wooden whistles with a crescent-shaped mouthpiece and transverse bore. Side-blown ivory horns are played in honour of kings and princes by musicians who belong to their



*2. Double log xylophone of the Gun peoples in southern Benin*

suite. The secret society of 'night hunters' uses large, side-blown oxhorns, which are played with a quite different technique.

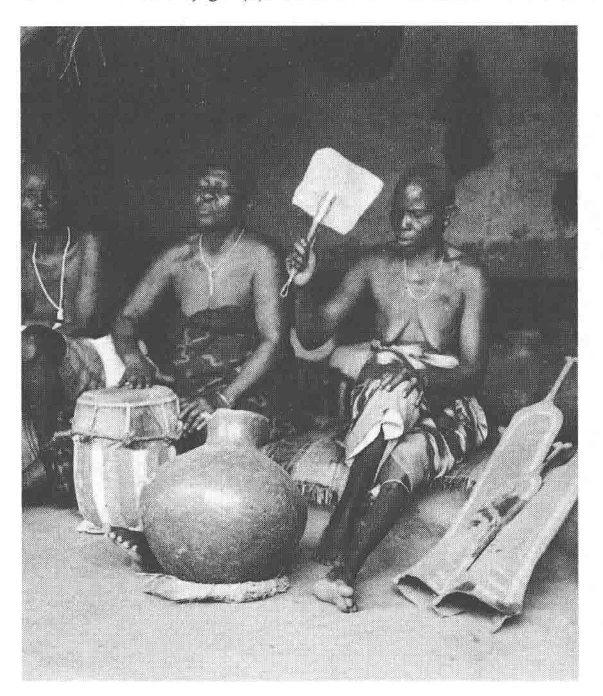
The iron bell, which appears in several different forms, and the drum are the most frequently used musical instruments. The bell is used in every instrumental ensemble and often by itself to provide the rhythmic accompaniment to the singing. The bell that is used for secular purposes is made from a folded sheet of iron with its sides hammered and soldered together and extended by a shaft that forms a handle. It is struck with a wooden stick. Certain bells, dating from about the 17th century, are larger and up to 90 cm in length. The rhythm produced by the bell is a combination of one short and one long beat, in a ratio of two to three. This is the basis of what Jones called the 'standard pattern' of a large number of African rhythms. The bell used for religious music is made in the same general way, but is in fact a double bell consisting of two bells, side by side, joined at their vertices. These two bells are of unequal height and produce an approximate interval of a 7th. Other clapperless bells in secular use are made from a folded sheet of metal without a handle. They are often used in pairs and are recognized as being male and female, as are the double bells described above. Certain cults use bells that are struck inside and are cornet-shaped, slightly open in their length. The most common form is a single bell, but multiple bells are also found.

Rattles are of wickerwork containing rattling objects or are gourds strung with beads, shells or bones; both types have handles. Wickerwork rattles are usually shaken in pairs, one being held in each hand; gourds are played singly and are either shaken or hit against the palm of the other hand. The wide-mesh net with which the gourd is strung is knotted with beads if the instrument is secular, with cowries or snake vertebrae if it is sacred. The lamellophone used for entertainment has five or six small tongues made of iron; the sound-box is made of wood and is quite large.

There is a remarkable variety of membranophones. Da Cruz (1954) briefly described about 40 of them; these

*3. Raft zither of the Mahi (Maxi), Fon (Fõ) and Gun (Gũ) people in southern Benin*

*4. Drum played by a Fon musician using a stick with his right hand and a small bow with his left hand*



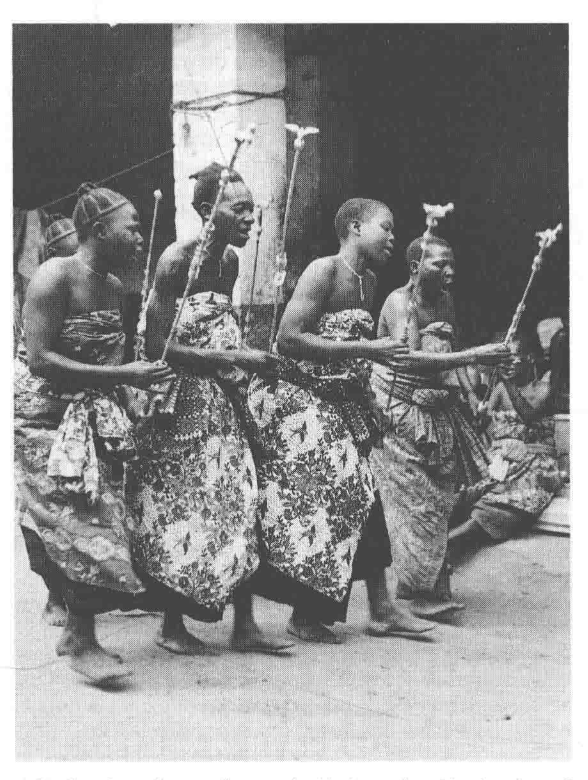
differ in the material and method of construction, the shape and height of their bodies, the methods of fixing the skins and the manner in which they are played. Most of them are single-skin drums and the membrane is always attached indirectly. The body is made either of wood or pottery; in the latter case the skin is attached by means of a wickerwork frame which almost entirely encloses the body. Certain instruments used at the Abomey court are of the same type as those found among the Asante (Ashanti) of Ghana and the Baoulé (Baule) of Côte d'Ivoire. They are drums played in pairs of male and female instruments resting obliquely on stakes and struck with forked sticks. These drums are used to sound the praise-names of kings and princes, the praise-names also being dance motifs.

Like all the Kwa languages, the Tadoid or Gbe (i.e. Ajagbe or Aja-Gbe, Fongbe or Fon-Gbe, Gungbe or Gun-Gbe, Mahigbe or Maxi-Gbe etc.) languages are tonal languages. The drums 'talk' by reproducing the inflections of the language, but in fact the words that are drummed are not identified unless the total phrase is itself already known; the patterns of sound are thus recognized rather than understood. Whether two sticks, a stick and a hand or two hands are used, the language tones are drummed by different types of opposition: either an opposition of place by striking the centre or the edge of the membrane, or an opposition of stroke through the use of 'checked' or 'unchecked' actions, or 'muted' or 'free' beats (in Jones's terms). The general principles of the system are described by Rouget (*RdM*, 1964). An ensemble of drums is generally composed of one 'talking drum' or pair of drums that jointly 'talk' and one or more accompanimental drums that are usually smaller. The ensemble is completed by a variable number of iron bells and rattles.

Among the small accompanimental drums, one is played with two sticks of different shape (fig.4): the right-hand stick is long and thin and the left-hand stick is in the shape of a small bow with a string made from a narrow strip of leather. One end of the bow is used either to stop the skin, which is struck with the other stick, or to obtain a different beat. Another type of drum found in this region is the rectangular frame drum (Schaeffner, 1958). Certain types of drum are reserved for particular uses, as were the war drums in the past. Secular and sacred drums are not always distinguished by their shape, but by whether or not they have been consecrated.

For funeral rituals, which occupy a very important place in the life of these peoples, different types of water-drum are used. The instrument consists of a rather large vessel, in principle of pottery, containing water on which floats an inverted half-gourd that is struck with a stick. The water-drum is usually played in pairs; it is accompanied by a variety of other rhythm instruments, the ensemble being used to accompany the singing and dancing during the vigils that follow interment or the celebrations that mark the end of mourning.

The percussion pots played by the queens at the courts of Abomey and Porto Novo have sometimes been wrongly included in the category of funeral instruments. These consist of large pottery vessels with rather narrow necks. They are placed on the ground in front of the player who strikes the mouth of each instrument with a type of leather fan, or sometimes with a wickerwork fan similar to that used to fan a fire (fig.5). The instrument produces a



*5. King's wives playing a percussion pot (centre) and drum in Porto Novo, Benin*

hollow sound, which provides the ensemble with a beat akin to a basic pulse. Among the Gun in Porto Novo, it is used to accompany the songs and dances of the young queens at the king's court, and of young princesses among other branches of the royal family. Queens and princesses dance leaning on metal staves decorated with rings that jingle to the rhythm of their dance steps (Rouget, 1971; fig.6). Music and dances accompanied by the percussion pots may be performed at festivities in memory of the dead, but they are performed just as often on other occasions as they do not have a particularly funereal character and, unlike those which are accompanied by water-drums, they do not incur any of the prohibitions connected with burial rituals (Rouget, *IMSCR* 1964).

In these areas, where the population density is one of the highest in Africa and where traditions remain very much alive, there is an intense social life. Birth, marriage, death, seasonal rituals, collective work, district or village festivities, ancestor worship or ceremonies for the *vodun*, all provide an opportunity for music-making. Each occasion and each ritual has its own music, and each god and each family has its own musical repertory. There is therefore a great variety of genres, each containing many pieces. Purely instrumental music exists, for example, in the use of iron bells, which are struck while a grave is being dug, as also does purely vocal music, like the songs that are sung twice a day for nine successive days over the grave of a man or for seven successive days over the grave of a woman.

Music, however, is for the most part performed by a combination of instruments and voices with a wide range of possible combinations. Singing is always monophonic; as far as is known, polyphonic music is not found in the Tadoid areas. For certain choral songs, whether secular or sacred, the chorus performs in unison and unfolds the melody in an absolutely linear form; but for other songs the melodic line is enriched, almost thickened, by all sorts of improvised ornaments (sung, spoken, shouted and ululated), which are of a rhythmic rather than a melodic character (Koudjo, 1988). This vocal heterophony is practised only in the lively songs that generally accompany frenzied dances characterized by the violent, almost disjointed shaking of the shoulders. The singers clap their hands in a deafening manner or beat their breasts fiercely with both fists, roaring at the same time. With the performers well stimulated by good food and drink, these songs of rejoicing, whether accompanied only by a beer bottle struck with a nail or by drums, bells and rattles, give an impression of unbridled exuberance.

In contrast, other songs are extremely restrained. They consist of long sequences of stanzas, carefully composed both poetically and musically and remarkable for the length of their melodic phrases. The style of these 'long songs' (as they are called) varies from region to region, but they are on the whole epic–lyric compositions, full of allusions to the history of the clan, the village or the kingdom (Rouget, 1971). Some are sung by men, generally in pairs, who sing stanzas in turn and who are assisted by 'prompters' in case they fall victim to the magic machinations of an enemy and their memories fail them. This type of repertory is derived, at least in part, from the 'challenge songs' that were cast from village to village in the past. Others are sung by choruses of women. All are learnt and rehearsed at length before being performed in public. Performance of long songs by men takes place during popular concerts for audiences of several hundred people and by women during court ceremonies in the intimacy of the royal palace. These melodies are fundamentally tetratonic but with a tendency to pentatonicism (Rouget, 1996). Every long song is followed without a

*6. Jingles of metal staves decorated with rings, played by the wives of a Gun king to accompany dancing*

pause by a short song in quick tempo composed of a single stanza repeated a fair number of times. Sometimes this second part, which corresponds to a change in the dance, is more rhythmic than melodic, performed in styles reminiscent of speech song. Side by side with this music there exists an immense repertory of smaller songs of very different types, notably the *chantefable* (Rouget, 1962).

Although it has much in common with secular music, religious music is distinct from it in two respects. In the first place, the cult of the *vodun* gives rise to ceremonies in which music and dance form an integral part of an extremely elaborate ritual, which is developed as a structure in time and which, strictly speaking, constitutes a theatrical enactment. These ceremonies are thus a series of spectacles that include purely instrumental episodes, sung passages, recitatives, spoken or declaimed passages, dance sequences and mimed actions. A series of events forms a number of 'scenes' or 'acts' performed with magnificent costumes, displays of colour, a variety of protagonists, spectators and the scenic organization of the space. These combine to make these ceremonies a piece of musical theatre in the full sense of the term.

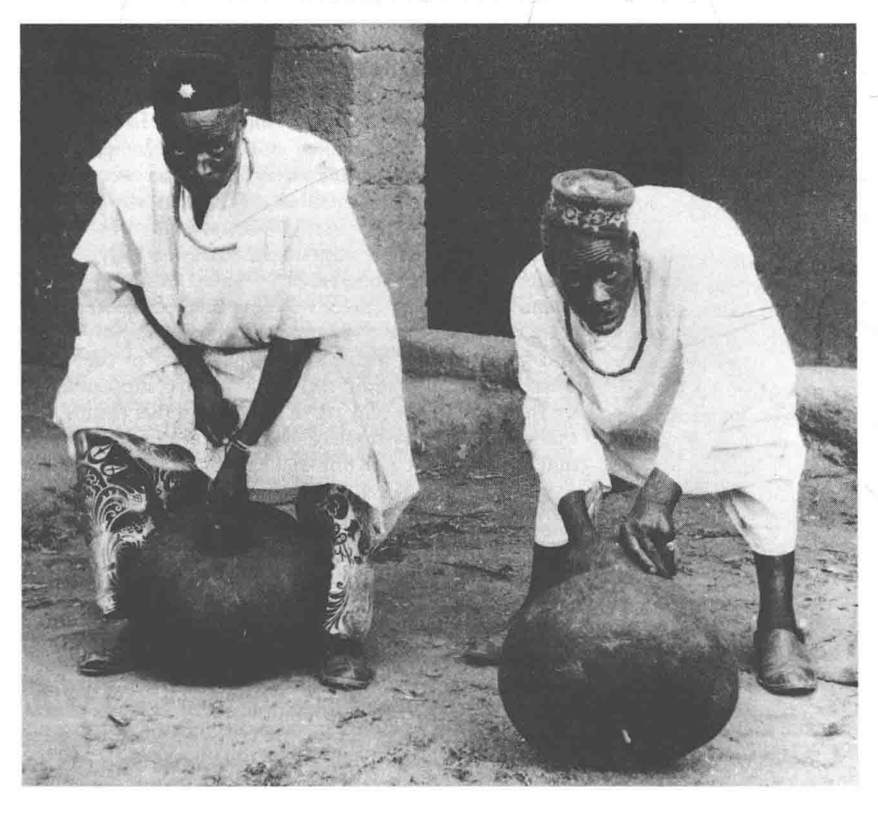
In the second place, the initiation into the cult of the *vodun* is performed in secluded places, each known as 'couvent' (a house of death), so called because as the initiates enter it they undergo a ritual death. The severe reclusion that the initiates undergo, sometimes for several years, is spent particularly in apprenticeship in a whole repertory of chants in a secret language. These chants are truly sacred; on no account can they be sung after final departure from the 'couvent'. The sacred chants are divided into the two categories of thanksgiving and quest chants. Each family of *vodun*, if not each *vodun*, has his own musical style. Taken as a whole, this sacred music shows three noteworthy features: an unusual vocal technique, the use of chromaticism and rigorous unaccompanied performance (Rouget, 1961). However, thanksgiving and quest songs and chants have quite different formal characteristics, the thanksgiving items generally being lengthy, often more than ten minutes, and the quest items being short, of the order of one to two minutes. They all, however, consist of highly elaborate forms (Rouget, 1990). They are learnt for a long time, rehearsed each day under the direction of a woman belonging to the hierarchy of 'féticheurs', who acts as choirleader, and must be performed perfectly. The thanksgiving chants are distinguished by their slow tempo, the length of the stanzas and the rigour and asceticism of the melodic pattern, which is broken by carefully calculated silences. They give an impression of intense spirituality.

With its totally opposite spirit and style, the music of the secret society of night hunters avails itself of a particular vocal technique, which also distinguishes it from the rest of the repertory. The vocal delivery of *vodun* song owes its distinctiveness to a specific vocal placement and tension (yet to be authoritatively described); but the calls of the night hunters, made back and forth among themselves as they take cover in the darkness at the bends in roads or lanes, are produced at the back of the throat so as to give a low and raucous utterance. This disguising of the voice is further accentuated by the effect of resonators of oxhorn placed in front of the mouth, or by the use of mirlitons. Moving about naked in the dark, the night hunters sometimes meet for processions on the roads. When they do this, they intone songs, in warrior style, in fierce voices and accompany them with long bellowings on their horns and with bells and iron tubes beaten frenziedly. High-pitched shrieks, strange or comical sounds, bursts of laughter, interjections emitted in cavernous voices are all mixed together, for the night hunters are mysterious beings who live in the sea and who speak the language of another world.

*(ii) Yoruboid-speaking peoples.* The eastern part of their territory is closely related, linguistically and ethnologically, to the neighbouring region of Nigeria, where the Yoruba form a people of several million inhabitants (*see* YORUBA MUSIC and NIGERIA). Since certain aspects of Yoruba culture, notably religion, have been maintained to a greater extent on Benin's side of the border, the corresponding music that has disappeared in Nigeria is still practised in Benin.

Like the cult of the *vodun* among the Fon and the Gun in Benin, that of the *orisha* among the Yoruba gives rise to magnificent ceremonies (Rouget, 1958), but ordered in a different way. Divine possession is more prominent, performers' roles are more individual, and although dance retains an important role, chanted speech plays a greater part. Chanted with clear language, but using texts that are often very difficult to understand, the liturgy of the *orisha* is imprinted with the same spirituality as that of the *vodun* (Laloum, Rouget, 1965). Whereas the Tadoid languages have only level tones, the softer inflexions of Yoruba, which has both level and gliding tones, give greater flexibility to the melody.

In the Yoruba area, the secret society called *oro* is comparable to that of the *zangbeto*, i.e. the 'night hunters' in the Tadoid area. The two societies use different musical instruments, but the music generally relates to the same aesthetic. Previously the *oro* was entrusted with the administration of justice, with the pursuit of wrong-doers, and with execution of those condemned to death. He makes himself known by his terrifying voice, which is that of the bullroarer, an instrument that may under no circumstances be seen by the uninitiated. His wife sings in a plaintive voice, which is produced by placing a mirliton made from a membrane of spider's cocoon in front of the mouth. Sometimes, in contrast, she yells in a piercing voice. For certain rituals an ensemble of bullroarers is used, in which several instruments of widely varying length are played together, the largest whirling slowly round and round to give a very low-pitched voice, that of the 'grandfather', and the smallest whirling rapidly round and giving a very high-pitched voice, that of the 'dog'. These artistically combined buzzings are supplemented by the continuous playing of two enormous drums and that of a third very small drum, the skin of which is very taut and whipped with fine sticks so that it whistles almost as much as it resonates. From time to time, the shout '*oro*' resounds, sung out in unison by all the participants to hail the miracle that is to be accomplished in the dark, the visible signs of which are spectacularly inscribed in the forest and will the next day stupefy the layman. Sacred music would thus seem to present in the Yoruba area as well as in the Tadoid area two opposed aspects: that of the unaccompanied chants for the *vodun* and the *orisha*; and the music of the secret societies, linked to the masks and the night. The latter, as much through the instruments used as by the use made of them, may be compared to the music of the 'sacred forest' of the Toma people in Guinea.



The Yoruba friction drum is particularly noteworthy (fig.7). It is made from the stem of a rush, which is inserted into the opening of a large gourd of water placed on the ground. The rush is held with one hand and rubbed with the other. The instrument, played in pairs, is used by members of the Ogboni society, which, in the past, was associated with the *oro*. Another secret society, known as *egungun* ('voices of the dead') or 'ghosts', plays an important role in funeral rites. The manner by which the 'ghosts' disguise their voices to sing in the course of their ceremonies, which resemble ritual theatre, is a noteworthy feature of music associated with masks. Completely hidden beneath speckled material cut from rich brocades, the 'ghosts' sing with raucous and extremely low-pitched voices that closely resemble those used for the 'leaf-masks' of the Basarí (Basari) of eastern Senegal for their agrarian rituals or those of the Tsogho (Tsogo) of Gabon for the ceremonies of Bwete (Bwiti).

The vocal music of a few peoples belonging to the western area of Yoruboid languages in Benin differs greatly from the music of the eastern side and more generally from the rest of the Yoruba area. Known as Itcha, Ife and Ana, these peoples, whose territory stretches also to Togo, sing polyphonically, an unknown practice among other members of the Yoruboid linguistic group. Their polyphony shows an extensive use of the interval of a 4th and is very different from the polyphony in 3rds of the Asante of Ghana or, among others, the Baoulé of Côte d'Ivoire. It also allows the voices greater mobility. Certain liturgical chants make a very particular use of chromaticism (Rouget, 1961).

Among Itchas, part-singing is, as far as is known, a musical practice of women. Young girls of 10–12 master this polyphonic singing. As a game or to accompany certain kinds of collective work, they sing short songs of elaborate strophic structures, one after another with quick tempos, and they are rigorously performed. Some girls also play a musical game in which two performers hold a long, hollow calabash tube. With their backs against a tree trunk, they stand side by side on one leg, keeping the other leg folded so they can beat the lower end of the tube against the thigh, while alternately opening and closing the upper end with the left hand in order to obtain two different sounds. The result is a rhythmic counterpoint in two parts made of a gentle and quiet series of bubbling sounds accompanied by the soft buzzing sound of a bead necklace coiled around the top of the calabash. Another game consists of playing a rudimentary kind of xylophone. This instrument is made of four short, stout and coarse rods of wood set across the two outstretched legs of the performer – usually a boy – who sits on the ground. These rods come from four different trees of four different densities and, therefore, yield differences in tone but not in tuning. This kind of xylophone exists elsewhere in West Africa (Rouget, 1969), notably among the Bariba of northern Benin.

*(iii) Gur-speaking peoples.* With the exception of the Dendi people and even more so the Fula (Fulani, FulBe or Fulɓe), who are scattered all over the region and have their own language and music, the entire population of the northern half of Benin belongs to the linguistic group called Gur. Nevertheless, a sharp distinction exists between east and west. The mountainous west, the Atakora, is inhabited by different small populations known as Somba (Sola or Solamba).

These societies are segmentary, with no central power, social stratification or people specialized in music-making. The common instrumentarium includes: drums (principally cylindrical with a snare), iron bells (struck with an

*7. Yoruba friction drums containing water, played by two members of the Ogboni secret society*

iron ring or consisting of a hoe blade), lithophones (often described as rock gongs), rattles, wood whistles with short or long tubes, side-blown flutes with finger-holes blown in solo, duo or larger ensembles, side-blown horns (antelope horn) and idioglot clarinets made of millet stem, but this inventory is certainly incomplete. There exists at least one known example (Duvelle, 1963) of a musical bow with a gourd resonator, an uncommon type of instrument in this part of Africa.

Rituals of different kinds, notably for agrarian or for age-specific festivities, make use of only a few of these instruments. However, for a great collective event, such as an important funeral ceremony (Arom, 1976), the whole of it may be mobilized, with the entire village involved. None of the instruments are tuned to each other. Each has its own individual tone colour together with its own way of being blown, struck or beaten. The sound is rhythmically organized. Despite a high degree of freedom and improvisation, each instrumentalist plays a complementary part. To the outside listener, this sounds like a rhythmic polyphony of tone colours, but for participants in the ceremony, this kaleidoscope of resonances is not only musical, it is also highly symbolic. Singing plays, of course, its part in the collective performance and takes two forms: dirges, which are long sentences sung by a woman in a speech-song manner, and dancing songs, which are brief repetitive melodies in call-and-response form.

The other part of north Benin, i.e. its central and eastern regions, differs from the west in that it was conquered by peoples who came from eastern regions located in what is now Nigeria. Among the different kingdoms of this area, known under the name of Borgu, Nikki is the most renowned. The king of Nikki had a powerful cavalry and reigned over an important population, the Baatonu, often called Bariba, whose language is spoken in most of this northern area of Benin. Bariba thus form a stratified society, with both nobles and commoners (and at one time freemen and slaves). Religious life also takes several forms: an autochthonous religion, Islam and the *bori*, a cult where possession trance plays a central role, borrowed from the neighbouring Songhai.

The music of the Bariba people is similar to the music of the Atakora peoples but has its own peculiarities. One example among many is the important role played by different kinds of rattles, the making of which is elaborate (Bio Tanné, 1986). Another particularity occurs in the music and dance called *teke*, which is performed for the enthronement not only of the great king but also of local chiefs. It is a hieratic dance performed by men, accompanied by drums. Performers sing while dancing and knocking together rods made of hard and sonorous wood, carved with care and often shaped in the form of a phallus.

Apart from the people's music, to which *teke* belongs, there exists a completely different court music performed only for kings. The ensemble that plays for the enthronement of the paramount king of Nikki is large, consisting of 16 long trumpets and four kettledrums (Bertho, 1951). These trumpets, called KAKAKI, are the same as those played for the Hausa emirs of neighbouring Nigeria. They are telescopic tubes of metal, and their overall length may vary between 2·5 and 4·25 metres (Ames and King, 1971). Men who blow them are professionals, members of a Hausa caste of musicians. As Schaeffner (1952) has shown, these instruments, of Middle Eastern origin, were introduced to Africa with Islam. At Kuande, capital of a smaller Bariba kingdom, the ensemble that performs every Friday (the Muslim day of prayer) in honour of the king is composed of only four *kakaki* and four drums, two of traditional cylindrical form and two of double-headed hourglass form. This last type of drum is probably also related to Islam. Music of this weekly ceremony requires the participation of singers, one of whom accompanies himself with a single-string fiddle (Arom, 1976). Singers as well as instrumentalists belong to a caste of musicians. The performance itself consists of vocal pieces in different styles and of different forms of praise for the king alternating with purely instrumental sections.

The aforementioned single-string fiddle, of which not only the bow but also the string is made of horsehair, is the principal musical instrument used for possession dances during the *bori* ritual. Tunes played by these fiddles (several may play together) call divinities to come down from above and be incarnated by their 'horses'. A set of calabash drums supplies the rhythmic element of the music. With this cult and its instruments, one approaches the Songhai-Zerma area of civilization from where they originate. (*See* NIGER as well as SONGHAI MUSIC for more detailed discussion.) The music of the Fula, a nomadic people scattered over northern Benin (Arom, 1975), is treated under The GAMBIA and FULBE MUSIC.

3. MODERN DEVELOPMENTS. The above description of the music of Benin corresponds to the traditional features of this music such as existed around 1975. Music, like everything else, changes, and radios and cassettes are now heard everywhere. Young musicians produce new music inspired either by local traditions or, in contrast, by turning their backs on them. Around 1980 a society named 'Union Nationale des Compositeurs-Chanteurs Traditionnels du Bénin' (UNCCTB) was created (Koudjo, 1989), and small firms now release their recordings under various labels. For lack of further information, a fuller discussion of this aspect of musical life in contemporary Benin cannot yet be attempted.

GILBERT ROUGET

**Benincori, Angelo Maria** (*b* Brescia, 28 March 1779; *d* Belleville, nr Paris, 30 Dec 1821). Italian composer and violinist. Son of a secretary of the Duke of Parma, he studied the violin in that city with the virtuoso Alessandro Rolla and counterpoint with Ghiretti, performing at court when he was seven. After his father's death he completed his musical education with financial help from the duke, probably taking lessons with Cimarosa. He may have written some church music at this time, but none appears to have survived. There followed a disastrous trip to Spain with his older brother Giuseppe, a cellist; they lost their money and Giuseppe died of a fever. (Fétis, who gave the fullest biographical account, dated this trip 1797.) Back in Italy, he had his opera *Nitteti* performed; it was subsequently given in Carnival 1800 in Vienna, where he remained until 1803 and where, under the influence of Haydn, he published his first two sets of string quartets. In about 1803 he moved to Paris and continued to publish chamber music, his admiration of Haydn being explicitly stated in the preface, reprinted by Finscher, to op.8. Although befriended by Pleyel, his attempts to establish himself as a dramatic composer in Paris were unsuccessful. Two operas (*Galatée* and *Hésione*) were accepted by the Opéra, but never staged, and he had to depend on teaching. Between 1815 and 1819 he did have three one-act works performed at the Opéra-Comique, but these had little success and their music is now lost. However, in 1818 he was given *Aladin* to finish for the Opéra when Isouard died, having partly completed only the first two of its five acts. But Benincori himself died six weeks before the première, and never knew its spectacular success, although this was largely dependent on new scenic effects and on the first use of gas to light the stage of the Opéra.

By his contemporaries he was most admired as a composer of string quartets. Although many sets were published under the title of *quatuors concertants*, only op.2 can be strictly related to the French model, with predominant first violin, digressive harmony and operatic march or romanza melodies. From op.3, all his quartets are in four movements, including an extensive opening movement and a minuet, and present a wider variety of language and style, in which violin virtuosity of the Viotti school is combined with Haydn's structural patterns. The influence of Haydn is particularly evident in the Quartets opp.4 and 5 which include eccentric minuets and feature incisive musical gestures and unusually concentrated motivic elaboration. Although dedicated to Haydn's memory, op.8 marks instead a return to the *quatuor brillant* type, with long solo passages accompanied by the other strings.

ANDREA LANZA

**Benítez, Joaquim M(aria)** (*b* Barcelona, 6 June 1940). Spanish musicologist. He studied classics and philosophy at Saint Francis Borgia College, Barcelona (BA 1963) and then was dispatched to Japan by the Society of Jesus. He spent two years learning Japanese and studying Japanese culture, becoming one of the first Westerners to study musicology and aesthetics at the graduate school of Tokyo University, and gained the MA (1971). He was ordained

priest in 1973, and was then appointed lecturer in music history and aesthetics at Elizabeth University of Music, Hiroshima (1974), becoming professor in 1985 and was also president of the university (1986–96). He has been an important mediator between Japanese and Western musicological worlds and his linguistic skills are clearly exhibited in his Japanese translation of Hughes' *A History of European Music*, his editorial work on the Japanese edition of *The New Grove Dictionary of Music and Musicians* and his editorship of the *Contemporary Music Review* (1986–). He organized the annual conference of the International Association of Music Libraries, Archives and Documentation Centres in Tokyo (1988). He has published his research on Japanese and Western contemporary music in both Japanese and Western languages.

YOSIHIKO TOKUMARU

**Benito (y Barbero), Cosme Damián José de** (*b* Madrid, 27 Sept 1829; *d* Madrid, 15 Jan 1888). Spanish composer. As a youth he studied solfège with his uncle, organist at the colegiata of Pastrana, and composition with Indalecio Soriano Fuertes. Later he studied the violin with Díez and the cello with Aguirre at the Madrid Conservatory and made a living as a cellist in various Madrid theatres until appointed organist and *maestro de capilla* at El Escorial on 1 September 1859. A reduction of personnel in 1868 left him in 1870 without a choir. On 20 December 1870 he was named professor at the Escuela Nacional de Música y Declamación in Madrid, and on 20 January 1886 he was appointed second organist of the royal chapel at Madrid. His honours included the Cross of the Order of Charles III (20 May 1871) and corresponding membership at the S Fernando Academy on 18 March 1879.

His more than 200 mostly sacred works, dated between 1846 and 1888, consist of masses (3 with orchestra), 6 settings of the Requiem, including opp.176 and 180 (Barcelona, n.d.), settings of the *Miserere*, *Stabat mater*, *Salve regina* (Madrid and Barcelona, n.d.), other Latin works, an oratorio *Las siete palabras de Jesu Cristo* with text by J.M. de Berriozábal (Madrid, 1861), and five textbooks (1877–84). Antonio Romero y Andía was his chief publisher. On request from the sesquicentennial commission at Philadelphia in 1873–5 he prepared a still useful 133-page catalogue listing 3000 titles of manuscript music at El Escorial (*E-Mn* M.2181).

ROBERT STEVENSON

**Benjamin, Anton J.** German firm of music publishers. Its origin can be traced to 1818, when Joseph Benjamin founded a book and music shop in Altona, which his son Anton later re-established in Hamburg. John Benjamin (1868–1931), a grandson of the founder who had taken charge of the firm in 1888, bought the Böhme music shop and concert agency in Hamburg in 1907. In 1917 he acquired the music publishing house originally founded in St Petersburg by A. Büttner but which had been taken over by Daniel Rahter in 1879. As Verlag Benjamin, the firm moved to Leipzig in 1920, and Richard Schauer, a nephew of John Benjamin, took over the direction. In 1925 they acquired the A.E. Fischer publishing house of Bremen, and in 1929 the Simrock music publishing firm. By taking over the Rahter and Simrock concerns, which continued to exist under their original names, the group publishing business of Benjamin acquired original publication rights on works by Tchaikovsky, Richard Strauss, Respighi, Rheinberger, Wolf-Ferrari, Beethoven, Brahms, Dvořák and others. After the Jewish pogrom of 1938 Schauer was forced to sell the publishing complex and emigrate to England. In 1951 the firm was returned to its rightful owner and Anton J. Benjamin Musikverlag GmbH was founded in Hamburg (the Leipzig house was completely destroyed during an air attack in 1943). The principal areas of publication of the Benjamin Verlag are *Hausmusik* and other light music. The firm is now run from London (at the premises of Schauer and May Ltd) by Schauer's daughter, Irene Retford.

THEODOR WOHNHAAS

**Benjamin, Arthur (Leslie)** (*b* Sydney, 18 Sept 1893; *d* London, 10 April 1960). Australian-English composer and pianist. After general education at Brisbane Grammar School he entered the RCM at 18, studying composition there with Stanford; a common admiration for Brahms eased his path with that teacher. Benjamin remained at the RCM until the outbreak of war in 1914, when he joined the infantry, later transferring to the air force. After the war he was for a short time a piano teacher at the Sydney Conservatorium, but his need for European musical life brought him back to London in 1921. His first published work, a string quartet, appeared in 1924 and won a Carnegie Award, and in 1926 Benjamin joined the staff of the RCM. An early enthusiasm for the music of Gershwin stimulated his Piano Concertino (1926), which he declared to have been influenced by the *Rhapsody in Blue*, although it is difficult to find this influence in the innocent sounds of Benjamin's Concertino, which bears a greater resemblance to salon music or to the music of the French music halls before the introduction of jazz. The composer himself played the solo part at the

first performance in England, conducted by Wood. Benjamin was a very good pianist, although not perhaps a virtuoso, and his playing affected both his style of composition and his musical career. He also gave the first performances of Howells's Piano Concerto no.1 (1913) and Lambert's Piano Concerto (1931).

More long-lasting and fruitful than the influence of Gershwin was that of Latin American music, which Benjamin heard during his travels as an adjudicator and examiner for the Associated Board. He wrote works in Latin-American dance rhythms throughout his life, and indeed one of his best known pieces is the *Jamaican Rumba* (1938), originally for two pianos and later orchestrated. It made his name known throughout the world, and many would have been astonished to learn that he was a 'serious' composer and a professor at the RCM. The 'light' element remained an important feature in his music until his last years. With the exception of several works his music is jovial in mood and uncomplicated in technique; a touch of neo-classicism in the Violin Concerto (1932) merely reflects the compatibility of the manner with Benjamin's essential cheerfulness. His first opera, *The Devil Take Her*, displays his light touch and sense of humour. The longest and most serious of his completed operas is *The Tale of Two Cities*. This was revived (1995) in excerpts for a BBC radio broadcast. None of his dramatic pieces has held the stage. Benjamin's orchestral music has fared better: the two concertante piano works have a certain life, and the second (1949) ends with a rugged and dramatic Passacaglia, an indication of the more profound direction that his music was taking in his last years. The *Romantic Fantasy* for violin, viola and orchestra is an ardent and wholly successful work, indebted to both Delius and Bax. His only symphony (1944–5) was performed at the 1948 Cheltenham Festival. It is dark and powerful, tragic in expression, and its mood seems in keeping with the time at which it was written. Much the same mood is shared by the Viola Sonata and the Ballade for strings. There were two further operas: *Mañana*, the first opera commissioned for BBC television, and *Tartuffe*, of which Benjamin completed the short score but orchestrated only a few pages.

His piano pupils included Britten. As a teacher, pianist and composer Benjamin was an accomplished professional, as was recognized by the Worshipful Company of Musicians which awarded him the Cobbett Medal in 1956. Film music was eminently fitted to his talents, and he contributed some successful examples, including scores for *An Ideal Husband* and for a documentary about the ascent of Everest.

WORKS
*(selective list)*

PETER J. PIRIE/ROBERT BARNETT

**Benjamin, George (William John)** (*b* London, 31 Jan 1960). English composer and conductor. He started composing at the age of seven and studied both the piano and composition with Peter Gellhorn until the age of 15. From then until the age of 19 he studied first privately and then at the Paris Conservatoire with Messiaen, also taking piano lessons with Messiaen's wife, Yvonne Loriod. He then studied composition with Goehr at Cambridge University (1978–82). Since the late 1980s he has also been active as a professional conductor; in 1993 he was appointed principal guest artist of the Hallé Orchestra. He was artistic director for the BBC's three-year festival Sounding the Century (1996–9) and was subsequently appointed composer-in-residence to the Berlin PO from Autumn 2000. Since 1999 he has taught and conducted at the Tanglewood Summer School.

Benjamin's first acknowledged pieces, composed in his late teens and early 20s, demonstrate remarkable assurance both in the handling of large orchestral sonorities and in the pacing of continuous, single-movement forms, often descriptive in character and inspiration. Despite his early studies with Messiaen, his harmonic style was already quite distinct from that of his teacher, owing more to Berg, Boulez and Dutilleux, with a clear preference for rich, resonant chords in overtone-type spacing. This is most evident in his early orchestral piece *Ringed by the Flat Horizon* (1979–80), which first brought him to public notice. He reacted very strongly against the serially derived compositional styles prevalent up to the late seventies: frank references to tonally inflected or jazz-inspired chords were also a common feature of his early work, especially the Piano Sonata (1977–8) and his later piano piece *Sortilèges* (1981). Attempts at a more abstract style, however, were largely unsuccessful, and he withdrew his dissonant, polyrhythmic *Duo* (1979–80) for cello and piano.

Benjamin's growing interest in the spectral music of Grisey and Murail is reflected in *At First Light* (1982) for ensemble. While never a strict spectral composer, he learnt much in terms of form and scoring from this trend; this is most evident in the work's long progression towards an overtone spectrum on C, which is reached at the end of the third movement. Benjamin obtains a very rich, almost orchestral sonority from an ensemble of only 14 players, both by his research into spectra and by the sophisticated layering of instrumental techniques employed in many registers simultaneously, giving the impression of a much larger ensemble.

This work marked the end of Benjamin's first group of pieces, all heavily influenced by French music. He has since moved away from this style towards a much more constructivist attitude, influenced by the music of Carter and the teaching of Goehr, with its emphasis on contrapuntal techniques, which had not until then been a major feature of his music. This resulted in a dramatic slowing of his output; he completed no large work for the next five years. The first steps towards a new manner were taken in the Three Studies (1981–5) for piano. In the first study, *Fantasy on Iambic Rhythm*, every detail is almost obsessively derived from a simple rhythmic cell, which is heard in multiple augmentation and diminution simultaneously in several independent layers. This technique was expanded in *Antara* (1985–7) for two solo flutes, live electronics and ensemble, which is a rare instance in Benjamin's output of sonorities and idioms loosely inspired by a folk music source (all the electronic sonorities were derived from the sampled sounds of Andean panpipes). Despite its primarily melodic, linear texture, the pitch structure of this work is more strictly spectral than anything else Benjamin has composed to date. Many of the modes used in the piece are constructed from scales of natural harmonics in pure tuning; the contrasting modal areas are formed by modulating between these different scales.

With *Upon Silence* (1989–90), a Yeats setting for mezzo-soprano and five viols, Benjamin finally abandoned the harmonic basis of his training with Messiaen in favour of an exclusively polyphonic texture of greater modal simplicity than anything he had previously written. Several extended passages have almost no accidentals at all; the work also introduced a personal adaptation of cantus firmus technique, and a melodic style loosely based upon plainchant neumatic cells. The vocal writing becomes increasingly melismatic as the work progresses, the entire final section being given over to a lengthy setting of a single line of poetry.

Throughout this period Benjamin had been working on a large orchestral project which was to emerge in 1993 as *Sudden Time*. This work combines many of the techniques of the previous ten years within the span of a single movement lasting 15 minutes. Much of the piece is based upon rhythmic premises developed from those in *Antara* and the first piano study. *Sudden Time* is not based upon a rhythmic cell, but a triple meter which is expanded, contracted and unpredictably distorted on several simultaneous layers throughout the second half of the work. The modal language of the work is formed from several multiple-octave scales, which Benjamin terms 'screens', characterized by different types of intervallic content, which are rarely heard in their entirety. A special system of passing notes is employed to modulate from one screen to the next, generating contrasting harmonic areas. In a typical process of intensification, the concluding viola solo virtuosically combines many of these techniques at once within a single instrumental line spanning more than four octaves, with separate staves for pitch and bowing articulation. The unusual instrumentation includes a muted upright piano, four alto flutes frequently playing natural harmonics and two Gartlein miniature recorders. The full orchestra is usually split up into numerous independent chamber groups in simultaneous dialogue; there are very few passages using the conventional tutti sonority.

Benjamin's first work for chorus, *Sometime Voices* (1996), was commissioned for the opening of Bridgewater Hall, Manchester, and is a setting of Caliban's speech from Act 3 scene ii of Shakespeare's *The Tempest*. Here Benjamin employed major and minor triads in his harmonic vocabulary for the first time since the early eighties, partly in order to ensure harmonic clarity in the choral writing. These triads are not used tonally, however, but in chains of progressions which specifically avoid any overt tonal references, employing common tones to link them in unpredictable patterns. The continuity of the piece, as well as its more overt dramatic shape, suggests the possibility of an as yet unexplored operatic talent.

The *Three Inventions* (1993–5) can to some extent be seen as an attempt to integrate elements from Benjamin's earlier manner with his later techniques, combining tributes to both of his principal teachers, Messiaen and

Goehr, with a manic central scherzo partly inspired by Burmese court music. The pitch syntax of the three pieces is the widest he has yet employed, ranging from the pure diatonicism of the first invention to the extreme chromaticism of the last, which is perhaps the most dissonant piece he has ever written. His fascination with simultaneously evolving layers of material is most evident in this last piece, which combines seven different types of music in competition with each other, breaking off abruptly without resolution. The forms of these pieces elude any easy classification as they derive their shape from the perpetually changing interactions of the musical materials employed. This fluid attitude towards form and musical time is typical of all Benjamin's recent work, perhaps in reaction to the more obvious forms of his earliest pieces. This is equally evident in the duet *Viola, Viola* (1997), which attempts to give the illusion of many instrumental voices by means of dense polyphonic layering, similar to that of the third *Invention*.

Benjamin's activities as a conductor have included numerous first performances, among them pieces by Wolfgang Rihm, Unsuk Chin and Gérard Grisey. He was appointed professor of composition at the RCM in 1985.

Wisely, Benjamin has resisted the temptation to exploit his natural facility for composing, preferring instead to challenge himself afresh with each piece. Although he found it essential to break free from the harmonic bias of his studies with Messiaen, there is no doubt that in his later work he builds inventively upon fundamentals inculcated by the French master, especially in the field of rhythm. For all that his compositional trajectory has been characterized by a tendency to make every work quite distinct from its predecessors, there is a clear sense of stylistic consistency throughout, notably in the acuity of his ear for unexpected instrumental combinations of great refinement and his distinctively personal reinvention of modality. His meticulousness and insistence upon the highest standards of realization make his one of the most original and surprising outputs of any composer currently working.

JULIAN ANDERSON

**Benjamin, William E(mmanuel)** (*b* Montreal, 7 Dec 1944). Canadian music theorist. Following baccalaureate studies in composition at McGill University, Montreal (MusBac 1965), he continued his studies in composition and music theory at Princeton University (MFA 1968; PhD 1976, with a dissertation on modular equivalence as a musical concept). He taught at Wellesley College (1970–72) and the University of Michigan (1972–6), then joined the staff of the University of British Columbia (associate professor, 1978–83; professor, 1983–; director of the School of Music, 1984–91). Benjamin has contributed significantly to a wide range of theoretical issues with published writings in the areas of tonal and atonal pitch organization, musical metre, and meta-theory. His work falls within a neo-Schenkerian tradition (typical of theorists from Princeton) inasmuch as his concerns with issues of prolongation and voice-leading are not bound by strict Schenkerian concepts of monotonality and contrapuntal processes. However, unlike some theorists from this school, he remains highly committed to the concept of harmony as a fundamental force of pitch organization. He propounds a new theory of harmony in 'Pitch-Class Counterpoint in Tonal Music' (1981) and examines the broader implications of this theory – as well as any other theory of tonal harmony – in 'Models of Underlying Tonal Structure' (1982). His later work addresses issues of harmony and tonality in late 19th-century music.

WILLIAM E. CAPLIN

**Benjelloun, Hajj Driss** [Bin Jallūn al-Tuwīmī, al-Hājj Idrīs] (*b* Fès, 6 June 1897; *d* Casablanca, 1982). Moroccan musicologist. Born into a wealthy merchant's family, he began work as a trader, and founded his own company. He settled in Casablanca, where he studied Islamic hymnology, the piano and the 'ūd. In 1958 he founded the Association of Amateurs of Andalusian Music in

Casablanca and served as its president until his death. In 1978 the association launched the occasional journal *al-Rabāb*, of which Benjelloun was the chief editor. The leading Moroccan scholar of Arab-Maghrib music, he delivered papers at all of the important musicological conferences in the Arab world. His main contribution to musicology was the revision he made of poems sung to the *nawbāh*, and the publication of the *Kunnāsh* of al-Ḥā'ik (1981), to which he added two mizān (movements) lacking in previous editions. He also composed in the traditional Maghrib style.

CHRISTIAN POCHÉ

**Benkő, András** [Andrei] (*b* Feiurdeni, Cluj, 21 Jan 1923). Romanian musicologist of Hungarian descent. He studied at the Cluj Conservatory (1946–50), where his teachers included Major, Mureşianu and Lakatos, and took the state music teacher's diploma in 1951. He was secretary of the Cluj Béla Bartók Choir (1948–9) before joining the department of composition and musicology at the Cluj Conservatory in 1949, becoming lecturer (1952–67) and reader (1967–85). He took the doctorate at the Cluj Conservatory in 1977, with a dissertation on Bartók. His special interests include Romanian and Hungarian music, the interpretation of early manuscripts, questions of music theory and style and music bibliography. He became a member of the Romanian Composers' Union in 1955 and was awarded the Bartók commemorative medal in 1968.

**Benmet, John.** *See* BENET, JOHN.

**Benn, Johann** (*b* in or nr Messkirch, Baden, *c*1590; *d* Muri, Aargau, Switzerland, *c*1660). German composer and organist resident in Switzerland. He is referred to as an organist at Messkirch in 1621, and he was probably also Kapellmeister of the private chapel of Count Wratislaus von Fürstenberg. He went on a pilgrimage to Einsiedeln in 1630. In 1638, on the recommendation of the Bishop of Konstanz, he was appointed organist of St Leodegar und Mauritius, Lucerne. In 1655 the Lucerne council agreed to his entering the monastery at Muri, where he was still living in 1657. His music is characterized by simple harmony, straightforward melodic lines and clear counterpoint. Venetian influence can be seen in the preference for polychoral writing. Johann Donfrid thought highly enough of his music to include six works in his celebrated anthologies of the 1620s.

WORKS

MAX ZULAUF

**Bennet, John** (i) (*b* ?1575–80; *fl* 1599–1614). English composer. He dedicated his madrigal volume (1599), 'these first fruits of my simple skill ... the indeavors of a yong wit', to Ralph Assheton, who held civic office in both Lancashire and Cheshire, as a token for favours

received. It seems probable, therefore, that Bennet came from the north-west of England, and was born about 1575–80.

For his madrigal volume Bennet took an unusually large number of texts (six out of 17) from existing collections; three of these texts had been printed only in the preceding year. Although Bennet did not borrow musical ideas from these earlier settings, he was evidently well acquainted with the very latest trends in the English madrigal. Certain features in his work seem to derive from Weelkes and Wilbye, but Morley was clearly his main model. Yet a trend towards the more serious madrigal is also present in this collection, and one work, *I languish*, employs the measured manner, amorphous imitation, long-drawn lines, and textural consistency reminiscent of a pre-madrigalian English tradition. *O sweet griefe* essays the same manner with greater impact because of its more compressed treatment of the text. *Weepe O mine eyes* is more successful still; the resemblance of the opening to the first phrase of Dowland's *Flow, my teares* can hardly be coincidental. By contrast, Bennet's Oriana madrigal, *All cre'tures now* (in RISM 1601[16]), demonstrates his command of a forthright festive manner.

The older native root to Bennet's style is also revealed in his works surviving in manuscripts. Of his two viol-accompanied songs, *Eliza, her name gives honor* is clearly an occasional piece in praise of Queen Elizabeth. His substantial verse anthem, *O God of Gods* (2pt *To the Almighty Trinity*, described in Clifford's *The Divine Services* (1663) as 'For the king's inauguration'), uses viols to collaborate with soloists in weaving a complex contrapuntal web which is akin to Gibbons's verse anthem style.

Bennet contributed four psalm settings and a prayer for the queen to Barley's psalter (1599[9]). His remaining published works, six contributions to Ravenscroft's *A Briefe Discourse* (1614[21]), reveal a vigorous native character, owing nothing to his earlier madrigals. Intended for unsophisticated diversion, they are forthright and humorous. Some are straightforward vocal pieces, while others combine verses with a repeated chorus. One piece is in a West Country dialect.

WORKS

Madrigalls, 4vv (London, 1599); ed. in EM, xxiii (1922, 2/1979)
Madrigal, 5vv, 1601[16], ed. in EM, xxxii (1923, 2/1962); 6 secular pieces, 4vv, 1614[21], 2 ed. in EM, xxiii (1922, 2/1979)
2 consort songs, 5vv; ed. in MB, xxii (1967)

5 sacred pieces, 1599[9]
Verse anthem, *GB-Ckc*, *DRc*, *Lbl*, *Lcm*, *Och*

DAVID BROWN

**Bennet** [Bennett], **John (ii).** *See* BENET, JOHN.

**Bennett, John** (*b* ?1725–30; *d* London, Sept 1784). English organist and composer. According to Burney, Bennett was a pupil of Pepusch and, though he occasionally appeared as a 'Chorus singer & figurante in processions' (i.e. as a stage extra or theatrical 'walk-on'), was chiefly employed as a viola player in the Drury Lane orchestra; he subsequently became a member of the Royal Society of Musicians and a member of the Queen's Band. In April 1752 he succeeded Burney as organist of St Dionis Backchurch, Fenchurch Street, and six years later he published an interesting set of *Ten Voluntaries for the Organ or Harpsichord* to which many contemporary musicians including Handel subscribed. These pieces are remarkable not only in that they show a keen awareness of developing *galant* idioms, but also as being among the most extended and technically demanding 18th-century examples of their kind. Bennett was a skilled contrapuntist, and his fugues in particular have an almost Germanic consistency of texture. It is curious that, apart from three hymn tunes contributed to *A Collection of Melodies for the Psalms of David, according to the Version of Christopher Smart* (London, 1765), he appears to have published nothing else.

H. DIACK JOHNSTONE

**Bennett, Joseph** (*b* Berkeley, Glos., 29 Nov 1831; *d* Purton, nr Berkeley, 12 June 1911). English music critic and writer. He attended singing classes at Berkeley Town Hall, was solo boy in the parish church choir, and also studied the organ, violin, viola and cello. He was a church organist in Margate from 1853 to 1855, when he moved to London. In the early 1860s he served in the Regiment of Volunteers under Colonel J.H. Mapleson (later manager of Drury Lane Theatre).

Bennett was precentor of Weigh House Chapel and organist of Westminster Chapel, and in 1865 assisted Henry Coleman, music critic of the *Sunday Times*; when Coleman retired, Bennett was appointed in his place. In 1870 he joined the *Daily Telegraph* as leader writer and music critic, remaining there and exercising great influence until his retirement. In addition he wrote for the *Pall Mall Gazette*, *Graphic*, *Pictorial Times* and *Musical World*, still continuing to contribute to the *Sunday Times*. From 1874 his work was centred on the *Daily Telegraph* as leader writer and music critic, though he was also on the staff of the *Musical Times* and editor of *Concordia* for Novello (1875–6). In 1876 he attended the first Bayreuth Festival, publishing his *Letters from Bayreuth* the following year.

In 1883 he became the first editor of *The Lute*, and in the same year acted as adjudicator for the Welsh National Eisteddfod, also spending some time in Ireland. He sailed for New York in October 1884 intending to go to Winnipeg, but almost his whole time was spent in the USA, where he was much impressed by the music of the Mormon Tabernacle in Salt Lake City; he returned to England in February 1885. He visited Bayreuth again in 1886 and was at the première of Verdi's *Otello* at La Scala in 1887. He retired in 1906.

As a critic Bennett was influenced by J.W. Davison, music critic of *The Times*, who wielded considerable power. Bennett admired Brahms, but found Wagner beyond his comprehension. He gave encouragement to Elgar in his *Daily Telegraph* articles, though he declined Elgar's request to write a libretto on the subject of S

Augustine. He was nonetheless a prolific librettist, providing texts for concert works by Barnett, Mackenzie and Sullivan (*The Golden Legend*).

ARTHUR D. WALKER

**Bennett** [DiFiglia], **Michael** (*b* Buffalo, NY, 8 April 1943; *d* Tucson, AZ, 2 July 1987). American director and choreographer. He made his début at the age of 17 as Baby John in a tour of *West Side Story*, and was influenced by working with Jerome Robbins, Michael Kidd and Peter Gennaro in further Broadway shows. His first orginal dances featured in the short-lived *A Joyful Noise* (1966), and in the following year he staged *How Now, Dow Jones* whose producer, David Merrick, spotted Bennett's potential and gave him his first hit, *Promises, Promises* (1968), with his first show-stopping number, 'Turkey Lurkey Time'. His staging of *Follies* in 1971 was so integral to the show's success that Hal Prince gave him co-director's credit. By *Seesaw* (1973), he took over the direction, choreography and writing of an out-of-town disaster and reversed its fortunes: this level of artistic control inspired Bennett to develop *A Chorus Line*. A series of workshops and interviews with dancers talking about their lives was transformed by him into a non-stop collage of dance, speech and song which told a specific story about dancers seeking work, but also worked as a potent universal metaphor. The apotheosis of the musical, *A Chorus Line* ran from 1975 to 1990 in New York, and has remained in production continually since. Bennett's fusion of all the elements of stage production into a seamless performance, also seen in the disappointing *Ballroom* (1978) and the commercially successful *Dreamgirls* (1981), has influenced all subsequent musicals.

ROBERT HOWIE

**Bennett,** Sir **Richard Rodney** (*b* Broadstairs, 29 March 1936). English composer and pianist. He was educated at Leighton Park School and at the RAM, where he studied with Ferguson and, briefly, Lennox Berkeley. The son of a well-known writer of children's books and a one-time pupil of Holst, his family background seemed set to nurture the talents of a budding musician. But such favourable circumstances cannot alone account for the fact that he started to write music almost before he could read, nor for the continued fulfilment of an early promise that enabled him to complete his third string quartet by the time he was 18 and, a year later, his first documentary film score.

Gifted with an acutely sensitive ear and consumed by an insatiable musical curiosity, Bennett's self-education was predictively catholic, ranging from the early 20th-century English music he first knew as a child, to the show tunes he took down from recordings heard in his teens, to the newest of the new European composers he discovered through listening to the weekly late-night programmes broadcast from German radio stations in the years immediately following World War II. By the end of his first year as a scholarship student at the RAM he was a fully fledged European himself, spending part of his summer holidays at the Darmstadt summer courses, both before and after the award of a scholarship from the French Government enabled him to spend two years in Paris (1957–9) as a student of Boulez.

Having by then made an extremely auspicious professional début as a composer of music for feature films (*Interpol* and *A Face in the Night* both date from 1956, *The Safecracker*, *Indiscreet* and *The Man Inside* from the years of his Paris studentship), it is the more remarkable that he was able so wholeheartedly to immerse himself in the most up-to-date of the avant-garde techniques fresh from the workshop of Boulez and others of the Darmstadt persuasion. While there remains only one work dating from this period (the unpublished *Cycle II for Paul Jacobs*) of which Bennett himself is justifiably proud, and although he was thereafter to set aside these European influences, the Paris years were undoubtedly formative ones. Returning to London in 1959, his career in film music continued apace (20 of his 50 or so film scores date from the following 10 years); this intense activity not only provided him with a good living, but brought an almost embarrassing acclaim for work he has always regarded as incidental to his primary job as a composer of concert music. From this point on he learnt more and more to compartmentalize his various musical talents.

While Bennett could well have opted for the temptingly fashionable internationalism of the 1950s, his successful foray into avant-garde techniques was in the end to last

*Richard Rodney Bennett, 1986*

no more than the couple of years he spent in Paris. It was nevertheless the enriching effect of this experience that enabled him to pick up the stylistic threads of his teenage Sonata for piano in a series of works in which the essentially melodic basis of the 12-note row was expanded to include ideas on harmonic proliferation learnt from Boulez. Almost a decade on Five Studies for piano show a distinctly more personal approach to serialism and to the evolution of a musical vocabulary that was to serve his expressive needs for the next twenty years or so. Composed in 1961, the one-act chamber opera, *The Ledge*, was followed in quick succession by *The Mines of Sulphur*, *A Penny for a Song* and *Victory*, all completed within a decade which also included a couple of stage pieces for children, two of his three symphonies, the Piano Concerto, *Epithalamion*, and 30 or more smaller but no less important vocal and instrumental works. This astonishing prolificity was sustained through the 1970s, with eight of his 17 concertos, *Spells* for voices and orchestra, and the important chamber music series of *Commedias* and *Scenas* all dating from this period.

It was in 1981 that the keyboard ballet *Noctuary* set out to explore the harmonic relationships between the strictly tonal world of the Scott Joplin piece it takes as its starting point and the strictly serial one of Bennett's own music. Although this was undoubtedly a landmark piece, it was *After Syrinx I* that seems to have provided the spur for a more permanent loosening of harmonic controls, with the tonality of Debussy's *Syrinx* seamlessly blended with what Bennett has called a more-or-less serial texture. This then paved the way for pieces whose harmony reflects freely-composed themes and, conversely, for chord sequences to yield corresponding melodic images. Once his newly atonal harmony had freed itself from the unspoken need to avoid pitch repetition, his neo-serial writing began to readmit previously excluded elements (such as octaves and tonal chords) and to reflect an evermore flexible use of proto-serial techniques. In line with the notion of an evolving harmony specific to each succeeding work, much of his 1980s chamber music stems from quotation, used either as an integral strand in the musical development (*Noctuary*, *Reflections on a theme of William Walton*) or as a starting point (the two pieces based on a madrigal by Monteverdi, and the five on Debussy's *Syrinx*).

No composer of his generation has done more to develop the stylistic middle ground of 20th-century music. Amiably persuasive rather than confrontational, his work attracts performers at every level – whether for his virtuoso concertos, his sensitive and eminently singable vocal music, or his outstanding chamber music. As an agile if largely self-taught pianist, Bennett has always been involved with performance of one kind or another; as a student, both in London (where he gave the UK première of Boulez's Sonata no.1 for piano) and in Paris, his ability to decipher new music could well have led to a successful career as composer/pianist in this field alone. But by 1959, winds of stylistic change were already beginning to cloud the carefully constructed certainties of the European avant-garde, and it was in any case obvious that significant choices would have to be made. Just as he had quickly discarded the sophisticated pre-compositional devices so eagerly absorbed in Paris, his piano playing adapted easily to a broader and generally more mainstream 20th-century repertory. A particular liking for ensemble playing of all kinds soon earned him a reputation as a sought-after accompanist as well as a valued collaborator in each of the several duo-partnerships he has enjoyed throughout his life – whether with other pianists (beginning with Cornelius Cardew, a fellow student at the RAM in the early 1950s, with whom he gave the English première of Boulez's *Structures I*) or with the succession of distinguished wind players who have in turn been the inspiration for much of his chamber music and, in several instances, his concertos.

Meanwhile, a fascination with quite other kinds of music had drawn him inexorably to investigate the jazz scene of 1950s London, as if in preparation for what was to become something of a parallel outlet for a more loose-limbed style of keyboard playing and, latterly, singing. His jazz partnerships have been as various and as distinguished as his chamber music ones, although in the 1990s he developed a solo cabaret-style show with himself as singer/pianist that has enjoyed considerable success around the world. But, in composition as in performance, he has always insisted on a clear separation between these two fields of endeavour and, the extraordinary range of his film music apart, his concert music yields little evidence of stylistic seepage (beyond the obvious instance of the purposefully crossover *Concerto for Stan Getz*).

Bennett is a fine if sometimes reluctant teacher who, following a spell at the RAM (1963–5), determined not to accept any further long-term commitment; he is stimulated by summer schools and enjoys short-term residencies, particularly if they also involve coaching performers, like the one at Peabody Institute, Baltimore (1970–71). He was invited to accept the international chair of composition at the RAM from 1994 to 1997, an appointment that was immediately renewed for a further three years. He was a member of the general council of the Performing Rights Society (1975–6) and was elected vice-president of the RCM in 1983; he received the Arnold Bax Society Prize in 1964 and the Ralph Vaughan Williams Award for composer of the year 1965; film music honours include a BAFTA Award for *Murder on the Orient Express* (1975) as well as an Ivor Novello Award and an Academy Award nomination (both 1976) for the same score. He was made a CBE in 1977 and knighted in 1999.

WORKS

STAGE

The Ledge (1, A. Mitchell), 1961; London, Sadler's Wells, 12 Sept 1961 (Croydon, 1975)

SUSAN BRADSHAW

**Bennett, Robert Russell** (*b* Kansas City, MO, 15 June 1894; *d* New York, 18 Aug 1981). American composer, orchestrator and conductor. Early studies were taken with his parents and the composer and conductor Carl Busch. He went to New York in 1916, where he worked first at G. Schirmer and then at T.B. Harms. Employment as a copyist and arranger, interrupted briefly by army service during World War I, led to his first theatre orchestrations in 1920. Upon Frank Saddler's death Bennett became America's pre-eminent theatre orchestrator, a position which he held for four decades. He interrupted his commercial work for much of 1926–9 to study in Paris with Nadia Boulanger, funded in part by a Guggenheim fellowship. Prizewinning entries in composition competitions sponsored by *Musical America* magazine and Victor Records led to frequent performances of his orchestral pieces in the USA during the 1930s and 40s. Most of 1936–40 was spent in Hollywood, principally at RKO, working on both orchestrations and original scoring. He returned to New York to host and conduct WOR's network radio programme 'Russell Bennett's Notebook', which sparked his most prolific period as a composer. His extensive work for NBC television after World War II began with *Victory at Sea* (1952–3), which he scored using a dozen themes provided by Richard Rodgers; he went on to provide original music for about 35 of NBC's documentary telefilms. The Goldman Band, beginning in the late 1940s, gave the first performances of many of Bennett's works. More than 30 wind-band scores were completed, and among them are his most-played compositions. His large-scale works include seven symphonies and the opera *Maria Malibran*, lavishly first staged at the Juilliard School.

Bennett provided orchestrations for all or part of more than 300 Broadway musicals. He is renowned for his effective use of the limited orchestral forces available to him and the phenomenal speed with which he supplied tasteful and disciplined song accompaniments as well as underscoring, and also bridges, dance music, overtures and exit music. Bennett's many published 'symphonic pictures', especially of the Rodgers and Hammerstein shows, remain exemplars of their type and have circulated widely. His *Instrumentally Speaking* (Melville, NY, 1975), distilled from a lifetime's experience, is the standard reference on American theatre orchestration. Praised by Boulanger as 'a true artist', Bennett stands apart from his theatre-arranging colleagues for his sustained independent creativity and long-standing associations with the leading conductors and soloists of his day, and his success as a composer was pivotal in elevating the theatre orchestrator's status in the USA. Like his commercial orchestrations, Bennett's compositions are scored with masterful simplicity and clarity. Though the witty geniality of his best-known pieces has led to an under-appreciation of the more serious and expansive scores, Bennett's works in all genres are distinguished by their personal harmonic idiom, effortless counterpoint and rhythmic vitality.

WORKS
(*selective list*)

STAGE

Endymion (ballet-operetta), 1927; Hold Your Horses (musical play), 1933; Maria Malibran (op), 1934; The Enchanted Kiss (op, 1), 1944; Crystal (op), 1972

Musicals, as sole or principal orchestrator (composers in parenthesis): Wildflower (V. Youmans), 1923; Rose Marie (R. Friml and H. Stothart), 1924; Show Boat (J. Kern), 1927; Girl Crazy (G. Gershwin), 1930; Of Thee I Sing (Gershwin), 1931; Anything Goes (C. Porter), 1934; Oklahoma! (R. Rodgers), 1943; Carmen Jones (version of Bizet: Carmen), 1943; Annie Get your Gun (I. GEORGE J. FERENCZ

**Bennett, William (Ingham Brooke)** (*b* London, 7 Feb 1936). English flautist. He studied with Geoffrey Gilbert at the GSM and in Paris with Jean-Pierre Rampal, winning a medal in the 1958 Geneva International Flute Competition. From 1965 he studied with Marcel Moyse who has remained a dominant influence on his playing. He has been principal flute with the LSO, the RPO, the Academy of St Martin-in-the-Fields and the English Chamber Orchestra. He also appears internationally as a soloist and has made many recordings. Bennett is an innately musical player, with a style and technique rich in expression, vibrancy and range of tone colours. He is widely considered to be the leading flautist of his generation. His experiments in improving flute design have been greatly influential, and since 1978 various makers in Britain, the USA and Taiwan have produced instruments tuned to the 'William Bennett Scale'. He is the dedicatee of works by Richard Rodney Bennett and William Matthias, and has made many transcriptions to enlarge the repertory of the flute. He teaches at the RAM and gives masterclasses in many countries. He was made an OBE in 1995.

EDWARD BLAKEMAN

**Bennett,** Sir **William Sterndale** (*b* Sheffield, 13 April 1816; *d* London, 1 Feb 1875). English composer. He ranks as the most distinguished English composer of the Romantic school.

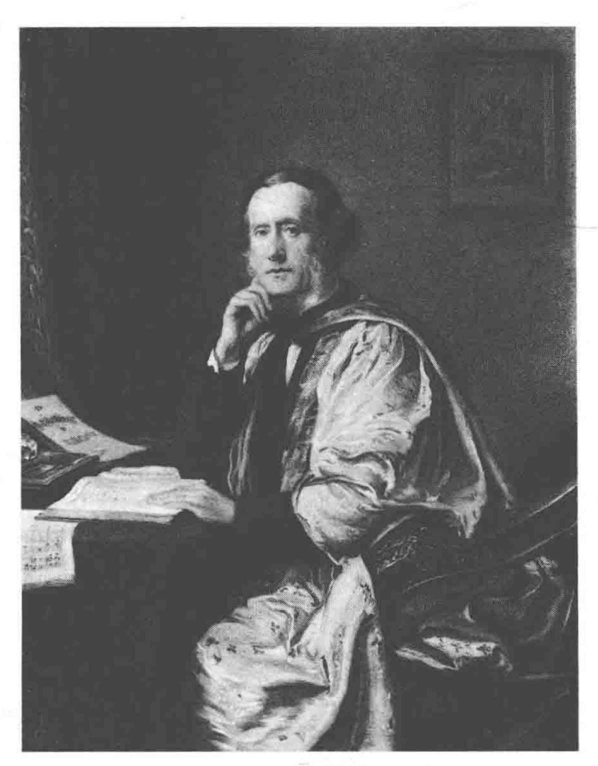
1. LIFE. For his early musical training he was chiefly indebted to his grandfather, John Bennett (1754–1837), who came from Ashford, Derbyshire, but moved to Cambridge in 1792 as a bass lay clerk in the choirs of King's, Trinity and St John's colleges. His sixth son Robert (1788–1819) became a chorister at King's, was made in 1804 an articled pupil of John Clarke (later Clarke-Whitfeld), organist of Trinity and St John's, and became organist of Sheffield parish church in 1811. On 28 May 1812 he married Elizabeth Donn, daughter of the curator of the Cambridge Botanic Gardens. Their three children were born at Sheffield. The third child, and only son, was named after William Sterndale, a Sheffield friend who had supplied the verses for a set of Six Songs which Robert Bennett had composed and published the year before (Bennett never treated the name Sterndale as part of his surname, though it has been adopted as such by his descendants). Elizabeth Bennett died, aged 27, on 7 May 1818; Robert married again, but died on 3 November 1819, and it was decided that the orphaned William and his sisters would go to live with their grandparents at Cambridge, where William was baptized on 19 March 1820. From this time his connection with Sheffield ended. He was appointed a chorister at King's, where his grandfather was still in the choir, on 17 February 1824. Two years later, on 7 March 1826 (before his tenth birthday), he was admitted to the RAM, having been recommended by the vice-provost of King's as a 'prodigy'. At first his principal study was the violin (with Oury and Spagnoletti), with the piano as a second instrument. Later he studied composition with Crotch. He played a piano concerto of J.L. Dussek at an academy concert on 6 September 1828, and sang the part of Cherubino in a student production of *Le nozze di Figaro* on 11 December 1830; he also sometimes sang in the choir at St Paul's Cathedral. Few compositions date from this early period, and the academy examiners in the summer of 1831 rebuked Bennett for his failure to achieve anything substantial in composition.

From this time his real achievement began. He made the piano his principal instrument, and soon excited comment by the brilliance of his playing. In April 1832 he completed his first symphony. His activity in composition was stimulated in August of the same year when Cipriani Potter replaced Crotch as principal of the RAM, and as Bennett's composition teacher. His first piano concerto, begun during the summer of 1832, was approved by his new master (a well-known exponent of this form), played at Cambridge on 28 November, and repeated at an academy concert on 30 March 1833. The impression it made was remarkable. William Ayrton, in *The Harmonicon*, declared that it 'would have conferred honour on any established master'. Lord Burghersh, the president of the RAM, directed that the concerto be published at the academy's expense. He also evidently spread word of Bennett's abilities, for in a few days the boy was summoned to Windsor, where on two occasions he played the concerto to the king and queen. At the RAM midsummer concert on 26 June it was chosen as the principal work, and there it was heard by Mendelssohn, who asked to be introduced to the composer after the concert and forthwith invited Bennett to visit him in Germany, not as a pupil but as a friend.

Bennett, still only 17, was naturally very much encouraged. The six years that followed were an intensely creative period – the only one, as it turned out, in his career. During this time he wrote two or three major orchestral works a year, and was at the same time developing a delicately individual manner in songs and short piano pieces. For the first four years he continued to benefit from an excellent grounding in the Classics from Potter, the only academy teacher, according to G.A. Macfarren, who attempted to teach the principles of musical form. And he continued to enjoy warm encouragement from Mendelssohn, first in correspondence and, later, during a series of visits to Germany.

On 17 April 1833 he was elected organist of St Ann's Chapel, Wandsworth (a chapel-of-ease in the parish of All Saints), at 30 guineas per annum, but he resigned after a year. He continued to add to his renown as a concert pianist; occasionally he played the violin or viola in the orchestra. The chief platforms for his compositions were the academy concerts, the Society of British Musicians (from 1834) and, occasionally, a concert at Cambridge, which he continued to visit both before and after his grandparents' deaths. On 11 May 1835 he made his début at the Philharmonic Society, playing his Second Piano Concerto; he played the third there the following spring. In May 1836, having finished his fourth (unpublished) concerto (WO32), he left with Carl Klingemann and J.W. Davison to attend the Niederrheinisches Musikfest at Düsseldorf, where Mendelssohn conducted the first performance of *St Paul* on 22 May. Before returning home he had begun what was to be his most popular orchestral composition, the overture *The Naiades*. Shortly after his departure, on 28 May, Mendelssohn wrote to Attwood in terms of glowing admiration: 'I think him the most promising young musician I know, not only in your

country but also here, and I am convinced if he does not become a very great musician, it is not God's will, but his own'.



His time as an academy pupil came to an end in September, and in October he began a longer visit to Germany. Mendelssohn welcomed him to Leipzig on 29 October and Bennett soon found himself an accepted member of the musical circle of which Mendelssohn was the acknowledged leader. In that circle was Schumann, who formed a close and lasting friendship with Bennett almost as soon as they had met. On Schumann's side, friendship was coupled with intense admiration for the younger man's music, soon to be expressed in an editorial devoted to Bennett in the New Year number of the *Neue Zeitschrift für Musik*. 'Were there many artists like Sterndale Bennett', wrote Schumann, 'all fears for the future progress of our art would be silenced.' On 13 January 1837 Bennett made his first appearance at the Gewandhaus concerts, playing his Third Piano Concerto; he conducted the overture *The Naiades* on 13 February (it had already been played at the Society of British Musicians on 25 January, with Davison conducting) and the *Parisina* overture on 6 March. The very high reputation which Bennett gained in Germany on this visit both as pianist and as composer is attested not only by Mendelssohn's letters and Schumann's reviews, but also by other newspaper reports and by requests that he began to receive from German publishers.

He returned to England in July, and in October began his long career as a teacher. He took his first private pupil on 2 October and began giving lessons at the RAM on 18 October. He had almost reached the end of his period of fecundity as a composer, a period that had been so full of promise that Schumann's praises, if extravagant, were hardly exaggerated. Colles attributed the early decline in his output to 'the stultifying influence which a professional life involving a great deal of teaching could not fail to exert on [a] sensitive musical nature' (he escaped from these duties for two more visits to Leipzig, in the winters of 1838–9 and 1841–2, that were closely similar to the first). From whatever cause, he certainly at this period began to experience a new difficulty in completing compositions. In August 1839 he signed an agreement with Coventry, the publisher, to compose an opera, but nothing came of the plan; he spent the following summer working on an oratorio, which he eventually left uncompleted. A set of 12 songs promised to his German publisher (Kistner) in 1837 was delivered in two sets, in 1842 and 1855. Towards the end of 1841 he became engaged to Mary Wood, one of his pupils at the RAM. They were married on 9 April 1844.

It now became all the more necessary for Bennett to work hard at his teaching, and to seek salaried positions. He had failed to secure the Edinburgh professorship in 1844, despite Mendelssohn's recommendation. He continued to play at the Philharmonic concerts until 1848, when a quarrel with Michael Costa led to his dissociation from the society's affairs. From 1842 until 1856 he gave an annual series of 'Classical Chamber Concerts', first at his own house and then in the Hanover Square Rooms; these concerts explored the repertory of chamber music with piano and serious piano music. In 1849 he founded the Bach Society, and for many years he directed its concerts; on 6 April 1854 he conducted the first English performance of the *St Matthew Passion*. Few compositions of any kind date from this period. Bennett's life was apparently a ceaseless round of playing and teaching, relieved only by family holidays at Cambridge or Southampton. In the 1850s the recognition due to his earlier success began to come to him in the shape of important appointments. In 1853 he was offered the conductorship of the Leipzig Gewandhaus concerts for the following season – a signal honour for an Englishman, but one which he turned down, for reasons that have never been fully explained. In November 1855 he accepted the conductorship of the Philharmonic Society in succession to Wagner, and began his new duties the following April; meanwhile, on 4 March 1856, he had been elected professor of music at Cambridge, by a majority of 149 votes. These twin appointments gave him the standing he had long deserved, but they added little to his income and certainly did not provide him with any additional time for composing. At Cambridge he refused to treat the position as a sinecure, but continued Walmisley's policy of giving public lectures and of leading the musical life of the town. He instituted examinations for the music degrees, to replace the 'exercises' which had previously been the only requirement. He was himself presented for the MusD degree on 30 June 1856, and soon afterwards was made a life Fellow of St John's College.

In May 1858 Bennett resigned from the RAM in protest against the high-handed behaviour of the president, Lord Westmoreland (formerly Lord Burghersh). In the same year he was chosen to conduct the Leeds Festival. He had to produce an ode (op.41) on the installation of the Duke of Devonshire as chancellor of the university in May 1862; his ode for the opening of the Industrial Exhibition (op.40) had been completed a few weeks earlier. On 22 June 1866 he returned to the RAM as principal, a position that involved arduous administrative duties, and he gave up conducting the Philharmonic concerts at the end of the season. He was made an honorary MA of Cambridge in 1867 and a DCL of Oxford in 1870, and was knighted on 24 March 1871, on the recommendation of the Prime Minister, Gladstone. In March 1872 he received a public testimonial in St James's Hall, and at the same time a scholarship in his honour was founded at the RAM.

Bennett had thus become a prominent public figure in the British musical world, and was still also held in honour in Germany. Despite the heavy combination of duties that he had assumed, the last period of his life saw a certain revival of his creative powers. Several major works appeared: *The May-Queen*, commissioned for the Leeds Festival of 1858; the two odes of 1862, and the overture *Paradise and the Peri* in the same year; the Symphony in G minor (1863–4), performed at the Philharmonic on 27 June 1864 and at the Leipzig Gewandhaus, with Bennett conducting, on 12 January 1865; *The Woman of Samaria*, commissioned for the Birmingham Festival of 1867 and performed there on 28 August; the overture to *Ajax* (completed in 1872); and the piano sonata *Die Jungfrau von Orleans*, completed in 1873. In the leanest years of his composing activity, Bennett had managed to produce a few piano pieces, but this form of composition practically ceased when he gave up playing the piano in public. A careful study of his career shows that it was not so much overwork that caused a falling-off of creativity, but discouragement and the lack of a strong external stimulus. In the 1830s he responded to the admiration of his English and German

*William Sterndale Bennett: engraving by Thomas Oldham Barlow after John Everett Millais, 1873*

colleagues, and above all of Mendelssohn. Between 1840 and 1855, he was discouraged by absence of due recognition in England, by Mendelssohn's death, and by the increasing monotony of his daily life; and he produced only what was needed, piano pieces for playing and teaching. After 1855 he was spurred by belated honours, and occasional commissions, to compose a respectable number of significant and substantial works, though it was too late to recapture his early self-confidence. One might guess that the early loss of both parents produced in Bennett an exceptionally intense need for reassurance and encouragement. England could not provide this for a native composer in his time. He found it temporarily in German musical circles; yet, when the opportunity came to claim his earned place as a leader in German music, he was not quite bold enough to grasp it.

In the last few years of his life Bennett spent his summer holidays quietly at Eastbourne, where he did much of his composing. He continued his teaching in London, and gave occasional concerts there and in the provinces. He visited Cambridge two or three times a year. In January 1875 he was taken ill, and died on 1 February (his wife had died on 17 October 1862). He was buried at Westminster Abbey on 6 February 1875.

2. WORKS. George Hogarth remarked in 1835 on the 'purity of the English school of the pianoforte', founded on the studies of Clementi and Cramer which, in turn, were based on the 'old masters':

> Students thus imbued with solid knowledge and good taste, are in little danger of being corrupted by the shallow and frivolous style which, springing from Vienna and Paris, is spreading itself over Europe. Our principal public performers, Mrs Anderson, Neate, Potter and Bennett ... belong to the school of these great masters, and follow their footsteps in tuition.

Bennett (who, it may be noticed, was already at 19 regarded as a 'principal performer') carried out this creed with inflexible resolve throughout his career as performer, teacher and composer. Several writers have used the word 'purity' in assessing his work. Like his fellow Romantics, Mendelssohn and Schumann, he saw himself as a fighter for what was good and true in the musical tradition he had inherited, against the mounting threats of commercialism, vulgarity and virtuosity. At several points in his career, the principle asserted itself in action; but his music reflects not the stresses and strains of the battle, but the ideals for which he was fighting, preserved and protected by an act of self-discipline. With perhaps misguided puritanism, he was determined not to be 'corrupted' by the innovations of Thalberg and Liszt, of Meyerbeer and Berlioz, of Chopin, or even of Schumann. His style bears a natural resemblance to that of the one Romantic composer he did wholeheartedly admire, Mendelssohn. Yet his model was not even Mendelssohn, but Mozart, as he confessed in a lecture delivered at Cambridge in 1871. This self-inflicted deafness to current musical sounds required a degree of conscious restraint that interfered with spontaneous expression.

For all that, Bennett composed some excellent music, and the best of it, the orchestral works of his youth that so greatly impressed Schumann, is now all but unknown. Few piano concertos between Beethoven and Brahms are as successful as Bennett's in embodying the Classical spirit, not in a stiff frame to deck with festoons of virtuosity, but in a living form capable of organic growth, and even of structural surprise. The first movements of the concertos have a sinewy strength that recalls Beethoven more often than any other composer. The slow movement of no.3, a Romantic dialogue between piano and orchestra, takes its idea from Beethoven's no.4, but in its detailed working out is quite original. The charming and long-popular 'Barcarole' movement, which first replaced the slow movement of the unpublished F minor concerto, and then, at Mendelssohn's suggestion, replaced the slow movement of no.4 in the same key, is a good example of Bennett's shy, subtle and quite individual personality. The Caprice in E major for piano and orchestra is a charming one-movement piece of generally Mendelssohnian character.

In the concert overtures also Bennett's manner is close to Mendelssohn's, evoking enchanted fairylands with gentle dance rhythms and delicate orchestral colouring. *Parisina* and *The Naiades* are the best; *Die Waldnymphe* and *Marie du Bois* seem to repeat, rather than add to, what Bennett had already achieved in the former works (as Schumann pointed out). *Marie du Bois* was re-used as the overture for *The May-Queen*, and he took tunes from it and used them in the course of the work. The symphonies were perhaps the least successful of the early group, though they have points of interest: the first begins, like no other symphony, with 32 bars of quiet counterpoint in mock 'ancient' style (used again, more aptly, in the eight-part anthem *In thee, O Lord, have I put my trust*). Of his later orchestral works, none recaptures the relatively carefree spirit of the 1830s. But in the late G minor symphony (op.43) Bennett did at last achieve a worthy tribute to Mozart.

Bennett has been called a musician's musician. More specifically, he is a pianist's musician, like Chopin. Much of the fascination of his piano pieces lies in their mastery

of the natural potential of the instrument. Instead of pretending that the piano can sustain great lyrical melodies, he made use of its percussive qualities to create a beautiful tapestry of subtly varying tone-colours. Never did he permit himself the least concession to the gallery; he seems on the contrary to be talking to himself, or only to those who fully appreciate and sympathize with his point of view. His character-pieces have often a dryness and sometimes a harmonic ruthlessness that please the connoisseur but put off the crowd. Such devices as the inverted tonic pedal, the evaded resolution and what might be called harmonic anticipation (ex.1) are frequent in his piano pieces. Moreover, apart from a few pieces deliberately intended for beginners, they are too difficult for all but the most accomplished pianists. The *Suite de pièces* op.24, a collection of six excellent, though unrelated, pieces, is a fair representation of the best in his piano music. His few longer pieces sometimes fail to maintain the interest of their opening pages, though in the Sonata in F minor (op.13) and the *Fantaisie* in A, op.16 (in form another sonata) he succeeded at least as well as Schumann and Chopin in fitting pianistic material into a form that was not pianistically evolved. His piano trio and duo are also happy examples of this. The late programmatic piano sonata *Die Jungfrau von Orleans* has many beautiful passages but is not entirely successful as a whole. Geoffrey Bush has convincingly refuted Hadow's opinion that Bennett was incapable of 'vehemence and passion'. Few piano works by any composer are more passionate than the A minor finale of the *Fantaisie* (1837).

Bennett possessed no special flair for choral music, the medium in which his services were most in demand in later life. *The May-Queen* and the oratorio *Zion*, though far more popular in the later 19th century than his instrumental works, seem now quite faded, partly, it must be said, because of the ineptitude of their texts. This 'Victorian' flavour attaches also to his church music. The only anthem that remained popular was the quartet 'God is a spirit' from *The Woman of Samaria*, but the eight-part *In thee, O Lord* is much superior, while *Lord, who shall dwell?* contains an interesting use of a hymn tune in contrapuntal texture.

In the solo songs Bennett came closest of all to identity with the Leipzig Romantic school. The texts are sometimes German lyrics in translation, and the music often suits the German text better than the English. The form is generally that of the strophic or modified-strophic lied. In style there is no point of contact with the indigenous songs of Bishop, Horn or Balfe. Yet in the op.23 songs *Gentle Zephyr*, *To Chloe in Sickness* and *May-Dew*, and *Dawn, gentle flower* (op.35 no.3) Bennett showed how an English lied might be developed, and his example was taken up by his pupil F.E. Bache, and by Hatton, Loder, Pierson and a few others.

Bennett did useful work as an editor of Classical piano sonatas (including one by G.F. Pinto), and in harmonizing and editing, with Otto Goldschmidt, German chorales adapted to English texts, in *The Chorale Book for England* (1863), which had a great effect on English hymnody; he also published editions of Bach's *St Matthew Passion* and Handel's *Acis and Galatea*. His work as a teacher, which occupied so much of his energy, had an incalculable if largely conservative influence on a generation of RAM students. His methods have been described in some detail by one of his most successful pupils, Bettina Walker (1890).

Most of Bennett's songs, partsongs and piano pieces, and piano reductions of the concertos and choral works, were published under the composer's supervision. The manuscript sources are still mostly in the possession of Bennett's family, and have been divided into two collections: one portion belongs now to Barry Sterndale-Bennett, a grandson of Bennett's grandson Robert Sterndale Bennett (1880–1963), who was for many years director of music at Uppingham School; the other is in the hands of Thomas Odling, a great-grandson of Bennett in the female line.

NICHOLAS TEMPERLEY (text, bibliography), ROSEMARY WILLIAMSON (work-list)

**Bennewitz** [Benevic], **Antonín** (*b* Přívaty, nr Litomyšl, March 1833, *d* Doksy, nr Litoměřice, 29 May 1926). Czech violinist, teacher and administrator. He studied with Mořic Mildner at the Prague Conservatory (1846–52) and held posts in Prague, Salzburg (1861–3) and Stuttgart (1863–6). He was professor at the Prague Conservatory (1865–82) and then director (1882–1901). An energetic and progressive musician, he contributed much to the artistic eminence of the school, improved its orchestra, cultivated chamber music and taught a number of pupils who made the Prague violin school world-famous; these included Otakar Ševčík, Jan Ondříček, Josef Suk, Oskar Nedbal and Karel Halíř. Under his direction appointments to the conservatory staff included Dvořák (composition), Ševčík (violin) and Hanuš Wihan (cello). He also organized some pioneering public concerts of Czech and foreign music, and himself played in chamber concerts, including in a trio with Smetana and Hegenbarth.

GRACIAN ČERNUŠÁK/JOHN WARRACK

**Benoctus de Francia.** *See* BENOIT.

**Benois, Alexandre** [Benua, Aleksandr Nikolayevich] (*b* St Petersburg, 21 April/3 May 1870; *d* Paris, 9 Feb 1960). Russian stage designer, director and art historian. He was one of a neo-Romantic group of St Petersburg artists (including Diaghilev, Bakst and Nuvel) associated with the journal *Mir iskusstvo* (1898–1905). After graduating in law he lived in France for a time. In his writings and as an artist, he tried to promote the understanding of both western European modernism and the national Russian cultural tradition. Thanks to his and Diaghilev's propagandist work, from 1899 the stage designs at the St Petersburg court theatres began to reflect trends in contemporary Russian painting, a process that Benois attempted to intensify and accelerate with his own designs (as in those for *Götterdämmerung*, Mariinsky Theatre, 1902). He played an important part in the Russian opera and ballet guest season in Paris in 1908 (organized by the *Mir iskusstvo* group) and in Diaghilev's Ballets Russes seasons that followed, as artistic director (until 1911), librettist and designer (see illustration), notably for *The*

*Design by Alexandre Benois for Stravinsky's 'Petrushka', Ballets Russes, Théâtre du Châtelet, Paris, 1911 (Bol'shoy Theatre Museum, Moscow)*

*Nightingale* (1914). Differences with Diaghilev led to a move to Stanislavsky's Moscow Arts Theatre, 1912–14. After the October Revolution he was director of the Hermitage painting collection and worked as designer for the Bol'shoy and Mariinsky theatres, including a production of *The Queen of Spades* (1921). In the 1920s he went to Paris, where he worked as an opera and ballet designer, notably for the Rubinstein Company (1923–34) and for the Opéra, as well as for La Scala and companies in Rome, Buenos Aires, Sydney and Monte Carlo. The main feature of his work was a desire to inject new life into the theatre of illusion by introducing the modernist style of painting of the turn of the century. His sets had a picturesque, fantastic quality, a fairy tale atmosphere and attractive local colour. Among his writings may be mentioned *Russkaya shkola zhivopisi* ('The Russian School of Painting'; St Petersburg, 1904; Eng. trans., 1916), *Vozniknoveniye 'Mira iskusstva': Aleksandr Benua* ('The origins of *The World of Art*'; Leningrad, 1928) and a volume of memoirs, *Zhizn'khudozhnika: vospominaniya* (New York, 1955; Eng. trans., 1960, 2/1988).

MANFRED BOETZKES

**Benoist, François** (*b* Nantes, 10 Sept 1794; *d* Paris, 6 May 1878). French organist, teacher and composer. He entered the Paris Conservatoire in 1811 as a pupil of Catel for harmony and Louis Adam for piano; he won a *premier prix* for harmony the same year and for piano in 1814. In 1815 he won the Prix de Rome with his cantata *Oenone* and spent the obligatory three years in Italy. He was appointed principal organist of the royal chapel in 1819 and in the same year professor of organ at the Conservatoire, a post he held for 53 years. He was much loved as a teacher and his pupils included Adolphe Adam, Alkan, Franck, Bizet, Dubois and Saint-Saëns. In 1840 he became *premier chef de chant* at the Opéra, with the additional task of revising the repertory for current use.

Benoist's compositions are not numerous; they consist principally of church and organ music and six works for the stage, none of which enjoyed more than modest success. He had considerable skill in improvising fugues, although according to Saint-Saëns he was a mediocre organist. He contributed to the *Revue et gazette musicale* for a number of years.

WORKS

*all printed works published in Paris*

STAGE

*first performed at the Paris Opéra unless otherwise stated*

Léonore et Félix (oc, 1, [?J.-V.F. de] Saint-Marcelin), Paris, OC (Feydeau), 27 Nov 1821 (?1821)
La gipsy (ballet, 3, H. de Saint-Georges and N. Mazilier), 28 Jan 1839, collab. A. Thomas and A. Marliani
Le diable amoureux (ballet, 3, Saint-Georges and Mazilier), 23 Sept 1840, collab. H. Reber, excerpts arr. pf pubd
L'apparition (op, 2, G. Delavigne), 16 June 1848
Nisida, ou Les amazones des Açores (ballet, 2, A. Mabille, E. Deligny), 20 Aug 1848
Pâquerette (ballet, 3, T. Gautier, A. Saint-Léon), 15 Jan 1851

OTHER WORKS

Vocal: Oenone (cant., P.-A. Vieillard), 1815; Requiem, 4vv, 1842; Cantique à la Sainte Vierge, pubd in *La maîtrise*, iv (1860); Mass, choir, org, orch (1861); Pie Jesu, 4vv, org (1862); Inviolata, hymne à la vierge (1864); others

H. COLIN SLIM

**Benoit** [Benedictus Sirede, Benoctus de Francia, Benenoit, Benedette di Giov. dito Benoit, Benotto di Giovanni, Benottus de Ferraria] (*fl* 1436–55). French singer and composer. He was probably from the archdiocese of Sens in Haute-Bourgogne. His works appear in 15th-century musical sources under the name Benoit, but an authoritative papal document identifies him as Benedictus Sirede. He is first documented in 1436–7, as a singer for the confraternity of Orsanmichele in Florence. In 1438 he was recruited in Ferrara by Lorenzo de' Medici for the cathedral and baptistry choir of Florence, becoming choirmaster in 1439. He resigned from this position on 23 January 1448. From 1448 to 1450 he served in the chapel of Leonello d'Este in Ferrara; he was also a member

of the papal chapel from December 1447 to February 1448, and again from January 1451 to October 1455.

Six works by Benoit survive, probably composed in the 1430s and 40s. All are in manuscripts copied in northern Italy during this period: *I-Bc* Q15, *MOe* α.X.1.11, *Vnm* 7554 (olim 145) and *GB-Ob* Can. misc.213. The isorhythmic motet *Gaude tu baptista Christi* and the antiphon *Puer qui natus est nobis* are in honour of St John the Baptist, patron saint of Florence, and may have been composed there. The hymns and antiphons closely resemble those by Du Fay from the same period. The chanson has been attributed by some scholars, on slender grounds, to a Guillaume Benoit who was choirmaster at Notre Dame in 1405 and possibly also a servant of the Duke of Suffolk between 1423 and 1427.

WORKS

Edition: *Early Fifteenth-Century Music*, ed. G. Reaney, CMM, xi/3 (1966) [complete edn]

Gaude, tu baptista Christi, 4vv, motet; Puer qui natus est nobis, 3vv, ant; Virgo Maria, non est tibi similis, 3vv, ant; Lucis Creator optime, 3vv, hymn; Tibi Christe splendor Patris, 3vv, hymn; De cuer joyeux, 3vv, rondeau

PAMELA F. STARR

**Benoît, Camille** (*b* Roanne, 7 Dec 1851; *d* Paris, 1 July 1923). French composer and writer on music. From 1872 he was a pupil of Franck. His début as a composer took place in 1880, with a concert overture. By 1883 he was contributing articles and translations of Wagner's writings to *Le ménestrel* and in the following year he published them in his *Souvenirs*, which attracted some attention. His writings also include *Musiciens, poètes et philosophes: aperçus et jugements* (Paris, 1887) and an analytical guide to *Die Meistersinger* (*Les motifs lyriques des 'Maîtres Chanteurs de Nuremberg'*, Paris, 1888). He worked on the *Guide musical* under the pseudonym 'Balthazar Claes'. Other than that he has done a translation into French of Gopethe's *Faust* (Paris, 1891). Benoît's third career, that of an antiquary, led him to join the staff of the Louvre in 1888, where he became keeper of antiquities in 1895. Within his limited time for composition he attempted several different musical genres.

For Anatole France's dramatic poem *Les noces corinthiennes* (1876) he wrote an Epithalame, one of his earliest works. An *Eleison* for solo voices, chorus and orchestra (1890) was revived by the Schola Cantorum in 1916. Of the projected opera *Cléopâtre* only the scene of the heroine's death was published (1889); Davies noted that 'this made a powerful enough impression on those who heard it, its strength and beauty precipitating immediate tributes from both d'Indy and Samazeuilh'. Benoît wrote three symphonic poems, *Fantaisie légendaire*, *Merlin l'enchanteur* and *La nuit* (unfinished); he also composed three *mélodies* and several piano pieces. Despite his allegiance to Wagner's principles, he was sufficiently interested in Berlioz to arrange *Roméo et Juliette* for piano duet (1878). He made a French translation of Goethe's *Faust* (1891) and a Latin translation of Beethoven's *Elegischer Gesang* op.118.

GUSTAVE FERRARI, MARIE LOUISE PEREYRA/JOËL-MARIE FAUQUET

**Benoit, Marcelle** (*b* Lille, 17 Dec 1921). French musicologist. She studied under Norbert Dufourcq at the Paris Conservatoire (1943–6, 1951–4), where she took *premier prix* in music history in 1952 and in musicology in 1954. From 1960 she was supervised for her research by Roland Mousnier at the Sorbonne and received the doctorat d'Etat in 1971 with a dissertation on music at Versailles. In 1958 she started teaching at the Paris Conservatoire, first as assistant lecturer, then as lecturer in music history (1965); she was appointed lecturer in musicology in 1973, obliging her to leave the Sweet Briar and Smith Colleges where she had been professor in music history since 1948.

Benoit was one of the first to make systematic use of the archives in the study of musical institutions and of music of the 17th and 18th centuries in France. A devoted assistant to Dufourcq, both in his teaching and in his publications, she was in particular his editorial assistant for the publishers Larousse (1948–85), especially for the dictionary *Larousse de la musique* (1957), and for the periodicals *L'orgue* (1947–96) and from 1960, *Recherches sur la musique française classique*. She was also the sub-editor from 1977 to 1987 for the music section of the series 'Que sais-je?', which was published by the Presses Universitaires de France. From 1993 Benoit worked for the Centre de Musique Baroque de Versailles and edited the series 'Le temps musical'. In 1988 she became the vice-president of the Association des Amis de l'Orgue and the president of the newly founded Société d'Etudes Philidoriennes.

CHRISTIANE SPIETH-WEISSENBACHER/JEAN GRIBENSKI

**Benoit, Peter (Leonard Leopold)** (*b* Harlebeke, 17 Aug 1834; *d* Antwerp, 8 March 1901). Belgian composer, conductor and teacher. He received his first music lessons from his father and then studied the piano and the organ with Carlier, verger and organist at Desselgem. In 1851 he became a pupil at the Brussels Conservatory, where he took courses in piano, harmony, counterpoint, fugue and composition, winning first prize in harmony and composition in 1854. His chief teacher was the director, François-Joseph Fétis. Having completed his studies at the conservatory, he continued to study with C.-L. Hanssens, director of the Théâtre de la Monnaie. During these years Benoit was in severe financial straits and was obliged to take a post as additional triangle player with the Monnaie orchestra. In 1856 he became conductor of the Park Theatre at Brussels. He won the Belgian Prix de Rome in 1857 with his cantata *Le meurtre d'Abel*, a setting of a French text, as was stipulated by the government at that time. On Fétis's advice he used the prize money to visit Germany, spending time at Cologne, Dresden, Berlin, Munich and, briefly, Prague. On his return he moved to Paris, where, in 1862, he became conductor of the Théâtre des Bouffes-Parisiens. However, in 1863 he resigned, returned to Belgium and settled first at Brussels, then, in 1867, at Antwerp, where he founded the Flemish Music School. Within a short time this school became an important element in the difficult struggle to establish Flemish music education and in the larger movement for the cultural development of the Flemish people. Benoit's untiring efforts were rewarded when the Belgian government not only recognized the school, but in 1898 raised its status to Royal Flemish Conservatory, with the same rights as the French-speaking conservatories in Belgium. Benoit further insisted on the need for a Flemish lyric theatre at Antwerp. In 1890 the Nederlandsch Lyrisch Toneel was founded, and in 1893 this became the Vlaamsche Opera.

As a composer Benoit brought new life to Flemish music: he gave the Flemish people a belief in their art and through his own creative example encouraged others to compose. His chief aim was to bring Flemish musical life to the level of general European culture, to match standards set by Berlioz, Liszt and Wagner, but in conjunction with the movement for Flemish national consciousness. These two sides of his work are seen in his *Rubenscantate*, which depicts the Antwerp of the painter's day. Stylistically, his works belong to 19th-century Romanticism. At first, his manner of writing, through Fétis's influence, was close to that of the French school; in his youthful works he was also influenced by Beethoven, Mendelssohn, Liszt, Chopin and Weber. But as his style developed, he inclined towards Berlioz and Meyerbeer; at the peak of his creative powers he used what was then a bold and non-Classical harmony, with dramatic effects recalling Wagner.

Benoit was principally a composer of vocal music, with a striking mastery of large choral masses. He consciously placed his art at the service of an ethical sense rooted in the Flemish people, and his first aim in composing was to be performed and understood by them, to which end he deliberately simplified the style of his later works. He searched for national traits in the melody and rhythm of traditional folk and art music. At the beginning of his career, he used existing works and also originated the children's cantata. The most original form that he employed was lyric drama, a play in which the actors speak in rhythm, accompanied orchestrally throughout. He was a teacher of international stature, whose conservatory curriculum was far ahead of its time.

WORKS

*complete list in Corbet (1944)*

*works published in Antwerp, n.d., unless otherwise stated*

Stage: 3 lyric dramas: Charlotte Corday, 1876, *B-Aa*, excerpts (Brussels, 1877), marche funèbre, arr. pf (n.p., 1878); De pacificatie van Gent, 1876, *Aa*, suite pubd; Karel van Gelderland, 1892, *Aa*, unpubd; 6 ops, incl. Le roi des Áulnes, Brussels, 2 Dec 1859, rev. 1861, *Aa*, unpubd; Isa, Brussels, 24 Feb 1867, *Aa*, excerpts pubd; Het meilief, 1893

Orats: Lucifer, 1865 (Brussels, n.d.); Prometheus, 1867; De schelde, 1868; De oorlog, 1873 (1885); De Rhijn, vs (1889)

Cants.: Le meurtre d'Abel, 1857; Jan Borluut, 1875, *Ac*, unpubd; De Rubenscantate, vs (1877); De waereld in!, 1878; Hucbald, 1880; De genius des vaderlands, 1880; Hymne aan de schoonheid, 1882; Kinderhulde aan een dichter, 1884; Hymne aan de vooruitgang, 1885; Ledeganckcantate, 1897, *Aa*, unpubd

Sacred: Salut de Noël, vv, orch (Berlin, 1858); Quadrilogie religieuse, 1864 [component parts perf. separately 1860, 1862, 1863]; Drama Christi, 1871; Alleluja, male vv (Paris, 1872); Mass, male vv, org (Paris, 1873); 20 [Lat.] motets, 1–3vv, org/hmn (Brussels, n.d.); 12 [Lat.] motets, 2–3vv (Brussels, n.d.); others

Other vocal: pieces, male vv, incl. De maaiers, 1864, Aan Antwerpen, 1877, *Ac*, unpubd, Het dietsche bloed, 1879; numerous Fr. and Flem. songs, incl. De liefde in het leven, song cycle, 1870; Liefdedrama, song cycle, acc. orch, pf, 1872, pt.i *Ac*, unpubd, pts.ii, iii pubd; Joncvrou Cathelyne, concert aria, 1879

Orch: Danse des spectres, 1858; Sym. Poem, pf, orch, 1864; Sym. Poem, fl, orch, 1866, arr. fl, pf (?1890); Humoristische jubelgroet, 1879, *Ac*, unpubd

Chbr: Str Qt no.4, 1858, *Aa*, unpubd; Sonata, G, pf, 1860; Contes et ballades, 5 bks, pf, 1861, 4 bks pubd (Paris, 1866); Luim, str qnt, 2 cl, 1869; numerous pf pieces

MARIE-THÉRÈSE BUYSSENS

**Benotto di Giovanni** [Benottus de Ferraria]. *See* BENOIT.

**Benser, John Daniel** (*d* ?London, 3 Dec 1785). German pianist and composer, active in England. On the recommendation of J.C. Bach, who may have suggested he go to England, he taught music to members of the English court, including the young Mrs Papendiek, who reported that he was 'an excellent master on Bach's plan but could not give you any sentiment for the science' (Broughton). He was also the first teacher of the piano virtuoso J.B. Cramer and was probably the 'Mr Benser' listed as a violist in Burney's account of the 1784 Handel Commemoration. From 1772 he was a member of the Royal Society of Musicians. Benser published several keyboard works in an easy or 'familiar' style, and was among the first to champion the piano. In his op.1 some remarks are printed which represent an early attempt to distinguish between the respective capabilities of the harpsichord and piano. His programmatic pieces *The Battle* and *The Storm* antedate by several years the more famous *Battle of Prague* by Kocźwara and *L'orage* by Steibelt.

WORKS

*all published in London*

6 Sonatas, pf/hpd, vn/fl, op.1 (*c*1771)
A Second Sett of 6 Sonatas, pf/hpd, vn, op.2 (*c*1777)
A First Sett of 3 Divertimento's, pf/hpd 4 hands, op.3 (*c*1780) [incl. The Chace, The Battle, The Echo]
Sonata: The Storm, pf [op.4] (1781)
5 Sonatas, pf/hpd, vn/fl, & 1 Duetto, kbd 4 hands, op.5 (*c*1785)

RONALD R. KIDD

**Benserade, Isaac de** (*b* Paris, bap. 5 Nov 1613; *d* Paris, 19 or 20 Oct 1691). French poet, librettist and playwright. Helped by Cardinal Richelieu, Benserade studied at the Collège de Navarre in Paris; however, fascinated by the theatre and attracted by salon life, he abandoned serious studies and developed his innate talents for witty verse, cleverly directed and full of grace and lightness. So successful was he that his contemporaries ranked him alongside Corneille, praising his style as 'cet air noble, ce tour galant, cette pureté de langage'. He knew everyone of significance in Paris, frequented the Hôtel de Rambouillet and was befriended by, among others, Jean Chapelain, Jean de La Fontaine, François La Rochefoucauld and Mme de Sévigné. Through his incisive wit and extraordinary success he made enemies of Molière, Antoine Furetière, Jean Racine and Nicolas Boileau, but throughout his life he was protected by the great – Richelieu and Anne of Austria, then the Duc de Brézé, Philippe d'Orléans, Cardinal Mazarin and Louis XIV (for whom he had genuine affection). His name was constantly on people's lips, and in 1651 he attained particular notoriety in his public verse conflict with Vincent Voiture. From 1663 onwards his name appeared annually in the list of the king's gratifications, and in 1674 he was elected to the Académie Française, which he attended assiduously, often presiding with distinction, and where he presented Bayle's *Nouvelles* in 1685.

His art of telling the truth about society people with elegance and dexterity was not only appreciated by the salons and developed in all the current poetic genres – epigrams, madrigals, rondeaux, enigmas, portraits and epitaphs – but was peculiarly suited to the court ballet. Benserade's popularity coincided with Louis XIV's career as a dancer of some talent, and between 1651 and 1669, when the king retired from the stage, Benserade wrote verses for 23 royal ballets. In the first, the *Ballet de Cassandre*, he depicted the king as the rising sun singing 'Je ne suis point à moi, je suis à l'Univers', and in the last, the *Ballet de Flore*, he expressed his own weariness:

> Je suis trop las de jouer ce Rolet,
> Depuis longtemps je travaille au Balet,
> L'Office n'est envié de personne ...

He retired to Gentilly, whence he returned to write only one further work, the *Ballet royal du triomphe de l'amour* (1681), but his tired lines showed that he was now out of touch with a younger generation.

In his court productions he collaborated most often with François de Beauvilliers, Duc de Saint-Aignan, who devised the general scheme, the choreographer Pierre Beauchamp and the musicians Jean-Baptiste Boësset, Louis Mollier, Cambefort, Carlo Caproli, Lambert and Lully. These last two were his principal colleagues: he wrote the words of nearly all the songs performed by Lambert (see the *Recueil des plus beaux vers qui ont esté mis en chant*, Paris, 1661), and Lully virtually took over the composition of the music of court ballets from 1657. The collaboration of Benserade and Lully made sung *récits* more frequent and dialogues increasingly important – indeed in the *Ballet de Flore* (1669), for example, the music nearly overshadowed the dancing with *récits* (solos, duets, trios and quartets as well as several choruses); and the structure of court ballets now encouraged the inclusion of larger instrumental pieces and overtures, as in *Les noces de village* (1663) and the *Ballet royal de la naissance de Vénus* (1665).

In 1697 the Abbé Paul Tallemant brought out an edition of Benserade's *Oeuvres* including many of his verses for ballets but not his five plays, which were produced in Paris between 1636 and 1641; other, miscellaneous works, as well as collections in which poems by Benserade appeared, are listed by Silin.

MARGARET M. McGOWAN

**Ben-Shabetai, Ari** (*b* Jerusalem, 22 Jan 1954). Israeli composer. He studied composition at the Guildhall School

in London (1978–9), with Mark Kopytman at the Rubin Academy in Jerusalem (graduated 1983), and with George Crumb and Richard Wernick at the University of Pennsylvania (PhD, 1987). Since 1987 he has been teaching at the Rubin Academy. He was the chairman of the Israeli Composers' League (1994–5).

His compositions tend to amalgamate different styles, for example aleatory means and proportional notation in *Rubaiyat* (1982) and atonal, extreme chromaticism with heterophony in the *Sinfonia cromatica* (1993). In the latter, each of the three movements represents a family of colours (magenta, aquamarine and white light) and the chromatic scale is developed as an important motif. In the *Elegy for Anna Frank* he uses a metalphone, an instrument of his own invention made of 11 gongs of different sizes, to evoke the sound of a railway. Ben-Shabetai's compositions have been performed in Europe and in the USA.

WORKS

MIRI GERSTEL

**Benson, George** (*b* Pittsburgh, 22 March 1943). American electric guitarist and singer. He sang in night clubs at the age of eight and formed a rock-and-roll group when he was 17. In the 1960s he attracted attention in jazz circles for his speed and agility on the electric guitar, which he played in an original style based on that of Wes Montgomery and somewhat touched by rock-and-roll. He played soul jazz as a member of Brother Jack McDuff's quartet (1962–5), then performed and recorded as the leader of groups that included Ronnie Cuber and Jimmy Smith as sidemen. Having established his jazz credentials – he had recorded with Billy Cobham, Miles Davis, Herbie Hancock, Freddie Hubbard, Ron Carter and Lee Morgan – Benson began to make more commercially orientated recordings in the early 1970s, on which he sang as well as played electric guitar. His recordings for Warner Bros., which include the Grammy-winning *Breezin'* (WB, 1976) and *Give me the night* (WB, 1980) and show the influence of funk and soul music, elevated him to the status of a major pop star. He has continued to issue a long succession of popular hits, but also returns to the jazz setting for recording and performing engagements. A distinctive feature of Benson's style is his practice of playing a florid guitar melody while scat singing an identical vocal line.

LEE JESKE/R

**Benson, Ivy** (*b* Leeds, 11 Nov 1913; *d* Clacton, 6 May 1993). English dance bandleader, saxophonist, pianist and singer. She was a child prodigy as a pianist, broadcasting on 'Children's Hour' in 1922, and playing frequently in public. She took up the clarinet and saxophone in her teens, and in 1929 joined her first all-female band, led by Edna Croudson. After some years with Croudson, she came to London and in 1937 played in female orchestras directed by Teddy Joyce, becoming leader of his Girl Friends. In 1940, after leading small groups of her own, she formed a nine-piece band for the revue *Meet the Girls*, which had an entirely female cast. For the rest of her career Benson led an all-female band, variously called her Rhythm Girl Band, her Ladies' Dance Orchestra and her Showband. She broadcast frequently during World War II and afterwards, and toured internationally for the Entertainments National Servicemen's Association from the 1940s onwards. In the 1940s she mainly played in a jazz-influenced swing style, but later often added a string section to play dance music in the manner of Victor Sylvester or Mantovani.

ALYN SHIPTON

**Benson, Warren (Frank)** (*b* Detroit, MI, 26 Jan 1924). American composer. He studied music theory at the University of Michigan (BM 1949, MM 1951) but is essentially self-taught as a composer. He was timpanist with the Detroit SO in 1946. He conducted and taught composition at Anatolia College in Salonica, Greece (1950–52, as a Fulbright scholar), Mars Hill (North Carolina) College (1952–3), Ithaca (New York) College (1953–67), where he organized the Ithaca College Percussion Ensemble, and the Eastman School (1967–93); he was also active in the Contemporary Music Project from its inception, developing its first pilot project. As a composer he has written especially successfully for percussion and wind ensembles and has received numerous commissions and awards, including a Guggenheim Fellowship (1981–2). His music is varied and selective in technique; lyricism is prominent in it, as is colourful instrumentation. He is the author of *Creative Projects in Musicianship* (Washington DC, 1967) and *Compositional Processes and Writing Skills* (Washington DC, 1974).

JERALD C. GRAUE/MICHAEL MECKNA

**Bent, Ian D(avid)** (*b* Birmingham, 1 Jan 1938). English musicologist. He studied at Cambridge University (BA 1961, MusB 1962, PhD 1969), and became a lecturer at King's College, London in 1965, where he pioneered the first systematic Master's programme in theory and analysis in Britain. His earliest publications reflected the focus of his doctoral dissertation on the English Chapel Royal (*c*1066–1327), but since the early 1970s his writings have been mainly concerned with the history and practice of music theory and analysis. From 1975 to 1986 he was professor of music at Nottingham University; he then moved to Columbia University, New York, where he was appointed Anne Parsons Bender Professor of Music in 1990. At Nottingham, Bent developed a particular interest in the use of computers for analytical and musicological work, while at the same time he completed his major article on analysis for the sixth edition of this dictionary. Since moving to the United States, Bent has become a leading historian of music theory, editing and writing a substantial series of important publications. Among these, his translations of and commentaries on 19th-century and Schenkerian texts are of outstanding value for their authoritative explication of technical matters and their concern with all significant aspects of historical context. He has also remained involved in the editing and publication of medieval music, and the series Cambridge Studies in Music Theory and Analysis, under his editorship since 1991, is notable for the range and thorough treatment of its subject matter.

ARNOLD WHITTALL

**Bent** [née Bassington], **Margaret (Hilda)** (*b* St Albans, Herts., 23 Dec 1940). English musicologist. She was organ scholar at Girton College, Cambridge, where she took the BA in 1962, the MusB in 1963 and the PhD in 1969 with a dissertation on the Old Hall manuscript initially supervised by Thurston Dart. From 1963 she taught freelance at Cambridge and King's College University of London, and was appointed lecturer at Goldsmiths' College in 1972. She was appointed professor of music at Brandeis University in 1975 and at Princeton in 1981, serving as chairman in both departments. In 1992 she returned to England, taking up a Senior Research Fellowship at All Souls College, Oxford. She was awarded the Dent Medal of the Royal Musical Association in 1979, a Guggenheim Fellowship in 1983 and an Honorary DMus by the University of Glasgow in 1997. As president of the AMS (1984–6) she was instrumental in establishing the AMS 50 dissertation fellowships; she was made a corresponding member in 1995. She was elected a Fellow of the British Academy (1993), a foreign honorary member of the American Academy of Arts and Sciences (1994), a Fellow of the Royal Historical Society and a member of Academia Europea (1995), and a vice president of the RMA (1998). She has served on many boards and committees (including the directorium of the IMS, 1987–92, and the Council of the British Academy, 1995–8), held a wide range of visiting appointments (including the Walker Ames Visiting Professorship at the University of Washington, Seattle in 1996), and given numerous invited lectures and conference papers in Europe and America (including the British Academy Italian lecture, 1998). She remains actively involved in teaching, and has fostered the interests of many younger scholars, including an extensive list of doctoral students.

Much of Bent's earlier published work on English music of the 14th and 15th centuries grew out of her study of the Old Hall manuscript, which established new models for the palaeographical understanding of medieval sources. She discovered and described new manuscript fragments, and her broad-ranging concern with source and text criticism has resulted in a number of important editions. Her monograph *Dunstaple* (1981) has been followed by further discoveries relating to this composer. The medieval motet is a strong focus in her work, resulting

in analytical, historical and musico-poetic studies of little-investigated repertories (the Italian motet, the Cyprus motets, papal motets) and individual works of Vitry and Machaut as well as English works. She has fostered interdisciplinary and collaborative ventures, notably the studies of the Roman de Fauvel coordinated in a volume edited together with Andrew Wathey. The relationships between compositional practice, theoretical testimony and performance have been developed in an important series of articles on *musica ficta* (starting in an appendix to her dissertation), manuscript transmission and the stemmatics of polyphony, counterpoint, analysis and mensural practice, as well as in practical work with professional and student performers.

ANDREW WATHEY

**Benthem, Jaap** [Jacob Barend] **van** (*b* Rotterdam, 23 Dec 1937). Dutch musicologist. He was trained as a teacher (1956–60) and also studied the piano with Jaap Callenbach at the Rotterdam Conservatory (1956–9) and music theory with Herman Strategier and Ton de Leeuw at the Utrecht Conservatory (1962–5). He taught music theory at the conservatories of Utrecht (1963–6), Rotterdam (1965–74) and Amsterdam (1972–4). Since 1972 he has taught at the University of Utrecht. He has held various administrative posts and was deputy chairman of the Vereniging voor Nederlandse Muziekgeschiedenis (1981–9).

Van Benthem has carried out fundamental research on the structure, authenticity and tradition of the secular music of Josquin Des Prez, on modal structures in the music of Josquin, Clemens non Papa and Ockeghem, and

on the role of numerical structures in Renaissance polyphony. He has provided critical editions of the masses and mass sections of Ockeghem (1994–), and, with Howard Mayer Brown, the three-part secular works of Josquin (1987–91). He has also published studies of Dutch composers and musicians from the period 1880–1940. Van Benthem's Renaissance studies are characterized by cautious criticism of sources and great insight into the nature of 15th- and 16th-century modality.

JOOST VAN GEMERT

**Benti** [Bente], **Matteo** (*b* Maclodio, nr Brescia, *c*1580; *d* Brescia, after 1661). Italian violin and cittern maker. He moved to Brescia late in the 16th century, and he is mentioned there as a cittern and violin maker in city records between 1634 and 1661. No extant instrument can definitely be attributed to him. A richly ornamented lute by Benti was reported by De Piccolellis (*Liutai antichi e moderni*, 1885) and others as existing in the collection of the museum of the Paris Conservatoire. This is in fact a cittern: Sacconi later attributed it to Stradivari, but it is now thought to be by Girolamo Virchi. Benti's instruments were highly prized by his contemporaries, and Tartini is said to have praised one of his violins for its remarkable sonority.

UGO RAVASIO

**Bento Gomes, Manoel de S.** *See* GOMES, MANOEL DE S BENTO.

**Bentoiu, Pascal** (*b* Bucharest, 22 April 1927). Romanian composer and writer. He studied composition privately, mainly with Mihail Jora. He attended classes at both the Academy of Music and the law faculty of Bucharest University, but was expelled by the communist authorities before he could complete his studies. He started his career as researcher at the Institute of Folklore (1953–6), compiling and publishing folksongs. He then worked as a freelance composer and musicologist, publishing writings on aesthetics and the book *Capodopere Enesciene* ('Enescu's Masterworks', Bucharest, 1984), in which he explores the position of Enescu in 20th-century music. He became a prominent member of the Union of Romanian Composers and Musicologists, heading its symphonic section and later becoming its president (1990–92).

His rich musical language makes use of modern means of expression, assimilating the most varied techniques while remaining within the framework of a refined neo-romanticism. Tonal-modal balance, the use of symmetry, architectural rigour, and the grouping of works in cycles (String Quartets, nos.3–6) are all characteristics of Bentoiu's chamber music. A prolific symphonist himself, he completed Enescu's unfinished Fourth and Fifth Symphonies (1994–6). Having worked in the theatre for several years as a composer of incidental music, he produced an opera, based on Molière's *L'amour médecin* in 1964; it was an immediate success and was followed by further works in the genre. In 1995 he was awarded an honorary doctorate by the Academy of Music in Bucharest.

WORKS
(*selective list*)

Stage: Amorul doctor [Doctor Love] (comic op, 1, Bentoiu, after Molière: *L'amour médecin*), op.15, 1964, Bucharest, 23 Dec 1966; Jertfirea Iphigeniei [Iphigenia's Immolation] (radio op, A. Pop and Bentoiu, after Euripides), op.17, Bucharest, 20 Sept 1968; Hamlet (op, 2, Bentoiu, after W. Shakespeare), op.18, 1969, Marseilles, 26 April 1974; incid music

8 syms: no.1, op.16, 1965; no.2, op.20, 1974; no.3, op.22, 1976; no.4, op.25, 1978; no.5, op.26, 1979; no.6 'Colours', op.28, 1985; no.7 'Volumes', op.29, 1986; no.8 'Images', op.30, 1987

Other orch: Ov. de concert, op.2, 1948; Pf Conc. no.1, op.5, 1954; Suita ardelenească [Transylvanian Suite], op.6, 1955; Luceafărul [The Morning Star], op.7, sym. poem, after M. Eminescu, 1957; Vn Conc., op.9, 1958; Imagini bucureştene [Images of Bucharest], op.10, sym suite, 1959; Pf Conc. no.2, op.12, 1960; Vc Conc., op.31, 1989

OCTAVIAN COSMA

**Benton, Brook** [Peay, Benjamin Franklin] (*b* Camden, SC, 19 Sept 1931; *d* New York, 9 April 1988). American singer and songwriter. Having started a black gospel singer, in the 1950s he co-wrote hits for artists including Nat 'King' Cole (*Looking Back*, with Clyde Otis) and Clyde McPhatter (*A Lover's Question*, with Otis and Belford Hendricks). During the period 1959–63 the latter songwriting partnership provided a series of hits for Benton himself. With Hendricks's opulent string and choral arrangements, these included *It's a matter of time*, *Thank you pretty baby*, *So Many Ways* and *Endlessly*; Benton's resonant, ingratiating baritone showed the influence of Billy Eckstine and Cole. At the same time, Benton recorded arrangements of the traditional *Boll Weevil Song* and *Frankie and Johnny*. One of his most effective recordings was an atmospheric version of Tony Joe White's *A Rainy Night in Georgia* (1970). Benton also sang with Dinah Washington on the standard *Babe you got what it takes* and the up-tempo *A Rockin' Good Way*, which was re-recorded in 1984 by the Welsh singers Bonnie Tyler and Shakin' Stevens.

DAVE LAING

**Benton, Rita** (*b* New York, 28 June 1918; *d* Paris, 23 March 1980). American musicologist and music librarian. She studied with James Friskin at the Juilliard School, taking a diploma in the piano in 1938; she received the BA at Hunter College the following year. After graduate work in musicology at the University of Iowa, she received the MA in 1951 and the PhD in 1961. She was music librarian at the University of Iowa from 1953; in 1967 she was appointed associate professor of music there. She was president of the Music Library Association, 1962–3, and became secretary of the AMS in 1972 and editor of *Fontes artis musicae* in 1976.

Among Benton's interests was French music of the late 18th century. She endeavoured to solve the difficult bibliographical problems associated with Ignace Pleyel, whose compositions appear in different arrangements, with altered titles, or with movements transposed, added or omitted in different publications. Her translation of Frits Noske's *La mélodie française de Berlioz à Duparc* has been praised for the fluidity of its English while preserving the author's literary style. As a music librarian, she was active in the IAML. Her three-volume *Directory of Music Research Libraries* (1967–75), revised and reissued as part of RISM, provides a wealth of information about the collections of major music libraries and means of access to them, and about important music collections in other North American and European libraries.

PAULA MORGAN

**Bentwich, Thelma.** *See* YELLIN, THELMA.

**Bentzon, Jørgen (Liebenberg)** (*b* Copenhagen, 14 Feb 1897; *d* Hørsholm, 9 July 1951). Danish composer. At the age of seven he began cello lessons, and a few years later started studying the piano. His diverse interests at a young age also led him to learn painting and to develop knowledge of more than a dozen languages. Like his cousin, Niels Viggo Bentzon, he showed an early talent for composing; in 1915 he completed a piano sonata in G minor which so impressed Nielsen that he accepted Bentzon as a private student (1915–18). After receiving a law degree from the University of Copenhagen (1920) Bentzon went first to Rome for piano instruction, then studied for half a year at the Leipzig Conservatory with Karg-Elert (composition), Sitt (score reading) and Weinreich (piano). In 1921 he returned to Copenhagen, where he was appointed to the Ministry of Justice; from 1933 to 1951 he served as clerk of the Supreme Court. He became a musical administrator as well: head of the Danish section of the ISCM (1927–30), he was on the board of the Samfund til Udgivelse af Dansk Musik from 1931, and was vice-chairman of the Tonekunstnerforening (1934–6). His encounter with the German 'Jugendbewegung' in Baden-Baden in 1927 made a deep impression

on him, and in 1931 he and Finn Høffding founded the first 'Folkemusikskole' in Copenhagen. Bentzon also served as head of all the Danish Folkemusikskoler from 1937 to 1946. Among the awards he received are the Anckerske Legat (1929) and the Kulturfonds Haederspris (1945).
